Headquarters Eighth United States Army
Yokohama, Honshu, Japan
270001 March 1950

Operation Plan)
)
Number 3)

Map: Japan, Special Strategic Map, 1:3,500,000.

Task Organization:

a. British Commonwealth Occupation Forces - Lt Gen H. C. H. Robertson

b. 1st Cavalry Division (Infantry) - Maj Gen H. P. Gay

c. 7th Infantry Division - Maj Gen D. G. Barr

d. 24th Infantry Division - Maj Gen W. F. Dean

e. 25th Infantry Division - Maj Gen W. B. Kean

f. Yokohama Command - Brig Gen C. Garvin

g. 40th AAA Brigade - Col M. C. Handwerk

h. Kobe Base - Col W. A. Collier

1. a. Intelligence: Annex 1 (Intelligence).

b. Friendly Forces: Annex 2 (CIC Emergency Plan).

2. Missions: This plan is concerned primarily with the maintenance of security of the Occupation Forces and their installations, in the event of civil disturbances. Such disturbances may be in the form of civilian riots, demonstrations against occupation forces, open conflict between civilian groups, or attacks on the occupation forces by organized civilians or quasi-military forces. Civil disturbances and infractions of Japanese law will normally be handled by civil police. Any element of occupation forces, when confronted or threatened with violence against itself, will act promptly on its initiative to prevent or quell such violence. Offensive action will be resorted to only when justified by the commission of hostile acts against the lives or property of the occupation forces, personnel attached thereto, or installations protected by such forces. The force employed will be the minimum required to attain the objective. It is desired that all troops clearly understand this policy pertaining to offensive action.

3. Tasks for Subordinate Units:

a. Commanders of Eighth Army units will coordinate their alert plans with local commanders of Air Force, Naval, and Far Eas Command installations. Ground Forces will provide additional protection to those installations and to hospitals, money printing plants, supply installations, signal communications facilities, ar such other installations as may require additional protection to ensure continued functioning during any emergency. Direct communi cation is authorized between commanders concerned. If matters arise which cannot be resolved locally, they will be referred to this headquarters for decision.

b. The General Officer Commanding, British Commonwealth Occupation Force, the Commanding Generals, 7th Infantry Division, 24th Infantry Division, 25th Infantry Division and the Commanding Officer, Eta Jima School Command, are responsible for action in accordance with this plan within their areas of responsibility. The Commanding General, 1st Cavalry Division (Infantry) is respons ble for action in accordance with this plan within his area of

DECLASSIFIED
Authority NND975029

Operation Plan Number 3, Contd

responsibility except as indicated below:

(1) The Commanding Generals, Headquarters and Service Group, General Headquarters, Far East Command, and Yokohama Command are responsibile for action, in accordance with this plan, in the event of "minor emergency" (paragraph 3x(2)) in the metropolitan areas of Tokyo and Yokohama respectively.

(2) The Commanding General, 1st Cavalry Division (Infantry) is responsible for action, in accordance with this plan, in the event of "limited" or "major emergency" (paragraph 3x(2)) in the metropolitan areas of Tokyo and Yokohama.

(3) Annex 6 (Tokyo-Yokohama Plan).

c. Those units under the control of the Commanding Officer, Kobe Base, will function under the tactical command of the Commanding Officer, Kobe Base, and will prepare their plans for emergency action in accordance with his directive. The CIC unit in the Kobe Base area will coordinate its plan with the Commanding General, 25th Infantry Division. The Commanding Officer, Kobe Base, will base his plans on those of the 25th Infantry Division, and will function under the command of the Commanding General, 25th Infantry Division when emergency alert action is required. The Commanding General, 25th Infantry Division will assure himself that during an emergency the logistical functions of Kobe Base are disrupted as little as possible and, when such disruption occurs, that the return to normal functions is accomplished with a minimum of delay.

d. Area commanders listed in paragraph 3b are responsible for coordinating the alert plans of units of Eighth Army located within their areas of responsibility, except for the following units whose plans will be coordinated by:

(1) This headquarters, for the 40th Antiaircraft Artillery Brigade.

(2) Air base commanders, for Eighth Army units at air bases.

x. (1) In the coordination of plans prescribed herein, it is desired that the technical missions of the units concerned be interferred with as little as possible.

(2) In the event of civil disturbance or threatened violence to occupation personnel or installations, prior to declaration of an emergency by this headquarters or by the Supreme Commander for the Allied Powers, unit commanders of areas affected will take the necessary action to:

(a) Keep the next higher echelon of command informed of the situation.

(b) Strengthen unit security.

(c) Maintain surveillance at the scene of disturbance.

(d) Alert subordinate units for possible emergency action.

DECLASSIFIED
Authority NND975029

Operation Plan Number 3, Contd

(3) Emergencies are classified according to the ability of Japanese governmental agencies to continue functioning. This classification is dictated by the character and severity of the disturbance and, therefore, determines the degree of action of occupation forces. Classes of emergency and action to be taken by troops are as follows:

(a) Minor emergency:

Japanese Government agencies remain capable of functioning. Disorders are characterized by isolated revolts against constituted authority. These disorders fall into two categories as outlined in subparagraphs 1 and 2 below. Upon recommendation of commanders listed in paragraph 3, above, this headquarters may declare, in any defined area, a state of "minor emergency" under conditions outlined in subparagraph 1 below, and with the Supreme Commander for the Allied Powers' approval in subparagraph 2 below.

1. If the disturbance consists of actions against occupation forces, local commanders designated by division commanders will take immediate action to provide security and execute aggressive action to seek out, disorganize, and apprehend the principals in such activities with minimum involvement of the civilian population. Legal action against individuals involved in disturbances of this type is a responsibility of the occupation forces.

2. If the revolt consists of violence between elements of the civilian population or against the Japanese government, the civil police is the responsible law enforcement agency. Local commanders will maintain continuous surveillance and prepare to intervene upon receipt of orders to prevent actions which might jeopardize the occupation forces and, when directed, to protect the lives and property of innocent civilians. Troops will not intervene or be called to the scene of the disturbance or potential disturbance without authority of this headquarters, as directed by the Supreme Commander for the Allied Powers, unless lives or property of the occupation forces and personnel attached thereto or installations protected by such forces have been molested or are in extreme danger.

(b) Limited emergency.

1. Japanese Government agencies have been destroyed in a certain area or so weakened that they can no longer function properly. Upon declaration by the

DECLASSIFIED
Authority NND975029

Supreme Commander for the Allied Powers of a state of "limited emergency," this condition becomes effective in a defined area, and a directive is issued to the occupation forces to establish direct military government in the area. Annex 8 (Direct Military Government).

2. Occupation forces in the area assume control of existing agencies of the Japanese Government and utilize them to the maximum for the duration of the emergency. This headquarters will issue necessary instructions, subsequent to a declaration by the Supreme Commander for the Allied Powers, outlining the actions required of troops in the affected area.

3. In the event of "limited" emergency, the civil affairs teams in the affected area will pass immediately to the operational control of the division commander exercising tactical responsibility for the affected area.

(c) Major emergency.

1. The Supreme Commander for the Allied Powers may declare a state of "major emergency," in a defined area, upon notification by this headquarters that responsibilities assigned under a state of "limited emergency" cannot be carried out with forces available in the general area.

2. This headquarters will issue orders for the conduct of tactical operations as coordinated with Commanding General, Far East Air Forces, and Commander Naval Forces Far East. Division commanders will ensure that each regimental or comparable commander having area responsibility prepares plans for the security of his area. These plans will provide for general defense based on logical contingencies and will include consideration of important terrain features, routes for movement, and occupation installations within the area.

(4) Eighth Army signal installations and detachments, such as transmitter and receiver sites, VHF relay stations, et cetera, will be provided security by the unit having tactical responsibility for the area in which the installations are located; however, operational control of the installations and detachments will remain with this headquarters. (See Annex 5 for list of stations.)

(5) The following general areas, listed in order of importance, are considered as vital strategic areas to be held by occupation forces at all costs. Specific areas and installations within the general areas are considered to be of equal importance. (Annex 7 (Map, Vital Strategic Areas))

Headquarters Eighth United States Army
Yokohama, Honshu, Japan
270001 March 1950

Annex 1 (Intelligence) to Operation Plan Number 3

1. Situation Forecast.

a. General Situation: After more than 4 years of occupation it is apparent that the Japanese as a nation have accepted the occupation forces with a sincere spirit of co-operation. There is, however, an undercurrent of opposition which is seldom expressed openly; it is manifest in criticism of the Japanese Government, which functions under directives issued by and within the limits set down by the Supreme Commander for the Allied Powers. Much of this criticism can be attributed to some of the nation's new leaders who lack the experience and vision required to properly conduct the affairs of industry and government. This opposition is also manifest in the nuisance strikes by some of the larger labor unions. This resistance, with few exceptions, can be traced to the Japan Communist Party which uses these labor organizations for fronts. Because of the present low standard of living, the strained national economy, increasing pressure of a constantly growing population, and a high rate of unemployment, many Japanese have been attracted to Communism. Although the Japan Communist Party lost considerable prestige and power in the year 1949, it is at present busily engaged in trying to recoup its losses, and as long as the above conditions exist, it can be expected to flourish and remain a constant threat to the occupation.

(1) Potential participants in civil disturbances:

(a) Political parties, religious groups, ex-military personnel and labor organizations all represent potential threats if they should come under the control of ruthless political or military leaders.

(b) Communist element.

The ultimate objective of the Communist Party is the overthrow of the present form of government and the establishment of the communist system of government. Basically the Party's mission is one of obstruction, undermining the economic and political system of the nation and discrediting the occupation force's effort to establish a free, democratic form of government in Japan. The Communists give no consideration to the improvement of the existing government, but operate on the basic premise that all other forms of government must be defeated and replaced by the communist system. They feel that any means used to establish their belief or system is justified by the end. The Japan Communist Party has attempted to extend its influence into every level of Japanese life, and is ready to expand when dissension and unrest allow such a move. Recently there has been definite

DECLASSIFIED
Authority NND975029

confirmation of the fact that the Japan Communist Party receives its orders from the Kremlin. It can be expected that neither the leaders in the Cominform nor the recently chastised leaders in the Japan Communist Party will allow any respite in the struggle to discredit or overthrow a form of government so diametrically opposed to their own, and that the Japan Communist Party will remain an ever present and increasing threat to the occupation forces.

(c) Koreans

At present there are more than 600,000 Koreans residing in Japan. This element of the population is easily aroused and may be used as a tool by the Communist Party in the attainment of its objectives. The Koreans in Japan engage in many illegal activities and are a source of constant concern to the Japanese law enforcement agencies. Although Koreans represent only seven-tenths of one percent of the population of Japan, they have committed seven times the number of crimes as the remainder of the population. The disbanding of Korean terrorist organizations, which included all leftist and some rightist groups, has lessened the capability of this element of the population for organized opposition to the Japanese Government, but there still remains a possibility of further organization and mass resistance.

(2) Capabilities.

(a) The Communists are capable of expanding simple forms of civil disturbances, once begun, to proportions beyond the capabilities of the Japanese police to control.

(b) The Communist elements could expand a labor dispute into a national strike. All the Communist dominated and influenced unions could have a coordinated, simultaneous action that, by work stoppage, sabotage, mass resignations, et cetera, could interrupt or halt a high percentage of the nation's industries and public services, and completely paralyze the Japanese economy.

(c) In the areas of Kanto, Kansai, Southern Honshu and Northern Kyushu, where the Korean population is concentrated, the Koreans are capable of developing situations beyond the control of the local police at any time.

DECLASSIFIED
Authority NND975029

Operation Plan Number 3, Contd

(d) Conclusions:

There will be no national uprising in Japan as long as the occupation forces remain. If the Japanese Government takes appropriate action in each situation as it develops, there will be no occasion for occupation troops to be employed on a national scale.

2. Intelligence:

a. Support for CIC units.

The General Officer Commanding, British Commonwealth Occupation Forces, commanders of divisions, Yokohama Command, Kobe Base and Eta Jima School Command will be prepared to furnish support to CIC units on call. This support will include assistance in apprehending and guarding certain potentially subversive personnel until arrangements have been made for their dispostion, assistance in establishing emergency communications, and such other assistance as may be required. Direct communication with local CIC commanders is authorized and encouraged for the development of plans to effect this support.

b. Information will be disseminated to Air Force Units:

(1) By AC of S, G-2, this headquarters, to A-2, Fifth Air Force.

(2) By AC of S, G-2, 25th Infantry Division, to A-2, Fifth Air Force.

c. Information will be disseminated to Navy units:

(1) By AC of S, G-2, this headquarters, to Yokosuka Naval Base, Fleet Activities Operations, or Officer of the Deck.

(2) By AC of S, G-2, 24th Division, to Fleet Activities, Sasebo.

Annex 2 (CIC Emergency Plan) to Operation Plan Number 3

1. The following are contemplated plans for CIC during operations under emergency conditions.

2. CIC PLAN

a. Minor emergency.

(1) Disturbances directed against occupation forces or their installations.

(a) Provide self-security for personnel and records.

(b) Effect liaison with S-2's of nearest tactical units, civil affairs units, and provost marshals.

(c) Carry out the mission assigned to CIC with respect to the identification and apprehension of ring-leaders responsible for uprising.

(d) Make recommendations to S-2's of tactical commands deemed necessary by the CIC unit commander to insure protection from sabotage of systems of communications and other vital installations both civil and military.

(e) Determine through investigation the who, what, why, when, where and how involved in the disturbance and keep tactical commanders currently informed.

(2) Disturbances between elements of the civil population or directed against the Japanese Government. Immediately place in effect policies enumerated in preceding paragraph with the exception of subparagraph (c). In an uprising involving only Japanese subjects and interests, whether individuals or governmental, the responsibility for the identification and apprehension of ringleaders is a proper function of Japanese authority and becomes a matter within the jurisdiction of CIC only when actions are directed against the occupation forces or their installations. CIC will, however, gather information on ringleaders for future reference.

b. Limited emergency.

(1) If the Supereme Commander for the Allied Powers should declare a state of limited emergency to be existent in a certain area of Japan, the resultant actions and policies of CIC will be:

(a) CIC personnel and equipment in the affected area would, at the discretion of this headquarters, be temporarily attached to such tactical units as may be directed.

DECLASSIFIED
Authority NND975029

The Commanding Officer, 441st CIC Detachment, will maintain close liaison with G-2, this headquarters, and if requested, will arrange for augmentation of CIC personnel in the area, or areas designated.

(b) CIC personnel, under the general supervision of the G-2 or S-2 of the units to which they may be attached will carry out the CIC mission stated in paragraph 3, Circular 2, General Headquarters, Far East Command, 6 January 1950, Subject: "Counter Intelligence Corps."

(c) CIC will maintain close liaison with G-2, this headquarters, Civil Affairs units and office of the Provost Marshall.

(d) When CIC detachments are attached to tactical units of Eighth Army, all instructions from the 441st CIC Detachment, other than routine administration matters such as promotions, et cetera, will be passed through the Assistant Chief of Staff, G-2 this headquarters.

(e) CIC operational reports will be submitted to the Assistant Chief of Staff, G-2 or S-2 of the unit to which attached. Information copies of operational reports and administrative reports will be forwarded through CIC channels, in accordance with paragraph 7, Circular 2, General Headquarters, Far East Command, 6 January 1950, subject: "Counter Intelligence Corps."

c. Major emergency.

(1) The Commanding Officer, 441st Counter Intelligence Corps Detachment, upon declaration of "major emergency" by the Superme Commander for the Allied Powers which authorizes the conduct of full-scale military operations under provisions of FM 27-10, "Rules of Land Warfare," in order to quell widespread serious disorders by an organized or quasi-organized enemy, or a general uprising among the inhabitants, will:

(a) In full coordination with G-2, this headquarters, effect such redeployment and reinforcement of CIC personnel and equipment as is deemed necessary in defense of vital strategic areas which must be retained at all costs.

(b) Will temporarily attach CIC personnel to tactical units in the sensitive areas.

(c) Will, through channels, supply information secured through CIC sources to this headquarters to provide data for preparation of weekly report to the Supreme Commander for the Allied Powers relative to the extent of civil disturbances, progress in

DECLASSIFIED
Authority NND975029

Operation Plan Number 3, Cont'd.

quelling civil disturbances, estimate of probable duration of the emergency and other significant matters of CIC nature.

(2) Duties in theaters of operations. Pursuant to the general plan of the theater commander, the operational duties of counter intelligence corps personnel include those directed in letter, AG 322 CIC (31 Oct 44) OB-S-B-M.

(a) The primary duty of counter intelligence corps personnel in the forward combat areas is to secure counterintelligence targets in the area of the objective. Foremost among these targets are:

1. Known and suspected enemy agents.

2. Known enemy collaborationists, sympathizers, and other persons whose presence menaces the security of the allied forces.

3. Offices formerly occupied by the enemy intelligence services or enemy police organizations and any documents they contain.

4. Offices of local semi-military organizations and collaborationist bodies and their records.

5. Centers of communications.

6. Buildings, billets, and installations known or suspected to contain documents of counterintelligence value.

(b) Secondary duties of counter intelligence corps personnel in forward combat areas are:

1. Making security checks in cooperation with the military police who are marshalling refugees and other civilians arriving from enemy occupied territory.

2. Contacting local authorities and persons known to be friendly to the allied cause in order to secure all possible counter intelligence information

3. Advising and assisting in securing against sabotage all public and private installations, the continued operations of which are essential to the allied forces.

4. Checking upon the ovservance by civilian population of all security provisions contained in the proclamations and orders issued by civil affairs detachments.

DECLASSIFIED
Authority NND975029

Operation Plan Number 3, Cont'd.

5. Assisting in the discovery and collection of any hidden armament or equipment which has not been surrendered or reported in accordance with ordinances.

6. Seizing of civil communications and arranging for their protection against sabotage until taken over by authorized signal communications personnel as provided in operational orders. The records of such installations are of prime importance and should be secured, guarded, and turned over to the proper authorities.

7. Seizing and impounding all civilian and captured enemy mail.

8. Advising on the immediate establishment of guards at captured ordnance and ammunition dumps, especially those which may be accessible to the local population.

9. Suspending publication of newspapers and other periodicals.

10. Prevent the looting and destruction of enemy documents and material by our own troops.

11. Transmitting to civil affairs, provost marshal and military police personnel all information on matters within their purview, such as civilian controls, adequacy and extent of cooperation of civil police, and the extent of disorder, looting and sabotage.

(3) Operations.

(a) Counter intelligence corps personnel will be encouraged to exercise initiative within the policies and directives issued by higher headquarters. In the performance of their duties they will be permitted to operate with minimum restrictions of movement. When consistent with the policies of the appropriate command, counter intelligence corps personnel will not be delayed in the execution of their assigned duties by the observance of standard military customs or prohibitions, nor by the military police or other military agencies. Counter intelligence corps badges and credentials will be honored at all times.

(b) In order that the mission of the counter intelligence corps may be performed more effectively, it is essential that the commanding officer of each detachment have full authority to direct the movement of his personnel within the area of his jurisdiction upon verbal authorization, without

DECLASSIFIED
Authority NND975029

either previous or subsequent written order.

(c) The normal procedure to be adopted in conducting counter intelligence investigations will be as follows:

1. Personnel assignments for investigations will be made by the counter intelligence corps detachment commander concerned.

2. Counter intelligence corps personnel will report to the unit commander, or his representative, and the unit intelligence officer,.identify themselves, and state the nature of their business. Upon completion of the investigation, counter intelligence corps personnel will report to the unit intelligence officer and the unit commander.

3. Copies of investigation reports will be forwarded to the commanding officer, counter intelligence corps detachment, in the prescribed numbers. Tactical commanding officers may request investigations to be made by the counter intelligence corps personnel and will then be furnished copies of reports. Action on such reports will be the function of the commanding officer of t the tactical unit concerned.

(d) Counter intelligence corps personnel are authorized, at the direction of the counter intelligence corps detachment commander to wear civilian or military clothes.

ANNEX 3 (Logistic Responsibilities)
to Operation Plan Number 3

1. Logistic Responsibilities.

a. This headquarters will:

(1) Render logistical support to all United States Army and United States Air Forces in Japan, except for the provision of Air Force technical supplies and air ammunition.

(2) Place necessary requisitions on other theaters, Zone of Interior services or headquarters.

(3) Coordinate and be responsible for delivery of supplies made available from all sources to support units.

(4) Determine and establish stock levels within limits prescribed by higher headquarters.

(5) Obtain and allocate supplies, services, labor and real estate from Japanese sources.

(6) Establish operational control of assigned vessels.

b. Division commanders will:

(1) Continue logistic functions now assigned.

(2) Install and operate necessary railheads.

c. Commanding Officer, Kobe Base will:

(1) Continue logistic functions now assigned.

(2) Install and operate necessary railhead.

(3) Operate the Port of Kobe as directed by this headquarters.

d. The Commanding General, Yokohama Command will:

(1) Continue logistic functions now assigned.

(2) Operate the Port of Tokyo-Yokohama as directed by this headquarters.

e. The Commanding General, Far East Air Forces:

(1) Continues to requisition on this headquarters for all supplies except Air Force technical supplies and Air Force ammunition for United States Air Force units in Japan.

(2) Continues issue of Air Force technical supplies to ground force units as required.

f. The General Officer Commanding, British Commonwealth Occupation Force, will:

(1) Continue logistical functions now assumed.

(2) Install and operate necessary railheads.

DECLASSIFIED
Authority NND975029

ANNEX 3 to Operation Plan Number 3 (contd)

2. Supply Levels.

This headquarters will continue to maintain levels of supply set forth in current administrative orders.

3. Transportation.

a. Water.

(1) Commander-in-Chief, Far East, arranges for augmentation of Commander, Naval Forces, Far East, when required.

(2) The SCAJAP shipping operating under Commander, Naval Forces, Far East, including Japanese manned LST's and converted Liberty ships, becomes immediately available for employment in support of this plan.

(3) Shipping procedures will continue as outlined in current directives.

b. Rail.

(1) To the maximum extent possible, rail transportation will continue to operate under present arrangements.

(2) Requests for train guards will be made to division commanders.

(3) Shipping procedures will continue as outlined in current directives.

4. Evacuation.

Evacuation will be in accordance with policies in effect at the time of the emergency, or placed in effect by reason of the emergency. (Medical Plan, Annex 4)

5. Reports.

G-4 periodic reports as outlined in FM 101-5 will be submitted as of 1800 daily beginning on the date this plan is implemented.

6. Burials.

a. In accordance with existing policies.

b. If the necessity arises for temporary burials, they will be in accordance with FM 10-63.

7. Supplies.

a. Assault and pioneer supplies.

(1) The supplies itemized in Appendix 1, "Class IV Assault and Pioneer Supplies for One Regimental Combat Team," may be issued upon direction of division commanders.

(2) The above supplies and one unit of Bailey Bridge will be in the hands of each division at all times.

b. Gas masks. Will be issued to troops in dangerous or critical areas upon direction of division commanders or this headquarters.

DECLASSIFIED
Authority NND975029

8. Civilian Relief Supplies. Release of civilian relief supplies will not be made unless authorized by this headquarters. Field commanders will report critical areas.

9. Resupply of Units. By requisition in accordance with announced policies.

10. Water.

a. Commanders will immediately seize and safeguard all sources of water supply to ensure against contamination.

b. Requirements for additional water purification equipment will be submitted to this headquarters by radio.

Annex 4 (Medical) to Operation Plan Number 3

1. General:

This medical plan is based upon declaration of minor, limited or major emergency as outlined in basic plan. The occupational mission and current requirements of existing medical installations do not permit practice operations for training purposes.

2. Concepts:

a. In the event of a minor emergency, medical installations will continue their occupational mission and furnish hospitalization facilities for such casualties as may occur among occupational personnel including those persons currently authorized medical service in occupational facilities. The medical installation commander will request the area commander to provide additional protection as is indicated by the situation and the extent of the emergency. The medical installation commander will advise this headquarters, attention: Surgeon, of his requirements for additional hospitalization or evacuation facilities and will advise the Commanding Officer, Yokohama Medical Depot, of additional medical supply requirements. Organic medical units of the tactical organizations will remain under the jurisdiction of the tactical commander.

b. In the event of a limited or major emergency there will be an immediate requirement for expanding hospitalization facilities to care for casualties and to clear medical installations operated by tactical organic medical units to assure their mobility. Upon declaration by the Supreme Commander for the Allied Powers of a state of limited or major emergency, the medical installations in the affected area, except units as noted in paragraph c below, are immediately attached for operational control to the division or area commander specified in basic directive. The division or area commander will:

(1) Advise this headquarters, attention: Surgeon, of his requirements for additional hospitalization or evacuation facilities outside of the area.

(2) Advise the Commanding Officer, Yokohama Medical Depot, of additional medical supply requirements.

(3) Provide additional protection for the medical installations in his area when indicated by the situation and the extent and duration of the emergency.

c. General hospitals and the 406th Medical General Laboratory will remain under the control of this headquarters. Operational control of medical installations exercised by division or area commanders in the event of implementation of this plan will revert to the headquarters previously exercising operational control upon termination of the emergency.

3. Expansions:

a. Organizations listed below will be prepared to expand facilities in increments when required to a maximum bed capacity not to exceed that shown below:

DECLASSIFIED
Authority NND975029

Operation Plan Number 3, Contd

Hospital	Location	Present Bed Capacity	Maximum Expansion Capacity
Tokyo GH	Tokyo, Honshu	1000	1500
Osaka GH	Osaka, Honshu	750	1500
361st SH	Tokyo, Honshu	500	750
155th SH	Yokohama, Honshu	500	750
118th SH	Fukuoka, Kyushu	500	750
172d SH	Sendai, Honshu	250	500
35th SH	Kyoto, Honshu	250	500
376th SH	Tachikawa, Honshu	200	300
161st SH	Sapporo, Hokkaido	200	300
5th SH	Irumagawa, Honshu	150	300
395th SH	Nagoya, Honshu	100	200
128th SH	Hara-Machida, Honshu	100	200
8th SH	Kobe, Honshu	100	200

b. Above expansions in the affected area will be accomplished upon direction of the division or area commander exercising operational control. Expansions not in the affected area or under operational control of division or area commanders will be accomplished upon direction of this headquarters.

4. Additional Medical Units or Newly Established Provisional Medical Units:

a. No additional medical units will be available or should be required under the estimated situation. The division or area commander will request this headquarters, to furnish additional medical support if the casualty rate and evacuation requirements exceed his available resources.

b. The division or area commander will request this headquarters, to furnish emergency surgical teams if the number of surgical cases in the affected area exceeds the local available resources.

c. The division or area commander will request this headquarters, to furnish such additional hospital care and ambulance or air evacuation facilities as are required by the situation.

d. This headquarters will furnish such facilities outlined above as the situation in other areas permits; will designate the receiving hospitals for patients evacuated from the affected area and maintain a bed credit regulating system to assure available hospital beds for all evacuees and be responsible for evacuation of casualties from the affected area to outer medical installation.

e. The Commanding Officer, Yokohama Medical Depot, is responsible for the medical supply logistical support of medical installations in the affected area.

5. Personnel:

Since no initial augmentation of personnel may be anticipated, maximum utilization of indigenous personnel including technicians and nurses' aides will be made.

DECLASSIFIED
Authority NND975029

Operation Plan Number 3, Contd

6. Medical Supplies:

Expansion units will be stored in the immediate vicinity of the hospitals concerned. Medical supply levels at medical installations within the affected area will be automatically suspended upon declaration of the emergency. Top priority will be given to delivery of medical supplies to the affected area.

Headquarters Eighth United States Army
Yokohama, Honshu, Japan
270001 March 1950

Annex 5 (Signal) to Operation Plan Number 3

1. a. Intelligence:

(1) Annex 1 (Intelligence).

(2) The occupation forces depend upon the Japanese commercial communications system and the loyalty of the Japanese communication workers to provide the greater part of the communication facilities throughout Japan. Minor acts of sabotage, such as the occasional cutting of cable lines, are an annoyance to the maintenance of communications at normal standards. These disruptions are seldom serious and usually require but a few hours to restore service to normal. However, concerted efforts at sabotage to vital installations or a general strike by the communication workers could disrupt communications extensively and force the occupation forces to resort to and depend entirely upon its tactical signal troops and their equipment. Communication systems thus established would be capable of providing only the minimum requirements of tactical commanders.

b. Existing communication systems, remaining intact, are adequate for all classes of emergency. Maintenance of these systems is essential to the occupation forces for normal functions and becomes increasingly essential during emergencies of any type. The increase of command and operational traffic coupled with anticipated communication disruptions will require strict control over the use of these facilities by all commanders.

c. Command Posts:

Eighth Army	-	Yokohama
British Commonwealth Occupation Forces	-	Kure
1st Cavalry Division (Infantry)	-	Asaka
7th Infantry Division	-	Sendai
24th Infantry Division	-	Kokura
25th Infantry Division	-	Osaka
Yokohama Command	-	Yokohama
40th AAA Brigade	-	Yokohama
Kobe Base	-	Kobe

2. Mission: Maintenance of adequate signal communications during all classes of emergency.

a. Eighth Army supplements the facilities of Far East Air Forces to the extent necessary to ensure provision of an integrated inter-communications system between air and ground forces in the objective area for such intelligence, supply point, liaison, line of communication defense, fighter control center and aircraft warning purposes as may be necessary. Arrangement of details of the communication support involved will be effected by direct communication with Eighth Army units and Far East Air Force units.

b. This headquarters provides, within capabilities, such assistance to the Commanding Officer, 71st Signal Service Battalion, on construction or installation, as may be requested.

SECRET

DECLASSIFIED
Authority NND975029

Operation Plan Number 3, cont'd.

3. a. The General Officer Commanding, British Commonwealth Occupation Forces, commanders of divisions, Kobe Base and Eta Jima School Command will provide security, to the extent practicable, to vital communication facilities within their areas of responsibility. Priority will be given to the security and continued operation of military facilities with emphasis placed on the radio relay (VHF) system. Plans for security of installations which are the resporsibility of Eighth Army signal units for operation and maintenance, will be coordinated with the commanding officer of the responsible unit. (See Appendix 2, Security of Vital Communication Facilities).

b. Commanding officers of Eighth Army signal units continue present missions and provide initial security for signal installations under their operational responsibility. Requests for assistance in the security of these installations will be made through this headquarters. Alert plans will be coordinated with the Signal Officer, this headquarters.

c. Commanding Officer, Eighth Army Signal Service Battalion, will coordinate the plans of the Post Signal Office, Yokohama Area, Eighth Army Training Film and Equipment Exchange, Eighth Army Photo Service Company, and the 8035th Signal Service Company (VHF).

x. All commanders of Eighth Army units will:

(1) Be prepared to provide emergency communications to augment those facilities remaining in operation in the event of the disruption of normal means.

(a) CW manual radio circuits and nets will be expanded with provisions made to handle high precedence traffic.

(b) Radio teletype (RTT), where available, and radio relay (VHF) systems with telegraph carrier equipment will be used to replace land line teletype circuits, thus reducing telephone traffic over the remaining voice circuits.

(c) Messenger service will be established as necessary.

(2) Commanders responsible for communications facilities will immediately survey damage to the communication system, salvage and expedite restoration of damaged equipment.

(3) Report to this headquarters, immediately:

(a) Incidents which are outside the capabilities of control or authority of the commander concerned to act.

(b) Attempts to and/or sabotage of facilities by subversive elements.

(c) Failure of Japanese communication workers to man important communication facilities.

4. Supply: No change.

SECURITY OF VITAL COMMUNICATION FACILITIES

1. Directive. The following paragraphs outline the procedure for ensuring security of vital communication facilities within Japan. Maximum measures will be taken by commanders to prevent sabotage to facilities currently utilized by the occupation forces, and to facilities which may in the future be converted to occupation use.

2. Operations. Security measures indicated below will be taken when the situation dictates:

a. Military communication facilities: Communication facilities such as radio transmitter and receiver stations, radio relay (VHF) terminal and relay stations, communication centers and telephone exchanges serving the occupation forces will be secured at all costs to prevent sabotage, unauthorized entry or any disruption of service. Signal unit commanders responsible for operation and maintenance of these facilities will provide initial security within their capabilities and will request additional assistance when required from units designated to provide security. Eighth Army signal unit commanders will make requests for assistance through this headquarters, attention: Signal Officer. (See inclosure 1 to this Appendix for locations of military communication facilities).

b. Japanese commercial communication facilities: Commanders concerned, within their area of responsibility, will take action to the extent practicable to prevent sabotage to those Japanese commercial communication facilities utilized, or which may in the future be utilized, by occupation forces. Japanese toll and central office telephone exchanges, telephone repeater stations, important cable routes, and cable terminal stations including submarine cable terminals will be provided security in accordance with the basic operation plan. (See inclosures 2 and 3 for Long Lines Route Map of Japan and Japanese Termination of Overseas Cables).

c. Japanese broadcasting system: This plan covers action to be taken under conditions of emergency as defined in basic operation plan, in order to ensure continued operation of elements of the Broadcasting Corporation of Japan considered essential to the attainment of occupational policies and objectives. This plan is designed for implementation only after noncompliance by the Japanese Government with an initial demand for provision of the broadcasting services considered essential. Action will be taken in accordance with this plan only upon direction of this headquarters.

(1) Minor emergency. No action to be taken in a minor emergency except for specific situations when directed by this headquarters.

(2) Limited emergency. The following action will be taken to the extent practicable for the studios and transmitter stations of all Japanese broadcasting stations, including central, local and minor stations:

(a) Provide security to prevent sabotage to studio and transmitter station equipment.

(b) Prevent the entry of unauthorized persons and provide protection for operating personnel as designated by this headquarters.

(c) Close stations, prevent operation and/or take transmitters off the air when directed by this headquarters. Incoming power to transmitters to above stations will be disconnected by opening switches or removing fuses.

DECLASSIFIED
Authority NND975029

Security of Vital Communication Facilities, Cont'd.

(3) Major emergency. Action, as outlined for limited emergency, will be taken in the case of studios and transmitter stations of central stations only. Other stations will be closed, transmitters taken off the air, incoming power disconnected, buildings and/or grounds locked or sealed to prevent further operation. Periodic visits will be made to ensure station is not operating.

(4) See inclosure 4, for location of Japanese broadcasting stations.

Headquarters Eighth United States Army
Yokohama, Honshu, Japan
270001 March 1950

Annex 6 (Tokyo-Yokohama Plan) to Operation Plan Number 3

1. General.

This directive is applicable to Eighth Army units located within the metropolitan TOKYO-YOKOHAMA area which is defined as the combined areas of jurisdiction of the Commanding General, Headquarters and Service Group, General Headquarters, Far East Command, and Commanding General, Yokohama Command.

2. Minor Emergency.

a. Area responsibilities are as shown in paragraph 3 of the basic plan.

b. In event of a riot or disorder, the immediate unit commander near whose area the riot occurs will promptly notify the appropriate metropolitan area commander and will take immediate action as outlined in the basic plan. Upon notification, the metropolitan area commander will assume responsibility for and take action within the provisions of this plan as dictated by the situation. If the metropolitan area commander is unable to accomplish his mission with troops currently available, he will make request to this headquarters for assistance.

c. When there is a possibility that all units in the TOKYO-YOKOHAMA metropolitan area may be employed, this headquarters will make available to the metropolitan area commanders concerned, upon request by these commanders, necessary additional troops. The Commanding General, 1st Cavalry Division (Infantry) will be prepared to furnish troops to metropolitan area commanders, upon orders from this headquarters, and will be prepared to furnish, on call by this headquarters, one platoon of tanks for duty in the TOKYO-YOKOHAMA area.

d. Pursuant to directive of the Commander-in-Chief, Far East, the Commanding General, Headquarters and Service Group, General Headquarters, Far East Command, is responsible for appropriate action in the event of civil disturbances in accordance with this plan in "minor" emergencies in the metropolitan Tokyo area. Direct communication between Commanding General, 1st Cavalry Division (Infantry) and Commanding General, Headquarters and Service Group, General Headquarters, Far East Command, is authorized in connection with surveillance and action reports pertaining to civil disturbances within the metropolitan Tokyo area. This headquarters is responsible for appropriate action in the metropolitan Tokyo area in event of civil disturbances of "limited" and "major" emergency. Commanding General, 1st Cavalry Division (Infantry) will be prepared to assume responsibility, on order from this headquarters, at any time subsequent to receipt of notification from this headquarters that a "minor" emergency exists in the metropolitan Tokyo area. Commanding General, 1st Cavalry Division (Infantry), will be prepared to establish direct liaison with the Commanding General, Headquarters and Service Group, General Headquarters, Far East Command, upon receipt of notification that a "minor" emergency exists in the metropolitan Tokyo area. This headquarters will ensure that emergency alert plans of 1st Cavalry Division (Infantry) and Headquarters and Service Group, General Headquarters, Far East Command, are coordinated to provide for orderly assumption of responsibilities outlined in this plan upon proclamation of a "limited" emergency in the metropolitan Tokyo area.

e. Commanding General, Yokohama Command is responsible for appropriate action in the event of civil disturbances in accordance

Operation Plan Number 3, Contd

with this plan in "minor" emergencies in the metropolitan Yokohama area. Direct communication between Commanding General, 1st Cavalry Division (Infantry) and Commanding General, Yokohama Command is authorized in connection with surveillance and action reports pertaining to civil disturbances within the metropolitan Yokohama area. Commanding General, 1st Cavalry Division (Infantry) will be prepared to establish direct liaison with the Commanding General, Yokohama Command, upon receipt of notification that a "minor" emergency exists in the metropolitan Yokohama area. This headquarters will ensure that emergency alert plans of 1st Cavalry Division (Infantry) and Yokohama Command are coordinated to provide for orderly assumption of responsibilities outlined in this plan upon proclamation of a "limited" emergency in the metropolitan Yokohama area.

3. Limited or Major Emergency.

In the event of "limited" or "major" emergency in the TOKYO-YOKOHAMA area, the Commanding General, 1st Cavalry Division (Infantry) is designated tactical commander, TOKYO-YOKOHAMA area to relieve the metropolitan area commanders and assume control of operations.

Headquarters Eighth United States Army
Yokohama, Honshu, Japan
270001 March 1950

Annex 8 (Direct Military Government) to Operation Plan Number 3

1. Direct military government will be established within the area of "limited emergency," as declared and defined by the Supreme Commander for the Allied Powers, and upon receipt by the responsible tactical commander of directives from this headquarters.

2. The Eighth Army directive implementing the Supreme Commander for the Allied Powers' declaration of "limited emergency" will delegate military government responsibility for the affected area to an appropriate subordinate occupation forces commander. To ensure prompt handling of emergencies, responsibility will be delegated to, but not below, the commanding general of a United States Army division or to the General Officer Commanding, British Commonwealth Occupation Force. The responsible commander becomes the military governor of the affected area and is vested with the powers and limitations specified in chapters 10 and 11, FM 27-10 as modified by Supreme Commander for the Allied Powers' policies.

3. The objectives of direct military government are:

a. To take over all phases of civil government where the Japanese civil government can no longer function effectively.

b. To return the directly governed areas to the responsible Japanese civil government at the earliest possible opportunity.

4. a. Existing responsible agencies of the Japanese Government, within the affected area, which are still capable of functioning effectively, will pass to the operational control of the military governor who will make maximum utilization of them for the duration of the emergency.

b. Control by military government will include but not be limited to supervision of political subdivisions, maintenance of law and order, supervision of courts, civilian supply, public health and sanitation, censorship, communications, transportation, public works and utilities, money, banking and public finance, price control and rationing, natural resources, commerce and trade, labor, custody of property, control of population movement, education, public welfare, and all other matters which are in the nature of civilian as distinguished from military matters.

5. a. Direct military government will be guided by principles and policies which have already been and may hereafter be enunciated by the Supreme Commander for the Allied Powers. When local conditions require any deviation from these adopted policies and the situation permits, a report will be made to this headquarters and specific authority requested for such variance. When emergency conditions require immediate action, without prior approval of this headquarters, a full report will be made.

b. On matters for which policies have not been established, the principles of FM 27-5 and FM 27-10 will apply.

6. Civil affairs agencies present in the affected area upon declaration of a "limited emergency" will pass immediately to the operational control of the designated military governor. Additional civil affairs personnel available will be attached as required. In the case of direct military government in the area of the British Commonwealth Occupation Force, the chief of the Chugoko Civil Affairs Region, in his own area of jurisdiction, will act as special staff advisor for military government matters on the staff of the responsible tactical commander.

SECRET

DECLASSIFIED
Authority NND975029

Operation Plan Number 3, Contd

7. a. Direct military government will not be continued longer than necessary. It will be terminated only by direction of the Supreme Commander for the Allied Powers.

b. Recommendations for the release of an area from a state of "limited emergency" will be made to this headquarters when the return to normalcy warrants.
