Epigaea repens (Trailing Arbutus). Ten thousand strong, healthy plants, grown under cultivation, are ready to fill your orders. Most failures in growing Arbutus have been due to orders being filled with wild plants. Our nursery grown plants, dug with a ball of earth, are quite sure to live, Arbutus requires acid soil and prefers partial shade.

Price: 3 \$1.50, 12 \$5.00, 100 \$35.00

WILDFLOWERS AND FERNS 1935

Hardy Plants in Rare, Unusual and Beautiful Varities for Your Wildflower Garden

SPECIAL DISCOUNT—Because of the shortness of the fall shipping season, together with the great amount of detail concerned in the handling of Wildflower and Fern orders, if you will mail us your order from this list, together with payment, in full, on or before August 15, 1935, you may deduct 10% from the purchase price.

How To Order Wildflowers— All prices are for plants f.o.b. Putney, transportation charges to be paid by the purchaser. Six plants of one kind will be sold at the dozen rate, fifty plants at the hundred rate. If a single plant of one kind is desired, take one-third the rate given for three and add five cents.

NEW PLANTS—Rare—Beautiful Offered for the First Time

Polemonium van bruntiae (American Jacob's Ladder), The rare American Jacob's Lad- der. 2-3 ft, tall with pale blue flowers in July. Described in "Wildflowers of New York"; "as beautiful as it is rare"
Arenaria stricta, A rare Sandwort with a
fountain of myriad white, starry flowers for sunuy crags and cliffs, May to July
Cerastium arvense (Starry Cerastium), A
low-growing Cerastium with large white, starry blossoms. May to June. Open Sun
Polygala senega (Seneca Snakeroot), Blos-
soms in early summer like white slate pencils, 6 to 10 inches tall. Partial shade
Houstonia longifolia (Longleaf Bluet), 6 in. plants bearing charming tubular white flowers throughout the summer
Primula farinosa (Birdseye Primrose).
Mealy grey leaves from which 5 to 8 in, stems bear lilac-colored flowers in May and early June.
Habenaria lacera (Green Fringe-orchid), 2
ft, tall with curious green flowers, Damp woods
Silene pennsylvaniea (Pentnink) A low

sprawling woody perennial with gorgeous piuk blossoms. Open fields and cliffs.... Smilacina trifolia (Three-leaved False Solomon's Seal), 5 to 8 in. Airy white flower heads in June, Shade...

EVERGREENS, PERENNIAL PLANTS, DECIDUOUS TREES AND SHRUBS

This folder covers Wildflowers and Ferns only. We also have a very complete line of Perennial Plants, Evergreens, Deciduous Trees and Shrubs. These are listed in one General Catalog which is mailed February first, each year. If you did not receive your copy of this eatolog, last spring, please tell us,

Gentiana Crinita (Fringed Gentian) with a suggestion of the thousands of plants available this fall.

Pioneering With Wildflowers

By George D. Aiken

Pioneering with Wildflowers is a beautifully bound book containing over one hundred photographic illustrations of wildflowers and ferns. In great detail but in story book manuer, it tells of the whims and fancies of over 300 species of native plants, types of soil required and even how to propagate them. Different chapters are devoted to groups of plants for particular locations. Thus if you wish a bog-garden, a woodland pathway, a little desert or a beautiful meadow planting. Pioneering with Wildflowers tells you exactly how to go about it.

It has been very gratifying to Mr. Aiken to receive the hundreds of letters from his readers telling him of their successes in establishing wildflower gardens, where even the most difficult plants are feeling perfectly at home.

The first edition of Pioneering with Wildflowers was sold almost before we knew it, and now, with practically no advertising, the second edition is well on its way. A splendid reference book, an addition to any library, a grand gift for a garden-loving friend, a girl or boy scout or campfire girls' troop.

This second edition of Pioneering with Wildflowers is larger and more profusely illustrated than the first. The price is \$2.50 postpaid.

POT GROWN STRAWBERRY PLANTS Green Mountain Strawberry

(U. S. Plant Patent No. 112)

Offered for the first time this spring, the success of this sensational patented everbearing strawberry was instantaneous, and sales have been made in practically all the New England states, but more especially to those New England growers who are familiar with this variety and, watching our stock of plants increasing year after year, have waited the time when they might be available.

In Windham County, Vermont, where it is best known, many acres have been planted and will be producing this fall.

The successful sale of Green Mountain is due to:

- Delicious quality. Decidedly better in quality than most other strawberries.
- Beautiful appearance. A long, pointed variety of bright red color, ripening evenly.
- Freedom from disease, Only traces of disease have been found in our fields of Green Monntain, even two-year-old fields being practically free from leaf spot.
- Good plant-maker, A decidedly better plant-maker than Mastodon or other everbearing species. On our own farms it has made practically as many plants as summer bearing varieties.

Green Mountain Strawberry
Note size of berries. (Photo taken in middle October.)

5. Remarkable yield. In the fall, 1934, our two-year-old field was estimated to have set fruit at the rate of 5,000 quarts per acre, but, unfortunately, about half the berries were caught by a severe frost in October. The summer crop of the Green Monutain with us is about double that of the Howard 17, and this year it has continued ripening berries ten days after the last fruit of the Howard was picked. Set our pot grown plants now. You may let them produce two to four clusters of fruit per plant next June, and they will still bear a good crop next fall for you.

Price, strong pot grown plants, 12 for \$1.50, 25 for \$2.50, 100 for \$8.00.

FAIRFAX

Very strong plant with fruit of highest quality. Ideal for home use. Season, midseason to late. 12 for 75c, 25 for \$1.25, 100 for \$1.00, \$35.00 per 1000.

HOWARD 17

Howard 17 is still being planted more than any other variety. Very heavy yielding commercial berry. For light and medium soil. Season, early to late, Prices same as Fairfax.
