PART 3294—IRON AND STEEL PRODUCTION [General Preference Order M-21, Direction 12]

EMERGENCY DISTRIBUTION OF STEEL FOR PRODUCTION OF CERTAIN CRITICAL PRODUCTS

The following direction is issued pursuant to M-21:

(a) *What this direction does.* The cumulative loss in production of steel in the last several months caused by work stoppages in the steel and coal industries has created a severe shortage of steel for all purposes. There will not be a sufficient supply of steel to keep all of industry going at a reasonable rate for a number of months. It is, therefore, necessary that special assistance be given for the manufacture of certain highly critical products. These products are ones which are extremely short for the Veterans' Housing Program and certain items of farm machinery which are urgently required to harvest this year's crops and for famine relief. Failure to obtain immediate full production of these items will seriously delay the housing program and will result in a loss of food production. This direction provides for certified orders for steel needed during the third quarter of 1946 to make these critical items. This direction applies only to steel in the forms and shapes listed in Schedule I of Order M-21. It does not apply to wrought iron, iron castings, or pig iron. Distribution of iron to critical products will be made by other procedures.

(b) *Products for which steel can be obtained under this direction.* Manufacturers of the products which are listed on Schedule A at the end of this direction may place certified orders in the way described in this direction for the steel that they need for the product. In addition, manufacturers of other products may, in certain very extraordinary cases described in paragraph (m), be specifically authorized to place certified orders.

(c) *Who can place certified orders—(1) With a producer without authorization.* A manufacturer of a critical product listed on Schedule A may certify a purchase order which he has already placed with a steel producer on the date of this direction and on which, at any time after January 1, 1946, the producer promised delivery before October 1, 1946. No specific authorization by the Civilian Production Administration is required for such certification. However, a manufacturer may not without specific authorization by CPA certify orders for steel for use in a plant not in production because of work stoppages.

(2) A manufacturer who on June 12, does not have any purchase orders placed with a producer (whether certified or otherwise) for steel of any of the types which he uses in production of critical products on Schedule A may place a certified order on a warehouse. No authorization by the Civilian Production Administration is required for this type of order. However, a manufacturer may not without specific authorization by CPA certify orders for steel for use in a plant not in production because of work stoppages.

(3) *When authorization needed.* Except for the orders listed in paragraphs (c) (1) and (2), no certified purchase order may be placed without specific authorization by CPA. Paragraph (d) below states when applications for authorizations may be made.

(d) *Application for authorization to place certified orders—(1) Who may apply.* Any manufacturer of a critical product listed on Schedule A who is unable to certify enough purchase orders under the provisions of paragraph (c) above for the amount of steel which he will require to actually put into production in his critical products during any of the month of July, August, or September, may apply to the Civilian Production Administration for authority to certify new purchase orders.

(2) *How to apply.* Application for such authority should be made in triplicate on Form CPA-4166.

(3) The Civilian Production Administration may issue authority to place certified purchase orders where it determines that the steel will actually be needed for production of the critical product and that the steel is available for such purposes. Additional

steel for inventories will be rarely authorized and then less than permitted by PR-32. Such authorization will permit a manufacturer to place a new purchase order on either a producer or a warehouse, but the CPA may limit the authorization to a named supplier.

(e) *Limit on amount which may be certified.* Except as specifically authorized a manufacturer must not certify a total number of purchase orders which will call for delivery in the third quarter of a greater amount of steel than he proposes to actually put into production in the manufacture of his critical product in that period. In addition, a manufacturer of farm machinery listed on Schedule A must not certify more steel than he will require to complete critical items which he will deliver before October 31, 1946. A manufacturer need not reduce the amount permitted because of steel in his inventory, within the limits of Priorities Regulation 32, but he may not, without specific authorization, use any of the amount certified in order to build up inventories to the permitted amount. Also he may not certify for delivery in any one month more than 40% of the steel he will put into production during the third quarter.

(f) *How to place a certified order.* A purchase order which has already been placed may be certified by sending a letter to the producer or warehouse, identifying the original purchase order and reciting in substantially the following form the following certification signed as provided in Priorities Regulation 7:

I certify, subject to the penalties of section 35A of the United States Criminal Code, that I will use this steel only to make ----- (specify one or more of the end products listed in Schedule A, or if specifically authorized for another product under paragraph (m), insert name of product and phrase "authorized under paragraph (m)") and that the tonnage covered by this order together with all tonnages placed with other producers and distributors for use in these products on similarly certified orders and uncertified orders is not in excess of the quantity of such steel which I am authorized to order under the provisions of Direction 12 to Order M-21.

The same certification is to be used when placing new purchase orders with warehouses or with producers when authorized by the Civilian Production Administration.

(g) *Period for which certified orders may be placed.* Orders may be certified for delivery only in July, August or September. A manufacturer must specify the months in which he requires delivery at the time he certifies his purchase order (or at the time he places a new certified purchase order).

(h) *Refusal of certified orders.* (1) A steel producer need not accept a certification on a previously accepted purchase order, or a new purchase order, which it receives after the first day of the month preceding the month in which delivery is requested. However, if delivery is requested in July, a producer must accept a certification under paragraph (c), if it is received on or before the 17th day of June, and need not accept it after the 17th day of June.

(2) A warehouse need not accept any certified order for a single product classification of steel in excess of 10,000 lbs. if delivery would deplete his stock to a point where his function in the distribution of steel would be seriously impaired. Schedule I of Order M-21 lists the "product classifications" of steel.

(3) In order to protect the requirements of small business, a warehouse must not accept any purchase order, whether certified or not, in excess of 10,000 pounds if delivery would deplete his stock to a point where his function in the distribution of steel would be impaired.

(i) *Certified orders must be treated as rated orders.* Certified orders must be scheduled for production in preference to all other orders for the same product classification, except for orders covered by specific written directives issued by the Civilian Production Administration, or (in the case of distributors) a rating of AAA issued after January 21, 1946. Any purchase order certified under this direction must be treated as a rated order under Priorities Regulation 1 and accepted, scheduled and delivered accordingly. The rules of Priorities Regulation 1 will apply, except to the extent that this direction is inconsistent with them. Steel obtained on certified orders must be used in accordance with § 944.11 of that regulation.

(j) *The effect on steel of certain other directions.* (1) Direction 13 to Priorities Regulation 1, which suspended preference ratings (except certain AAA ratings on distributors) on steel, remains in effect for the time being.

(2) Direction 9 to Order M-21, which provides certifications for tin mill products for food and pharmaceutical purposes, remains in effect. That direction explains how producers of tin mill products should schedule orders certified under either that direction or this one.

(k) *Other distribution of steel.* Steel producers and warehouses must distribute balance of steel production after filling certified orders as follows:

(1) *Warehouse stocks.* Producers must ship to warehouses during the third quarter of 1946 not less than the same proportion of total tonnage of steel produced by them in that quarter as they shipped to warehouses during the fourth quarter of 1945.

(2) *Equitable distribution to consumers.* Producers and warehouses must distribute remaining amounts of steel in a fair and equitable manner.

(l) *Reports.* Steel Producers and warehouses must furnish such reports as may be required by the Civilian Production Administration from time to time, subject to approval by the Budget Bureau pursuant to the Federal Reports Act of 1912.

(m) *Additional assistance in extraordinary circumstances—(1) Steel for governmental agency requirements.* The Civilian Production Administration may authorize the placing of certified orders to fill severely limited requirements of high urgency for the Army, Navy, Coast Guard, Maritime Commission, War Shipping Administration, Veterans' Administration, Federal Public Housing Administration, Canada or for export. No applications should be made for this authority by manufacturers unless specifically requested by the appropriate government agency.

(2) *Relief for other manufacturers cannot ordinarily be granted.* The shortage of steel during the third quarter will be so severe that most manufacturers may not be able to obtain enough steel to maintain minimum economic rates of operation. For this reason, the Civilian Production Administration will not be able to offer assistance to manufacturers to support minimum economic rates of production. Assistance may be given in extraordinary circumstances where a manufacturer will suffer extraordinary hardship which is not generally common to users of steel because of the shortage of steel or for requirements of public health and safety or other similarly urgent requirements. Application should be made by letter to the Steel Branch of CPA. CPA may give assistance by finding a supplier, or by authorization to place certified orders, or by issuance of directives if required.

Issued this 12th day of June 1946.

[MPR 580,¹ Amdt. 14]

RETAIL CEILING PRICES FOR CERTAIN APPAREL
AND HOUSE FURNISHINGS

A statement of the considerations involved in the issuance of this amendment issued simultaneously herewith has been filed with the Division of the Federal Register.

Maximum Price Regulation 580 is amended in the following respects:

1. Section 6 (b) is amended by changing the heading thereof to read as follows: "(b) Amendment by OPA to reduce markups."

2. A new paragraph (c) is added to section 6 to read as follows:

(c) Amendment by OPA, in special instance, to increase markups. The OPA Regional Office for the region in which your OPA District Office is located may increase the markup for any cost line on your chart so as to bring it in line with the markups under the regulation when your markup for that cost line is abnormally low because the offering price stated on your chart for that cost line is a price which was conclusively found by the Office of Price Administration to have been reduced as a result of enforcement proceedings.

¹ 10 F.R. 3015.

3. Paragraph (a) of section 25 is amended to read as follows:

(a) Base date pricing charts and amendments thereto filed under section 2 or filed, permitted or required by section 6;

This amendment shall become effective June 17, 1946.

Issued this 12th day of June 1946.

PART 1499—COMMODITIES AND SERVICES

[Rev. SR 14B, Amdt. 5]

BREAD AND BAKERY PRODUCTS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

A new section 13 is added to Revised Supplementary Regulation 14B to read as follows:

SEC. 13. *Emergency adjustment in maximum prices.* Maximum prices for sales by producers of bread and bread-type rolls other than rye bread and rye rolls, as defined in paragraph (e) of section 7 of this regulation, as determined under any other provision of this revised supplementary regulation or any other regulation or order, are hereby increased at the rate of one cent per pound in the case of bread and by one cent per dozen in the case of bread-type rolls. Each producer may apply such increases in the case of bread by adjustment in his maximum price per loaf, by adjustment of the weight of the loaf, or by a combination of both, so as to result in an increase of one cent per pound. Any decrease in weight pursuant to section 12 hereof shall be disregarded for purposes of this section. Whenever a producer increases or decreases his maximum price per loaf of bread or sales unit of bread-type rolls pursuant to this section, any

reseller may increase or must decrease his maximum price by a like amount per loaf or unit. This section shall not be applicable to sales of bread or sales units of rolls where the weight has been increased and the price adjusted since March 15, 1946, under the provisions of section 2 of this regulation. However, any producer who has increased his weight and price under section 2 since March 15, 1946, may revert to his former weight and price and then take advantage of the provisions of this section 13.

NOTE: Under this section you are permitted to increase your maximum price of your bread 1 cent per pound either by an adjustment in price or by adjustment of the weight, or by a combination of both. In making your calculations you will proceed as follows:

Divide your present price of bread by your baked weight. The result will be your present price per ounce of bread. Since the section permits an increase of 1 cent per pound you are permitted an increase of 0.0625 cent per ounce. Now add 0.0625 cent to your present price per ounce of bread to arrive at your new price per ounce.

To your present price per loaf add 1 cent, and then divide your new price by your new baked weight where an adjustment in weight is required. There are listed below several examples of this procedure.

Example No. 1. A 14 ounce loaf with a maximum price of 7¢. The 7¢ price divided by 14 ounces gives you 0.5000¢ as your present price per ounce.

0.5000¢ present price per ounce plus
0.0625¢ permitted increase per ounce

0.5625¢ new price per ounce

7.0000¢ present price per loaf plus
1.0000¢ increase in price per loaf

8.0000¢ new price per loaf.

8.0000¢ divided by 0.5625¢ equals 14.22 new baked weight ounces. The result after adjustment is an 8¢ price and a baked weight of 14.22 ounces.

The same loaf of bread need not be increased in price but can be decreased in weight as follows:

7.0000¢ divided by 0.5625¢ gives you 12.44 new baked weight ounces. The result after adjustment is a 7¢ price and a baked weight of 12.44 ounces.

Example No. 2. An 18-ounce loaf with a maximum price of 10¢. Price 10¢ divided by 18 ounces gives you 0.5556¢ present price per ounce.

0.5556¢ present price per ounce plus
0.0625¢ permitted increase per ounce

0.6181¢ new price per ounce
10.0000¢ present price per loaf plus
1.0000¢ increase in price per loaf

11.0000c new price per loaf.

11.0000¢ divided by 0.6181¢ gives you 17.80 new baked weight ounces. The result after adjustment is 11¢ price and a baked weight of 17.80 ounces.

The same loaf of bread need not be increased in price but can be decreased in weight as follows:

10.0000¢ divided by 0.6181¢ gives you 16.18 new baked weight ounces. The result after adjustment is a 10¢ price and a baked weight of 16.18 ounces.

This amendment shall become effective June 12, 1946.

Issued this 12th day of June 1946.

NOTICE OF PETITION FOR MODIFICATION

Pursuant to the provisions of the Packers and Stockyards Act 1921, as amended (7 U. S. C. 181 et seq.), the Secretary of Agriculture on December 13, 1934, issued an order prescribing reasonable rates and charges for stockyard services rendered by the respondent. Upon petitions for modification filed by respondent, this order has been modified from time to time.

By an original and supplemental petition filed on May 23 and May 28, 1946, the respondent has requested that the proposed schedule of rates and charges set out in the data attached to respondent's petition be established at respondent's stockyard.

The effect of such proposed modification, if granted, would increase the rates and charges at respondent's stockyard, thus resulting in additional revenues to respondent, and, therefore, public notice should be given of the filing of such petition in order that all interested persons may have an opportunity to be heard in the matter.

Now, therefore, notice is hereby given to the public and to all interested persons of the filing of such petition for modification.

All interested persons who desire to be heard upon the matter requested in said petition for modification shall notify the Hearing Clerk, Office of the Solicitor, United States Department of Agriculture, Washington 25, D. C., within 15 days from the date of publication of this notice.

Copies hereof shall be served upon the respondents by registered mail or in person.

FEDERAL COMMUNICATIONS COMMISSION.

SERVICE ALLOCATIONS FOR 920-940 AND 940-960 MEGACYCLE BANDS¹

PUBLIC NOTICE

JUNE 3, 1946.

In the Commission's report of allocations from 25,000 kilocycles to 30,000,000 kilocycles (Docket 6651) dated May 25, 1945, the frequency band 920-940 megacycles was allocated to the experimental broadcast services, and the 940-960 megacycle band was allocated to fixed and experimental broadcast services, the latter band on a shared basis between broadcasting and low power fixed services such as police facsimile, control circuits, public service, special, emergency automatic relays or repeaters, relay broadcast, and broadcast studio-to-transmitter links.

The Commission has received urgent inquiries as to the exact manner in which the various services mentioned above would be accommodated in the different bands provided. Potential manufacturers and users of FM studio-to-transmitter link equipment are particularly anxious to have the Commission indicate in detail the frequencies which are available to that service.

Accordingly, the following tentative service-allocation plan for the frequency bands 920-940 and 940-960 megacycles has been formulated for the various services which reflects the desire of the Commission that certain frequencies be made definitely available for the immediate use of specific services having a pressing need for them:

(1) Assignments to FM studio-to-transmitter links may be made in the upper portion of the 920-940 megacycle band in the event that future requirements indicate that insufficient space is available in the band of frequencies 940-952 megacycles.

(2) Assignments to Experimental Broadcasting Service in the 920-940 megacycle band may be made progressively upward from 920 megacycles.

(3) The band of frequencies 952-960 megacycles is to be used for fixed circuits such as police facsimile, control circuits, etc., with assignments progressing downward from 960 megacycles.

(4) The band of frequencies 940-952 megacycles is to be used for FM studio-to-transmitter links with assignments progressing upward from 940 megacycles.

(5) Assignments in the frequency bands 920-940 and 940-960 megacycles are to be on multiples of 100 kilocycles in order that a flexible channeling system may be provided. (The bandwidths

¹ Part 4—Rules governing broadcast services other than standard broadcast.

Part 5—Rules and regulations governing experimental radio service.

required by the different services concerned can be accommodated through the assignment of an appropriate number of adjacent channels to each station.)

(6) A frequency tolerance of .01% and a bandwidth of 500 kilocycles are advocated for FM studio-to-transmitter links.

The relatively narrow beams which may be employed by point-to-point stations in this region of the spectrum should make possible a high degree of frequency conservation by means of geographic separation as differentiated from frequency separation. It is contemplated that the authorization of FM studio-to-transmitter equipment will require the showing of a definite need for the use of a radio circuit instead of a wire circuit.

It is to be pointed out that general provisions have been made in the Commission's report of allocations from 25,000 kilocycles to 30,000,000 kilocycles (Docket 6651), dated May 25, 1945, for the operation of the above-mentioned services in bands other than 940-960 megacycles, and the policies proposed herein do not preclude such operation provided a proper need can be shown to exist. However, detailed allocation plans for such bands must necessarily be formulated around the over-all indicated requirements of all services to which the bands apply, with particular reference to the suitability of the bands for each of the services for which consideration must be given.

The Commission wishes to obtain the comments of all services which expect to use frequencies between 920 and 960 megacycles with regard to the above proposed policies and with particular attention to the following subjects:

(a) Distances to be covered and power considered necessary.

(b) Practical transmission bandwidth, frequency tolerance, and receiver selectivity data for each type of emission and communication service contemplated.

(c) Whether frequency space allowed above for each service is considered adequate.

(d) Directive characteristics of antennas proposed for each type of service and the maximum degree of directivity believed practical.

It is requested that comments from those interested in this subject be submitted in writing to the Secretary of the Commission by June 15, 1946.

F.M. BROADCASTING OTHER THAN NON-COM-
MERCIAL EDUCATIONAL BROADCAST SERVICE
ORDER PROVIDING OPPORTUNITY FOR ORAL
ARGUMENT

In the matter of promulgation of rules and regulations and Standards of Good Engineering Practice for FM broadcasting other than non-commercial educational broadcast service. Docket No. 6768.

At a session of the Federal Communications Commission held in its offices in Washington, D. C. on the 24th day of May 1946;

Whereas, it appears that the public interest, convenience, and necessity may be served by the adoption of the attached proposed amendments to the Commission's rules and regulations, and Standards of Good Engineering Practice for FM broadcasting other than non-commercial educational broadcast service;

Now, therefore, *It is ordered*, That any persons desiring to submit written statements with respect to these proposed rules and regulations and standards, file such statements with the Commission on or before June 15, 1946; and any persons desiring the opportunity of oral argument file their requests with the Commission on or before June 15, 1946; and

It is further ordered, That in absence of protests on or before June 15, 1946, the proposed rules and regulations and standards will be promulgated.

§ 3.202 *Areas of the United States.* For the purpose of allocation the United States is divided into two areas. The first area—area I—includes southern New Hampshire; all of Massachusetts, Rhode Island, and Connecticut; southeastern New York as far north as Albany-Troy-Schenectady; all of New Jersey, Delaware, and the District of Columbia; Maryland as far west as Hagerstown; and eastern Pennsylvania as far west as Harrisburg.¹ The second area—area II—comprehends the remainder of the United States not included in area I.

§ 3.203 *Class A stations.* (a) A class A station is a station which operates on a Class A channel and is designed to render service primarily to a community or to a city or town other than the principal city of an area, and the surrounding rural area. The transmitter power and antenna height of a class A station shall normally be capable of coverage equivalent² to a minimum of 0.1 kw and a maximum of 1.0 kw effective radiated power at 250 feet antenna height, as determined by the methods prescribed in the Standards of Good Engineering Practice Concerning FM Broadcast Stations. Class A stations will not be authorized with more than 1 kw effective radiated power. Standard power ratings of transmitters used for Class A stations shall be not less than 250 watts nor more than 1000 watts. A normal minimum separation for class A stations of 50 miles will be

¹ In some of the territory contiguous to area I, the demand for frequencies requires that applications be given careful study and consideration to insure an equitable distribution of facilities throughout the region. This region includes the remainder of Maryland, Pennsylvania, and New York (except the northeastern corner) not included in area I; Virginia, West Virginia, North Carolina, South Carolina, Ohio, and Indiana; southern Michigan as far north as Saginaw; eastern Illinois as far west as Rockford-Decatur; and southeastern Wisconsin as far north as Sheboygan. Other regions may be added as required.

² For the purpose of determining equivalent coverage, the 1000 uv/m contour should be used.

provided on the same channel and 35 miles on adjacent channels.

(b) Twenty channels beginning with 104.1 mc and ending with 107.9 mc (channels 281 through 300) are designated as Class A channels. All of these channels are available for assignment in cities which are not the central city or cities of a metropolitan district. Ten of these channels are also available for assignment in central cities of metropolitan districts which have fewer than six class B stations.³

(c) The main studio of a class A station shall be located in the city served and the transmitter shall be located as near the center of the city as practicable.

§ 3.204 *Class B stations.* (a) A Class B station is a station which operates on a class B channel and is designed to render service primarily to a metropolitan district or principal city and the surrounding rural area, or to rural areas removed from large centers of population. The service area of a class B station will not be protected beyond the 1000 uv/m contour; however, class B assignments will be made in a manner to insure, insofar as possible, a maximum of service to all listeners, whether urban or rural, giving consideration to the minimum signal capable of providing service. Standard power ratings of transmitters used for class B stations shall normally be 1000 watts or greater. In the following subsections, antenna height above average terrain and effective radiated power are to be determined by the methods prescribed in the Standards of Good Engineering Practice Concerning FM Broadcast Stations.

(1) In area I, class B stations will be licensed to operate with a service area equivalent⁴ to a minimum of 10 kw effective radiated power and antenna height of 300 feet above average terrain and a maximum of 20 kw effective radiated power and antenna height of 500 feet above average terrain.⁴ In metropolitan districts in area I with a population greater than 250,000 the minimum service area shall be the equivalent⁴ of 20 kw effective radiated power and an antenna height of 350 feet above average terrain. Class B stations in area I will not be licensed with an effective radiated power greater than 20 kw.

(2) In area II, class B stations will be licensed to operate with a service area equivalent⁴ to a minimum of 2 kw effective radiated power and antenna height of 300 feet above average terrain and a normal maximum of 20 kw effective radiated power and antenna height of 500 feet above average terrain.⁴ In area II,

³ For the time being, until more FM broadcast stations are authorized, the Commission will not authorize class A stations in central cities of metropolitan districts having four or more standard broadcast stations.

⁴ In the determination of appropriate coverage, consideration should be given to population distribution, terrain, service from other FM stations, trade area and other economic factors. Among the recognized trade area authorities are the following: J. Walter Thompson (Retail Shopping Areas), Hearst Magazines, Inc. (Consumer Trading Areas), Rand McNally Map Co. (Trading Areas) and Hagstrom Map Co. (Four Color Retail Trading Area Map).

where it is shown that the public interest would be served by authorizing greater power or antenna height either to serve greater area or to provide a higher signal intensity within an area, the power, antenna height, and area will be determined on the merits of the case, with particular attention being given to rural areas which would not otherwise receive service.

(b) Sixty channels beginning at 92.1 mc and ending at 103.9 mc (channels 221 through 280) are designated as class B channels.

§ 3.205 Station location. (a) Each FM broadcast station shall be considered located in the state and city where the main studio is located.

(b) The transmitter of each FM broadcast station shall be so located that satisfactory service is delivered to the city where the main studio is located, in accordance with the Standards of Good Engineering Practice Concerning FM Broadcast Stations: *Provided, however*, Upon special showing of need, authorization may be granted to locate the transmitter so that adequate service is not rendered to this city, but in no event shall this city be beyond the 50 uv/m contour.

§ 3.206 Main studio. The term "main studio" means the studio from which the majority of local programs originate and/or from which a majority of station announcements are made of programs originating at remote points.

The following changes are proposed for the Standards of Good Engineering Practice Concerning FM Broadcast Stations.

2. *Engineering standards of allocation.* A. Sections 3.202 to 3.206 inclusive of the rules and regulations describe the basis for allocation of FM Broadcast Stations, including the division of the United States into Areas I and II. Where reference is made in the rules to antenna heights of Class A stations, section 2 E (1) of these Standards should be consulted; for Class B stations, section 2 E (2) should be consulted.

B. In determining the predicted and measured field intensity contours of FM broadcast stations the following shall govern:

- (1) Class A stations will normally not be required to determine their contours.
- (2) Class B stations shall determine the extent of their 1000 uv/m and 50 uv/m contours.

The above contours shall be determined in accordance with the methods prescribed in these Standards.

C. Although some service is provided by tropospheric waves, the service area is considered to be only that served by the ground wave. The extent of the service is determined by the point at which the ground wave is no longer of sufficient intensity to provide satisfactory broadcast service. The field intensity considered necessary for service is as follows:

TABLE I

Area:	Median field intensity
City business or factory areas	1000 uv/m
Rural areas	50 uv/m

A medium field intensity of 3000 to 5000 uv/m should be placed over the principal city to be served, and a median field intensity of 1000 uv/m should be placed over the business district of cities of 10,000 or greater within the metropolitan district served. The location of the main studio of a class A station is specified in § 3.203 of the rules. A field intensity of 5000 uv/m should be provided over the main studio of a class B station except as otherwise provided in § 3.204 of the rules.

These figures are based upon the usual noise levels encountered in the several areas and upon the absence of interference from other FM stations.

D. A basis for allocation of satellite stations has not yet been determined. For the present, applications will be considered on their individual merits.

E. The service area is predicted as follows:

(1) *Class A stations.* A map, topographic where obtainable, shall be submitted for the area within 15 miles of the proposed antenna site. On this map shall be indicated the antenna location and a circle of 10 miles radius with the antenna location as center. Representative points shall be picked on this circle 15 degrees apart and the elevation of these points determined. The average elevation of these points will be considered the average elevation of the circle. The difference between the elevation of the center of the radiating system and the average elevation of this circle shall be considered the height of the antenna over the terrain 10 miles from the transmitter. In cases where the applicant believes this method to be grossly in error due to peculiarities of the terrain, this method shall be used for determining the antenna height but a showing may be made, if desired, determining the height by other means and describing the method used. Calculations of the service contours of Class A stations are not required.

(2) *Class B stations.* (No changes in present section 2 E (2)).

FEDERAL POWER COMMISSION.

[Docket No. G-734]

PENN-YORK NATURAL GAS CORP.

NOTICE OF APPLICATION

JUNE 10, 1946.

Notice is hereby given that on May 31, 1946, an application was filed with the

Federal Power Commission by Penn-York Natural Gas Corporation ("Applicant"), a corporation organized under the laws of the Commonwealth of Pennsylvania, with its principal place of business in Buffalo, New York, for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended, to authorize the Applicant to construct and operate the facilities hereinafter described.

Applicant proposes to construct the following-described facilities:

(1) One additional 8" pipeline stream bed crossing at Cattaraugus Creek, parallel to, connected with, and approximately one hundred (100) feet distant from Applicant's presently existing 8" pipeline which crosses Cattaraugus Creek at a point on the Erie and Cattaraugus county line and which 8" pipeline extends from Applicant's Arcade Station in Wyoming County, New York, to its Sheridan Station, in Chautauqua County, New York, the Cattaraugus Creek crossing being located approximately twenty-five (25) miles west of said Arcade Station. The length of the proposed new pipeline crossing will be approximately one thousand (1,000) feet, and the two pipeline crossings will be joined with appropriate headers and valves to permit operation of either singly.

(2) Applicant also proposes to construct one steel building, 40' x 80', to be used as a garage, warehouse and workshop, and to be located in the Town of Arcade, Wyoming County, New York. Applicant submits that this proposed building will be located at a central point on the company's pipeline system and will provide centralized, more efficient and less costly operation of its system.

The application recites that Applicant owns and operates a pipeline which extends from Harrison Township, Potter County, Pennsylvania, to the distribution lines of Republic Light, Heat and Power Co., Inc., at two points known respectively as Billo Station, Town of Alden, Erie County, New York, and Sheridan Station, Town of Sheridan, Chautauqua County, New York. The application further states that Applicant presently has one producing gas well and that it purchases the bulk of the gas it transports and sells to Republic Light, Heat and Power Co., Inc. from New York State Natural Gas Corporation.

Applicant proposes by means of the proposed pipeline to assure maintenance of adequate service by elimination of the hazard involved, should a break occur in the one pipeline now crossing Cattaraugus Creek during flood and ice conditions. Applicant submits that the construction of the proposed pipeline will provide a much greater degree of safety and that it is in the public interest that this crossing be constructed. Applicant proposes by means of the proposed steel building to provide more centralized, more efficient and less costly operation of its system. Applicant states that it does not presently own any similar garage, warehouse and workshop facility at a central point on its system, and that its present facilities are not movable and are insufficient in size, in addition to being located

in Pennsylvania at the extreme south end of its 10" pipeline.

The estimated over-all capital cost of constructing the proposed facilities is \$20,000.

Any interested State Commission is requested to notify the Federal Power Commission whether the application should be considered under the cooperative provisions of Part 67 of the provisional rules of practice and regulations under the Natural Gas Act, and, if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with the reasons for such request.

Any person desiring to be heard or to make any protest with reference to the application of Penn-York Natural Gas Corporation should file with the Federal Power Commission, Washington 25, D. C., not later than fifteen days from the date of this publication, a petition or protest in accordance with the Commission's provisional rules of practice and regulations under the Natural Gas Act.

BITUMINOUS COAL IN DISTRICT 8

ESTABLISHMENT OF MAXIMUM PRICES

For the reasons set forth in an opinion issued simultaneously herewith, and in accordance with § 1340.207 (a) of Maximum Price Regulation No. 120; It is ordered:

Order No. 1343 under Maximum Price Regulation No. 120 is hereby amended in the following respects:

[Rev. SO 119, Order 251]

A. MARCHAND, INC.

ADJUSTMENT OF CEILING PRICES

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, and pursuant to sections 15 and 16 of Revised Supplementary Order No. 119, it is ordered:

(a) *Manufacturer's ceiling prices.* A. Marchand, Incorporated, 680 Fifth Avenue, New York, New York, may compute its adjusted ceiling prices for bathroom and closet fixtures of its manufacture by increasing by 15 percent the ceiling prices to each class of purchaser as established by Maximum Price Regulation No. 188.

As used in this paragraph "ceiling prices as established under Maximum Price Regulation No. 188", shall mean the ceiling prices established under that regulation without the inclusion in those ceiling prices either directly or indirectly of any adjustment, either individual or industry-wide.

(b) *Ceiling prices of purchasers for resale.* (1) A purchaser for resale, who had an established ceiling price prior to the effective date of this order for any article, whose manufacturer's ceiling price was adjusted in accordance with the provisions of this order, may increase that established ceiling price by 15 percent.

(2) A purchaser for resale who had no established ceiling price prior to the effective date of this order for any article whose ceiling price is subject to this order, shall determine his ceiling price by adding to his invoice cost the same percentage markup which he has on the "most comparable article" for which he has a properly established ceiling price. For this purpose the "most comparable article" is one which meets all the following tests:

(i) It belongs to the narrowest trade category which includes the article being priced.

(ii) Both it and the article being priced were purchased from the same class of supplier.

(iii) Both it and the article being priced belong to a class of articles to which, according to customary trade practices, an approximately uniform percentage markup is applied.

(iv) Its net replacement cost is nearest to the net cost of the article being priced.

The determination of a ceiling price in this way need not be reported to the Office of Price Administration; however, each seller must keep complete records showing all the information called for by OPA Form 620-759 with regard to how he determined his ceiling price, for so long as the Emergency Price Control Act of 1942, as amended, remains in effect.

If the resale ceiling price cannot be determined under the above method, the reseller shall apply to the Office of Price Administration for the establishment of a ceiling price under § 1499.3 (c) of the General Maximum Price Regulation. Ceiling prices established under that section will reflect the supplier's prices as adjusted in accordance with this order.

(c) *Terms of sale.* Ceiling prices adjusted by this order are subject to each seller's terms, discounts and allowances on sales to each class of purchaser in effect during March 1942, or thereafter, properly established under OPA regulations.

(d) *Notification.* At the time of, or prior to the first invoice to a purchaser for resale on and after the effective date of this order, showing prices adjusted in accordance with this order, the seller shall notify the purchaser in writing of the method established in paragraph (b) of this order for determining adjusted ceiling prices for resales of the articles. This notice may be given in any convenient form.

(e) All requests contained in the application for price adjustment filed by A. Marchand, Incorporated, assigned OPA Docket No. 6069-SO-119-56C, not specifically granted by this order are hereby denied.

(f) The provisions of Supplementary Order No. 153 shall have no application to any sale or delivery of any article subject to this order.

(g) This order may be revoked or amended by the Price Administrator at any time.

This order shall become effective on the 11th day of June 1946.

Issued this 11th day of June 1946.

Administrator.

[SO 108, Special Order 16]

MEN'S AND BOYS' TAILORED CLOTHING

ADJUSTMENT OF SURCHARGES FOR
MANUFACTURERS

An opinion accompanying this Special Order No. 16 under section 17 of Supplementary Order 108 has been issued simultaneously herewith and filed with the Division of the Federal Register.

SECTION 1. Who is affected by this order. This order applies to all manufacturers of men's and boys' tailored clothing who made deliveries of items at any time since January 1, 1943 at selling prices established under Maximum Price Regulation 177 and who are now making deliveries of items at selling prices established under Maximum Price Regulation 607 and who have a net surcharge on June 30, 1946.

SEC. 2. Purpose of this order. This order permits manufacturers of men's and boys' tailored clothing to recalculate the amount of their net surcharges existing on June 30, 1946 in the manner set forth in section 3.

SEC. 3. How to recalculate a net surcharge. If you have a net surcharge on June 30, 1946, you may deduct from that net surcharge an amount calculated as follows:

Step 1. Find the amount of your net surcharge existing on June 30, 1946.

Step 2. For each category separately, find all units which you delivered up to the close of business on June 30, 1946 at selling prices established under MPR 607.

Step 3. For each category separately, find the total net dollar amount charged for all units found in Step 2.

Step 4. For each category separately, determine the net ceiling price under MPR 177 for each unit found in Step 2.

Step 5. For each category separately, add together all of the net ceiling prices found under Step 4.

Step 6. Find the difference in each category between the amount found in Step 3 and the amount found in Step 5.

Step 7. Add together the amounts found in Step 6 for all categories in which the amount found in Step 5 was greater than the amount found in Step 3.

Step 8. Add together the amounts found in Step 6 for all categories in which the amount found in Step 3 was greater than the amount found in Step 5.

Step 9. If the amount found in Step 8 is greater than the amount found in Step 7, find the difference between the two. This is the amount you may deduct from your net surcharge existing on June 30, 1946.

SEC. 4. Filing a report of the recalculation. If you have recalculated a net surcharge as described in section 3 above, you must file with your OPA district office, on or before July 20, 1946, two signed copies of a statement showing all the calculations found in steps 1 through 9.

This special order shall become effective June 12, 1946.

NOTE: All reporting and record-keeping requirements of this special order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 12th day of June 1946.

[Region I Rev. Order G-70 Under RMPR 122]

SOLID FUELS IN BOSTON REGION

For the reasons set forth in an opinion issued simultaneously herewith and under the authority vested in the Regional Administrator of Region I of the Office of Price Administration by §§ 1340.259 (a) (1) and 1340.260 of Revised Maximum Price Regulation No. 122 and the Emergency Price Control Act of 1942, as amended, Region I Order No. G-70 is hereby amended to read as follows:

(a) *What this order does.* This is a revision of Region I Order No. G-70, which established specific maximum prices for certain solid fuels when sold in specified areas in Region I. The body of the order contains the general provisions which are applicable to all solid fuels in all of the areas covered by this order. The special provisions and specific prices applicable in particular areas are set forth in appendices, separately numbered, each of which has appeared as an amendment to the original order or will appear as an amendment to this revised order.

All appendices heretofore issued under Order No. G-70 (and effective thereunder on the effective date of this revised order) shall become appendices hereof and shall retain their present numbering; *Provided, further,* That the provisions,

schedules and terms contained in any such appendix, as modified or affected by any Region I supplementary order which is outstanding and applicable thereto on the effective date of this revised order, shall continue in full force and effect as so modified in such appendix under this revised order until such appendix is revised by an amendment issued to this revised order, or until the provisions of any region I supplementary order, otherwise applicable thereto, have been revoked in respect to such appendix. If any special provision in an appendix is contrary to or inconsistent with any of the general provisions, the special provision shall be controlling in the area covered by that appendix. Any solid fuel for which specific prices are not provided will continue to be priced under the provisions of Revised Maximum Price Regulation No. 122.

Nothing contained in this order shall be so construed as to permit noncompliance with any statutes of the State or States within which any area covered by this order is located, or any rules or regulations promulgated under any such statutes, concerning sales or deliveries of solid fuels.

(b) *What this order prohibits.* Regardless of any contract or other obligation, no person shall:

(1) Sell, or in the course of trade or business, buy any solid fuel for which a specific price is established by this order at a price higher than the specific maximum price (but lower prices may be charged, paid or offered); or

(2) Obtain a higher than maximum price, directly or indirectly, by:

(a) Granting less than the discounts, allowances or price differentials which are specifically required;

(b) Charging for a service unless it is expressly requested by the buyer, charging more for a service than the amount authorized by this order, or charging for any service for which a charge is not specifically authorized by this order;

(c) Using any tying agreement or making any requirement that anything other than the fuel requested by the buyer be purchased by him, except that a dealer may comply with the requirements or standards with respect to deliveries which have been or may be issued by any agency of the United States government; or

(d) Using any other device by which a higher than maximum price is obtained.

(c) *Transportation tax.* Any dealer subject to this order may collect, in addition to the specified maximum prices established herein, provided he states it separately, the amount of the transportation tax imposed by section 620 of the Revenue Act of 1942 actually paid or incurred by him, or an amount equal to the amount of such tax paid by any of his prior suppliers and separately stated and collected from the dealer by his supplier; *Provided, however,* That no part of that tax may be collected in addition to the maximum price on sales of lesser quantities than one-quarter ton or any sales of any quantity of bagged fuel; and *Provided further,* That the dealer need not state separately from his selling price

the amount of said tax on a sale to the United States or any agency thereof, any State government, or any political subdivision thereof.

(d) *Addition of increases in supplier's prices prohibited.* The maximum prices established by this order may not be increased by a dealer to reflect increases in purchase costs or in suppliers' maximum prices occurring after the effective date hereof, and need not be decreased to reflect decreases in such costs or maximum prices. Increases or decreases in the maximum prices established by this order to reflect such increases or decreases are within the discretion of the Regional Administrator.

(e) *Conditions upon sale of Pennsylvania Anthracites (and other solid fuels)—(1) Quality standards and applicability of prices for Pennsylvania anthracite.* All anthracite sold subject to this order shall conform to OPA quality standards, except to the extent that any anthracite which fails to conform thereto is sold pursuant to the provisions of this subparagraph.

(a) The specific maximum prices set forth in this order (or in any appendix hereto) for broken, egg, stove, chestnut, pea, buckwheat and rice sizes of Pennsylvania Anthracite may be charged only for Pennsylvania Anthracite of those sizes the ash content of which does not exceed that specified in § 1340.200 (a) (6) of Maximum Price Regulation No. 112 for the particular size.

(b) Maximum prices for Pennsylvania Anthracite received by a dealer which has been identified by his supplier prior to its resale as anthracite with an ash content in excess of OPA quality standards shall be the maximum prices established under this area order, less the following amounts:

	Per net ton ¹
Broken, egg, stove and chestnut.....	\$1.00
Pea.....	.80
Buckwheat No. 1.....	.60
Rice (buckwheat No. 2).....	.50

¹For sales of fractions of a net ton, the reduction shall be proportionate.

(c) Such anthracite shall be kept separate in storage and delivery from all other anthracite. Every dealer selling such anthracite must, in addition to the information required by the terms of any other invoicing requirement, place the following legend on the invoice, sales slip, or receipt:

Price reduced because of high ash content.

(2) *Higher priced anthracites.* A dealer selling anthracites under this order for which different maximum prices are established hereunder, shall segregate each such anthracite from other anthracite, except to the extent that any such anthracite is sold pursuant to the provisions of this subparagraph.

The specific dollars-and-cents prices set forth in any appendix to this Revised Order No. G-70 for any higher priced anthracite (i. e., for any anthracite other than Group I) may be charged only if the following conditions are observed:

(a) The particular coal is not mixed with any other coal, either in storage or delivery; *Provided, however,* That if a purchaser requests a delivery of a mix-

ture of two or more coals, the dealer may comply with such requests if the quantity of each is separately weighed, the price charged does not exceed the weighted average of the maximum prices for the individual coals, and the invoice or similar document delivered to the purchaser clearly states the quantity of each coal in the mixture, identified by the terms used herein; *And provided further*, That two or more coals may be mixed and sold at the price provided for that one which carries the lowest price, in which case the name used may be that of any coal in the mixture to which the lowest price would apply;

(b) An invoice or similar document is delivered to the purchaser which describes the coals by the names used in this order;

(c) The records kept by the dealer, pursuant to the record-keeping clause of this order, clearly identify the higher priced coals by the names used in this order, and are complete and accurate as to any mixtures permitted by subparagraph (a) above and as to the composition thereof and name or names used therefor; and

(d) The dealer preserves and keeps available for examination by the Office of Price Administration, for so long as the Emergency Price Control Act of 1942, as amended, remains in effect, all invoices and other records of his purchases of higher priced coals.

(3) The maximum prices set forth in any price schedule established under this order for sales of solid fuels to consumers (whether for delivered sales, yard sales, or sales f. o. b. transportation facilities, at seller's yard, dock or other terminal facilities) are applicable, unless otherwise specified, only to sales of solid fuels to consumers in less than railroad carlots. In connection with every sale under this order to a consumer of any solid fuel sold in not less than railroad carlots, the maximum price set forth in the applicable price schedule for the particular solid fuel shall, unless said price is specifically applicable to consumer sales in quantities of railroad carlots or greater, be reduced ten cents per net ton.

(f) *Geographical applicability.* Specific maximum prices which are established by an appendix to this order for "yard sales," sales f. o. b. transportation facilities at a dealer's yard, dock or other terminal facility, or sales at retail stores and other fixed locations shall apply to all such sales at points located in the area covered by the particular appendix, regardless of the ultimate destination of the fuel. Specific maximum prices for sales on a delivered basis shall apply to all such sales to purchasers who receive delivery within the area covered by the appendix, regardless of whether the dealer is located within that area.

(g) *Adjustable pricing.* Any person may agree to sell at whatever maximum price is in effect at the time of delivery; but no person may deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery.

(h) *Applicability of other regulations.*

(1) To the extent applicable, the provi-

sions of this order supersede Revised Maximum Price Regulation No. 122, and dealers whose prices are established by this order are not required to file reports under § 1340.262 (c) thereof for those solid fuels for which specific maximum prices are established. However, Revised Maximum Price Regulation No. 122, as amended, shall continue to apply in all cases where specific maximum prices are not established by this or some other order, and as to all transactions prior to the date upon which specific maximum prices become effective, and all dealers shall continue to observe the requirements of § 1340.262 (a) concerning preservation of base period records.

(2) The provisions of Licensing Order No. 1, licensing all persons who make sales under price control, are applicable to all sellers subject to this order. A seller's license may be suspended for violation of the license or of one or more applicable price schedules or regulations. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

(i) *Enforcement.* (1) Persons violating any provision of this order are subject to the criminal penalties, civil and enforcement actions, and suits for treble damages provided for by the Emergency Price Control Act of 1942, as amended.

(2) Persons who have any evidence of any violation of this order are urged to communicate with the District Office of the Office of Price Administration having jurisdiction over the area in which the violation occurred.

(j) *Posting of maximum prices; sales slips and receipts.* (1) Every dealer subject to this order shall post all of the maximum prices established hereby which apply to the types of sales made by him in his place of business in a manner plainly visible to and understandable by the purchasing public and shall keep a copy of this order available for examination by any person during ordinary business hours. In the case of a dealer who sells directly to consumers from a truck or wagon, the posting shall be done on the truck or wagon. All postings shall include the relevant terms of sale.

(2) Every dealer selling fuel for sales of which a maximum price is set by this order shall give to each purchaser an invoice or similar document showing:

(a) The date of the sale or delivery, the name and address of the dealer and of the buyer, the kind, size and quantity of the solid fuel sold, the price charged, and the terms of sale; and

(b) Separately stating any special services rendered and other charges made and the amount charged therefor. COLUMBIA GAS & ELECTRIC CORP. AND DAYTON POWER AND LIGHT CO.

ORDER CLOSING RECORD AND RESERVING JURISDICTION

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 7th day of June 1946.

Columbia Gas & Electric Corporation ("Columbia"), a registered holding company and a subsidiary of The United Corporation ("United"), also a registered holding company, and Columbia's public utility subsidiary, The Dayton Power and Light Company ("Dayton"), having filed a joint application-declaration and amendments thereto pursuant to the Public Utility Holding Company Act of 1935 with respect to, among other things, the sale by Columbia of 1,530,000 shares of common stock, \$7 par value, of Dayton in accordance with the competitive bidding requirements of Rule U-50; and

The Commission having, by order dated May 23, 1946, granted the application and permitting the declaration to become effective, subject, however, to a reservation of jurisdiction over the price to be paid Columbia for the Dayton common stock and the underwriters' spread and its allocation and all legal fees and

other expenses to be paid in connection with the proposed transactions; and

Applicant and declarant having, on June 6, 1946, filed a further amendment to the application-declaration stating that Columbia had offered the common stock of Dayton for sale, pursuant to the competitive bidding requirements of Rule U-50, and had received the following bids:

Bidder	Price per share to company
Blyth & Co., Inc., and Mellon Securities Corp.....	\$33.639
Morgan, Stanley & Co. and W. E. Hutton & Co.....	30.6399

The amendment further stating that Columbia has accepted the bid of Blyth & Co., Inc., and Mellon Securities Corp. for the common stock of Dayton, as set out above, and that the stock will be offered for sale to the public at a price of \$35.75 per share resulting in an underwriters' spread of \$2.111 per share; and

The Commission having examined the amendment and having heard further testimony and oral argument with respect to the bids submitted and having on June 6, 1946, issued its memorandum opinion concluding that, in view of the difficult questions raised under the Public Utility Holding Company Act of 1935 and the further complications which might result if certain indicated violations of the Securities Act of 1933 were established, it would be inadvisable to enter a definitive order under the Public Utility Holding Company Act of 1935 prior to 8:00 p. m., e. d. s. t., of that date, the time of expiration of the underwriting contract; and

The Commission having this day been advised of an extension of the underwriting contract for a period of twenty-four hours until 8:00 p. m., e. d. s. t., June 7, 1946; and

The Commission having further examined the record in the proceedings under the Public Utility Holding Company Act of 1935 and now being satisfied that the applicable requirements of such Act have been met, and being further satisfied that any violations of the Securities Act of 1933 which may have occurred would not require denying the application or withholding effectiveness of the declaration filed under the Public Utility Holding Company Act of 1935;

It is ordered, That the record reopened by Commission's order dated June 6, 1946, be, and the same hereby is, closed except with respect to legal fees and other expenses to be paid in connection with the proposed transaction, as to which matters jurisdiction was heretofore reserved.

It is further ordered, That the jurisdiction heretofore reserved with respect to the price to be paid Columbia for the Dayton common stock and the underwriters' spread and its allocation be, and the same hereby is, released, and that said application and declaration, as amended, be, and hereby is, granted and permitted to become effective, respectively, subject, however, to the terms and conditions prescribed in Rule U-24.

An opinion will issue in due course.

By the Commission.

AMERICAN GAS AND ELECTRIC CO. AND OHIO POWER CO.

ORDER GRANTING APPLICATION

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 7th day of June, A. D. 1946.

American Gas and Electric Company ("American"), a registered holding company, and its subsidiary, Ohio Power Company ("Ohio Power"), having filed an application and amendments thereto pursuant to the Public Utility Holding Company Act of 1935 and the Rules and Regulations promulgated thereunder with respect to the following transactions.

American is the owner of all the presently outstanding 4,792,952 shares of no par value common stock of Ohio Power. American proposes to purchase from Ohio Power and Ohio Power proposes to sell to American 200,000 shares of no par value common stock of Ohio Power for a cash purchase price of \$4,000,000. Ohio Power proposes to apply the proceeds from the sale of said common stock together with treasury cash to the payment of its presently outstanding bank loans in the principal amount of \$4,750,000. American, in effecting the proposed transactions, states that it intends to utilize \$3,441,266 of the proceeds from the sale of its holdings of the common stock of The Scranton Electric Company together with \$558,734.00 of its general corporate funds.

Ohio Power requests that the requirement to increase its earned surplus by \$1,000,000 per year through the year 1948 contained in the Commission's order dated March 26, 1941, be removed concurrently with the payment of said bank loans. The application states the consummation of the proposed transactions is contingent upon the approval by the Commission of the above request by Ohio Power.

The application states that the Public Utilities Commission of Ohio which has jurisdiction over the proposed issuance and sale of common stock and the use of the proceeds thereof has approved the proposed transactions.

American has requested that the Commission enter an order reciting that the proposed use by American of \$3,441,266 of the proceeds of the sale by American of the common stock of The Scranton Electric Company for the proposed purchase by American from Ohio Power of the said 200,000 shares of no par value common stock of Ohio Power for a cash purchase price of \$4,000,000 is necessary and appropriate to the integration or simplification of the Holding Company System of which American is a member and neces-

sary or appropriate to effectuate the provisions of section 11 (b) of the act, and that such order conform to the pertinent requirements of sections 371 and 1808 of the Internal Revenue Code, as amended, and contain the recitals, specifications and itemizations therein required.

Said application having been filed on May 17, 1946, and said amendments having been filed on May 22, 1946, and June 6, 1946, and notice of said filing having been duly given in the form and manner prescribed by Rule U-23 of said act and the Commission not having received a request for a hearing with respect to said application within the period specified in said notice, or otherwise, and not having ordered the hearing thereon; and

The Commission finding that the proposed transactions hereinabove mentioned satisfy the requirements of the provisions of the act and the rules thereunder, insofar as they are applicable, and that it is appropriate in the public interest and the interest of investors and consumers that said application be granted and that the effective date therein be advanced:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of said act and subject to the terms and conditions prescribed in Rule U-24 that the aforesaid application be, and the same hereby is, granted.

It is further ordered, That, upon consummation of the proposed transactions, the dividend restriction with respect to the common stock of Ohio Power contained in the order of the Commission dated March 26, 1941 be modified to eliminate therefrom the requirement that Ohio Power increase its earned surplus by \$1,000,000 per year for the years 1946-1948, inclusive.

It is further ordered and recited, That the use by American of the balance of \$3,441,266 of the proceeds of the sale of the common stock of The Scranton Electric Company for the purchase of shares of the common stock of the Ohio Power Company is necessary and appropriate to the integration or simplification of the Holding Company System of which American is a member, and necessary and appropriate to effectuate the provisions of section 11 (b) of the Public Utility Holding Company Act of 1935.

CAMBRIDGE ELECTRIC LIGHT CO. AND NEW ENGLAND GAS AND ELECTRIC ASSN.

NOTICE OF FILING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 10th day of June 1946.

Notice is hereby given that a joint application-declaration has been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 by New England Gas and Electric Association (New England), a registered holding company, and its subsidiary, Cambridge Electric Light Company (Cambridge); and

Notice is further given that any interested person may, not later than June 21, 1946, at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be held on such matter, stating the reason for such request and the nature of his interest, or may request that he be notified if the Commission should order a hearing thereon. At any time there-

after such application-declaration, as filed or as amended, may be granted or permitted to become effective as provided in Rule U-23 of the Rules and Regulations promulgated pursuant to said Act, or the Commission may exempt such transactions as provided in Rules U-20 (a) and U-100 thereof. Any such request should be addressed: Secretary, Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania.

All interested persons are referred to said application-declaration which is on file in the offices of said Commission, for a statement of the transactions therein proposed which are summarized below:

Cambridge proposes to issue its notes payable to The First National Bank of Boston in amounts not exceeding in the aggregate \$3,338,000, all of such notes to be issued and dated prior to March 31, 1948, in such denominations as Cambridge shall elect at the time of issue to mature not later than December 31, 1951, and to bear interest at a rate not exceeding 2% per annum.

Cambridge has presently outstanding indebtedness aggregating \$500,000 due The First National Bank of Boston, represented by notes maturing June 30, 1946. The new notes will be issued to retire said existing notes maturing June 30, 1946, and thereafter in such amounts as may be necessary to pay for proposed additions and betterments to the plant and property of Cambridge.

As soon as the loans made by The First National Bank of Boston shall aggregate \$1,000,000 and completed fundable additions to plant are at least \$1,000,000, Cambridge will issue and sell additional shares of its capital stock sufficient to provide \$1,000,000, which cash will be applied to the reduction of its note indebtedness. Under the terms of the loan agreement with The First National Bank of Boston, New England will at that time purchase such additional capital stock when the same has been duly authorized and issued. It is the further intention of Cambridge that the remainder of the temporary borrowings will eventually be replaced by an issue of first mortgage bonds.

The application by Cambridge is filed pursuant to section 6 (b) for exemption from the provisions of section 6 (a) of the act of the issue and sale of the notes payable in the aggregate amount of \$3,338,000. New England has joined in the filing under section 12 (f) of the act by reason of its participation in the loan agreement with The First National Bank of Boston; it agrees therein, subject to approvals required of regulatory authorities, to purchase the new additional shares of capital stock of Cambridge to be issued in the future.

By the Commission.
