The reflex is darker, and there is a rich golden suffusion around the beautiful, full high-center. The form is beautiful, with long wavy, twisted and whorled petals, which relieve the immense size from stiffness. The stem is long and stiff, holding the flower from facing to upright. It is a splendid free bloomer, and this season was in full bloom with perfectly full centers until killed down by the frost in November. The plant is a very strong, sturdy grower. In all, it is the greatest of all yellows, and is in a class by itself.
