Aug. 1 { 1921
Sept. 19 }

Stedburne, N.H.

1921
Aug 1.

Clear, cumuli clouds, breeze, very cool. Temp. 66°.

This morning I drove with Miss Rautou to her place. We drove to Endicott Farm, and to Gorham - I spent some time at Endicott Farm the house, wandering about, looking at my room and ^{the} ~~with~~ Gorham the familiar spots. The view is superb. Then Miss Rautou we drove to Gorham and on the way I visited the Eriophorum covered field and got specimens. At Gorham Mr. Stearns took me over his summer house which is transformed from his little photographic bldg before the land was taken. It is all most attractive. Returning to Endicott Farm, I spent an hour or more wandering about in and out of the house. Then we returned.

This P.M. I went up Crows nest with Prof. Clemente. ^{Up} We walked slowly, talking and I had a very nice time. Crows nest evening briefly at home. Miss Harris arrived this P.M.

- *Carex scoparia* Smilx., var. *freycinetii*. Hubbard.
dry ground, intervals between rock + river Endicott Farm.
- *Eriophorum integrifolium* (Engelm.) Torrey ^{Woodring Gates}
Large area in boggy meadow, belonging to Mrs. Evans, w.p.t. of town.
- *Ribes rubrum* Linn.

Single shrub some 4 ft. tall growing on grass land & some 20-30 ft. behind the Rautou house on Endicott Farm, against a stone wall and by a rod of Arbor-vitae, healthy and covered with large ripe fruit. A few years ago the shrub ^{was} noticed there when it was not more than 2 feet tall. Nobody had any idea how it came there, and there is no currant bush anywhere in the neighborhood. The bush, the arbor-vitae and the stretch of grass land that is kept mowed is all there is. It is a causal introduction in some way - I examined the place to-day. Informatively Miss Rautou,

1921
Aug 2

Steelburne NH

Clear, cool, cumulus clouds.

This morning I called on Dr. Snodale and he told me about his arrangement with Mr. Blaschka in regard to making models of ovaries for Harvard -

Later a party of a dozen of us went on a picnic to Bowls & Pitches & the Wigwam. I went on the Stony Pasture and passed Mr. Sprague's Boulder. We had a very pleasant time and hot coffee was made over a fire. Some of us walked afterward upon the trail by the brook and then home. We covered about five miles. I saw at Bowls & Pitches 3 chickadees, the first time I have seen the species for 9 years or more.

Since my return home I have been busy over grasses collected here that are to go to Mr. Blaschka -

- Taxus canadensis Marsh

- Woods near Wigwam, showing development of fruit
- Rubus* ^(canadensis L.) _{Elegans} Blaeberry.
- Bent tail. Specimens from 3 plants. Found in woods on trail near old bridge over mill brook above the Wigwam -

Viola rotundifolia

Damp soil by Wigwam, in good clifftop areas fruit -

Cinna canadensis L. Brachelytrum erectum (L.) Beauvois.

On rocks in mill brook at Bowls & Pitches -

Prof. G. L. Goodale's birthday

1834 - August 3 - 1921 -

Shelburne, N.H.

1921

Aug 3

Clear, light clouds, calm, perfect

It was said to-day it was an absolutely perfect
hay-making day. Much was done -

I was busy this morning at home with
Blaschka glasses, putting yesterday's
plants into press. Prof. Miss B. helped.

This afternoon Miss Brown & I went
down into the intervals and skirted the
creek by the Knobble from Gramineae -
we got several species besides a few
of other orders. At the back of the
Knobble we started up a pair of Black 2 R.R. Ducks.
^{2 R.R. Ducks}

Returning to the house, Miss B. went home
and I sat with Suo on the piazza, watching the hay-making. Soon there ap-
peared Dr. & Joe Godale who had called
on me at the cottage. We had a talk
and then Dr. & Joe S. and Joe's son
who was in the party strolled over to the Garde
Cottage where I sat for a while. Dr. S. was
very bright -

At dinner I met Miss Dolly Kirk,
Miss Ball & Miss Howell -

Evening at home over many items
Dr. Goodale's birthday to-day. Miss Brown & I rode down this
morning a large basket of cones & wild flowers, and a dozen
pins of wood plants, *Lunularia* etc. We saw Mrs. G. & thus & son
the next had gone to Gorham. Joe & family came yesterday -
Some Dr. G.'s hrs. for Saco arrived & we left.

*Before dinner I walked over to the Mountain to get a
Campionula that had appeared in the lawn.*

(2)

Plants collected in Philbrick lower inter-
vale, for R. Blaschka -

| | |
|--|---------|
| <i>Cimicifuga latifolia</i> (Pursh.) Griseb. | 1 |
| <i>Leersia oryzoides</i> (L.) Sw. | 3 shrub |
| <i>Agricola hyperborealis</i> (Walt.) Benth. | 5 |
| <i>Glyceria canadensis</i> (Michx.) Pursh | 3 |
| " <i>borealis</i> (Nash) Batchelder | 2 |
| " <i>grandis</i> (Wats.) | 5 |
| <i>Agropyron repens</i> (L.) Beauvois | 1 |
| <i>Polygonum aviculare</i> L. | 1 |

- *Cardamine pensylvanica* Nutt. Damp ground
- *Rubus vernigerus* Blanchard, var. *microfolius* by Creek Standard size w.c.t. Dec 28, 1921
In grass by the Creek. Less than a foot high
perhaps due to mowing -
- *Rubus elegantulus* Blanchard Side w.c.t.
Dec 28, 1921
Fruit among the rocks at the crossing of
the Creek opp. the Farm House. Bending at
the end.
- *Campanula asperinoides* Pursh ?
Wet grass land by Creek. very weak, running
in grass.

Agricola alba L., var. *vulgaria* (Willd.) Flinch. 4
dry roadside by Little House -
The Gramineae are to be sent to
Rudolph Blaschka -

- *Campanula rotundifolia* L.
Escape from Emerson garden, some 20-30 ft.
from garden border in grass lawn.

Shelburne, N.H.

1921

Aug. 4

Light clouds, generally clear, with a slight
breeze, mild, a few short showers, not enough
to hinder the haying -

A good piece of the haying was done to-
day and for a time I watched it going
on from the porch where is a fine
view. The few short showers did not in-
terfere with it at all.

This morning with Miss Painter and
Dr. Foster we walked over to Hebbards Mill
and then on to the Evans Cottage at the
foot of Moreton. There we sat for some
time enjoying the very beautiful view.
Bald Cap is wonderfully fine with all its
surroundings. We returned through the
village and reached home for dinner.

Before starting we heated ovens and
changed all the plants of which I have
just had a big lot.

This afternoon I sat on the porch
and worked in my study writing &c.
Evening at home.

Epeorus

By Yellow Trail a little beyond
Cabot Brook - Coll. by Ex Mrs. Ralph Lyon.
Sisymbrium altissimum L.
Frithly Hebbards Mill. Pods be-
ginning to split when dry.

6

Stellmane N.H.

1921

Aug. 5

Clear, warm, calm. Max. 80° F.

It has been another perfect day, day-

This morning we all cheered Dr. Thrus Foster off. We shall miss them very much -

Later we walked over the yellow trail to the Lightfoot pasture, looking for plants -

Home before dinner. Miss Brown saw a deer very near at least -

This afternoon I had a call from Mr. Strong, tutor to Whitney Stone.

He is very fond of nature, and plants and we had an extremely good time. He does not go into botany scientifically.

Later Frances Johnson took us and her son Eddy, Sus, and three of the girls to Gorham to see President Harding - the place was Gorham crowded. A long row of cars were parked on the side of the common - At last the President arrived in a large car with Mrs. Harding & Senator Weeks. The invalid soldier boys were gathered in front of the Int. Madison House. From the platform everybody could see the President. He made a very excellent speech of some 15 minutes and then greeted the soldier boys particularly and later shook hands with as many of the visitors as he could. Altogether it was a very pleasant occasion. I was very glad to see and to hear the President. We reached home about 7.15 and enjoyed a late supper.

Shelburne, N.H.

1921
Aug 6

Clear with light clouds, thickening in the P.M. Warm, growing cool in P.M.

Another ideal hay day, much was put in to the barn. All across the Creek is in the barn, and a good lot is cut this afternoon. This straw, and is not nearly dry & cocked for over Sunday -

This morning we spent a good deal of time heating ovens and going over the full process. Most of the plants, including all the grasses were taken out. That's a relief - I also wrote letters -

This afternoon we walked by the wood road to Evans Cottage and called on Miss Chapman with whom we sat some time. Mrs. Evans we saw too. She has had few boarders as yet, but will have a good number from now on.

I have watched the haying to-day from the piiazza with much interest. The men are all so interested and so on, the alert in their work -

Evening at the Farm & cottage -

This afternoon we watched from the piiazza a dense flock of hundred of Cliff Swallows flying to & fro over the Creek off the cottage. Cliff Swallows A small tree on the bank was filled with ^{immense} numbers of them, clinging to the twigs, even in slight motion some ceasing, others clefiting, a scene of wonderful activity, through the telescope

1921
Aug. 7

Sunday.

Shelburne, Vt.

Cloudy, muggy, light rains, weak lightning -

I have spent much time to-day getting the grasses ready for Mr. Blashfield. I have 18 species, making 45 sheets, all Shelburne grasses -

I have also written several letters and I saw Miss Harris this morning when she came up. I gave her a photo of the Hummingbird.

We saw through the telescope this morning Woodchuck a woodchuck caught in one of Bunnie's traps near the river. Miss Brown told the Morses and Dr. house, Miss B. & Bunnie went down in the auto and I watched from the piazza the rather difficult operation of getting the fellow into a big sack. I saw every movement. Then I met them at the Morses and saw the fellow transferred to a pen for rabbits -

This P.M. I called on Dr. Gwadale and talked over the grasses -

This evening we called on Mrs. Emerita who is alone now that Prof. E. is in Cambridge -

Shelburne, Vt.

1921

Aug. 8

Slight rain at midnight, sun & cloud during the day, afternoon very fine with fleecy cumuli and bright sun.

This morning I wrote and called on Dr. Goodale. We did up the package of grasses for Mr. Blatchell and in the P.M. with Dr. F. Mrs. Goodale I drove over to Gorham to send it on, but neither at the Shelburne nor Gorham P.C. did they know how. We left it at the latter place and I shall be informed later.

On our return I went up to the Morris and saw the woodchuck. How he (or she) will be reconciled to the new quarters, and whether he will eat properly is a question.

This evening Mrs. Lyon and their two children came up and I showed them the Moon, Jupiter, Saturn, Spica, Centaur, and the double star in Ursa major. Miss Lowell dropped in -

1921

Aug 9

Bright, clear, fine cumulus clouds mild
 Evening never clearer & calmer -

This morning with Mr. Thos Lynn, Miss Paulette
 and the two nurses, Duffey we took a walk ~~that~~
~~was~~ round Wheeler Pond to the foot of
 Cross Nest and back by the trail along the
 rear of Wheeler's and of Evans' Farms. The air was
 good. The Blackberries are ripening. We
 found a number of White Spruces, small,
 between the big one on the he Breton road
 & Wheeler pasture. We also found a good
 patch of the bunchy Carex that disappeared
 a while ago -

This evening I showed the room (1st quarter) to Barney
 and two of the other men. Much impressed.

- Juniperus communis L., var. depressa Pursh.
 Young fruit. A single small shrub, on grassy slope, Wheeler pasture
- 1 Rubus recurvans Blanchard. Tid m.t. f. Dec. 28, 1921
 Dry roadside opp. middle of Wheeler Cemetery, very low almost
 trailing. Resting on low growth some 6 in. above ground.
- 2 Rubus vermontanus Blanchard, var. midifolius Blanchard. Tid m.t. f.
 Dec. 28/921 -
 Triangle, Wheeler Pond, trailing.
- 3 Rubus recurvicaulis Blanchard. Tid m.t. f. Dec. 28/921.
 Dry roadside, he Breton road, absolute prostrate.
- 4 Rubus glandicaulis Blanchard. Tid m.t. f. Dec 28/921
 Dry pasture, s.e. corner Crossnest, low, bending.
- 5 Rubus allegheniensis Porter
 Dry roadside, low, slightly bending. A little w. of Wheeler Cemetery
- Agrimonia striata Michx.
 Wheeler pasture near the old cellar in grass.

Stelburne, N.H.

1921
Aug 10

Clear, with some cumuli, breeze, mild.

This morning we saw a bird in the Red Spruces, White Pines & White Birches in front of the cottage, close at hand. Very active, flitting about like a Warbler catching insects & eating them, never seen alway. General color slate all over, breast lighter bill certainly .7 in. long black, length about 6+ in.

Mrs Lowell walked with us this A.M. to the sta. where we met Miss Croft from the State. Then Mrs C. & I walked to the village & I gave Chester Hayes, his wife present (a knife & chain) and took his photo. Took photo holding it. Then we went to the old mill and of Chester from there home.

This P.M. busy in my room and watching Barney & the men load a cart with hay. It was the biggest load I have seen yet - At 5:30 Barney drove last load the last load into the barn! Haying before hay taken in on the Island. July 16 -

I took 5 pictures ($2\frac{1}{2} \times 4\frac{1}{4}$) from the hill <sup>5 miles fr.
hill east of
Hebbards' mill</sup>, of the horizon, from Moriale to Goffs -

Mrs Warner, Mrs. Emerton & her maid, Nora, came up this evening and saw the moon (quarter), very clear -

Bromus ciliatus L.

Damp roadside - Flower - near Leighton house.

Entirely glabrous. Hole in Chandler field full of weeds,

~~Pyrola secunda~~ ^{native by} 2 m. above Marijuana site of Baldaps. Coll. by Ralph T. Keyes

Shelburne, N.H.

1921

Aug. 11 Cloudy, muggy, hot. Max. 86° F. Heavy clouds this evening -

Barney and his men have been busy to-day taking up the hay from the banks of the creek and similar places, the cleaning up jobs -

Miss Brown & I took a walk this morning over the Red Trail and round to Lightfoot Pasture, examining the Spruces for *Cecropiaobium*. None was found. We looked for Witch's Broom unsuccessfully -

This afternoon I sat on the piazza, read changed drier & t. I have felt very tired to-day -

Mr. & Mrs. Eddy Jr. left this P.M.

Miss Florence Painter sister of Miss Lockwood Painter came this afternoon to be with her sister for a while. I had a very pleasant talk with her at the table this evening.

I called on Dr. Goodale before supper and he showed me a bottle of a chemical compound sent him by Joe which preserves in natural colors human parts. Dr. Goodale will experiment with plants, notably *Mycotropa uniflora*.

My knees are not as strong this summer as they should be, the effect, I feel, of the rheumatism of 1½ years ago - And yet I did not feel it last year -

Shelburne, N.H.

1921

Aug 12

Early morning heavy fog and threatening clouds, soon clearing to a fine day, pleasant breeze, cumulus clouds and balmy air. Heavy rain in early AM.

This morning Miss Boorn & I went down to the river where we collected a number of Cyperaceae & Gramineae for Mr. Blaschka. Later I wrote a letter to Dr. Goodale explaining my situation to him and telling him that while I should do for him all I could, I couldn't assume entire responsibility for the whole set. I put the morning plants in w/press with Miss Boorn's help -

We had tea & cake on the piazza this P.M. There came Miss Painter, her sister, Miss Howell, Miss Croxfield, Miss Dolly Rich, Miss Bull. We saw the Humming Birds drink, and through my telescope we saw Woodchucks, a Swt. Blue Heron, a Marsh Hawk twice alighting in the intervals by the potatoes, and 3 Blk Ducks in one of the pools near the Rubble. It was quite exciting -

This evening Miss Painter their sister, and the two Misses Duffee came up and said the moon and all the wonders on it -

- | | | |
|---|--|------------------------------|

1921

Aug 13

(1)

Fog early A.M., soon clearing, somewhat cloudy.

This morning after breakfast, Mrs. Goodale called Dr. Goodale and told us that Dr. Goodale had fallen late yesterday has a fall. P.M. in the sitting room and cut the skin under one of his eyes and made quite a bruise. He wanted to see the glass case we. We all went down. He was on the bed and propped down stairs and was quite bumped up. He had been tripped on a rug, with his rubber soled slippers. He retained his humor in it all but he is laid up for the present. We had a talk over my part in the glass flower work. The Doctor understands my position exactly, and others will be drawn in with some pay to furnish material. He wants grasses in flower. He has never.

Later Miss Brown & I went over to the woods by the Emerson place and put some pieces of plant, bunch-berg (fr.) checker-berg (pl.) in a jar of chemical preparation to see if the colors will be preserved. The doctor use this to preserve in color human flesh discolored & dead flesh of animals. Later in the P.M. Miss Painter and her sister called, after a walk up Crag, and gave us a good bunch ~~fungi~~ of monotropa which Dr. Goodale had wanted put into a jar which he gave us to fill. We transferred the Monotropa in the place of the others and I shall give De G. the jar to-morrow - a jar of chemicals to preserve color.

Stellburne, N.H.

1921

Aug. 13

(2)

This afternoon we had tea on the porch and there came Frances Johnson, Nancy, Prof. & Mrs. Emerson, Mr. & Mrs. Ralph Lyon, with Ralph & Betty. We had a very pleasant time. The telescope was called into service to show the Woodchucks and their performances near the hole. Their perfect of action makes it extremely interesting.

Later when the guests had gone, excepting the Lynns, we had a rare sight. The osprey covered a Great Blue Heron standing on the cropped interval near one of the pools of The Creek near The Knobblle, with a big Sucker at least a foot long in his bill. We all in short turns watched the performance. The fish was not quite dead and the heron shook it, dropped it in the short grass and pecked head at it, then picked it up and shook again. Finally he worked the fish about with his mandibles and got it head first with end of the body & tail pointing straight out of its bill. Then in a few gulps he swallowed the creature head foremost, and I saw the swelling of the throat and long neck as the fish went down. It was an astonishing performance.

The heron then walked away and soon flew off. All this consumed several minutes. I saw the whole process.

Evening at the main house & cottage.

got. Blue
Heron
Willings &
Swallowing
a Sucker.

Sunday-

Shelburne, N.B.

1921

Aug. 14

Rain in short showers during the day with sun and fine cloud effects - Cool.

This morning I called on Dr. Goodall and sat some time with him. He is getting on very well but he has a real black eye and a good cut under it - Later did some reading & writing. Finished a good novel, "The Girl, a Horse, & a Dog" by Francis Lynde.

This afternoon I caught on the path round Storey's Pine Hill a *Storeria occipitomaculata*, a little small Bonar Snake which I put in alcohol -

Bennie Morse called and I had a good talk with him. He looked at the Woodchucks through the telescope and later I went over to his cottage and saw his caged Woodchuck and his single Chipmunk. He had let out all the ones he had, as one or two had died and as none had been seen for some time about the place, Dr. Morse thought there might have been some epidemic.

A day or two ago a chipmunk went into his open cage and he has kept it - Bennie has quite a collection of skins, cones, &c. &c.

This evening I had a long talk with Mr. & Mrs. Lyon who, with their children and the Misses Painter had gone up Miramichi. While it rained a good deal, they had a wonderful time, what with the bursts of sun and the wonderful cloud effects. They brought me some *Arenaria groenlandica*, *Vitis-idaea*, var. *americana*, (*Vaccinium*) & *Paronychia* sp., var. *albi*. - , a scrap only of the latter, as I warned them.

Shelburne, N.Y.

1921

Aug 15

Clear, with scattered clouds, wind, very cool - 68° Max.

This morning I played a tournament game with Miss Painter for as partner. We were beaten. I spent the morning by the court, after this, talking with Miss Painter, very pleasant.

After dinner I bade good-bye to the Lyons who were going home, leaving Ralph & Bettie with Mr. & Mrs. Bristol, Mrs. Lyons' father & mother who arrived to-day. Then I came home and wrote letters hard.

Mrs. & Mrs. Eddy came up before dinner and sat on the piazza some time,

At supper Dr. Morse gave me a paper a club caught in the river this p.m. This, I understand the same as our sleives of my early days - It is silvery in color -

This evening Miss Maywell & Miss Deane came up and viewed the moon through my telescope. The moon was too full to show very much, but they got the leading features and were much impressed.

Two letters received to-day from Mrs. Channing (Walter) & Mrs. H. E. White.

Stellburne, N.H.

1921

Aug. 16 Clear, with light clouds, stiff breeze.

A glorious day. This morning I talked at the house some time with Howard and with Mrs. Bristol, father of Mrs. Lyon - At home I enjoyed my letters from Pease, Churchill & Mrs. Macmillan - Also did some reading.

This afternoon I got down the big kite box kite and Bumie brought out his flying small one and we had a good time flying them. Both gave trouble. Mine is very old and it has various troubles. It comes down very quickly from a height unexpectedly in a long curve and once the string broke and some time was occupied in getting it. Still we could keep it up a short distance and get enjoyment. Bumie's broke loose more than once.

Later we sat on the porch and had a good talk with Prof. Emerick who called -

I have had very interesting letters from Mrs. Macmillan & others as I have mentioned above, Mrs. Melvin is now, presumably, in her new home. Joe Churchill is at Moosejaw.

Evening at home - Moon full. Wonderful view over the valley -

Shelburne, N.H.

1921

Aug 17

Clear, warm, calm. A perfect day -
Clouding in late P.M.

This morning I spent much time with
the crowd to see the Croquet Tournament
games. The occasion was very interesting.
Later I returned to the cottage via the
hill-slope, a steep ascent slowly taken.

I worked on accounts this P.M. mainly.
At 4:30 P.M., I went down again and
saw two more croquet games. I am
taking Dr. Muse's place so I must play
at least once more. His Kingman is
my partner.

As I watched the games, an immense
flock of cave swallows, with some ^{cave +}
barn swallows, began to circle about,
filling the air. They were clustering on
the tops of the corn stalks in immense
numbers, and circling about over the
creek. I walked down part way and
had a very fine view of them. Finally
they are gone and drifted away like
flies - Where will they spend the night?

I had a pleasant talk on the piano
after supper with Miss Florence Painter.

I called on Dr. H. S. Endale before supper.
Rubus allegheniensis Porter, var. Graesii Fernald
dry slope between the Little House and the
Bungalow.

Smilacina foliosa (R. & S.) Trin.

Shade, by dry path by brook, rich soil, round pine grove.

- Thursday -

Shelburne, N.H.

1921

Aug. 18

A.m. cloudy with little sun, P.m. smart rain - cool.

This morning Miss Kingsmat I won a croquet champion match from Miss Painter & Miss Brown. It was a long 2-hour fight. Watching a previous game and resting took up the rest of the morning -

This afternoon I was glad to busy myself at home, the rain falling fast. Bunny came up out with Miss Brown's help made three kites and we decorated them with colored illustrations of the Great Blue Heron & the Hummingbird. It is proposed to fly them, if they will go up when the tennis tournament is over -

Just after dinner I watched a croquet match between another set of players.

This evening we went over to the Glaessl and sat by the fire with Miss Painter & her sister Florence. We had a very pleasant talk and spent the entire evening -

Shelburne, N.H.

1921

Aug. 19

(1)

Clear as crystal, cool, a perfect day. 76° F.

This morning Miss Kingman & I won a game of Croquet from Miss Doll, Kirk and Miss Durfee, after a fight for two hours - That puts us into the Finals with Mr. Eddy & Haney - Game to-wonnd morning, if pleasant. This event used up the morning -

The afternoon was spent ^{partly} at the Cottage resting, reading, writing &c.

I had many letters, one especially long & interesting from T. Schuyler Matthews

Later Miss Boothby & I walked down to Wheeler Pond to investigate the Rubus triangle - I took fruit. We walked over to the bog pond across the road and little below and got a number more blackberries. We have named the spot Larch Pond & Larch Bog. There are a number of fine Larches bordering the bog pond.

Home for supper. Evening, at home after a short stay at the Farm, and a visit to Sunset Rock with the full moon, a glory above.

On our return from Larch Pond we went up the hill south of the pond and sat down and had a glorious view to the east with Caribou in the center background. A Fish Hawk sailed almost overhead and once poised and remained on rapidly beating wings & legs hanging down, and he looked down into the river to see if there was a fish to dive for - The view of the river with rocks behind is wonderful.

- Friday -

Stelburne, N.H.

1921

Aug 19

(2)

List of plants collected to-day -

Selaria glauca (L.) Beauv.

Flower, dry hillside near the river by
Larch Pond. For Mr. Blaschka,

1 Rubus canadensis L

Arched ascending, ~~at~~ 4 ft long, cut at bottom
drupelets about 10, shape of fruit round. Boggy
border of Larch Bog -

size in ft.
Dec. 28/921

2 Rubus vernoniarus Blanckard, var. viridifolius Blanckard.

size in ft.
Dec. 28/921

Low, bending, fruit spherical - new cane taken.
Boggy border of Larch Bog -

3 Rubus canadensis L

Arched ascending, 3½ feet long, fruit spherical
drupelets 3-8, sweet, cane cut at bottom.

size in ft.
Dec. 28/921

4 Rubus vernoniarus Blanckard, var. viridifolius Blanckard.

size in ft.
Dec. 28/921

Low, trailing, fruit of 6-7 drupelets, sweet
cane about 3 feet long. Boggy border of Larch Bog.

5 Rubus vernoniarus Blanckard, var. viridifolius Blanckard.

size in ft.
Dec. 28/921

Trailing, entire new told cane taken. Triangle
by Wheeler Pond, S.E. corner. - 6 sheets -

6 Rubus allegheniensis Porter

Tree, slightly bending. Entire plant taken
dry roadside. opp. Wheeler Cemetery.

Measurements refer to old cane,
also method of growth -

Sleckburne, N.H.

1921

Aug. 20

Sun during most of the A.M., cloudy in the P.M., a terrific rain squall between 5 & 6, from the west. Heavens black.

The morning Miss Kingman & I were defeated in the finals at croquet by Mrs. Eddy & Nancy Johnson. Colored photographs were given as prizes. I gave Miss Kingman & Nancy small mounted photos of me standing with glass & the Hummingbird drinking.

I gave Ralph Lynn, 10 yrs to-day, a large mounted photo in sepia of the Hummingbird. He is a bright boy. To-day Miss Brown & I put all the ~~Rubi~~ of yesterday into press. I put 4 or 5 sheets of one plant into press and that gave as quite a bit of work. I am collecting, not at random, but specimens that I feel are not the very common ones and may prove new to me here. It is not very practicable to name them here. In the Key in the manual is not entirely reliable. I hope that Larch Bog border will give me something good.

The official
Rubi
Sleckburn
Section

I staid some time at the Farm house this evening talking with the guests. There are a good many very congenial people there —

Aralia racemosa L. See note under Aug. 22.

Shelburne, Vt.

1921

Aug. 21 Clear, breezy early AM. soon calm, cool. a perfect day -

This morning I sat with the two Misses Painter in the Gleach, and we had a nice long talk for at least half the morning. On my return home I found the four ladies had been here with Miss Brown sitting on the piazza, watching the Humming birds trills.

My plant rows were all cleaned this morning.

After dinner on the Farm piazza we were all talking when Mr. Abbott (86 yrs. old) suddenly challenged me to a high jump!! Great excitement - the cake in succession sprang into the air amid applause - judgment a draw!! Miss Maxwell produced two pieces of candy and prizes!! C. Louis Lewis' performance.

Mr. & Mrs. Emerson & I walked over to the Hebbard Mill which we inspected. I examined the Sisymbrium which is beginning to split its pods,

- Sisymbrium altissimum L.
By Hebbard's Mill - pods splitting.

Mrs. Henry Channing Barbera arrived this evening.

Shelburne, N.H.

1921

Aug. 22 Cloudy, cool, calm, max. 69° F., clear -

I spent the morning here & there on the place talking with friends.

This afternoon Miss Painter, Miss Florence Painter, Miss Brown & I drove with Frank to Gorham where many errands were done.

I called on Judge Evans to witness my signature to a paper extension of a mortgage which I mailed down to Miss Booth.

Then I had a very pleasant talk with him and he told me all about his connection with Pres. Harding's visit to Gorham. He introduced the President to the people. We had an ice cream at Shovey's and I showed the 3 tops of Moriah. We got home to 5 P.M.

I wrote Ned Rand today for his ^{new} Rand's birthday, 62 years. I sent him a small birthday photo of the Hummingbird with me standing & holding a tumbler as the bird drank.

This evening, I sat by the fire at the Farm table with the picknickers to Sunday River about the trip and so forth - ^{Linin both sides of the road by Sunday River} *Dicentra deltoides* L. newy., Oxford Co., Maine. Coll. & G. Turf. ^{large} ^{large} Eddy.

Ciraria racemosa L.

Top of inflorescence & portion of one leaf.

Aug. 23

Trip round the Big Mts. through
(1) Crawford Notch -

Clear as crystal all day, air pleasant -

This A.M., at 9:15 a party of Miss Painter
the two Miss Duffees, Mrs. Emerson & I & Lawrence
Thom Brown drove round the mts. via
Carter notch, Jackson, Bartlett, Crawford notch
Twin Mt House, Jefferson and Randolph
Gorham & home. In every way it was per-
fect. We lunched in Crawford Notch. All the
familiar scenes were viewed with great plea-
sure. We paused at the Miller House location
and I was much impressed by Webster, Miller &
Willard. Just outside the Notch is a sign
reading "Site of the original Notch
House built by Tom Crawford in
1828. Burnt in 1854".

When we reached Jefferson we saw an
aeroplane high up. It circled almost
over the big mts and retarded close
over our heads with big noise. It
sailed about and we understood that it is
located near by and takes parties up
at \$1 per minute.

All the big mts from Madison to Pleasant
are visible at once from Jefferson -

Cotswold we met Mrs. Henry Cleaving,
& her daughter, come for a visit. Mrs. Greenough
is here -

Shelburne, N.H.

1921

Aug. 23

(2)

Passing through Bartlett we visited the boulders which is a few rods from the main road in a rocky spot away the trees. I have never visited it before on our drives. It is generally oval in shape some 10 ft. across and is resting some two feet above the ground on four small borders, also of granite, in a pretty regular rectangle. One of the boulders has been split by the intense weight above. It is a splendid example of a glacial boulder being deposited in this interesting fashion. The big boulder weighs many tons.

{ *Eupatorium urticacefolium* Reichard

 Crawford Hotel in glade near
 the head of Hart Locatock.

Shelburne, Vt.

1921

Aug. 24

Cloudy, pleasant, mild.

The day after the ball! I must admit that I was tired to-day and quite ready to keep quiet. I even lay down for an hour this afternoon though I think it does not help.

We went over my big pile of plants in pines, mainly Rubi, and took out the bulk to my satisfaction. I also had some pruners for the Blaschka bundle to take out and arrange —

Mrs. Channing, & Barbara came up this morning with Miss Durfee who took them on to saw them & walk to the Presidential Platform. The Channings continued and went up Cabot and enjoyed it —

This afternoon Miss Lowell had a fair under the apple trees for Radcliffe. Various small articles were sold — People gathered and it was pleasant —

This evening I had a long talk with Mrs. Channing at the Farm.

Mrs. Greenough has come for 2 or 3 days. Mrs. Danielslee is now sleeping & her, but is very depressed —

Miss Brown, this morning, with a saw, opened ^{opens up} Miss Brown's w. from the piazza, to wards winter op., giving a view over Lightfoot intervals to the village. It widens very much our view, and still leaves much woodland

Shelburne, N.H.

1921

Aug. 25

Clear with clouds, some haze part of the day, big mts. obscured - Mild.

This A.M., Miss Painter, her sister Miss Painter, Walker
Miss Duffee & ~~sister~~, Mrs. Channing & Barbara and ^{7 Florence} ^{Craig}
Miss McDonald with Miss Brown & me, started about
9 o'clock and walked up Craig. I got along
remarkably well - On our return I showed
them the Devil's Den Boulders - Barbara climbed
to the top! At the Swimming Pool, Francis Fordale
who with his G., his daughter & Bonnie were bathing, took me ^{caught} ^{Snake}
back to my door. I caught by the door a small snake & bottled it.

This P.M., Francis, his G., his wife, & Clara came up
and saw the Humming Birds drift, and also a St. Blue Heron at the near creek catch & kill a big ^{9 ft. Blue Heron} ^{catches} ^{Sucker}.
Sucker and get all ready to swallow it,
when a man passing for the cows disturbed the
bird who flew away with the fish. Fine sight

Later Mr. McChesney called and ~~so~~ our
company of Dr & Mrs. Morse, Bonnie, 2 Miss Durfees,
Miss Ringman, Miss McDonald, Mrs. Channing & Barbara,
Mr. & Mrs. Eddy, came and drank tea & ate cakes, &c.
and saw the Hammer drink and told stories.
It was extremely pleasant.

This evening Prof. & Mrs. Emerton came
up and made a nice call. It was a
pleasant ending of a pleasant day -

Good letters from Joe Churchill, and
Ned Rand -

This has been a busy day full of much
pleasure. I love to have friends about me.

Shelburne, N.H.

1921

Aug. 26

Rather lazy, evening brilliant, day warm,
evening very cool - temp. 78°.

This morning I spent at home over my
work - Miss Brown with Bunny's help did more work
some more opening up of the S. W. view - ^{more work}
It will be a great improvement, ^{shd.} ~~shd.~~ ^{opening}
in the broad intervals, the village with
the little church and Witterops.

Charles, Francis Goodale's boy, called this morning
and Miss Harris came too, and we all sat some time
on the piazza.

This P.M. I rested for a while and later
we had up on the piazza, Mr. & Mrs. Abbott
Miss Coolidge, Mr. & Mrs. Bristol with Ralph
and Bettie - Pleasant conversation -

This evening we called on Mrs. Lawrence
at the Lodge and had a good talk.

The evening is wondrous clear, stars
brilliant, no moon -

Shelburne, N.H.

1921

Aug 27 Clear cool; big mountains cloudy -

This morning I spent at home writing &
After dinner Gus took Miss Harris, Miss Durfee
& me to Ervecon - I visited Mr. Bennett
and admired his two pots of *Campanula*
isophyllea, forma alba, and especially did I
enthusiase over the typical isophyllea that he
had found in Norway me. A pot of
the species in beautiful flower was between
the white forms.

Campanula
isophyllea
typical

I did some errands and Miss Durfee & I had
an ice cream together at Shorey's - Miss Harris
called on Marjorie -

Returning home I joined the two Miss
Painters and we walked to Wheeler Pond
where I took specimens of the Rubus spp
in the triangle for Rose Ware.

Then I took the ladies round Larch
Pond and up the hill slope to see the
beautiful view east. It is unsurpassed -
See Aug. 19 - Then we walked round the
hill and the ladies thought they never
saw a more glorious view over the river
to the west with the setting sun aglow
among rich clouds. Home to supper.

This evening I heard from Mrs. Channing
& Barbara and the others glowing accounts
of their drive through Grafton Notch to
Leyville Notch. They are west through Screw
Auger Falls and up over the cut!!

Rubus

Wheeler Pond triangle trailings

Stoddard, N.H.

1921

Aug 28

Foggy early A.M., clear rest of day, warm -

This morning a party of us walked to church.
There were 29 there (19 from the farm). Mr. Wood
preached, as usual. I took up the offertory -
I drove home with Mr. & Mrs. Cebbett. I then
called on Dr. & Mrs. Endall and had a pleasant
talk. Francis et al were away -

This afternoon I staid some time in
the living room talking -

Later we went to Miss Maxwell & Miss
Deane to tea & met Mrs. Cleammy & Barbara
(there). We had pleasant conversation

This evening we all sang hymns
in the parlor for some time. It was
very pleasant -

The weather still continues very
fine -

Steelburne, N.H.

1921

Aug. 29 Sun & cloud & intermittent rain, hot -

The croquet tournament has occupied a large portion of the day, morning & afternoon. Peggy & I vs. Mrs. Moore & Reggie was the 1st game. We won. Miss Brown & Barbara Channing played. Mrs. Johnson & Bunnie Morse, the latter won. Other games were played. I watched the games with interest, Alice, & Phil.

At 11:30 a picnic party drove to Moose River Picnic Grounds - Party, Mr. & Mrs. Abbott, Miss Painter & Miss Florence Painter, Mrs. Henry Channing & daughter Barbara, Miss Harris, Miss Maxwell, Miss Brown & I. It was a very pleasant occasion. Lawrence & Frank drove the two cars. The locality is as attractive as ever. We had a very excellent luncheon of tenderloin steak & bacon, hot coffee and many items going with it.

After the lunch rain drops began to fall and short showers and we retired to the cars, the tops having been raised. Miss Channing & Barbara, & Miss Florence went in bathing. We returned home at 3 P.M.

Rubus canadensis L. (3 plants) low bending river roadside by Moose River picnic grounds. Graham. Five m.s.t. Aug. 28, 1921

Shelburne, N.H.

1921

Aug. 30

Air thick and growing thicker through the day.
Smart Thunder storm in the evening fol-
lowed by bright star-light. very sultry.
Temp. 88° F.

This Am. Peggy & I play a tournament. ^{Peggy & I won the} croquet game with Frances Johnson & Bonnie croquet and won - Then in the P.M. at 4:30 we ^{tournament} played Miss Kingman & Mr. Johnson for the finals and we won the championship.

My prize we a Traveler's Hawg Whisk Bush. We got applause on entering the supper room. Peggy got a pair of tortoise shell pens - had we must play Mr. Eddy & Lawrence -

I rested the rest of the morning & afternoon. I put yesterday's Rubi into pots and I also named a plant sent me by Phoebe J. Stone from Bardwell's Ferry, Mass. near where Grace & Nellie Williams live. Grace told her to write me. The plant was Solanum rostratum. ^{Phoebe J. Stone from Mass.}

I wrote her a letter -

At supper time we had a smart thun-
der storm for a while -

Mrs. Cleaving & Barbara with others
drove to the summit of Mt. Washington
to-day with Lawrence. Atmosphere thick.
Very summery cold & cloudy, but the
near views to near the summit were
fine. They go to-morrow. We have en-
joyed their visit very much.

Solanum rostratum Dunal. Coll. Tex Phoebe J. Stone Brookvale Farm
weed, waste ground, large plant, more than one. Bardwell's Ferry, Mass.

Stellburne N.H.

1921

Aug 31

Clear with some cloud, warm.

This afternoon I watched a croquet game and later played with Beppie against Mr. Eddy & Lawrence who beat us closely.

I sat idle up the afternoon and I must now do some work at home -

This morning a party of us walked over to the Evans cottage at the foot of Moriah and sat there some time enjoying the view - Miss Bradford, Miss Lowell, Miss Painter, Mrs. Channing and we were the party.

I have received today good letters from L. H. Bailey, Gray Hale,
M. A. Fernald, Nova Scotia.

R. A. Ware, Boston -

Dr S. Mainerd Middlebury Vt.

I have sent on to him 8 violets from Susan Steppard -

Rubus allegheniensis Porter

Arch'd ascending, old cane entire, fragment of new cane. Open pasture just of Moriah border of the village - Coll. Mrs. L. M. Brown.

1921
Sept 1

- Thursday - Shelburne, N.H.

First day of autumn -

Clear, calm, warm - max. 84° F

This morning Miss Painter, Miss Brown & I ^{Walk to} walked to Whitney Farm, 2 miles. The air ^{Whitney} was good, and the mountains stood out in ^{Farm} crystal clearness. The big range as seen from Gates Cottage was superb. The bogs were wonderfully clear or but, Washington and a car was descending from the summit and emitting a volume of smoke.

At the Farm we took in the view from the Cottage and inspected the new barn which is very large and well appointed -

I examined the cones on the Scotch Pine by the road near the Farm. They are still green. I shall collect later - we got home to dinner -

This afternoon I have been busy at home with letters, accounts &c

Miss Brown took Miss Kingman to the Rocky Pasture for Catnip which is still abundant by the old sugar house.

Mrs. Shirley, her daughter, Miss Hammond, Miss Hereford & her friend Miss ^{, arrived this evening. Not all stay,} Miss Warner & Miss Coolidge came up this evening & Miss Brown showed the constellations. I was at the main house for a time. *Bryonia ciliata* L. For Black R.R. -

Ripe fruit - roadside -

Shelburne, Vt.

1921

Sept. 2

Fri., more or less cloudy, with hot sun. Temp. 89°

It has been a scorching hot day and I have been at or near the cottage - There is always plenty to do at my desk or with my plants. I have written some long letters and cleaned the ovens in the houses. I have called on Dr. Thrus-Soodale, and the Mrs. Bristol, the latter not going to-morrow.

This afternoon I caught a bat, the small species, on the piazza, and caught a bat - put it in a box and showed it to some of the guests - Mrs. Shirley & party auto'd away this morning -

Mrs. Stetson and Eleanor and Henry came here this P.M. in their auto from Holderness on Squam Lake where they have a cottage. It was good to see them. Henry is spending the night with us, the others with the Johnstons. They are off for Bangor to-morrow -

Shelburne, N.H.

1921

Sept. 3 Clear and somewhat thick, warm, very strong wind at times, max. 90°

This morning I said it was a while to see the Stetsons off. Then I wrote at home and at 11 A.M. we walked over to the Rd. to send a money order for Miss Braun & Col. At the bridge we saw an Amer. Bittern ^{Amer. Bittern} in. He (or she) flew some over the river and finally alighted at the very end of the stony island near above the bridge at the south end. With our glasses we could easily see every detail. He (it) no mind the autos thundering by so near, and that, combined with his being so near the bridge and when we were there, and the whitish streaks on his sides & back leads me to call him an imm. bird - We watched him for 10 or 15 minutes. We returned in time for dinner -

This afternoon I wrote & read at home, and bade Mr. & Mrs. Bristol and Ralph & Bettie, grandchildren who left for him. They had the Casino -

Mr. & Mrs. Sprague & son Jr. Wollaston called in their car on their way from home this morning to Poplar Tavern where they will make a stay -

1921

Sept 4

Sunday -

Shelburne, N.H.

Clear, rather warm -

This morning I wrote and read and
talked

This afternoon with Miss Painter we walked
over to church. With Mr. Wood there were 11
of us there, not a villager. Miss Bull played
the organ and the services were interesting.
I drove home with Miss Painter et al.

Miss Bull & Miss Dolly Kilk came to the
cottage and staid till supper time.
The white birches are all turning brown
as I have noticed before. It seems to be
some kind of blight - <sup>white
birches
turning
brown</sup>

This evening I had a long talk with
Miss Hensford at the Farm House. She
is very anxious to know, for reasons un-
known, whether when ants are seen hauling
a dead beetle here & there over a sidewalk
or any area they have a purpose or are
merely aimlessly pulling it to & fro.
While I feel sure that they have a defi-
nite purpose that they may have to a cer-
tain, still as something really definite
is wanted, I shall write to Mr. Hawshaw.

Evening wonderfully clear & brilliant
The new moon was exquisite -

Mrs. Morse brought down from Concord a
bit of Paronychia & Epipactis

Stellburne, N.H.

1921

Sept 5 Clear with cumulus clouds. Warm.

This morning I staid down some time at the farm - I sat with Mr. Eddy in the sun on the bench by the croquet ground. He is suffering from a kind of rheumatism just now. Later I came home and started on letter writing. I was soon interrupted by a call from Mrs. Marcellon who has returned from her hurried call to Miller, where she learned that her house was flooded by the bursting of a water pipe. The pipe in the wall of the 3d story had corroded, and the water tank was above the story. One can imagine the result. All is not over yet -

This afternoon I was busy here & there and in late P.M. I went down to the river opposite the house and joined Emily Ball, Dolly Kirk, Miss ^{Mrs. Price} Harris, ^{Miss} Brown on the stony beach. The supper went down with Miss Ball in the auto. We spent quite a time there. Fires were built, corn roasted, bread toasted, tea made. We sat around on the logs, talked, joked & sang. A light Hawk scolded & darted around us feeding, a G.R. Blue Heron alighted by the creek, Duck flew by and the new moon slowly sank with bank of clouds. We returned about 8 P.M.

Cyperus dentatus T or

Stony beach by river opp. the Farm - Found.

Carex arcta

Forest, boggy run at the far up. the farm

Tuesday -

Stellburne N.H.

1921
Sept. 6

Sun & cloud, a good day, cool night.

A shower in early morning in the night.

This morning after breakfast on invitation from Mr. Paine, Mr. Eddy & I, with Anna & two of her children drove, with Gus too, to Greenham, leaving there Gus and Anna & children and going on to Berlin, where Mr. P. did business, and Mr. Eddy & I walked around and enjoyed ourselves pleasantly. We all returned in time for dinner.

This afternoon the croquet game between Mr. Eddy and Lawrence vs. Mr. Johnson & Peppy was played - I staid down being uninteresting. Eddy & Lawrence won. During the game Mr. Thos. Sprague & son drove up in their car, and we met them. They came down from Randolph. We sat on the farm piazza and then came up to the cottage and sat on the piazza a while. They spent one night at Poplar Tavern late & had an uncomfortable time. We saw them a few days ago.

Yesterday I was pleased to receive from Dr. Brainerd the roses I sent. Miss Susan Slothrop had done well in naming them -

Steelburne, N.H.

1921

Sept. 7

Clear, cloudless, warm - glorious day -

I have spent to-day quietly, and briefly - my few plants are easily taken care of - I have read, and written many letters, clearing my correspondence very well.

The Humming birds have not visited the ^{Humming}
tumblers since August 2d - why, I have no idea, ^{birds not} ~~as yet~~ ^{since} ~~seen them Aug. 28~~
of course I mean that we have not seen them ~~Aug. 28~~
in our many visits to the piazza, and when we
have sat there - It is a silent time between
visits to the piazza for some reason or other.
On Sept. 6 as I sat reading on the piazza an
im. Hummer appeared and sampled the has-
turtiums in a vase on the table close home
at the back of the piazza. Yesterday at
6.30 P.M. as I sat on the Emerson piazza
a ♀ was feeding from the gladioli & has-
turtiums by the railing - So they are here.

Last evening, we took tea with Prof. Brewster,
his wife being in Cambridge. We had a very
pleasant time, socially. Two game of back-
gammon were played with him, Miss Brown
won, I lost -

The moon was brilliant - Returning home Aurora
we walked up on to Sunset Rock. There was a very
fine aurora, snowy-white that stretched in a broad
curve from Orion setting in the west to the Hyades
rising in the east. The center reach in bright just
a little above Ursa major. At times on the top
of the arc in places there was a little shimmering.

Shelburne, N.H.

1921

Sept. 8

Clear, rather warm, glorious day -

I have been at home today, writing and reading - I have finished "Squire Plum" by Holman F. Day. It is excellent - I have got my correspondence well under way -

Mrs. Painter's brother Mr. & Mrs. C. B. Turner came yesterday P.M. I have met them to-day and had pleasant talk. Had nice letters from Mrs. & Barbara Cleavinger. I so hope to see more of them this fall.

This evening we had a pleasant company to see the moon about half full.

There were Mr. & Mrs. ^{Loring} Painter, Prof. & Mrs. C.B. Turner, Miss McDonald & Miss Warner. It was a very interesting occasion. Prof. Turner is Prof. of Catechonomy at

and he had much of interest to tell. The evening was wonderfully clear - I learned that Algol is surely a double star, one of diminished light which in rotation partly conceals the other - Algol's time is given

frequently in the Sky Maps. The double star in the handle of the Dipper has a very long period of revolution, an immense no. of years, so that it always looks alike to one. Rotation may be a million years.

Algol

Double star
Dipper

Stellburne N.H.

1921
Sept 8

Clear cool evening, nearly morning; warm
at midday - very fine day - Calm.

This morning I passed quietly at home,
writing part of the time.

Mrs Marpessa & Mr McChesney called and
we had a very pleasant chat. of me, his
experience in the Yellow Stone Park on
horseback with a lot of boys and several
older men - They were on top of the usual
routes and everywhere the bears were
very familiar, coming out for food.

Later in the morning Mrs Maxwell & Mrs
Deane called and we had another chat.

After dinner Mrs Brown & I walked over
to the Goodales and had an extremely good
call upon them. Dr. Goodale read us a
note he had written to file. It was a
definite statement of his position in re-
gard to the grass & sedge work that he
had arranged for Mr. Bo Cawleka to do
in a term of years. He wanted to leave
this statement behind him in case any-
thing should happen to him.

Rest of the day, at home.

This evening Mrs Maxwell, Mrs Deane
and Prof. Emerton came up and we had
a real good session with the moon and double
star in the Dipper. Wonderful night & half moon.
Prof. Emerton & I laid and played backgammon.

Shelburne, N.H.

1921

Sept 10

Rather thick, clearing, calm warm at noonday

A quiet morning & afternoon. I have got my plants in order for packing nearly - my correspondence is about through - It has been a large one -

Mrs Louise Parker and her party went up Flushing to Caribou this morning. We agreed to flash from Caribou if possible, at 2 P.M. At the given time we went out to the telescope stand with a mirror, and the sun being bright, we flashed over to the mountain. Soon back came a most brilliant reply followed by others, and for nearly 20 minutes, the flashes came very brightly from the very summit. Then as the party walked down the cone to the north along the sky-line the flashes continued till the party disappeared on the edge. The distance in an air line is 8 miles. On the return of the party, they told me that my flashing was plainly seen, so it was all a great success. They took the mirror that was in the tent, $\frac{1}{2}$ miles from the summit and used it on the top -

This evening Miss Hereford & Miss Dugley came up with us after tea and we had a pleasant talk and a wonderful view of the moon. The heavens were as clear as crystal -

Selaria glauca (L) Beauv. } grass land by Little
" " *viridis* " . } House - In Blasenhe

Sunday — Shelburne Vt.

1921

Sept. 11

Heavy fog in A.M., gradually clearing, & having clouds above which thickened during the day.
Wind . Light rain began at 4:45 P.M.

No service to-day. I have talked at the Farm with friends, and Mr. & Mrs. Eddy called before dinner and we had a pleasant talk on the piazza. I have begun to review the letters received this summer, and shall destroy all I can, we have decided to go home on the 19th and get ready for the fall —

We return
Sept. 19.

This afternoon Prof. Emerson & I took a stroll as far as the Legislative pasture, talking and discussing this and that on the way. Miss Brown took Prof. Emerson's maid and Dr. Endale's maid on the yellow trail to get fir balsam twigs — Rain drops began to fall just as Prof. & I. & I reached my cottage. It continued slowly and steadily the rest of the day till bed-time when it was still raining. This only needed. At the farm here the supply has been steady, and Mr. Philbrick has his winter supply when the ground freezes and he has in the cellar of the house an artesian well in case of extreme need. This has never occurred — the drought over the country has been very severe.

Shelburne, N.H.

1921
Sept. 12

Cold, chilly; rain ^{last night &} in the morning. Coldest day but one (August 1) when the mercury ran as low as to-day, 66°, since June 14.

First and cloud have covered the mountains, and the welcome rain of last night and this morning has done much good -

It has been a day in the house and I have been reading, going over heaps of letters and destroying many. It takes a good while to get my apparatus into shape to leave. What shall I leave, what shall I take back? It is hard to have duplicates of every thing.

Miss Brown has been into the woods on the Red Trail, and brought back and planted a number of small hemlocks. It has been a big task. She has also a large number of Hemlock branches laden with last year's cones to take home. -

This evening we went to the Slack and met Miss Painter, Mrs. Painter & Prof. & Mrs. Turner. We had a very jolly time playing games with paper and pencil - Then we had a light drink and cakes. We played till after ten -

Stellburne, N.H.

1921

Sept. 13 Clear, windy, cool; almost cold in the

This morning I worked and read at home.

This afternoon I fixed Bannie's kite for playing, and we took it down to the interval. Mrs. Morse came with Bannie's box kite. We put them up and had various adventures. The string for one kite kept breaking. But after a while things went fairly smoothly.

This morning before noon Miss Brown & I went over the Knubble to review old times when I used to botanize there. Then we crossed over to Evans Island and looked around. In dry weather Evans & Philbrick's Islands are connected. I was more than pleased to come across a large patch of Andropogon furcatus Muell. as tall as my shoulder, and also a small area covered with Prunus pumila L. Two new plants for Stellburne.

This evening we spent at the Cottage. Miss Brown has a bad head-ache from over-exercise flying the kite.

Andropogon furcatus Muell.

Large patch, Evans Island, very handsome.

The island
nest
The
Knubble.

1921
Sept. 14

Shelburne N.H.

Cloudy, cool - calm. Breeze of sun -

A croquet tournament day. Peggy Johnson has got up another series and this morning Miss Painter & I beat Dr. Turner and Mrs. Painter. I then watched another game for a while and then Miss Brown & I, with Miss Bowen of Boston, walked over to Evans Island where we were yesterday.

The Sand Cherry, I find covers quite a large area (see below). We found some plants with the leaves quite green - next season I shall watch the spot for flowers & fruit.

The Andropogon furcatus also covers quite a large area on the small island. It is in good shape for collecting -

I collected quite a bag full of plants.

This afternoon we put the plants into press and then I watched another match game. Miss Brown & partner won. Then I read & finished White-wash by Horace Amnesley - very good.

Andropogon furcatus Muell.

Same patch as yesterday, plants at least 5 ft tall & less

Shelburne, N.H.

1921

Sept. 15th

Cloudy & sunny morning warm, thickening and raining heavily in each afternoon, breaking up later in P.M.

This morning Miss Painter & I were beaten in croquet by Mr. Johnson & Nancy. Miss Brown & Prof. Emerson were beaten by Reggie & Bunny. The contest is nearing a close - The morning was spent over these games.

This afternoon I have been getting my things gradually into shape for our return. I am much pleased over the finds of yesterday & today before. The Audropogon and Bromus are worth a good deal, and there is plenty of both.

This evening we called on Prof. & Mrs. Emerson to say goodbye. We met there Mr. & Mrs. Miller. Then we went over and called on Dr. & Mrs. Goodale who leave on Saturday. The Dr. seems very bright and is looking forward to the auto ride to his brother in Saco -

Sept. 16

Shelburne, N.H.

Clear, calm, cool, cumulus clouds. A perfect day

This morning after some packing, we walked with Miss Bowen, a young girl from Boston over Shelburne Bridge to the camp of the river men and we continued from the north side of the bridge along the border of the river to where the river-men were putting piles of logs some left long into the river. The broad stony expanse was covered with these piles, 3 or 4 ft high. A single log was under the edge of the pile, making an aperture underneath. A pair of horses was backed up to the pile, a chain was slipped under the pile by pushing a pole with a hook on the end, inserted into the end of the chain. That was drawn through and put over the logs, and hooked to the chain that the horses were pulling. Then the horses hauled the load into the river, and the logs were set afloat. It was interesting work. The logs belong to the International paper company and are going down to Rumford Falls.

We got back to dinner. Then we worked hard getting ready for our departure. The details of closing are many.

At 5 P.M. I went down and welcomed the three Hines. Evening at farm & cottage -

Glorious full moon, wonderful sunset -

Pedee

Slim with turned leaves & deformed-globose fruit, stony beach of the river. Lighter farm.

Stedburne, N.H.

1921

Sept 17 Cloudy, with fine rains at intervals.

It has been a big tournament to-day.
Tom & Phil. In the game Peggy and
Gunny beat Mr. Eddy and his Dougherty!!
First time Mr. Eddy with a partner has
been beaten.

Several callers came to-day, Prof. Mrs.
Turner, Clara Howe, Miss Maxwell,
Miss Deane, Mrs. Painter.

This afternoon at 4:30, we went to
a tea at Miss Maxwell's & Miss Deane's and
met Miss Harris and Prof. Mrs. Emerton.
Pleasant conversation -

The spare time has been occupied
with packing. There is much detail.

1921

Sunday Shelburne, N.H.

Sept 18 Clear and cloudy, rain drops - Wind, Cool

The last day and of course a busy one mainly at the house -

This noon we walked with Miss Painter, Lois Howe and her friend Mrs. Mitchell, to the Presidential Platform. The Presidential Range looked as fine as ever.

Shelburne, N.H. to Cambridge, Mass.

1921

Sept 19 Clear with some cloud, at first cool, later warm. Min. last night 46° -

This morning with cordial goodbyes from the house we drove to the station. Miss Painter had walked down to say goodbye. Yesterday she gave Luisa Brown a beautiful pitcher with a set of glasses in glass. She has proved a warm, true friend.

Our trip to Cambridge was smooth and on time with changes at Danville June. There were crowds of people everywhere and we had to stand, coming out from Boston. Lizzie was at the door to welcome us. I have phoned to 808 Park St. and to Joe Cheechill with whom I had a real good talk.

This evening Charlie Hopper called and told us of his father's death on Sept 12. He had been sick a week with intestinal trouble and he passed quickly away. Charlie is seeing about a lot in Mt. Lebanon. There are various complications that make the choice difficult -
