

We can treat the
Amalgam, but
cannot recover the Mercury
as we have no proper retorting
apparatus, -
We can obtain however
all the Gold -

Dear Sir

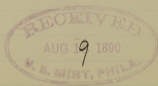

We are here prospecting and de-
veloping a gold mine, we are getting
gold, through our stamp mill, we
have no facilities to retort the quick
silver or to rene the gold, my object
in writing is to ascertain, whether we
can send you the amalgam, and
have you retort the mercury from it
and give us the value of the gold,
also please tell cost for so doing
and how and to whom to send.
Could you send the value in a check?
Yours very respectfully A. J. Inlow.

Asks whether he can
send Amalgam &
have the mercury re-
covered from it - would
give value of Gold.

[RG104 E-1 Box 164]

[Abstract:] Asks whether he can send amalgam & have the mercury recovered from it. And give value of gold.

Dear Sir

We are here prospecting and developing a gold mine, we are getting gold, through our stamp mill, we have no facilities to retort the quick silver or to run the gold, my object in writing is to ascertain, whether we can send you the amalgam, and have you retort the mercury from it and give us the value of the gold; also please tell cost for so doing and how and to where to send. Could you send the value in a check?

Yours very respectfully
A.J. Inlaes

[Handwritten reply noted on letter:]

We can treat the amalgam, but cannot recover the mercury as we have no proper retorting apparatus, - We can obtain however all the gold -
