February—Bregman, Samuel, fined \$100; Krack, Henry, fined \$50; Katz, Jacob, fined \$50; Petry, August, fined \$100.

March-Hyman, Atlas, fined \$75.

June—Boltman, Samuel, fined \$50; Hameritz, David, fined \$50. October—Weisshaus, Joseph, fined \$50.

November-Cutting, Robert, fined \$100; Jones, Samuel, fined \$100.

Certain of the more important cases in which convictions were obtained for violation of section 56 of the Sanitary Code, relative to the sale of milk without a permit:

February-Fravaglam, Antonio, fined \$5.

May—O'Neill, Patrick, fined \$25; Duffy, Hugh, fined \$15; Lewald, Jacob, fined \$25.

August—Jones, John, fined \$15; Moseman, Frederick, fined \$15. September—Hyatt, Floyd, fined \$10.

October-Gittin, Louis, fined \$20; Reischeimer, Abraham, fined \$20.

Certain of the more important cases in which convictions were obtained for violation of section 57 of the Sanitary Code, relative to adulterated cream being held, kept, or offered for sale:

October—Abrahams, Max, fined \$25; Greenberg, Harry, fined \$25. November—Appelbaum, Joseph, fined \$20.

Certain of the more important cases in which convictions were obtained for violation of section 68 of the Sanitary Code, relative to the adulteration and misbranding of foods:

January—Prentiss, Annie, fined \$50; Rothchild, Jacob, fined \$50; Licht, Israel, fined \$10.

February—Israel, Charles, fined \$25.

March-Ershowsky, Barney, fined \$50.

May-Stern, Sigmund, fined \$25.

June-Reiss, William, fined \$20; Hartog, Louis N., fined \$50.

August—Becker, Gustave, fined \$10; Siegel, Simon, fined \$10; Kahn, Charles, fined \$10; Karpf, Isaac, fined \$10; Kirschbaum, Jacob, fined \$10; Karpf, Jacob, fined \$10; Schoen, Frederick, fined \$10; Rollman, John, fined \$10; Strauss, David, fined \$10; Mehlner, Joseph, fined \$10; Moyka, John, fined \$10; Martin, Giovanni, fined \$10.

September—Weil, Jacob, fined \$10; Dorn, John, fined \$5; Saalberg, Leopold, fined \$15; Jackel, Robert, fined \$15; Hansen, J. G., fined \$15; Porges, Bernhard, fined \$15; Foter, Emil, fined \$25; Schmitzberger, Joseph, fined \$25; Harf, Leo, fined \$15; Sorltheis, Adam, fined \$15; Fingend, Aaron, fined \$15.

October—Davis, George, fined \$25; Briedenback, Gustave, fined \$25; Blecher, Emil, fined \$25; Alexander, Adolph, fined \$25; Falk, Adolph, fined \$25; Ludwig, Robert, fined \$25; Legaz, John, fined \$25; Leon, Philip, fined \$50.

November—Falk, John, fined \$10; Boyle, Thomas, fined \$50.

December—Fischer, Isaac, fined \$50; Casella, Andrea, fined \$25; Landesman, Bernard, fined \$50.

Certain of the more important cases in which convictions were obtained for violation of section 118 of the Sanitary Code, relative to nuisance caused by dust, ashes, lime, or other like substance being allowed to pass into a street, public place, or into any occupied premises:

January—Levinsohn, Isaac, fined \$15; Steinfeld, William, fined \$10; Woolson, Harry, fined \$10.

February-Goldstein, Hyman, fined \$15.

March—Levine, Adolph, fined \$15; Cohen, Isidore, fined \$50; Mistufzuk, Guvin, fined \$15.

April-Levine, Louis, fined \$25; Wasserman, Joseph, fined \$20.

May-Schwartz, Adolph, fined \$10.

June-Sullivan, John, fined \$20; Diskin, Solomon, fined \$10.

Certain of the more important cases in which convictions were obtained for violation of section 162 of the Sanitary Code, relative to the issuing of false death certificates:

On the 26th of June, 1908, Samuel Stera was fined \$250 by the Court of Special Sessions for violating section 162 of the Sanitary Code (practicing medicine without license).

Certain of the more important cases in which convictions were obtained for violation of sections 164 and 165 of the Sanitary Code, relative to retaining the dead body of a human being for a longer time than four days:

On March 23, 1908, Lawrence Wardenhauer, an undertaker, residing at No. 159 Onderdonk avenue, Ridgewood, Borough of Queens, was arrested for violation of the above section. He was arraigned before a Magistrate in the Second District Magistrates' Court, Borough of Queens, and held in \$500 bail for Special Sessions. On April 7, 1908, the defendant was found guilty and sentenced to pay a fine of \$50.

Civil Actions in Municipal Courts.

Department of Health vs. John F. Ranken.

January 11, 1908—Six actions brought against the above-named defendant, a physician practicing in the City of New York, for violation of section 133 of the Sanitary Code, for failure to report cases of contagious diseases.

January 18, 1908—Defendant paid \$50 in settlement of said actions. Department of Health vs. Robert R. Mont.

February 1, 1908—Two actions brought against the said defendant, to recover a penalty of \$100 for violation of section 163 of the Sanitary Code, relative to the burying of the dead body of a human being without a permit from the Department.

February 1, 1908—Four actions brought against the said defendant to recover a penalty of \$200, for violation of section 165 of the Sanitary Code, in retaining the body of a human being for a longer time than the law allows.

June 18, 1908—Defendant paid a penalty of \$100 in settlement of the above-mentioned actions.

Department of Health vs. Robert H. Anderson.

February 15, 1908—Action brought to recover a penalty of \$50, for violation of section 133 of the Sanitary Code, relative to his failure to report a case of contagious disease.

February 25, 1908—Defendant paid the full penalty, \$50, in settlement of said action.

Department of Health vs. Frank L. Tucker.

February 15, 1908—Action brought to recover a penalty of \$50, for violation of section 133 of the Sanitary Code, relative to the defendant's failure to report a case of contagious disease.

March 27, 1908—Defendant paid \$10, in settlement of said action. Department of Health vs. Thomas G. Sherwood.

March 30, 1908—Action brought to recover a penalty of \$50, for violation of section 127 of the Sanitary Code, relative to the defendant's failure to report a case of glanders.

April 13. 1908-Defendant paid \$25, in settlement of action.

Department of Health vs. J. Elmer Ryder.

March 30, 1908—Action brought to recover a penalty of \$50, for violation of section 127 of the Sanitary Code, relative to the defendant's failure to report a case of glanders.

April 7, 1908—Defendant paid \$25, in settlement of action.

Department of Health vs. Frank Belsky.

July 2, 1908—Action brought to recover a penalty of \$50, for violation of section 167 of the Sanitary Code, relative to the failure of the defendant to procure the necessary permit for the burial of a stillborn child.

September 29, 1908—Defendant paid \$25, in settlement of action.

Department of Health vs. Oscar A. Spier.

November 21, 1908—Action brought to recover a penalty of \$50, for violation of section 159 of the Sanitary Code, relative to the failure of the defendant to file birth certificate.

December 6, 1908—Defendant paid the full penalty, \$50, in settlement of action.

Department of Health vs. Charles Valerius.

December 21, 1908—Action in conversion for the sum of \$1.80.

December 31, 1908—Defendant paid the full amount in settlement of action.

Dec. 12, 1908	Salaries—Street Cleaning Department	60,000 00
		\$191,500 00

No Corporate Stock was authorized for the use of the Department of Health during the year 1908.

The annual estimate of the amount required for the maintenance of the Department during 1909 was prepared during June and July and presented to the Board of Estimate and Apportionment.

After strict examination by representatives of the Comptroller and by the Committee of the Bureau of Municipal Research, who each made an exhaustive investigation and a favorable report upon the application, the sum of \$2,484,859.25 was allowed and included in the Budget for 1909, as against \$2,279,849.50 allowed in the Budget for 1908, an increase of \$205,009.75.

The condition of the accounts were pronounced to be excellent by the investigators. A new system of accounting, as recommended by the Department of Finance, was installed in this Department on January 1, 1908, being one of the first Departments in which the new method was introduced.

Comparative statement of the moneys received through the various financial resources of the Department of Health during the period from 1902 to 1908 inclusive:

Year.	Appropriation.	Bond Issue.	Sales of Laboratory Products.	Care and Maintenance of Im- migrants.	Total.
1902	\$984,391 48	\$242,662 50	\$32,048 13	\$35,272 00	\$1,294,374 I
903	1,034,391 48	230,500 00	21,432 91	33,726 00	1,320,150 3

All moneys collected by the Department are received in this office. The money is derived from the following sources, viz.: The sale of laboratory products; the care, maintenance and transportation of immigrants; fines and penalties for violations of the Sanitary Code, and transcripts of the records of The money received for laboratory products and that for the care and maintenance of immigrants is paid to the City Chamberlain each month, and added to the Department appropriations. The fees derived from transcripts of Department records are now paid monthly to the City Chamberlain, and are credited to the General Fund for the Redemption of the City Debt, pursuant to Chapter 377, Laws of 1907, dated May 28, 1907. The money received for fines and penalties and that from participating employees who have signified their intention, in writing, of taking advantage of the provisions of the Health Department Pension Law and contributing one per centum of their respective salaries, is added to the Health Department Pension Fund the Department.

ACCOUNTS OF THE DEPARTMENT.

The new system of accounting inaugurated on January 1 includes the keeping of the following books and records:

Order Register—A record of all orders issued in numerical sequence for the purchase of supplies and materials and labor, both on contract and open market purchases.

Appropriation Ledger—Showing the various appropriations allowed by the Board of Estimate and Apportionment in the Annual Budget, and in which all orders are kept set up as a reserve against the various appropriations and liquidated by vouchers transmitted to the Department of Finance in payment of same.

Bond Fund Ledger—This is similar to the above book, with the exception that the expenditures are chargeable to Bond Issue granted by the Board of Estimate and Apportionment during the year.

Contract Ledger—In this book all contracts entered into by the Department are charged and as orders are issued against them they are tabulated and charged to the various lines of the contract affected.

Register of Invoices—This is a daily register of all invoices received and is made in duplicate, one copy being forwarded to the Department of Finance.

Register of Vouchers—This is a record of all vouchers transmitted to the Department of Finance for payment.

Contract Register—Contains a complete record of all contracts from their inception to the filing of the executed contracts.

Expense Ledger—Is a record of the expenditures for the various functions and institutions of the Department, and is used for statistical purposes, making up the Budget for the ensuing year.

Payroll Voucher Schedule—Being a record of various vouchers chargeable to appropriations for salaries and wages.

Payroll Ledger—Showing the various appropriations available for salaries and wages and the charges against the various appropriations.

Trial Balances, of all the above books, are made at the end of each month, and transcripts of same are forwarded to the Comptroller of The City of New York.

General Journal and General Ledger—These are the controlling books of all the above books.

Record of Burial of Deceased Soldiers—Contains a record of vouchers transmitted to the Department of Finance for the burial of deceased veterans.

Horse Register—A record is kept, containing a full description of each horse, giving the number, color, age, special marks, where stabled, and work performd.

AUDITING OF BILLS.

All bills contracted by the Department are rendered in triplicate, stamped with date of receipt by the Division incurring the expense, and certified to the effect that the articles or services enumerated have been received, examined and found correct, and are for the exclusive use of the Department, one bill being retained in that office for filing, and two returned to the office of the Chief Clerk, where they are charged against the proper appropriations, one being filed with the requisition, the other forwarded to the Department of Finance for payment after having been approved by the Board of Health.

Considerable delay in auditing still continues, due to the failure of the various Divisions of the Department to promptly certify and forward the necessary bills which accompany the delivery of the merchandise

The number of bills received, audited and forwarded to the Department of Finance for payment during the year 1908 was approximately 42,000.

SUBDIVISION TELEPHONES.

Telephones are installed in the private residences of certain officials and employees to facilitate the transaction of official business of the Department. Those desiring to use the same for personal business are required to pay to the Department the usual rates charged by the telephone company, an account of which is rendered to them each month. It has been found necessary to establish in the various Boroughs of the City the following telephones:

Borough of Manhattan	35
Borough of Brooklyn	26
Parauch of The Proper	.0

Borough of Queens	9
Borough of Richmond	8
Otisville, N. Y	2
	_
Total telephones installed	98

TELEPHONE RECEIPTS.

The following amounts were received from employees for the use of official telephones for private business during the year 1908. These amounts were transmitted to the City Chamberlain, to be credited against the appropriation for telephones for the various Boroughs:

Location.	Total Amount Received.
Borough of Manhattan	\$125.00
Borough of The Bronx	
Borough of Brooklyn	122.28
Borough of Queens	20.30
Borough of Richmond	55.20
Otisville, N. Y	14.00

\$383.03

BURIAL OF DECEASED VETERANS.

The duty of auditing claims for the interment of deceased honorably discharged soldiers, sailors and marines, and their wives, finally devolved upon this Department through an opinion of the Corporation Counsel, rendered in February, 1906.

The following claims have been audited and forwarded to the Department of Finance for payment during 1908:

Place of Death.	Year of Death.	Number.	Amount of Claims.	Totals.
New York County	1905	1	\$35 00	,
New York County	1906	2	70 00

Subdivision Payrolls.

The payrolls of the various Boroughs and Hospitals of the Department are prepared monthly, recording the name, residence, designation and compensation and time employed, certified by the proper of-

ficials, charged against the appropriate accounts, approved by the Board, certified by the Civil Service Commission, and forwarded to the Department of Finance for payment.

Schedule of total number of employees in the service of the Department of Health in the various Boroughs on December 31, 1908, with a statement of their aggregate annual compensation (exclusive of Sanitary Police, \$98,300).

Pension Fund.

The Board of Trustees of the Health Department Pension Fund consists of the members of the Board of Health, one of whom is chosen to be chairman and one elected as secretary annually. Said Board of

Trustees is charged with the duty of receiving, investing and administering all funds derived from fines and penalties for violation of the Sanitary Code and Health Laws, and one per centum of the annual salaries of participating employees (payable monthly).

Pensions are granted to employees who have served for a period of twenty years, upon application of such employees, to employees disabled by reason of performance of duty and to widows or minors or employees who die from disease or injury suffered in the discharge of duties.

A report in detail of the condition of said fund is submitted to his Honor the Mayor annually, in the month of January.

Report of the condition of the Health Department Pension Fund for the year 1908, showing receipts and disbursements during that period:

Contracts.

Pursuant to the provisions of section 419 of the Charter, contracts by public letting must be made for work to be performed and supplies to be furnished for the use of the Department, where the supplies and work are of a similar character, and the amount involved exceeds the sum of \$1,000.

Contracts were executed for furnishing the following supplies to the various offices, buildings, hospitals and clinics of the Department during the year 1908:

Supplies.	Amount.
Butter	
Bread	
Fish	2,515.67
Mineral water	
Groceries	
Disinfectants	9,804.87

Supplies.	Amount.
Milk	37,996.87
Meat	51,660.26
Vegetables	7,881.81
Eggs	9,417.20
1ce	5,221.26
Coal, for steamboats only	10,379.25
Forage	11,667.68
Drugs	8,244.93
Druggists' sundries	13,795.57
Textiles	3,832.70
Alcohol	4,020.71
Whiskey	1,291.50
Screens, shades and awnings	1,679.00
Lighting fixtures	1,133.00
Butter and eggs, Otisville, N. Y	8,789.76
Meat, Otisville, N. Y	12,222.00
Bread, Otisville, N. Y	1,102.50
Fish, Otisville, N. Y	543.90
Groceries, Otisville, N. Y	3,812.05
Coal, Otisville, N. Y	3,000.00
Forage, Otisville, N. Y	3,723.90
Cement, Otisville, N. Y	1,915.20
Lumber, Otisville, N. Y	24,095.78

\$278,454.65

The above schedule does not include a number of awards, each of which amounted to less than \$500, therefore not requiring a formal contract. Standards are constantly being improved and deliveries of better grades received, due to close inspection.

Wherever the present close system of inspection has developed the necessity for a more specific description of the supplies to be contracted for, the change has been incorporated in the contract form for the succeeding year, and samples of a higher grade purchased to be used as standards when required; this the quality of the supplies delivered continues to improve annually.

The following contract forms for furnishing supplies during 1908 were prepared and printed for advertisement and award:

Milk. Butter. Coal (steamboat). Bread Fish. Groceries. Food Supplies, Otisville Sanato Ice. Drugs. Mineral Waters. Vegetables, Chemicals, Fruits. Laboratory Apparatus. Eggs. Cheese. Meats. Forage.

Contracts were approved for the removal of night soil, offal and dead animals, etc., for the year 1908, for a period of five years ending with 1909. These contracts were advertised and awarded in 1905, as follows:

Contractor.	Covering Boroughs of	Annual Cost.	
McKeever & Company	Brooklyn and Queens	\$31,200 00	
M. J. & J. F. White	Manhattan, The Bronx, Richmond	38,680 00	
Total		\$69,880 00	

The following contracts for the construction of new buildings, alterations, improvements, etc., were entered into during 1908:

Construction of and Location.	Contractor.	Cost.	
Two new boilers, Kingston Avenue Hospital	E. J. O'Brien & Bro	\$17,225	
Addition to stable, Richmond	W. H. C. Russell	1,593	
Heating and plumbing, Otisville	Swinton & Co	7,459	
Laundry Building, Kingston Avenue Hospital	Chas. Peckworth	74,495	
Sewer, North Brother Island	Chas. Meads & Co	4,312	

Contracts were entered into with the following architects for their services in preparing plans and specifications for the construction of the improvements indicated below:

Description and Location.	Architect.	Estimated Fees.	
Plans, etc., dormitory at Otisville	J. V. Van Pelt	\$1,000	
Plans, etc., addition to dining hall at Otisville	J. V. Van Pelt	1,000	
Plans, etc., laundry building at Kingston Avenue Hos- pital	Westervelt & Austin Westervelt & Austin	4,000	

Contract forms were also prepared and printed for the construction of the following improvements, not as yet advertised nor awarded:

Concrete building, at North Brother Island.

Electric light plant, at Otisville.

Shacks, dormitories and other buildings, at Otisville.

PURCHASE OF SUPPLIES.

In purchasing supplies for the use of the Department, requisitions properly certified by the executive officers of the different divisons as to the necessity therefor, are received in the office of the Chief Clerk, examined and presented to the President of the Board of Health for approval and authority to incur the expense. Estimates are then obtained from reputable business concerns or manufacturers, if possible, and the order given to the lowest bidder. Should the amount exceed the sum of \$1.000 the supplies are purchased by contract, the result of public bidding.

INSPECTION OF SUPPLIES.

During the year 1908 there were 4.992 requisitions received on which inspections were made

Upon receipt of goods at the various institutions they are held until the same have been inspected and passed by the Inspector of Supplies before being placed in stock, note being made on the Inspector's copy of the order for recording in the office of the Chief Clerk, for the purpose of checking the bills. Perishable supplies, such as meat, fish, grocery supplies, fruits, vegetables, etc., which are furnished on monthly orders on an open requisition, are subject to the same inspection, and are rejected when found necessary.

The Departmental divisions from which requisitions were received include the following hospitals, laboratories and offices in the various Boroughs. Requisitions were forwarded as follows:

Headquarters, Fifty-fifth street and Sixth avenuc	1,328
Borough of The Bronx	176
Borough of Brooklyn	285
Borough of Queens	185
Borough of Richmond	223
Research laboratory	560
Chemical laboratory	129
Vaccine laboratory	36
Drug laboratory	138
Riverside Hospital	491
Willard Parker Hospital, Reception and Scarlet Fever Hospital	286
Trachoma Hospital	129

The average number of items of each of the above-mentioned requisitions, 4,992, were approximately twenty (20), and the number of orders issued were 9,382.

The Inspectors visit each of the hospitals, laboratories, offices, etc., at least once a week, making thorough inspection of the goods received and rejecting those which do not conform to the Department standards and the specifications set forth when the estimate is requested.

During the year several contractors endeavored to deliver a poor quality of merchandise to the hospitals and laboratories. Measures were promptly taken to compel them to fulfill their respective contracts in accordance with the specifications and the standard samples, after which the goods delivered were of a satisfactory character.

The inspection of supplies has proved a great economy in many ways; the force formerly consisted of one man, was totally inadequate to cover all the institutions, and, consequently, it was found necessary to detail an additional inspector to perfect this particular branch of the service.

A new feature of the inspection of meats, fish, poultry, eggs and grocery supplies, furnished under contract, was added to our methods by having the deliveries examined and passed upon by the Meat and Food Inspectors attached to the Sanitary Bureau, in addition to the inspection made by the Inspectors attached to this office and the matrons of the various institutions.

CONSTRUCTION AND REPAIRS.

Report of the work performed by the Sanitary Inspectors who are assigned to the office of the Chief Clerk to supervise the construction of new buildings and repairs and alterations to old buildings as follows: Willard Parker and Reception Hospital.

An additional laboratory was constructed on the second floor of the Research Laboratory Building. A water service main was extended to the Antitoxin Stable.

Kingston Avenue Hospital.

Contract was awarded for the setting of two new mgn pressure steam boilers to replace two smaller insufficient boilers, also a separate contract for the thorough overhauling of one individual boiler.

An addition was constructed to the boilerhouse for a pumproom.

A new laundry building is to replace the present structure, for which the contract has also been let.

A solarium was constructed on tent platform by Department employees.

A separate smokestack was built for incinerator.

The iron fence around the hospital grounds was completed this year, as was also the measles pavilion completed and opened.

Riverside Hospital.

Additions to Pavilions No. 5 and No. 6 were constructed by employees of the Department.

Plans and specifications were prepared for an iron and tile trunk sewer with branches to receive the drainage from various pavilions, kitchen building and doctor's residence, and an iron sewer for Nurses' Home, Stable Building and Stove House; this contract was let and the work commenced.

Laundry Building was completed this year and accepted.

Headquarters Building-Manhattan.

The fire extinguishing apparatus was remodeled and hose tested, in compliance with the rules of the Fire Department.

The storeroom in rear part of cellar was provided with a new floor.

The storm-door at main entrance was covered with new roofing.

Main and other roofs, skylights, etc., were repaired and painted.

Diagnosis Laboratory was equipped with a fume hood and ventilator.

Improvements were made to toilet facilities and hot water supply.

In the annex, repairs and improvements were made, including redecorating.

Office Building-Brooklyn.

Improvements were made to drains and plumbing fixtures.

Wire inclosure was constructed on first floor for filing records.

Repairs to roof exits were made by Department employees; also repairs to heating apparatus.

New Office Building-Brooklyn.

Under construction.

Office Building-The Bronx.

Iron rails and gates were provided for the outside cellar entrances. The Clinic was redecorated and general repairs made.

Office Building-Queens.

Additional electric lighting was installed in several offices.

GENERAL.

Manhattan.

The clinic adjoining main office building was completely redecorated on the interior; the roof repaired and repainted; new rain leader put up on rear wall. An interior hoistway was constructed in the drug laboratory, at No. 116 East Forty-first street, and improvements made to the hot water supply.

Brooklyn.

Additional partitions were erected in the Clinic at No. 361 Jay street, for patients' dressing-rooms and office purposes; also shelving for storage.

Queens.

Additions were built to the stable building of the disinfecting station at Jamaica, the work being executed by employees of the Department.

Richmond.

An addition was built to the stable portion of the disinfecting station. The complete exterior and interior of the old building has been cleaned and repainted.

Plans and specifications were prepared by the Inspectors for all repairs and some of the new work; all the work received their superintendence. Work let out on contract in 1907 were completed and accepted as follows: Laundry Building, North Brother Island (Riverside Hospital), pavements, etc.; Willard Parker Hospital, addition to Nurses' Home; Measles Pavilion, Morgue Building, etc., Kingston Avenue Hospital, were completed and accepted.

Otisville.

The following is an outline of the construction work, etc., accomplished at the Tuberculosis Sanatorium, Otisville, during the year:

Two shacks have been completed, plans for which were made by Mr. Van Pelt, architect, at a cost, approximately, of \$9,000.

Four shacks have been built, plans for which were made in the Department, costing approximately \$7,000.

One shack has been built, plans for which were made at Otisville, costing probably \$1,500.

Two shacks for women are in course of construction, one of which has received roof timbers, the other having foundation finished. On these shacks probably \$1,200 has been spent.

Boilers and laundry machinery have been installed, contract price being \$9,420. Additions and alterations have also been made to the laundry building costing probably \$1,000.

Two solaria additions have been added to the dining hall, costing approximately \$11,000.

A building has been erected at the rear of the dining hall for Bed Patients' Quarters, Kitchen and Dining-Room. This building is nearly completed and has cost to date probably about \$12,000. The solaria and rear buildings are being constructed in accordance with plans prepared by Mr. Van Pelt, architect.

Alterations are nearly finished in the Matron's House, which will cost probably \$3,500.

A solarium has been built and baths installed in connection with the two-story shack, costing probably \$1,500.

Alterations and improvements have been made in barns and other buildings which will probably cost \$3,000.

A new road from the station to the shacks has been constructed and is now in use and largely completed.

Alterations are in progress in an old building which is to be converted into a dining-room for the Women's Unit.

In connection with the work around shacks and building considerable drainage and laying of water and sewer pipes, grading, etc., was necessary and has been done.

A root cellar has been constructed and is nearly finished, costing probably \$1,000.

A lumber shed is being erected, costing probably \$2,000. There is also a large stock of lumber on hand, purchased from Corporate Stock funds.

Two wagon sheds have been erected costing about \$800.

BOOKS, PRINTED BLANKS AND STATIONERY.

On January 1, 1908, all printed blanks and books required for use on that date were delivered by the Board of City Record and sent to the various offices and Boroughs in the Department.

The annual requisition for printed blanks and books, made to the City Record during the month of July for the year 1909, was carefully made up. Only blanks absolutely needed for the year were ordered, and the amounts made as small as possible, as shown by the following schedule:

Borough.	Books.	Printed Blanks.	Book Pages.	Grand Total.	Ordered Last Year.
Manhattan	656	3,633,900	164,000	3,797,900	4,686,982
Brooklyn	622	1,370,225	155,500	1,525,725	1,194,912
Bronx	26	515,625	6,500	522,125	470,220
Queens	16	267,440	4,000	271,440	166,120
Richmond	63	130,100	15,750	145,850	112,100
Total	1,383	5,917,290	345,750	6,263,040	6,630,343

During the year 1908, 212 special requisitions for books, printed blanks and stationery supplies were made to the City Record, requiring the printing of over seven million blanks. These blanks were ordered by and delivered to the various Boroughs, as per the following schedule:

Seriedire.	
Manhattan	6,244,075
Brooklyn	461,000
The Bronx	248,200
Queens	93,135
Richmond	64,725
m . A	
Total	7.111.135

An additional storeroom has been provided in the cellar of the Department building for storing printed blanks and books, which has been

of considerable benefit. All printed matter can now be properly stored and cared for.

For the past few years 2,000 copies of the Annual Report were ordered on the Annual Requisition. The cost of printing and binding these books amounts to the sum of \$8,000.

STOREHOUSES.

The following table shows the work performed at the storehouses established at Riverside Hospital, Willard Parker Hospital, Kingston Avenue Hospital, and the Tuberculosis Sanatorium at Otisville:

REPORTS, COMMUNICATIONS, APPLICATIONS FOR PERMITS, NOTICES AND ORDERS AND CERTIFICATES OF BIRTHS, MARRIAGES AND DEATHS,

SUBMITTED TO THE BOARD OF HEALTH.

The following official reports, communications and applications, summarized and classified as to the subject matter, were received during the year ending December 31, 1908, and submitted to the Board for consideration and final action:

Special reports and communications submitted to the Board of Health	
for action	699
Premises declared a public nuisance	498
Premises ordered vacated	320
Lodging house permits granted	157
Cow permits granted	138
Mercantile permits granted	49
Miscellaneous permits granted	6,724
Permits denied	4,382
Permits revoked	3.477
Board orders extended or modified	95
Extension of Modification of Board orders denied	514
Board orders rescinded	
Delayed and imperfect certificates of births, marriages, and deaths ap-	
proved and ordered filed	3,435
Corrected certificates of births, marriages and deaths approved and	
ordered filed	806

ORDERS ISSUED BY THE BOARD OF HEALTH.

Orders of the Board for the abatement of nuisances are issued under the supervision of the Assistant Sanitary Superintendents in the various Boroughs, upon the facts and evidence contained in the written reports of the Sanitary Inspectors, the result of personal inspection of premises complained of. These orders call the attention of owners, lessees and agents to violations of the Sanitary Code and Health Laws in each case, and require the necessary alterations, repairs, cleaning and improvements of the premises named within three days from the receipt of the order. If, upon reinspection, it is found that the requirements of the order have not been complied with, a suit for penalty is commenced against the delinquents under sections 1172 and 1222, chapter 466, Laws of 1901.

Summary of clerical work performed in the various Boroughs in connection with the issuance of Board orders, negative reports filed, and fees paid and certificates issued, the result of searching for sanitary violations against premises; also written references forwarded to other city departments, as follows:

Borough.	Board Orders Issued.	Negative Reports Filed.	References to Other De- partments.	Searches Made and Certificates Issued.	Communica- tions Re- ceived and Answered.	Fees Received.
Manhattan	14,761	8,209	1,178	1,566	1,300	\$878 20

Queens	3,599	1,082	505	11	8	5 50
Richmond	1,661	561	98	5		2 50
Totals	31,135	18,285	4,659	2,114	1,462	\$1,151 70

SEARCHES AND TRANSCRIPTS OF BIRTHS, MARRIAGES AND DEATHS.

Certified copies of the records of Vital Statitics as may be found to be on file in the Bureau of Records are furnished to applicants authorized to receive same, namely, interested parties, next of kin, legal representatives, etc., upon payment of the fee in such cases prescribed by the Board of Health. Written orders are signed by the Assistant Chief Clerk in the various Boroughs and issued to the Assistant Registrar of Records, authorizing the search and issuance of a transcript of the record, which, in accordance with the regulations of the Board, is authenticated by affixing the seal of the Department of Health and attested by the signature of the Assistant Chief Clerk of the Borough. When search is made and the record is not found to be on file, an official certificate is issued to that effect.

Summary of applications for searches made to the Assistant Chief Clerks in the various Boroughs, showing fees received and work performed in connection with searches and transcripts of the records of births, marriages and deaths on file in the Bureau of Records in the Department:

_	Applica-		Transcripts Signed and Authenticated.			Communica-	Fees

Total	43,569	5,047	4,247	35,408	4,035	6,332	\$22,023 10	

WRITTEN ACKNOWLEDGMENT OF COMPLAINTS RECEIVED.

All mail, matter and letters addressed to the Department of Health are carefully scrutinized, and those in which complaints are made relative to matters within the jurisdiction of the Department and giving the names and addresses of the authors, are promptly acknowledged and referred to the Sanitary Superintendent for action. Those requiring the attention of other City departments are acknowledged and immediately forwarded for such action as may be found necessary.

Statement of the number of written complaints received and answered in the various Boroughs:

SANITARY CODE OF THE BOARD OF HEALTH OF THE DEPARTMENT OF HEALTH OF THE CITY OF NEW YORK, 1908.

THE SANITARY CODE.

The Sanitary Ordinances adopted by the Board of Health of the Department of Health of The City of New York, called the Sanitary Code, and conformed to Chapter XIX, Title 1, Chapter 378, of the Laws of 1897, and Chapter XIX, Title 1, Chapter 466, of the Laws of 1901, pursuant to Section 1172 of said Titles, with the amendments and additional provisions, added and published to February 1, 1908.

Definition of Terms.

Section 1. The terms "Board," "this Board," and "said Board" whenever used in this Code shall be held to mean the "Board of Health of the Department of Health of The City of New York;" the word "Department," whenever used herein, shall be held to mean the Department of Health of The City of New York; the words "person," "owner," "tenant," "lessee," "occupant," "contractor," "party," "manager," "board," and "officer," shall respectively be held to apply to and include, both jointly and severally, each and all owners, partowners, tenants, lessees, occupants, contractors, parties in interest, persons, managers, boards, officers, and corporations, who may sustain the relations, or may be in like position of any one or more thereof referred to in any ordinance or regulation; every word or phrase anywhere herein defined shall be held to have such meaning whenever used herein; the words "city," or "this city," or "said city," whenever used herein, shall be held to mean The City of New York; the word "regulations" shall be held to include "special regulations" (which latter will be from time to time issued, and will contain more detailed provisions than can be herein conveniently set forth); the word "permit" shall be construed to mean the permission in writing of this Board, issued according to its by-laws, rules, regulations, and Sanitary Code; and every "report" herein required shall be held to be a report in writing,

The Sanitary Code.

signed by the person (and indicating his official position) who makes the same; the word "light" or "lighted," shall be held to refer to natural, external light; and all words and phrases herein defined shall also include their usual and natural meaning, as well as those herein especially given.

Sec. 2. The word "street," when used in the Sanitary Code, shall be held to include avenues, public highways, sidewalks, gutters, and public alleys; and the words "public place" shall be held to include parks, piers, docks, and wharves, and water and open spaces thereto adjacent, and also public yards, grounds, and areas, and all open spaces between buildings and streets, and in view of such streets; the word "ashes" shall be held to include einders, coal, and everything that usually remains after fires; the word "rubbish" shall be held to include all the loose and decayed material and dirt-like substance that attends use or decay, or which accumulates from building, storing, or cleaning; the word "garbage" shall be held to include swill and every accumulation of both animal and vegetable matter, liquid or otherwise, that attends the preparation, decay, and dealing in, or storage of meats, fish, fowls, birds, or vegetables; and the word "dirt" shall be held to mean natural soil, earth, and stone.

Sec. 3. A "tenement-house" shall be taken to mean and include every house, building, or portion thereof, which is rented, leased, let or hired out to be occupied, or is occupied, as the home, or residence of three families or more, living independently of each other, and doing their cooking upon the premises, or by more than two families upon any floor, so living and cooking, but having a common right in the halls, stairways, yards, water-closets, or privies, or some of them. A "lodging-house" shall be taken to mean and include any house or building, or portion thereof, in which persons are harbored or received, or lodged for hire for a single night, or for less than a week at one time, or any part of which is let for any person to sleep in for any term less than a week. A "cellar" shall be taken to mean and include every basement or lower story of any building or house of which onehalf or more of the height from the floor to the ceiling is below the level of the street adjoining. The phrase "boarding-house" shall be held to include every building, and every story and portion thereof,

The Sanitary Code

which is at any time or usually used, leased, or occupied, or intended so to be, by any number of persons exceeding ten, as boarders thereat. The word "manufactory" shall be held to include every building, and every story and portion thereof, in which any sort of labor or work is done, which calls for the continual or usual presence of several persons during several hours of the day or night, engaged about said work or labor; and the word "saloon" shall be held to include every portion of any building in which the business of selling meals, liquors, drinks, or refreshments of any kind, shall be conducted, and includes "concert saloons."

- Sec. 4. The term "theatre" shall be held to include the building, rooms, and place where any play, concert, opera, circus, trick or jugglery show, gymnastic or other exhibition, masquerade, public dance, drill, lecture, address, or other public or frequent gathering or amusement, are, is, or may be held, given, performed, or take place, and the approach or approaches thereto, and appurtenances thereof.
- Sec. 5. The word "physician" shall include every person who practices about the cure of the sick or injured, or who has the charge of, or professionally prescribes for, any person sick, injured, or diseased, and the phrase "infectious disease" shall be held to include all diseases of an infectious, contagious, or pestilential nature.
- Sec. 6. The word "meat" whenever herein used, includes every part of any land animal and eggs (whether mixed or not with any other substance); and the word "fish" includes every part of any animal that lives in water, or the flesh of which is not meat; and the word "vegetable" includes every article of human consumption as food, which (not being meat, or fish, or milk) is held, or offered, or intended for sale or consumption as food for human beings, at any place in said city; and all fish and meat found therein shall be deemed to be therein and held for such sale or consumption as such food, unless the contrary be distinctly proved.
- Sec. 7. The word "cattle" shall be held to include all animals, except birds, fowl, and fish, of which any part of the body is used as food; the word "butcher" shall be held to include whoever is engaged in the business of keeping, driving, or slaughtering any cattle, or in selling any meat; the words "private market" shall include every store,

cellar, stand, and place (not being a part of a public market) at which the business is the buying, selling, or keeping for sale, of meat, fish, or vegetables for human food.

Misfeasance and Nonfeasance.

Sec. 8. No person shall carelessly or negligently do or devise or contribute to the doing of any act or thing dangerous to the life, or detrimental to the health of any human being; nor shall any person knowingly do or advise or contribute to the doing of any such act or thing (not actually authorized by law), except with justifiable motives, and for adequate reasons; nor shall any person omit to do any act, or to take any precaution, reasonable and proper, to prevent or remove danger or detriment to the life or health of any human being.

Obedience to Ordinances and Regulations.

Sec. 9. Every contractor in these ordinances referred to, and every person who has contracted or undertakes, or is bound to do, or is engaged in doing any one of the things, in respect of which these ordinances contain provisions or regulations, shall comply with these ordinances, to the extent that any contract, obligation, or duty requires or permits; and no direction of any contractors or persons shall excuse him for a non-compliance with any of said ordinances.

Sec. 10. It is hereby declared to be the duty of every owner and part owner and person interested, and of every lessee, tenant, and occupant of or in any place, water, ground, room, stall, apartment, building, erection, vessel, vehicle, matter, and thing in The City of New York, and of every person conducting or interested in business therein or thereat, and of every person who has undertaken to clean any place, ground or street therein, and of every person, public officer and department having charge of any ground, place, building or erection therein, to keep, place and preserve the same and the sewerage, drainage and ventilation thereof in such condition, and to conduct the same in such manner, that it shall not be a nuisance or be dangerous or prejudicial to life or health. The term "building" as used in this section, includes a railway car, booth, tent, shop or other erection or enclosure.

Sec. 11. Every person shall observe and obey each and every special regulation and every order of this Board, that is or may be

made, for carrying into effect any of the ordinances or powers hereinbefore or hereinafter contained, or any law of this State or otherwise, whether issued directly by the Board, or promulgated by any Bureau charged therewith, as if the same had been herein inserted at length.

Sec. 12. No person shall omit or refuse to comply with, or resist any of the provisions of the Sanitary Code, or any of the rules, orders, sanitary regulations, or ordinances established or declared by this Board under or pursuant to any of the provisions of the seventy-fourth chapter of the Laws of 1866; or of chapter six hundred and eighty-six of the Laws of 1866; or of chapter nine hundred and fifty-six of the Laws of 1867; or of chapter three hundred and thirty-five of the Laws of 1873; or of chapter seven hundred and fifty-seven of the Laws of 1873; or of chapter six hundred and thirty-six of the Laws of 1874; or of chapter three hundred and seventy-eight of the Laws of 1897; or of chapter four hundred and sixty-six of the Laws of 1901; nor shall any person refuse or neglect to comply with any of the provisions of the said laws in so far as the same are now in force and applicable to The City of New York; or omit or refuse or neglect the execution of any order or special regulation of this Department; no person shall interfere with or obstruct any Inspector of this Department when making the inspections or examinations ordered by this Board, or when executing its orders.

Sec. 13. The owner, lessee, tenant, and occupant of any building or premises, or any part thereof, where there shall be a nuisance, or a violation of any ordinance or section of the Sanitary Code, shall be jointly and severally liable therefor, and each of them may be required to abate the nuisance, or comply with the order of the Board of Health in respect to the premises, or the part thereof, of which such person is owner, lessee, tenant or occupant.

Sec. 14. Whenever a muisance in any place or upon any premises in The City of New York shall have been found or declared by resolution of the Board of Health to exist, and an order shall have been made directing the owner, lessee, tenant or occupant of such premises to make suitable and necessary repairs or improvements, or to abate the said nuisance, such repairs or improvements shall be made, and such nuisance shall be fully abated within the time specified in and by said order.

False Statements.

Sec. 15. No person shall make any false or untruthful statement in any application for a permit from the Board of Health.

Dwellings, Lodging-Houses and Other Buildings, Ventilation, Drainage and Plumbing.

Sec. 16. No person shall hereafter erect, or cause to be erected, or converted to a new purpose by alteration, any building or structure, or change the construction of any part of any building by addition or otherwise, so that it, or any part thereof, shall be inadequate or defective in respect to strength, ventilation, light, sewerage, or any other usual, proper, or necessary provision or precaution for the security of life and health; and no person shall make or use a smoke house or room, or apparatus for smoking meat, without a permit from the Board of Health, and subject to the conditions thereof; nor shall the builder, owner, lessee, tenant or occupant of any such, or of any other building or structure, cause or allow any matter or thing to be or to be done in or about any such building or structure dangerous or prejudicial to life or health.

Sec. 17. No owner or lessee of any building, or any part thereof, shall lease or let or hire out or allow the same or any portion thereof to be occupied by any person, or allow any one to dwell or lodge therein, except when said building or such parts thereof are sufficiently lighted, ventilated, provided and accommodated, and are in all respects in that condition of cleanliness and wholesomeness for which this Code or any law of this State provides, or in which they or either of them require any such premises to be kept. Nor shall any such person rent, let, hire out, or allow, having power to prevent the same, to be used as or for a place of sleeping or residence, any portion or apartment of any building, which apartment or portion has not at least two feet of its height and space above the level of every part of the sidewalk and curbstone of any adjacent street, nor of which the floor is damp by reason of water from the ground, or which is impregnated or penetrated by any offensive gas, smell, or exhalation prejudicial to health. But this section shall not prevent the leasing, renting, or occupancy of

cellars or rooms less elevated than aforesaid, and as a part of any building rented or let, when they are not let or intended to be occupied or used by any person as a sleeping apartment, or as a principal or sole dwelling apartment.

Sec. 18. No person having the right and power to prevent the same shall knowingly cause or permit any person to sleep or remain in any cellar, or in any bathroom, or in any room where there is a water-closet, or in any place dangerous or prejudicial to life or health, by reason of a want of ventilation or drainage, or by reason of the presence of any poisonous, noxious, or offensive odors or substance, or otherwise.

Sec. 19. No owner, lessee, or keeper of any tenement-house, lodging-house, boarding-house, or manufactory, shall cause or allow the same to be overcrowded or cause or allow so great a number of persons to dwell, be, or sleep in any such house, or any portion thereof, as thereby to cause any danger or detriment to life or health.

Sec. 20. Every person who shall be the owner, lessee, or keeper or manager of any tenement-house, boarding-house, lodging-house, or manufactory, shall provide, or cause to be provided, for the accommodation thereof and for the use of the tenants, lodgers, boarders, and workers thereat, adequate privies, or water-closets, and the same shall be adequately ventilated, and shall at all times be kept in such cleanly and wholesome condition, as not to be offensive, or be dangerous or detrimental to life or health. And no offensive smell or gases, from or through any outlet or sewer, or through any such privy or water-closet, shall be allowed by any person aforesaid to pass into such house or any part thereof, or into any other house or building.

Sec. 21. For all lodging-houses in The City of New York containing rooms in which there are more than three beds for the use of lodgers or in which more than six persons are allowed to sleep, a permit from the Board of Health shall be required, and no persons shall have, lease, let or keep any such lodging-house or the lodgings therein, or assist in the keeping, hire, or assist in hiring, or conduct the business of any such lodging-house, or the lodgings therein, except pursuant to the terms and conditions of such permit. The beds in all lodging-houses and in every room in which beds are let for lodgers

shall be separated by a passageway of not less than two feet, horizontally, and all the beds shall be so arranged that under each of them the air shall freely circulate and there shall be adequate ventilation.

Four hundred cubic feet of air space shall be provided and allowed for each bed or lodger.

Lodging-houses shall be conducted in accordance with rules and regulations adopted from time to time by the Board of Health and which are hereby made a part hereof.

Sec. 22. Every owner, lessee, tenant and manager of any boarding-house or manufactory, shall cause every part thereof and its appurtenances to be put, and shall thereafter cause the same to be kept, in a cleanly and wholesome condition, and shall cause every room thereof in which any person may sleep, dwell, or work, to be adequately lighted and ventilated; and, if the same be a manufactory, shall cause every part thereof in which any person may work, to be maintained at such temperature, and be provided with such accommodations and safeguards, as not, by reason of the want thereof, or of anything about the condition of such manufactory or its appurtenances, to cause any unnecessary danger or detriment to the life or health of any person being properly therein or thereat.

Sec. 23. All filthy and dirty walls and ceilings of any building, including the walls and ceiling of the cellar thereof, shall be thoroughly cleaned and whitewashed whenever required by the Board of Health.

Sec. 24. The roofs and skylights of all buildings shall be kept in a condition of good repair so that rain water shall not enter the building.

Sec. 25. No master or teacher, or manager of or in any school, public or private, or of or in any Sunday-school or gymnasium, or the officers or managers thereof, or officers or managers or persons having charge of any place of public worship, shall so far omit or neglect any duty or reasonable care or precaution respecting the safety or health of any scholar, pupil, or attendant, or respecting the temperature, ventilation, or cleanliness or strength of any church, hall of worship, school-house, school-room, or place of practice or exercise, or relative to anything appurtenant thereto, as that by reason of such neglect or omission, the life or health of any person shall suffer or incur any

avoidable peril or detriment, and no day nursery shall be conducted in The City of New York without a permit from the Board of Health.

Sec. 26. Every keeper or proprietor of a hotel or boarding-house, and every other person having for use a bathing-house upon any beach or shore of the ocean, for the accommodation of his guests or other persons for pay, shall provide for the safety of such bathers two lines of sound, serviceable and strong manila or hemp rope, not less than one inch in diameter, anchored at some point above high water, at the same distance apart as the line of bathing-houses, or space fronting on such beach occupied by him in his width; and from the two points at which such life lines are so anchored, such line shall be made to extend as far into the surf as bathing is ordinarily safe and free from danger of drowning to persons not expert in swimming, and at such points of safety such lines shall be anchored and buoyed. From the two points of such lines so extended, anchored and buoyed, a third line shall be extended, connecting the two extremities, and buoved at such points as to be principally above the surface of the water, thereby inclosing a space within such lines and the beach within which bathing is believed to be safe. Every such keeper or proprietor or other such person shall cause to be painted and put up in some prominent place upon the beach, near such bathing-houses, the following words: "Bathing bevond the lines dangerous." Such lines so placed, anchored and buoyed, and such notice so put up, shall continue and be so maintained by every such keeper, proprietor or other person during the entire season of surf bathing. The owner of a bathing-house shall not be subject to the provisions of this section where it is used, occupied or maintained by a lessee for hire, but such lessee shall be deemed the keeper or proprictor thereof. No bathing establishment shall be maintained in The City of New York or along the water front of said city without a permit from the Board of Health.

Sewerage and Drainage.

Sec. 27. Every person using, making, or having any drain, soilpipe, passage or connection between any sewer (or with any river or other body of water) and any ground, building, erection, or place of business, and in like manner every owner or tenant of any grounds, buildings or erections, and every person interested in such place of business or the business thereat, and in like manner every board, department, officer, and person (to the extent of the right and authority of each), shall cause and require such drain, soil-pipe, passage and connection to be at all times adequate for its purpose, and to convey and allow, freely and entirely, to pass whatever enters or should enter the same; and no change shall be made of the drainage, sewerage, or the sewer connection of any house or premises, involving changes in the drainage, sewerage, or sewer connection of any other house or premises, unless at least 30 days notice thereof in writing shall have been previously given to this Department, and to the owner or occupant of the premises affected by such change.

Sec. 28. It shall be the duty of all boards, departments, officers, and persons having power and authority so to do or require (and to the extent thereof) to cause sufficient water to be used, and other adequate means to be taken, so that whatever substances may enter any sewer shall pass speedily along and from the same, and sufficiently far into some water or proper reservoir, that no accumulations shall take place, and no exhalations proceed therefrom, dangerous or prejudicial to life or health.

Sec. 29. No brick, sheet metal, or earthenware material or chimney flue shall be used as a sewer ventilator, or to ventilate any trap, drain, soil or waste pipe.

Sec. 30. The soil, waste and vent pipes in an extension to any building must be extended above the roof of the main building if within thirty feet of the front or rear windows of the main building or of an adjoining building, or if so located as to cause a nuisance.

Sec. 31. All joints in iron drain pipes, soil and waste pipes, must be filled with oakum and lead and hand caulked so as to make them gas-tight. All connections of lead with iron pipes must be made with a brass sleeve or ferrule of the same size as the lead pipe, put in the hub of the branch of the iron pipe, and caulked with lead. The lead pipe must be attached to the ferrule by a wiped or overcast joint. All connections of lead waste and vent pipes shall be made by means of wiped joints.

- Sec. 32. All house drains, waste, soil and vent pipes, traps, and water pipes in any building and premises shall at all times be kept in good order and repair so that no gases or odors shall escape therefrom and so that the same shall not leak.
- Sec. 33. Every water-closet, urinal, sink, basin, wash-tray, bath and every tub or set of tubs and hydrant waste pipe must be separately and effectively trapped; except where a sink and wash tubs immediately adjoin each other, in which case the waste pipe from the tubs may be connected with the inlet side of the sink trap. Traps must be placed as near the fixtures as practicable, and in no case shall a trap be more than two feet from the fixture. In no case shall the waste from a bath tub or other fixture be connected with a water-closet trap. No trap vent pipe shall be used as a waste or soil pipe.
- Sec. 34. No drain pipe from a refrigerator shall be connected with the soil or waste pipe, but it shall discharge into a properly trapped, sewer-connected, water supplied, open sink. No overflow pipe from a tank shall discharge into any soil or waste pipe, or water-closet trap or into the drain or sewer, but it may discharge upon the roof or into an open water-supplied tank.
- Sec. 35. Rain water leaders shall be sound, tight and adequate for their purpose and shall not be used as soil, waste or vent pipes, or be connected therewith; nor shall any soil, waste or vent pipe be used as a leader. When within the house, the leader must be of cast iron, with leaded joints; when outside of the house and connected with the house drain it must be trapped beneath the ground or just inside of the wall, the trap being arranged in either case so as to prevent freezing. In every case where a leader opens near a window or a light shaft, it must be properly trapped at its base. The joint between a cast iron leader and the roof must be made gas and water tight by means of a brass ferrule and lead or copper pipe properly connected.
- Sec. 36. The waste or soil pipe in every lodging house, or other dwelling in The City of New York shall be ventilated by extending the same by means of a pipe of the same size to the height of not less than two feet above the roof of the building.
- Sec. 37. No privy vault, or cesspool, shall be allowed to remain on any premises, or shall be built in The City of New York, unless when

unavoidable. The sides and bottom of every privy vault, cesspool, or school-sink in The City of New York must be impermeable, and secure against any saturation of the walls or the ground above the same. No water-closet or privy shall be constructed without adequate provision for the effectual and proper ventilation and cleansing thereof.

Sec. 38. No person, persons, company or corporation shall cause, permit or allow any sewage, drainage, factory refuse or any foul or offensive liquid or other material to flow, leak, escape or be emptied or discharged into the waters of any river, stream, canal, harbor, bay or estuary, or into the sea within the city limits, excepting under low-water mark, and in such manner and under such conditions that no nuisance can or shall be caused thereby or as a result thereof.

Street Drainage.

Sec. 39. Every person, when cleaning any street, shall clean, and every contractor shall cause to be cleaned, the gutters and parts of the street along which the water will run, before using any water to wash the same; and no substance that could be before scraped away shall be washed or allowed to be carried or be put into the sewer, or into any receptacle therewith connected.

Sec. 40. No person being owner, lessee, tenant, or occupant of any building or premises, shall allow any water or other liquid to run from or out of such building or premises upon or across any sidewalk or curb stone, and if such substance is allowed to pass into any street, it must reach the same by a passage, to be kept at all times adequate and in repair, under or through such flag-stone or curb-stone; and no water or other liquid, or ice therefrom, shall be allowed to gather or remain on the upper surface of such curb, flag-stone, or passage; nor shall such person allow any accumulation of such water or liquid, or the ice therefrom, upon any street or place, but shall at all times cause the same to be removed or to pass along the gutter or some proper passage to one of the rivers or into a sewer.

Sec. 41. Every owner, tenant, lessec and occupant of any building or lot (whether vacant or occupied) within or near the built-up portions of said city, shall keep and cause to be kept the sidewalk and flagging, and curb-stone in front thereof, free from obstructions and nuisances

of every kind, and shall not allow anything in the area or yard or about his premises to become a nuisance, or dangerous or prejudicial to life or health.

Food and Drink.

Sec. 42. No meat, fish, eggs, birds, fowl, fruit, vegetables, or milk not being then healthy, fresh, sound, wholesome, and safe for human food, nor any meat or fish that died by disease or accident, shall be brought into The City of New York, or offered or held for sale as such food anywhere in said city, nor shall any such articles be kept or stored therein.

For the purposes of this section any meat, fish, eggs, birds, fowl, fruit, vegetables or milk offered for sale anywhere in the city by dealers in food, shall be deemed to be offered or held for sale as food.

Sec. 43. No calf, or the meat thereof, shall be brought into The City of New York or held, sold or offered for sale for human food, which, when killed, was less than four weeks old, or when killed and dressed weighs less than forty-five (45) pounds. No pig, or the meat thereof shall be brought into The City of New York or held, sold, or offered for sale for human food, which, when killed, was less than five weeks old. No lamb, or the meat thereof, shall be brought into The City of New York or held, sold or offered for sale for human food, which, when killed, was less than eight weeks old. Nor shall any meagre, sickly, or unwholesome fish, birds or fowl be brought into said city or held, sold or offered for sale for human food.

Sec. 44. No cattle shall be killed for human food while in an overheated, feverish, or diseased condition; and all such diseased cattle, in The City of New York, and the place where found, and their disease, shall be at once reported to this Department by the owner or custodian thereof, that the proper order may be made relative thereto, or for the removal thereof from said city.

Sec. 45. The body of any animal, or any part thereof, which is to be used as human food, shall not be carted or carried through the streets or avenues, unless it be so covered as to protect it from dust and dirt; and no meat, poultry, game or fish shall be hung or exposed for sale in any street or outside of any shop or store, or in the open windows or doorways thereof, in The City of New York. No

meat or dead animal above the size of a rabbit shall be taken to any public or private market to be sold for human food until the same shall have been fully cooled after killing, nor until the entrails and feet (except of poultry and game, and except the feet of swine), shall have been removed.

- Sec. 46. No breadstuffs, cake, pastry, dried or preserved fruits, candies or confectionery shall be kept, sold or offered for sale outside of a building in The City of New York, or in any street or public place, unless they be kept properly covered so that they shall be protected from dust and ditt.
- Sec. 47. No person, being the manager or keeper of any saloon, boarding-house or lodging-house, or being employed as a clerk, servant, or agent thereat, shall therein or thereat, offer or have, for food or drink, or to be eaten or drunk, any poisonous, deleterious, or unwholesome substance, nor allow anything therein to be done or to occur, dangerous to life or prejudicial to health.
- Sec. 48. No meat, fish, fruit, vegetables or milk, or unwholesome liquid shall knowingly be bought, sold, held, offered for sale, labeled, or any representation made in respect thereof, under a false name or quality, or as being what the same is not, as respects wholesomeness, soundness, or safety for food or drink.
- Sec. 49. Every person, being the owner, lessee, or occupant of any room, stall or place where any meat, fish, fruit or vegetables, designed or held for human food, shall be stored or kept, or shall be held or offered for sale, shall put and keep such room, stall and place, and its appurtenances, in a cleanly and wholesome condition; and every person having charge, or interested or engaged, whether as principal or agent, in the care or respect to the custody or sale of any meat, fish, fruit, birds, fowl or vegetables, designed for human food, shall put and preserve the same in a cleanly and wholesome condition, and shall not allow the same, or any part thereof, to be poisoned, infected, or rendered unsafe or unwholesome for human food.
- Sec. 50. No butcher or dealer shall keep in any market any refrigerator or ice-box, unless the same shall be lined with some proper metallic substance, so as to be water-tight.

Sec. 51. In the sale, or keeping for sale, of any beverage or drink, no person shall keep or use any tap, faucet, tank, fountain or vessel, or any pipe or conduit in connection therewith, which shall be composed or made, either wholly or in part, of brass, lead, copper, or other metal or metallic substances that are or will be affected by liquids so that dangerous, unwholesome or deleterious compounds are formed therein or thereby, or such that beer, soda water, syrups or other liquids, or any beverage, drink or flavoring material drawn therefrom shall be unwholesome, dangerous or detrimental to health.

Sec. 52. No person shall have at any place where milk, butter or cheese is kept for sale, nor shall at any place sell, deliver, or offer, or have for sale, or keep for use, nor shall any person bring or send to said city any unwholesome, watered or adulterated milk, or milk known as "swillmilk," or milk from cows or other animals that for the most part have been kept in stables or that have been fed in whole or in part on swill, or milk from sick or diseased cows or other animals, or any butter or cheese made from any such milk, or any unwholesome butter or cheese.

Sec. 53. No milk which is watered, adulterated, reduced or changed in any respect by the addition of water or other substance, or by the removal of cream, shall be brought into The City of New York, or held, kept, sold or offered for sale at any place in said city; nor shall any one keep, have, sell or offer for sale in the said city any such milk.

The term "adulterated milk," when so used in this code means:

First—Milk containing more than eighty-eight per centum of water or fluids.

Second—Milk containing less than twelve per centum of milk solids. Third—Milk containing less than three per centum of fats.

Fourth-Milk drawn from animals within fifteen days before or five days after parturition.

Fifth—Milk drawn from animals fed on distillery waste, or any substance in a state of fermentation or putrefaction, or on any unwholesome food.

Sixth—Milk drawn from cows kept in a crowded or unhealthy condition.

Seventh—Milk from which any part of the cream has been removed. Eighth—Milk which has been diluted with water or any other fluid, or to which has been added, or into which has been introduced, any foreign substance whatever.

Ninth—Milk the temperature of which is higher than 50 degrees Fahrenheit, or which contains an excessive number of bacteria.

The provisions of this section shall not be applicable, however, to modified milk or skimmed milk held or offered for sale under permits therefor from the Board of Health, pursuant to the rules and regulations of said Board.

Sec. 54. Any milk found to be adulterated, which has been brought into the City of New York, or is held or offered for sale in said City, may be seized and destroyed by any inspector or other officer of this Department authorized to inspect same.

Sec. 55. No condensed milk which is adulterated shall be brought into The City of New York or held, kept, sold or offered for sale at any place in said city, nor shall any one have, keep, sell or offer for sale in said city any such condensed milk. The term "adulterated," when used in this section, refers to condensed milk in which the amount of fat is less than twenty-five per cent. of the milk solids contained therein, or to which any foreign substance whatever has been added, excepting sugars, as in preserved milks.

Sec. 56. No milk, modified milk, or cream shall be received, held, kept, offered for sale or sold and delivered in The City of New York, without a permit in writing therefor from the Board of Health, and subject to the conditions thereof.

By the term "modified milk" is meant milk which has been changed by the addition of water, barley water, lime water, sugar of milk, or other substances intended to render the milk suitable for infant feeding.

Sec. 56a. All milk held, kept, offered for sale or sold and delivered in The City of New York shall be so held, kept, offered for sale or sold and delivered under either or any of the following grades or designations and under no other, and in accordance with such rules and regulations as may be adopted by the Board of Health, namely:

Milk: This term shall be applied to cows' milk which conforms to the requirements of Section 53 of the Sanitary Code and which does not meet the requirements of milk sold under other grades or designations herein provided for.

Selected Milk: Which is milk produced by farms holding a permit therefor from the Board of Health and handled according to the rules and regulations of said Board.

Inspected Milk: Which is milk produced under the supervision of a Milk Commission appointed by the Medical Society of the County of New York or by the Medical Society of the County of Kings, or under certificate for "Inspected Milk," issued by said Commission. No milk, however, shall be held, kept, offered for sale or sold and delivered as inspected milk in The City of New York which is produced under requirements less than those of the said Board for Selected Milk.

Guaranteed Milk: Which is milk produced by farms holding a permit therefor from the Board of Health and produced and handled in accordance with the rules and regulations of the said Board.

Certified Milk: Which is milk certified by the Milk Commission appointed by the Medical Society of the County of New York, or the Medical Society of the County of Kings as being produced under the supervision and in conformity with the requirements of that Commission as laid down for Certified Milk. No milk, however, shall be held, kept, offered for sale or sold and delivered as Certified Milk in The City of New York which is produced under requirements less than those of the said Board for Guaranteed Milk.

Skimmed Milk: Which is milk containing less than three per cent. butter fat.

Condensed Skimmed Milk: Which is milk in which the butter fat is less than twenty-five per cent. of the total milk solids.

Condensed Milk: Which is milk from which any part of the water has been removed, or milk from which any part of the water has been removed and to which sugars have been added.

The provisions of this section shall not apply to butter-milk, or to milk products commonly known as Kumyss, Matzoon, Zoolak, dried milk or milk powder, or to other similar preparations, or to cream or modified milk.

Sec. 56b. No milk shall be held, kept, offered for sale or sold and delivered in The City of New York, which has been subjected to the action of heat commonly known as "Pasteurization" unless the receptacle in which the same is contained is plainly labeled "Pasteurized." Pasteurized milk shall not be sold as such unless the rules and regulations of the Board of Health in regard thereto have been complied with; and said term "Pasteurized" may be used in connection with any milk designated or graded as hereinbefore provided for.

Sec. 56c. No milk shall be held, kept, offered for sale or sold and delivered in The City of New York under either or any of the grades or designations provided for in Section 56a hereof without a permit in writing therefor from the Board of Health, subject to the conditions thereof, and the rules and regulations of said Board (except condensed milk when contained in hermetically scaled cans); and said permit shall specify the grade or designation of milk which the holder of such permit is authorized to keep, offer for sale or deliver as aforesaid.

Sec. 57. No cream which is adulterated shall be brought into The City of New York, or held, kept, sold or offered for sale in said city, nor shall any one keep, have, sell or offer for sale in said city any such cream. The term "cream" means that portion of milk represented in milk fat which rises to the surface of milk on standing or is separated from it by centrifugal force and which is fresh and clean. The term "adulterated," when used in this section, refers to cream to which any foreign substance whatever has been added, or which contains less than fifteen per cent. of butter fat.

Sec. 58. Upon any cattle, milk, meat, birds, fowl, fish or vegetables being found by any Inspector or other officer of this Department in a condition which renders them, in his opinion, unwholesome and unfit for use as human food, or in a condition or of a weight or quality in this code condemned or forbidden, he is empowered, authorized and directed to immediately condemn the same and cause it to be removed to the offal or garbage dock for destruction, and report this action to the Department without delay.

And the owner or person in charge thereof, when so directed by the said inspector or by an order of the Sanitary Superintendent, or ar Assistant Sanitary Superintendent, shall remove, or cause the same to be removed, to the place designated by the said inspectors or the order of said Sanitary Superintendent or Assistant Sanitary Superintendent, or to the offal dock, and shall not sell, or offer to sell, or dispose of the same for human food. And when, in the opinion of the Sanitary Superintendent, or an Assistant Sanitary Superintendent, any such meat, fish, fruits, or vegetables shall be unfit for human food, or any such animal, cattle, sheep, swine, or fowls, by reason of disease, or exposure to contagious diseases, shall be unfit for human food, and improper or unfit to remain near other animals or to be kept alive, the Board of Health may direct the same to be destroyed, as dangerous to life and health, and may order any such animals, cattle, sheep, swine, or fowls, to be removed by any inspector, police officer, officer or agent of this Department, to be killed, and taken to the offal dock.

Sec. 59. It shall be the duty of every manufacturer, importer or other person who manufactures or imports, in The City of New York, any artificial or natural mineral, spring or other water for drinking purposes, to file, under oath, with the Department of Health, the name of such water and the exact location from which it is obtained, together with the chemical and bacteriological analysis thereof, and, when manufactured, the exact formula used in its production, giving qualitatively and quantitatively each and every item entering into its composition. No person shall manufacture or bottle mineral, carbonated or table waters, in The City of New York without a permit from the Board of Health.

Sec. 60. Every butcher or milk dealer, and their agents, shall allow the parties authorized by this Department to freely and fully inspect the cattle, meats, fish, vegetables and milk held or kept by them, or intended for sale, and will be expected to answer all reasonable and proper questions asked by such persons relative to the condition thereof, and of the places where such articles may be.

Water.

Sec. 61. No person shall throw or allow to run or pass into any public reservoir, water-pipe or aqueduct, or into or upon any border or margin thereof, or excavation or stream therewith connected, any

animal, vegetable, or mineral substance whatever; nor shall any person (having power or right to prevent the same) do or permit any act or thing that will impair or peril the purity or wholesomeness of any water or other fluid used or designed as a drink, in any part of said city; nor shall any person bathe nor (except in the discharge of a public duty) put any part of his person into such water; nor shall any unauthorized person open any erection or unscrew any hydrant holding such water.

Sec. 62. It shall be the duty of every person, officer, department, and board, having any authority and control in regard to any water designed for human consumption (and within the proper sphere of the duty of each thereof), to take all usual and also all reasonable measures and precautions to secure and preserve the purity and wholesomeness of such water.

Sec. 63. Water from wells in the Borough of Manhattan shall not be used for drink; nor shall such water be used for any purpose in any tenement or lodging-house, hotel, manufactory or building in which persons are living or employed, or in which there are offices, or a restaurant or saloon, without a permit from the Board of Health. Water from wells in the other boroughs of said city, other than the public water supply, shall not be used in any tenement or lodging-house, hotel, manufactory or buildings in which persons are living or employed, or in which there are offices or a restaurant or saloon, without a permit from the Board of Health.

Sec. 64. No person shall destroy or in any wise injure or impair any drinking hydrant, or part thereof, in the said city; nor shall any person interfere with the use or enjoyment of the water therein, or therefrom, or interrupt the flow thereof, nor shall any person put any dirty, poisonous, medicinal, or noxious substance into or near said water or hydrant, whereby such water is made or may be regarded as dangerous or unwholesome as a drink.

Drugs, Medicines, Adulterations and Poisons.

Sec. 65. No person shall make, prepare, put up, administer or dispense any prescription, decoction, or medicine under any deceptive or fraudulent name, direction or pretence; nor shall any ingredient be

substituted for another in any prescription; nor shall any false or deceptive representation be made by any person to any other, as to the kind, quality, purpose, or effect of any such drug, medicine, decoction, drink, or other article offered or intended to be taken as food or medicine.

- Sec. 66. No poison shall be sold at retail by any person in The City of New York, without having affixed to the bottle, box, parcel or receptacle containing such poison, a label bearing the word "Poison" distinctly shown, printed or written in red ink, together with the name and place of business of the seller and the name of the poison printed or written upon such bottle, box, parcel or receptacle in plain legible characters.
- Sec. 67. No phenol, commonly known as carbolic acid, shall be sold at retail by any person in The City of New York, except upon the prescription of a physician, when in a stronger solution than five percent.
- Sec. 68. No person shall have, sell or offer for sale in The City of New York any food which is adulterated or misbranded. The term food as herein used shall include every article of food and every beverage used by man and all confectionery.

Food as herein defined shall be deemed adulterated:

- (a) If any substance or substances has or have been mixed and packed with it so as to reduce or lower or injuriously affect its quality or strength.
- (b) If any inferior or cheaper substances have been substituted wholly or in part for the article.
- (c) If any valuable constituent of the article has been wholly or in part abstracted.
- (d) If it consists wholly or in part of diseased or decomposed or putrid or rotten animal or vegetable substance, or any portion of any animal unfit for food, whether manufactured or not, or if it is a product of a diseased animal, or one that has died otherwise than by slaughter.
- (e) If it be colored or coated or polished or powdered, whereby damage is concealed or it is made to appear better than it really is.

- (f) If it contains any added poisonous ingredient, or any ingredient which may render such article injurious to health; or if it contains any antiseptic or preservative not evident and not known to the purchaser or consumer.
- (g) If in the case of confectionery, it contains terra alba, barytes, tale, chrome yellow, or other mineral substance or poisonous color or flavor, or other ingredient deleterious or detrimental to health; or any vinous, malt or spirituous liquor or compound or narcotic drug.
- (h) If, in the case of spirituous, fermented and malt liquors, they contain any substance or ingredient not normal or healthful to exist in such liquors, or which may be deleterious or detrimental to health when such liquors are used as beverages.

Food shall be deemed misbranded:

- (a) If it be an imitation or offered for sale under the distinctive name of another article.
- (b) If it be labeled or branded so as to deceive or mislead the purchaser, or purport to be a foreign product when not so; or if the contents of the package as originally put up shall have been removed in whole or in part and other contents shall have been placed in such package; or if it fails to bear a statement on the label of the quantity or proportion of any morphine, opium, cocaine, heroin, chloroform, cannabis indica, chloral hydrate or acetanilid, or any derivative or preparation of any such substances contained therein.
- (c) If in package form and the contents are stated in terms of weight or measure, they are not plainly and correctly stated on the outside of the package.
- (d) If the package or its label shall bear any statement, design or device regarding the ingredients or the substances contained therein, which statement, design or device shall be false or misleading in any particular: Provided. That an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be adulterated or misbranded in the following cases:

First—In the cast of mixtures or compounds which may be now or from time to time hereafter known as articles of food, under their own distinctive names, and not an imitation of or offered for sale under the distinctive name of another article, if the name be accompanied on

the same label or brand with a statement of the place where said article has been manufactured or produced.

Second—In the case of articles labeled, branded or tagged so as to plainly indicate that they are compounds, imitations or blends, and the word "compound," "imitation" or "blend," as the case may be, is plainly stated on the package in which it is offered for sale: Provided, That the term blend, as herein used, shall be construed to mean a mixture of like substances, not excluding harmless coloring or flavoring ingredients used for the purpose of coloring and flavoring only: And provided further, That nothing in this section shall be construed as requiring or compelling proprietors or manufacturers of proprietary foods which contain no unwholesome added ingredient to disclose their trade formulas, except in so far as the provisions of this section may require to secure freedom from adulteration or misbranding.

- Sec. 69. No person shall manufacture or produce or have, sell or offer for sale in The City of New York any drug which is adulterated or misbranded. The term drug as herein used shall include all medicines for external or internal use, or both. Drugs as herein defined shall be deemed adulterated:
- (a) If when sold by or under a name recognized in the United States pharmacopoeia or National formulary, it differs from the standard of strength, quality or purity as determined by the test laid down in the United State pharmacopoeia or National formulary official at the time of investigation; provided that no drug defined in the United States pharmacopoeia or National formulary shall be deemed to be adulterated under this provision if the standard of strength, quality or purity be plainly stated upon the bottle, box or other container thereof; although the standard may differ from that determined by the test laid down in the United States pharmacopoeia or National formulary.
- (b) If its strength or purity falls below the professed standard

A drug shall be deemed misbranded:

(a) If it be an imitation or offered for sale under the distinctive name of another article.

(b) If the contents of the package as originally put up shall have been removed, in whole or in part, and other contents shall have been placed in such package, or if the package fails to bear a statement on the label of the quantity or proportion of any alcohol, morphine, opium, cocaine, heroin, chloroform, cannabis indica, chloral hydrate or acetanilid, or any derivative or preparation of any such substances contained therein.

Cattle, Horses, Etc.

- Sec. 70. No cattle, swine or sheep shall be driven through any public street or avenue in the Borough of Brooklyn without a permit from the Board of Health in writing, and subject to the conditions thereof.
- Sec. 71. No cattle shall be kept in any place where the ventilation is not adequate and the water and food are not of such quality and in such condition as to preserve their health, safe condition and whole-someness for food.
- Sec. 72. No cows shall be kept in The City of New York without a permit from the Board of Health. Every stable and place where any cows, horses, or other animals may be, shall be kept at all times in a cleanly and wholesome condition, and properly ventilated, and no person shall allow any animal to be therein, which is infected with any contagious or pestilential disease.
- Sec. 73. No horses shall be yarded and no cattle, swine, or sheep, geese or goats, shall be kept or yarded within or adjacent to the built-up portions of The City of New York, without a permit from the Board of Health.
- Sec. 74. No cattle, with or without their young calves, shall be led through or along any of the streets of The City of New York without a permit from the Board of Health, and in strict accordance with the routes, hours, and conditions prescribed thereby; and no person shall lead, attempt to lead, or cause to be led, any cattle otherwise than singly, one person with each, nor upon any sidewalks; provided, however, that sheep may be driven on routes prescribed for them, pursuant to the terms and conditions of the permits issued by the Board of Health.
- Sec. 75. No cattle, sheep, swine or calves shall be driven in the streets or avenues of the Borough of Manhattan without a permit from the Department of Health, except in those cases where the said cattle.

sheep, swine or calves shall be landed at the foot of the street leading to the slaughterhouse to which they shall be destined, and where the streets shall be effectively barred or closed, so as to prevent the escape of such eattle, ctc., during the transfer from the dock to the slaughterhouse. No eattle, sheep, swine or calves shall be landed in the Borough of Manhattan except in accordance with the provisions and restrictions of this ordinance.

No cattle, calves, swine or sheep shall be driven in the Boroughs of The Bronx, Queens or Richmond, except in such streets, avenues or roads as shall be set apart and designated by the Board of Health.

Sec. 76. No cellar in The City of New York shall be occupied as a stable for horses, cattle or other animals, without a permit from the Board of Health.

Sec. 77. No cattle shall be placed or carried, while bound or tied by their legs, or bound down by their necks, in any vehicle in said city, but shall be allowed freely to stand in such vehicles when transported, and while being therein.

Sec. 78. No person shall take or drive or allow to go or be taken (having the right and ability to prevent the same), any horse or other animal, or any vehicle, upon any sidewalk or foot-path in front of any building, to the peril of any person; nor shall any person block up or obstruct any street or place, or contribute thereto.

Forels and Small Animals.

Sec. 79. No live chickens, geese, ducks, or other fowls, shall be brought into, or kept, or held, or offered for sale, or killed, in any yard, area, cellar, coop, building, premises, or part thereof, or in any public market, or on any sidewalk, except upon premises used for farming in unimproved sections of the city, without a permit from the Board of Health and subject to the conditions thereof.

Sec. 80. No person shall sell or keep for sale at any place in The City of New York any dogs, cats, birds or other small animals, without a permit from the Board of Health.

Sec. 81. No live pigeons shall be kept within the built-up portion of The City of New York without a permit from the Board of Health and subject to the conditions thereof.

Slaughtering and Slaughter-Houses.

Sec. 82. No person shall kill or dress any animal or meat in any market, and the keeping and slaughtering of all cattle, and the preparation and keeping of all meat and fish, birds and fowl, shall be in that manner which is, or is generally reputed or known to be, best adapted to secure and continue their safety and wholesomeness as food.

Sec. 83. The business of slaughtering cattle, sheep, swine, pigs or calves shall not be conducted in The City of New York without a permit from the Board of Health. Nor shall such business be conducted unless the same shall be in buildings located on or near the water front, and all buildings shall be constructed so as to receive all stock deliverable thereat from boats, cars, or transports, and to secure the proper care and disposition of all parts of the slaughtered animals upon the premises, or the immediate removal thereof by means of boats. It shall not be unlawful, however, to slaughter cattle, sheep, swine, pigs or calves on the Borough of Brooklyn, at such places where such business was established and carried on on January 3, 1808.

Sec. 84. The business of slaughtering cattle, sheep, swine, pigs or calves in the Borough of Manhattan shall be conducted on the west side of the borough between the north of the middle line of the block between West Thirty-eighth and West Thirty-ninth streets and the south side of West Forty-first street, Eleventh avenue and North River, inclusive; and the slaughtering of cattle, sheep or calves on the east side of the borough shall be between the north of the middle line of the block between East Forty-second and East Forty-third streets and the south side of East Forty-seventh street, First avenue and East River, inclusive.

Sec. 85. No building shall be erected or converted into, or used as a slaughter-house in The City of New York until the plans thereof have been duly submitted to the Board of Health and approved in writing by said Board; and no building occuped as a slaughter-house or any part thereof, or any building on the same lot, shall be occupied at any time as a dwelling or lodging place; and every such building shall at all times be kept adequately and thoroughly ventilated.

All floors where any meat, refuse, offal, fertilizer or any other materials, derived directly or indirectly from slaughtering of animals, are

treated or handled must be made water tight, properly drained and sewer-connected, and the walls of the killing, meat dressing and cooling rooms must be covered to the height of six feet above the floor with some non-absorbent material.

The yards, other than where cattle are kept, must be cemented or paved so as not to absorb liquid filth, and be so graded as to permit the same to flow into the sewer opening.

All woodwork, except floors and counters, must be painted or whitewashed.

Blood from slaughtered animals must not be allowed to flow into the sewer or river, but while still fresh must be treated so as not to become offensive. All offensive odors arsing from the handling of meat and treating of and caring for offal, blood or any other material stored or manufactured, must be cared for by destruction or condensation, and not allowed to escape into the outside air.

Sec. 86. No horses shall be slaughtered in The City of New York without a permit from the Board of Health.

The bringing into The City of New York and the keeping and selling of horse flesh for food, and the slaughtering of horses for food in said city are prohibited.

Sec. 87. No offal or butcher's refuse shall be conveyed through any street or avenue or over any ferry in The City of New York without a permit from the Board of Health and when so conveyed must be in tight boxes, barrels or receptacles, and tightly covered so that no odor shall escape therefrom.

No offal or butcher's refuse shall be brought into The City of New York.

Offensive Trades.

Sec. 88. No person shall permit or have any offensive water or other liquid or substance on his premses or grounds, to the prejudice of life or health, whether for use in any trade or otherwise; and no establishment or place of business for tanning, skinning, or scouring, or for dressing hides or leather, or for carrying on any offensive or noisome trade or business, shall hereafter be opened, started, established or maintained in The City of New York, without a permit from the Board of Health. And every such establishment now existing shall

be kept cleanly and wholesome, and be so conducted in every particular as not to be offensive, or prejudicial to life or health.

Sec. 89. No person or corporation being a manufacturer of gas, or engaged about the manufacturere thereof, shall throw or deposit or allow to run, or shall permit to be thrown or deposited in any public waters, river or stream, or in any sewer therewith connected, or in any street, or public place, any gas, tar, or any refuse matter of or from any gas-house works, manufactory, mains or service pipes; or permit the escape of any offensive odors from their works, mains or pipes; nor shall any such person or corporation permit to escape from any of their works, mains, or pipes, any gas dangerous or prejudicial to life or health, or manufacture illuminating gas of such ingredients and quality that in the process of burning it any substance which may escape therefrom shall be dangerous or prejudicial to life or health; or fail to use the most approved or all reasonable means for preventing the escape of odors.

No buildings shall be erected or converted into, or used as a place for the manufacture of illuminating gas, until the plans of such buildings and the location thereof have been duly approved in writing by the Board of Health.

Sec. 90. It shall not be lawful for any person or persons, incorporated or unincorporated, to carry on, establish, prosecute, or continue, within the Borough of Manhattan, the occupation, or trade, or business of bone boiling, bone burning, bone grinding, horse skinning, cow skinning, or skinning of dead animals, or the boiling of offal; and any such establishment or establishments, or place of such business existing within said borough, shall be forthwith removed out of sail borough, and such trade, occupation, or business shall be forthwith abated and discontinued, providing that nothing in this section contained shall apply to the slaughtering or dressing of animals for sale in said city.

Sec. 91. The business of bone crushing, bone boiling, bone grinding, bone or shell burning, lime making, horse skinning, cow skinning, glue making from any part of dead animals, gut cleaning, hide curing, fat rendering, boiling of fish, swill or offal, heating, drying, storing of blood, scrap, fat, grease or offensive animal or vegetable matter,

or manufacturing materials for manure or fertilizer, shall not be carried on or continued within the Boroughs of Brooklyn, The Bronx, Queens or Richmond without a permit from the Board of Health.

Nor shall any building be erected or converted or used for the carrying on of any business above mentioned until the plans thereof have been duly submitted to the Board of Health and approved in writing by said Board.

Sec. 92. No occupation or business that is dangerous or detrimental to life or health shall be established or carried on in The City of New York.

Sec. 93. All persons engaged in the business of boiling or rendering fat, lard, or animal matter, shall cause the scrap or residuum to be dried or otherwise prepared so as to effectually deprive such material of all offensive odors, and to preserve the same entirely inoffensive, immediately after the removal thereof from the receptacles in which the rendering process may be conducted.

Sec. 94. No person shall hereafter erect or establish in said city any manufactory or place of business for boiling any varnish or oil, or for the distilling of any ardent or alcoholic spirits, or for making any lampblack, turpentine, or tar, or for the treating and refining of ores, metals or alloys of metals, with acids or heat, or for conducting any other business that will or does generate any offensive or deleterious gas, vapor, deposit or exhalation without a permit from the Board of Health.

Sec. 95. No fat, tallow or lard shall be melted or rendered, except when fresh from the slaughtered animal, and taken directly from the places of slaughter in The City of New York, and in a condition free from sourness and taint and all other causes of offense at the time of rendering, and all melting and rendering must be in steam-tight vessels, and the gases and odors therefrom must be destroyed by combustion or other means equally effective, and according to the best and most improved means and processes; and everything preceding, following, and in connection with such melting and rendering, and the premises where the same shall be conducted, must be free from all offensive odor, and other cause of detriment to the public health. No fat, lard or tallow shall be brought into The City of New York to be

rendered or melted, and none shall be rendered or melted that has come from any place outside of The City of New York, without a permit from the Board of Health. The business of melting or rendering fat, tallow or lard shall not be carried on or conducted in The City of New York without a permit from the Board of Health.

Sec. 96. The owners, lessees, tenants, occupants and managers of every building, vessel or place in or upon which a locomotive or stationary engine, furnace or boilers are used shall cause all ashes, cinders, rubbish, dirt and refuse to be removed to some proper place so that the same shall not accumulate, nor shall any person cause, suffer or allow cinders, dust, gas, steam or offensive or noisome odors to escape or be discharged from any such building, vessel or place, to the detriment or annoyance of any person or persons not being therein or thereupon engaged.

Sec. 97. Every owner, lessee, tenant, and occupant of any stall, stable, or apartment in the built-up portions of The City of New York, in which any horse, cattle, or other animal shall be kept, or of any place in which manure, stable refuse, or any liquid discharge of such animals shall collect or accumulate shall cause such manure, stable refuse, or liquid to be promptly and properly removed therefrom, and shall at all times keep or cause to be kept such stalls, stables or apartments, and the drains, yards, and appurtenances thereof, in a clean and sanitary condition, so that no offensive odors shall be allowed to escape therefrom. Every such stable, and the yards and appurtenances thereof, shall be connected with the sewer in the street in front thereof. It shall be the duty of every such owner, lessee, tenant or occupant to cause all manure and stable refuse to be removed daily from such stable or stable premises, unless the same are pressed in bales, barrels or boxes, as hereinafter provided. It shall not be lawful to remove manure and stable refuse in carts or wagons, or to cart the same within the city without a permit from the Board of Health, and such carts and wagons shall be of a construction approved by said Board, and every such cart or wagon must have a permit from the Board, and be used in accordance with the terms of such permit and not otherwise. Manure carts and wagons shall be loaded within the stable premises and not upon the street or sidewalk, and the manure and stable refuse shall be removed from such premises in a manner not in any way offensive or so as to cause any nuisance. All manure and stable refuse when transported through the streets must be covered and secured so that no part of the same will fall upon the street, and so as to prevent the escape of offensive odors, and the same shall not be unloaded or deposited within the city limits, except upon the conditions of a permit from the Board of Health, and at such docks and places as shall be approved by the Board, and to which a permit in writing for such use shall have previously been granted by said Board. No manure or stable refuse shall be thrown upon or allowed to fall or remain upon any street or sidewalk or upon any ground near any stable. No manure vault shall be built or used on any premises within the built-up portions of The City of New York.

Every owner, lessee, tenant and occupant of any stall, stable or apartment, in the built-up portions of The City of New York, in which any horse, cattle or other animals shall be kept, and from which the manure and stable refuse are not removed daily as hereinbefore provided, shall cause the same to be pressed in bales, barrels or boxes, at least once in each day, and so pressed as to reduce the same to not more than one-third of the original bulk. Manure and stable refuse pressed in bales, barrels or boxes, shall be removed to such docks or places as shall be approved by the Board of Health, and to which a permit for such use shall have previously been granted by said Board, and such bales, barrels and boxes shall not be opened until delivered at such docks or places.

Offensive Materials.

Sec. 98. No person shall fill in any land under or above water within the limits of The City of New York, or any of the islands situated within such limits, with garbage, dead animals, decaying matter or any offensive and unwholesome material, or with dirt, ashes, or other refuse, when mixed with such garbage, dead animals or portions thereof, decaying matter, or offensive and unwholesome material.

No street sweepings shall be deposited or used to fill up or raise the surface or level of any lot, grounds, dock, wharf, or pier in or adjacent to the built-up portions of The City of New York without a permit from the Board of Health.

Sec. 99. No ground or material filled with offensive matter or substance, or that will emit or allow to arise through or from the same, any offensive smell or deleterious exhalation, shall (adjacent to or within the built-up portion of said city) be opened or turned up or the surface thereof removed, between the first day of May and the first day of October of any year, except according to a permit first obtained therefor from the Board of Health.

Sec. 100. No part of the contents of or substances from any sink, privy, or cesspool, nor any manure, or other offensive substance, shall be by any person deposited or allowed to run or drop into or remain in any street or public place; nor shall the same be thrown or allowed to fall or run into any river or other body of water, save through the proper underground sewers.

Sec. 101. No person shall gather, collect, accumulate, store, expose, carry, or transport in any manner through the streets and public places of this city, or in or to any cellar, or house in said city, any bones, refuse, or offensive material without a permit from the Board of Health.

Sec. 102. No swill, brine, urine of animals, or other offensive animal matter, nor any stinking, noxious liquid, or other filthy matter of any kind, shall by any person be allowed to run or fall into or upon any street or public place, or be taken or put therein.

Sec. 103. No blood, butcher's offal or garbage, nor any dead aummals, nor any putrid or stinking animal or vegetable matter, shall be thrown by any person or allowed to go into any street, place, sewer or receiving basin, or into any river or standing or running water or excavation or into any ground or premises in the built-up portions of the city.

Sec. 104. No person shall draw off, or allow to run on mo any ground, street or place of said city, the contents (or any part thereot) of any vault, privy, cistern, cesspool, or sink; nor shall any owner, tenant, or occupant of any building to which any vault, sink, privy, or cesspool shall appertain, or be attached, permit the contents or any part thereof, to flow therefrom, or to rise within two feet of any part of the top, or permit said contents to become offensive; nor shall any vault.

privy, cistern, cesspool or sink be filled or covered with dirt until it has been emptied of its filthy contents.

Sec. 105. No person shall throw into or deposit in any vault, sink, privy, or cesspool, any offal, ashes, meat, fish, garbage, or other substances except that of which any such place is the appropriate receptacle.

Sec. 106. Every tub or other receptacle in any sink, or privy (or placed, or allowed to stand therein by any owner, tenant, or occupant of any building or premises), and used to contain any liquid or partially liquid substance, shall be sufficiently strong, perfectly tight, and adequately provided with a strong cover and with hoops and handles; shall not be allowed to be filled to within four inches of any part of the top, and shall not be allowed (or its contents) to be offensive. And the provisions of this Code relative to emptying cesspools, and to throwing any substance therein, shall apply to said tubs and receptacles as if here repeated and applied thereto.

And no person shall throw, drop or allow to fall into the North or East River, or into any street or place, any substance being, or having been, part of the contents of any such vault, cesspool, privy, sink, tub or receptacle, or any offal.

Sec. 107. Neither the contents of any such tub, or of any receptacle, cesspool, privy, vault, sink, water-closet or cistern, nor anything in any room, excavation, vat, building, premises or place, shall be allowed to become a muisance, or offensive, so as to be dangerous or prejudicial to life or health.

Sec. 108. It shall be the duty of every owner, tenant, lessee, occupant, or person in charge of any and every building, or place of business in the generally built-up portions of The City of New York, forthwith to provide or cause to be provided, and at all times thereafter to keep and cause to be kept and provided, within such building or place of business, and for the exclusive use of such building or place of business, separate receptacles for receiving and holding, without leakage, all the ashes, garbage, and liquid substances that may accumulate during thirty-six hours, from said building or place of business, or the portion thereof of which such person may be the owner, tenaut, lessee, occupant or in charge, and every such receptacle designed and used to hold ashes shall be made of or lined with some suitable metal.

And it shall be the duty of every owner, lessee or agent of any such building or place of business to cause to be separated and put into their respective receptacles all such materials and substances and such receptacles shall not be filled to within four inches of the top thereof.

And such receptacles, as well as any light refuse or rubbish to be removed, shall be kept within the premises until the proper time for removal, and shall then be placed in the area, or within the stoop-line only, and shall there remain until such materials or substances are removed by the Department of Street Cleaning, but in no case shall such receptacles be placed where they shall be or become a nuisance.

All light refuse or rubbish, likely to be scattered or blown about, shall, before being placed outside of any building or premises for removal, be properly bundled, packed or otherwise secured.

Sec. 109. No person, not for that purpose authorized, shall interfere with the receptacles for ashes, garbage or liquid substances, as provided in accordance with Section 108 of the Sanitary Code, or with the contents thereof; nor shall any person in any way handle or disturb such contents.

Sec. 110. All occupants so preferring may deliver their ashes, garbage and rubbish directly to the proper carts, to be taken away at any hour of the day when said carts may be present; and said carts may take such articles from receptacles delivered at any such hour; provided that such garbage or rubbish be not highly filthy or offensive; and in the latter case, the same shall not be so delivered or received during the period from seven o'clock a. m. of any day till ten o'clock of the evening of the same day.

Sec. 111. No pile or deposit of manure, offal, dirt or garbage, or any accumulation of any offensive or nauseous substance, shall be made within the built-up portions of The City of New York or upon the piers, docks or bulkheads adjacent thereto, or upon any vessel or scow lying at such pier, wharf or bulkhead; nor shall such deposit or accumulations be made anywhere in this city within three hundred feet of any church or place of worship, or inhabited dwelling, without a permit from the Board of Health; and no person shall contribute to the making of any such accumulations; nor shall cars or floats loaded with or having in or upon them any such substance or substances be

allowed to remain or stand on or along any railroad, street or highway within 300 feet of any inhabited dwelling, nor elsewhere in said city without a permit from the Board of Health; and no manure, garbage or other material that is liable to emit an offensive exhalation, shall, in or adjacent to the built-up portions of The City of New York, be turned or stirred, except about its removal, in such a way as to increase such exhalations by reason thereof; nor shall any straw, hay or other substance which has been used as bedding for animals, be placed or dried upon any street, or sidewalk, or roof of any building; nor shall any straw, hay or other substance, or the contents of any mattress or bed, be deposited or burnt, without a permit from the Board of Health.

Sec. 112. Every proprietor, lessee, tenant, and occupant of any oyster-house, oyster-saloon or other premises where any oysters, clams, lobsters, or shell or other fish are consumed, used, or sold, or where any of the refuse matter, offal, or shells thereof accumulate shall daily cause all such shells, offal, and refuse matter to be removed therefrom to some proper place, and shall keep his house, saloon and premises at all times free from any offensive smells or accumulations.

Sec. 113. No person shall obstruct, delay, or interfere with the proper and free use, for the purposes for which they may be and should be set apart and devoted of any dock, pier, or bulkhead set apart for the use of any contractor or person engaged in removing any offal, garbage, rubbish, dirt, dead animal, night-soil, or other like substances, or with the proper performance of such contracts.

Sec. 114. It shall be the duty of every person (his agents and employees) who has contracted or undertaken to remove any diseased or dead animal, offal, rubbish, garbage, dirt, street-sweepings, night-soil, or other filthy, offensive, or noxious substance, or is engaged about any such removal, or in loading or unloading any such substance, to do the same with dispatch, and in every particular in a manner as cleanly and little offensive, and with as little danger and prejudice to life and health as possible, and no matter or material shall lie piled up, or partially raked together, in any street or place before the removal thereof, more than a reasonable time, nor for more than four hours in the day-time, under any circumstances.

Sec. 115. No ship, boat, or other vessel, shall be taken or allowed by any person to come into or lay to, or at, or within any dock, pier, bulkhead or slip, or be placed therein for the purposes of the shipment or removal of any offal, garbage, rubbish, blood or offensive animal or vegetable matter, dirt or dead animals, or for the use of any contractor for the removal of any of the foregoing substances, without a permit from the Board of Health.

Sec. 116. It shall be the duty of every owner, lessee, and tenant of any vacant, sunken, or excavated lot in The City of New York to keep the same at all times clean and inoffensive, and free from the accumulation of water thereon, and to maintain around the same a proper fence, so as to effectually prevent the throwing or depositing therein or thereupon any garbage or offensive thing whatsoever, and so as to prevent persons passing from falling into such excavation.

Sec. 117. No person shall deposit upon any street or public place within the generally built-up portion of The City of New York, or upon any paved street, any dirt or brick, or other material, or dirt taken from any ground therein, in such manner as to occupy more than one hundred square feet of surface of any street or place (and the same shall be compact and at one side); nor shall any person allow the same to remain in said street or public place more than twelve hours, without a permit from the Board of Health, or unless such occupancy shall be otherwise duly authorized by paramount authority. Nor shall any such substance be so deposited or allowed to remain by any person, as to obstruct the free flowage along any gutter.

Sec. 118. No lime, ashes, coal, dry sand, hair, feathers, or other substance that is in a similar manner liable to be blown by the wind, shall be sieved, agitated or exposed, nor shall any mat, carpet or cloth be shaken or beaten, nor shall any cloth, yarn, garment, material, or substance be scoured, cleaned, or hung, nor shall any rags, damaged merchandise, barrels, boxes, or broken bales of merchandise or goods, be placed, kept, or exposed in any place where they or particles therefrom will pass into any street or public place, or into any occupied premises. Neither shall any usual nor any reasonable precautions be omitted by any person to prevent fragments or other substances from falling, to the peril of life, or dust or light material flying into any

street, place, or building, from any building or erection, while the same is being altered, repaired or demolished, or otherwise.

Removal of Filth.

Sec. 119. No person shall engage in the business of transporting manure, swill, ashes, garbage, offal, or any offensive or noxious substance, or drive any cart for such purpose, in The City of New York, without a permit from the Board of Health.

Sec. 120. No cart or other vehicle for carrying any manure, swill, garbage, offal, or rubbish, or other nauseous or offensive substance, or the contents of any privy, vault, cesspool, or sink, shall, without necessity therefor, be allowed to stand or remain before or near any building, place of business, or other premises where any person may be; nor shall any such cart or vehicle be allowed to occupy an unreasonable length of time in loading or unloading, or in passing along any street or through any inhabited place or grounds. Such carts, vehicles, and all implements used in connection therewith must be kept in an inoffensive and sanitary condition, and, when not in use, shall be stored and kept in some place where no needless offense shall be given to any of the people of said city.

Sec. 121. All carts and vehicles for carrying any nauseous or offensive substances, boxes, tubs and receptacles in which any nauseous or offensive substance may be, or may be carried, shall be strong and tight, and the sides shall be so high above the load or contents, that no part of such contents or load shall fall, leak, or spill therefrom; and either the vehicle or vessel carried by it shall be so covered as to be inoffensive; and all such material shall be loaded and removed in a sanitary manner, and according to the regulations of the Department of Health, and it shall be the duty of every person removing any offensive material to at once replace in said vehicle or vessel any material that may have fallen therefrom upon or in any place, street or premises.

Sec. 122. All putrid or offensive matter, and all night-soil, and the contents of sinks, privies, vaults and cesspools, and all noxious substances, shall, before their removal or exposure, be disinfected and rendered inoffensive by the owner, lessee, or occupant of the premises where the same may be, or by the person or contractor who removes or

is about to remove the same; and no part of the contents of any vault, privy, sink or cesspool shall be removed without a permit from the Board of Health

Sec. 123. No boat, scow or other receptacle used in transporting garbage to Barren Island or the place of disposal shall be permitted to remain moored or be at any dock, wharf or place within the limits of The City of New York for a longer period than twenty-four hours from the time garbage is first delivered or placed thereon. Garbage shall be received on such boat, scow or other receptacle, and transported, in a manner approved by the Board of Health.

Discased, Injured and Dead Animals.

Sec. 124. No diseased cattle, swine, sheep, horses, dogs or cats, which are suffering from or have been exposed to any disease which is contagious among such animals, shall be brought into or kept in The City of New York. All persons, corporations, or companies bringing milch cows into The City of New York shall furnish a certificate signed by a veterinarian who is a graduate of a recognized veterinary college, with the date of graduation and the name of the college from which the degree was received, to the effect that said cows are free from tuberculosis as far as may be determined by physical examination and the tuberculin test. Said certificate shall give a number which has been permanently attached to each cow, and a description sufficiently accurate for identification, stating the date (which must be not more than sixty days prior to the time they are brought into the city), the place of examination, the temperature of the cow or cows at intervals of three hours, for twelve hours before the subcutaneous injection of the tuberculin, the preparation of tuberculin used, the location of the injection, the quantity injected, the temperature at the tenth hour after the injection of the tuberculin and every three hours after the aforesaid tenth hour for twelve hours, or until the reaction is completed. No cow with a certificate which states that said cow gave a reaction of two degrees F, after the injection with 0.5 c, c, of the tuberculin prepared by the Department of Health of The City of New York (or its equivalent), diluted with ten times its volume of a 0.5 per cent. watery solution of carbolic acid, shall be brought into The City of New York.

Sec. 125. No person shall keep, or retain, or allow or cause to be kept or retained, at any place within The City of New York, any animal having the disease known as glanders, or farcy or any other contagious disease, but shall forthwith report the fact to the Department of Health of said city and under the direction of the Sanitary Superintendent or Assistant Sanitary Superintendent shall destroy or cause to be destroyed, remove or cause to be removed and dispose of such animal or animals in a manner designated by the Sanitary Superintendent or Assistant Sanitary Superintendent, and every person who destroys any such animal shall forthwith notify the Department of Health of such destruction, the place of destruction and the disposition of the body of such animal.

Sec. 126. All dead horses, before they are placed in the street, must have a tag attached giving the name and address of the owner and the stable from which the horse was removed.

Sec. 127. Every veterinary surgeon who is called to examine or professionally attend any animal within The City of New York having the glanders or farcy or any contagious disease shall report forthwith in writing to the Board of Health of said city the following facts, viz.: First, a statement of the location of such diseased animal; second, the name and address of the owner thereof; third, the type and character of the disease.

Sec. 128. No person shall leave in or throw into any place or street, or public water, or offensively expose or bury, the body (or any part thereof) of any dead or fatally sick or injured animal; nor shall any person keep any dead animal or any offensive meat, bird, fowl, or fish in a place where the same may be dangerous to the life or detrimental to the health of any person.

Sec. 129. Any animal, being in any street or public place, within or adjacent to the built-up portion of New York City, and appearing in the estimation of any officer or inspector of this Department (and of two discreet citizens, called by such officer or inspector to view the same in his presence) injured or diseased past recovery, for any useful purpose, and not being attended and properly cared for by the owner or some proper person having charge thereof for such owner, or not traying been removed to some private premises, or to some place designated to the contraction of the property of the contraction of the

nated by such officer or inspector, within one hour after being found or left in such condition, may be deprived of life by such officer or inspector, or as he may direct; and shall thereafter, unless at once removed by the owner or person, be treated as any other animal found on a street or place.

Sec. 130. Any person having a dead animal or an animal past recovery, and not killed for and proper for use as food, or in any offensive condition, or sick with an infectious or contagious disease, on his premises in said city, and every person whose animal or any animal in his charge or under his control in any street or place, may die or become or be in a condition past recovery, shall at once notify the Department of Health, and under the direction of the Sanitary Superintendent or an Assistant Sanitary Superintendent or an officer of the Police Department, remove or cause the removal of such animal, dead or alive, to such place as may be designated by such official.

Sec. 131. No person other than the inspectors or officers of this Department or the Police Department, or persons thereto authorized, shall in any way interfere with such dead, sick or injured animal in any street or place, and no person shall skin or wound such animal in such street or public place, unless to terminate its life as herein authorized, except that the owner or person having control of such animal may terminate the life thereof in the presence and by the consent of a policeman or an inspector or officer of this Department.

Sec. 132. Every animal which shows symptoms of rabies and every animal that has been exposed to such disease shall, by the person owning the same or having possession thereof, be at once confined in some secure place for such length of time as to determine whether such disease exists or to show that such exposure has not given such animal said disease, and so as to avoid all danger to life or health. And such person shall also forthwith notify the Department of Health thereof and of the place where such animal is confined. Every animal which is mad or has rabies shall at once be killed by the owner or person having possession thereof, or by the Department of Health, and the body of any animal that has died of such disease, or being suspected of such disease has been killed, shall be at once surrendered to the Department of Health to be by it disposed of.

Should a dog bite any person it shall be the duty of the owner, or person having the same in his possession or under his control, to at once notify said Department thereof, and surrender said dog to said Department for inspection and observation; and such dog shall be returned to the person from whom the same shall have been received if found not rabid, and if found to be rabid, it shall be destroyed by said Department.

When the police or other person or authorities destroy a dog for any of the causes herein mentioned, it shall be his or their duty to immediately notify the said Department thereof and of the location of its body, so that the same may be obtained by the said Department; and it shall be unlawful to remove any such dog or the body of any such animal heretofore mentioned except as herein provided.

Infectious Diseases.

Sec. 133. It shall be the duty of every physician to report to the Department of Health, in writing, the full name, age and address of every person suffering from any one of the infectious diseases included in the list appended, with the name of the disease, within twenty-four hours of the time when the case is first seen:

A.—Contagious (very readily communicable): Measles, rubella (rötheln), scarlet fever, small-pox, varicella (chicken-pox), typhus fever, relapsing fever.

B.—Communicable: Diphtheria (croup), typhoid fever, Asiatic cholera, tuberculosis (of any organ), plague, tetanus, anthrax, glanders, epidemic cerebro-spinal meningitis, leprosy, infectious diseases of the eye (trachoma, suppurative conjunctivitis), puerperal septicaemia, erysipelas, whooping cough.

C.—Indirectly Communicable (through intermediary host): Yellow fever, malarial fever.

Note.—In this provisional classification of the infectious diseases, arranged for practical purposes, the most readily communicable of these diseases, embracing the exanthemata and typhus fever, have been placed in a group by themselves and called contagious. This has been done with a view to emphasizing a distinction, which is not only of scientific significance, but of practical importance, in dealing with the sanitary features of administration. This distinction is furthermore of importance because it avoids the misunderstanding and alarm frequently caused by including in the same class the very readily communicable diseases (such as small-pox), and the much less communicable diseases (such as tuberculosis), which require very different sanitary measures for their control.

Sec. 134. It shall be the duty of the Commissioners or managers or the principal, superintendent, or physician, of each and every public institution or dispensary, in this city, to report to the Department of Health, in writing, the full name, age and address of any person suffering from any one of the infectious diseases included in the list appended, with the name of the disease, within twenty-four hours of the time when the case is first seen:

A.—Communicable: Influenza, lobar pneumonia, broncho-pneumonia, infectious diseases of the gastro-intestinal canal (dysentery, cholera morbus, cholera infantum, summer diarrhoeas in infants).

B.—Parasitic Diseases of the Skin: Scabies, tinea tonsurans, impetigo (contagious), favus.

Note.—In this list of diseases reporting is required by the Department of Health in order that data may be obtained for general and special investigation of the modes and sources of infection and as to the prevalence and distribution of these diseases. The Department of Health does not purpose to exercise a sanitary surveillance in these cases, but desires information with a view to the ultimate removal or improvement in the conditions which now foster them. Notification is required in certain of these diseases because of the liability to their extension among the children in schools.

Sec. 135. It shall be the duty of every physician to report forthwith, in writing, to the Department of Health, the death of every person who dies from, or while suffering with, any infectious disease, and to state in such report the specific name and type of such disease.

Sec. 136. It shall be the duty of every keeper of any boarding-house or lodging-house, and the proprietor of every lodging-house or hotel, to report forthwith to the Department of Health all the known facts in regard to any person ill, in any house or hotel under his or her charge, and suffering from any one of the following infectious diseases: measles, diphtheria (croup), scarlet fever, small-pox, chicken-pox, epidemic cholera, typhus fever, rubella (rötheln), plague, tuberculosis and whooping cough.

Sec. 137. It shall be the duty of every person having knowledge of the existence of any person afflicted with any one of the following infectious diseases: measles, diphtheria (croup), scarlet fever, small-pox, chicken-pox, epidemic cholera, typhus fever, rubella (rötheln), plague, tuberculosis and whooping cough, who he has reason to think

requires the attention of the Department of Health, to at once report to the Department all facts in regard to the disease; and no person shall interfere with or obstruct the entrance, inspection or examination of any building or house, or the occupants thereof, by the inspectors and officers of this Department, when any case of one of the infectious diseases above specified has been reported as existing in such house or dwelling; nor shall any person interfere with or obstruct, mutilate or tear down any notices of this Department posted in or on any premises in The City of New York.

Sec. 138. It shall be the duty of the commissioners or managers, or the principal, superintendent or physician of each and every public or private institution or dispensary in this city to report to the Department of Health, in writing, or to cause such report to be made by some proper and competent person, the name, age, sex, occupation and latest address of every person afflicted with tuberculosis, who is in their care or who has come under their observation, within one week of such time. It shall be the duty of every person sick with this disease and every person in attendance upon any one sick with this disease, and of the authorities of public and private institutions or dispensaries, to observe and enforce all the sanitary rules and regulations of the Board of Health for preventing the spread of pulmonary tuberculosis.

Sec. 139. Whenever an inspector of this Department shall report in writing that any person is sick of any infectious disease, under such circumstances that the continuance of such sick person in the place where he or she may be is dangerous to the lives of other persons residing in the neighborhood, the Sanitary Superintendent, an Assistant Sanitary Superintendent, or the Chief Inspector of the Division of Contagious Diseases, upon the report of the Medical Inspector of the Department, may cause the removal of such sick person to one of the hospitals under the charge of this Department or to a hospital delegated by the Board of Health.

Sec. 140. In every public hospital and dispensary in The City of New York there shall be provided and maintained a suitable room or rooms for the temporary isolation of persons suffering from any of the following infectious diseases: measles, diplitheria (croup), scarlet fever, small-pox, chicken-pox, epidemic cholera, typhus fever, rubella

(rötheln), plague and whooping cough; and such person shall immediately be separated from other persons at such dispensary or hospital. It shall be the duty of the physician or physicians, and of the officers and managers of every hospital or dispensary, to cause a report to be immediately made to the Department of Health of The City of New York of every person afflicted with any one of the infectious diseases berein specified who comes to their knowledge, and to have such person properly isolated from other persons.

Sec. 141. It shall be the duty of every undertaker having notice of the death of any person within The City of New York of small-pox. diphtheria (croup), scarlet fever, yellow fever, typhus fever, plague, Asiatic cholera, measles, or any other infectious disease dangerous to the general health of the community, or of the bringing of the dead body of any person who has died of any such disease into such city, to give immediate notice thereof to this Department. No person shall retain or expose, or assist in the retention or exposure or the dead body of any such person except in a coffin or casket properly sealed; nor shall he allow any such body to be placed in any coffin or casket unless the body has been wrapped in a sheet saturated with a proper disinfecting solution and the coffin or casket shall then be immediately and permanently sealed. No undertaker shall assist in the public or church funeral of any such person. No undertaker shall use, or cause or allow to be used, at any funeral, or in any room where the dead body of any person shall be, any draperies, decorations, rugs or carpets, belonging to or furnished by him or under his direction.

Sec. 142. A public or church funeral shall not be held of any person who has died of small-pox, diphtheria (croup), scarlet fever, yellow fever, typhus fever, Asiatic cholera, measles or plague; but the funeral of such person shall be private, and it shall not be lawful to invite, or permit at the funeral of any person who has died of any one of the above diseases, or of any infectious disease, or at any services connected therewith, any person whose attendance is not necessary, or to whom there is danger of contagion thereby.

Sec. 143. No person shall within this city, without a permit from the Board of Health, carry, remove, or cause or permit to be carried or removed any person sick with any infectious disease, or remove or cause

to be removed, any such person from any building or vessel to any other building or vessel or to the shore, or to or from any vehicle in any part of the city. Nor shall any person, by any exposure of any individual sick of any infectious disease, or of the body of such person, or by any negligent act connected therewith, or in respect of the care or custody thereof, or by a needless exposure of himself cause or contribute to, or promote the spread of disease from any such person, or from any dead body.

Sec. 144. Every owner, lessee, tenant and occupant of any dwelling or apartment in The City of New York shall forthwith report to the Department of Health, in writing, the removal of any person from such dwelling or apartment who shall be suffering from any of the following infectious diseases: measles, diphtheria (croup), scarlet fever, small-pox, chicken-pox, epidemic cholera, typhus fever, rubella (rötheln), plague, whooping cough or tuberculosis (of any organ).

Sec. 145. No principal or superintendent of any school, and no parent, master or custodian of any child or minor (having the power and authority to prevent) shall permit any child or minor having scarlet fever, diphtheria (croup), small-pox or any dangerous, infectious or contagious disease, or any child in any family in which any such disease exists or has recently existed, to attend any public or private school until the Board of Health shall have given its permission therefor, nor in any manner to be unnecessarily exposed, or to needlessly expose any other person to the taking or to the infection of any contagious disease.

Disinfection.

Sec. 146. Adequate disinfection or cleansing and renovation of premises, furniture and belongings, deemed by the Department of Health to be infected by contagious or communicable diseases, shall immediately follow the recovery, death or removal of the person suffering from such disease, and such disinfection or cleansing and renovation shall be performed by the owner or occupant of said premises when ordered by the Board of Health.

Vaccination, Antitoxin.

Sec. 147. Every person, being the parent or guardian, or having the care, custody, or control of any minor, or other individual, shall (to

the extent of any means, power or authority of said parent, guardian, or other person that could properly be used or exerted for such purpose) cause and procure such minor or individual to be so promptly, frequently and effectively vaccinated, that such minor or individual shall not take, or be liable to take the small-pox.

Sec. 148. That no preparation of diphtheria antitoxin shall be offered or exposed for sale in this city unless the receptacle containing such preparation bear a label on which is placed the name and the address of the producer, and upon such label, or upon a circular accompanying such receptacle and inclosed with it in a sealed package, shall be printed or written the date of production and the value of the contents in antitoxin, as measured by some generally recognized standard.

Vessels and Seamen.

Sec. 149. The master, chief officer, and consignee of every vessel not being in quarantine, or within quarantine limits, but being within one-fourth of a mile of any dock, wharf, pier, or building of said city, shall daily report to the Department of Health, or cause to be reported, in writing, the particulars, and shall therein state the name, disease, and condition of any person being in or on such vessel, and sick of any infectious disease.

Sec. 150. The keepers, lessees, tenants and owners of every boarding-house and lodging-house shall forthwith notify the Department of Health of the fact of any seafaring man or person lately from any vessel being taken sick at such house, and shall in such notice state where such sick person may be found, and from what vessel, and when he came, to the best of the knowledge of the person or persons giving such notice.

Sec. 151. Every master and chief officer of any vessel, and every physician of, or who practiced on, any vessel which shall arrive in the port of New York from any other port, shall at once report to this Department any facts connected with any person or thing on said vessel, or that came thereon, which he has reason to think may endanger the public health of this city; and he shall report the facts as to any person being or having been sick thereon, of an infectious disease.

and as to there being or having been, during the voyage or since her arrival, any infected person or articles thereon.

Sec. 152. No master, charterer, owner, part owner or consignee of any vessel, or any other person, shall bring to any dock, pier, wharf, or building within one thousand feet thereof, in said city, or unload at any dock, building, or pier therein, or have on storage in the built-up portions of said city, any skins, hides, rags, or similar articles or materials having been brought from any foreign country or any infected place, or from any points south of Norfolk, Virginia, without or otherwise than according to a permit from the Board of Health, and no person shall sell, exchange, remove, or in any way expose any straw, bedding or other articles used by immigrants upon any vessel bringing immigrants to this port, until it has been adequately and properly cleansed or disinfected; and all straw, bedding or other articles that have been exposed on any vessel to contagion or infection of any contagious disease, or have been or are liable to communicate such disease, shall be destrived by fire on said vessel.

Sec. 153. No owner, agent, or consignee of any vessel, or cargo, and no officer of any vessel (in respect of either of which vessel or cargo a permit, according to any law, ordinance, or regulation shall or should have been obtained to pass quarantine, or to come up to the water-front of The City of New York) shall unload, or land, or cause to be unladen or landed, such cargo, or any part thereof, in said city, without having first received a permit from the Board of Health so to do.

Sec. 154. No captain, officer, consignee, owner or other person in charge of any vessel (or having right and authority to prevent the same) shall remove or aid in removing from any vessel to the shore (save as legally authorized by the Health Officer of the port of New York, and into quarantine grounds and buildings only) any person sick of, or person that has been exposed to, and is liable very soon to develop any infectious disease, or so remove or aid in removing any articles that may have been exposed to the contagion of any such disease, except in accordance with a permit from the Board of Health.

Sec. 155. No master, charterer, consignee, or other person shall order, bring or allow (having power and authority to prevent the same) any vessel or person, or article therefrom, from any infected port, or

any vessel, or person or article therefrom, liable to quarantine, according to the ninth section of the three hundred and fifty-eighth chapter of the Laws of 1863 (or under any other laws, and whether such quarantine has been made or suffered or not), to come or be brought to any point nearer than three hundred yards from any dock or pier, or to any building in said city without or otherwise than according to a permit from the Board of Health. Nor shall any vessel, or person or thing therein or therefrom, having been in quarantine, come or be brought within the last-named distance of any last-named place, without the permit or assent of this Board.

Sec. 156. No person shall bring into this city from any infected place, or land, or take therein, from any vessel lately from an infected port, or from any vessel or building in which had lately been any person sick of an infectious disease, any article or person whatsoever, nor shall any such person land or come into said city, without a permit from the Board of Health; and it shall be no excuse that such person or article so offending, or the occasion of offense, has passed through quarantine, or has a permit from any other source than this Board.

Sec. 157. No owner, part owner, charterer, agent, or consignee of any vessel, or any officer or person having charge or control of the same, shall allow to be cast therefrom, and no person shall cast therefrom, into any public waters of The City of New York, any straw, bedding, clothing, or other substance.

Marriages, Births and Deaths.

Sec. 158. It shall be the duty of the clergymen, magistrates and other persons who perform the marriage ceremony in The City of New York, to keep a registry of the marriages celebrated by them, which shall contain, as near as the same can be ascertained, the place and date of marriage, age, color, name and surname of the parties married, birthplace, residence, number of marriage and condition of each, whether single, widowed, or divorced, the occupation of the groom, maiden name of the bride if a widow, the names of the parents of each and the maiden name of the mother of each. And every person authorized by law to perform the ceremony of marriage shall register his or her name and address in the office of the Bureau of Records.

Sec. 159. It shall be the duty of the parents of any child born in said city (and if there be no parent alive that has made such report, then of the next of kin of said child born), and of every person present at such birth, within ten days after such birth, to report to the Department of Health, in writing, as far as known, the date, borough and street number of said birth, and the name, sex and color of such child born, and the name, residence, birthplace and age of the parents, the occupation of the father and the maiden name of the mother. It shall be the duty of physicians and professional midwives to keep a register of the several births in which they have assisted professionally, which shall contain the date of birth, borough, street, and street number where such birth took place, the sex, color of the child, and also, as near as the same can be ascertained, the name of the said child, the number of previous children born of the mother, the number now living; the name, residence, birthplace and age of the parents; the occupation of the father and the maiden name of the mother; and to file a written copy of the said registry of birth with the Department of Health in the borough office of the borough where the birth occurred, within ten days after such birth, upon blank forms furnished by the said Department. Physicians and midwives shall certify they attended at the birth so reported, and that all the other facts stated in the copy of the said registry are true to the best of their knowledge, information and belief.

Sec. 160. It shall be the duty of the next of kin of any person deceased, and of each person being with such deceased person at his or her death, to report, in writing, to the Department of Health, within five days after such death, the age, color, nativity, last occupation and cause of death of such deceased person and the place of such person's death and last residence. Physicians who have attended deceased persons in their last illness shall make and preserve a registry of such death, stating the cause thereof and specifying the date, hour, place and street number of such death, and shall, in the report of the death of such persons, specify, as near as the same can be ascertained, the date of death, sex, name and surname, age, occupation, term of residence in said city, place of nativity, condition of life, whether single, married, widowed or divorced, color, last place of residence, the names and birth-places of the parents, the maiden name of the mother, and the cause

of death of such deceased persons and the coroners of the city, in such cases as an inquest may have been held, shall, in their certificates, conform to the requirements of this section.

Every physician in said city shall register his or her name and address in the office of the Bureau of Records of said Department.

Sec. 161. It shall be the duty of every person required to make or keep a registry of births, marriages or deaths, to present to the Bureau of Records, a copy of such registry signed by such person, within ten days after the birth or marriage, and within thirty-six hours, after the death of any person to whom such registry may or should relate, which shall thereupon be placed on file in the said Bureau.

Sec. 162. No person shall make, prepare, deliver or issue any false certificate, statement or report of a birth, marriage or death, or any such certificate, statement or report, which is not in accordance with the facts of the birth, marriage or death; all certificates, statements and reports of births, marriages or deaths, shall be signed by the person purporting to make the same, and no person shall sign or forge the name of another to any such certificate, statement or report.

Transportation of Dead Bodies.

Sec. 163. That no captain, agent, or person having charge of or attached to any ferry-boat, sailing, or other vessel, nor any person in charge of any car, stage, or other vehicle, or public or private conveyance, shall convey or allow to be conveyed thereon or by any means aforesaid, nor shall any person convey or allow to be carried or conveyed, in any manner, from, through, into or within The City of New York, the dead body of any human being, or any part thereof, without a permit therefor from the Board of Health. And the proper coupon for that purpose attached to any such permit, when issued, shall be preserved and returned to this Department, as its regulations may require, by the proper officer or person on each boat or vessel, and by the proper person in charge of any train of cars or vehicle on which any such body may be carried from said city. Provided, however, that the same effect shall be given, under this section, to transit permits issued severally by Boards of Health of cities, towns or villages in the State of New York, or by Boards of Health that may be hereafter organized,

pursuant to Laws of the State of New York, or when issued by the Health Officer of any such city, town or village, as to a transit permit issued from this Board, when the death of the person named in the permit shall have occurred in the city, town or village, from which such permit shall have been issued.

And provided that the same effect shall be given, under this section, to a transit permit issued under the laws of the State of New Jersey, as to a transit permit issued from this Board; subject, nevertheless, in every case to all the care, precautions and diligence prescribed by the rules and regulations of this Department. And provided, that the same effect be given, under this section, to a transit permit issued under the laws of the State of Connecticut, as to a transit permit from this Board; subject, nevertheless, in every case, to all the care, precautions and diligence prescribed by the rules and regulations of this Department.

Sec. 164. No person shall retain, expose, or allow to be retained or exposed, the dead body of any human being to the peril or prejudice of the life or health of any person.

Sec. 165. No person shall allow to be retained unburied the dead body of any human being for a longer time than four days or where death has resulted from small-pox, diphtheria (croup), scarlet fever, yellow fever, typhus fever, plague, Asiatic cholera or measles, for a longer time than twenty-four hours, after death of such person, without a permit from the Sanitary Superintendent or an Assistant Sanitary Superintendent, which permit shall specify the length of time during which such body may be retained unburied. This ordinance shall not apply to bodies retained in any public morgue in The City of New York.

Sec. 166. It shall be the duty of every person who has discovered or seen the body of a dead human being, or any part thereof (if there is reason for such person to think that the fact of the death, or the place of such body, or part thereof, is not publicly known), to immediately communicate to the Bureau of Records the fact of such discovery of such body, the place where, and time when, the same was discovered or seen, and where the same is or may be found, and any facts known by which said body may be identified, or the cause of death ascertained.

Cemeteries.

Sec. 167. No interment of the dead body of any human being, or disposition thereof in any tomb, vault, crematory, or cemetery, shall be made within The City of New York, without a permit therefor granted by the Board of Health, nor otherwise than in accordance therewith, and said dead body shall be placed in a metallic or tin-lined box, or a box so constructed as to prevent the issuance of any liquids therefrom; and no sexton or other person shall assist in, or assent to, or allow any such interment, or aid or assist about preparing any grave or place of deposit for any such body, or assist in the cremation of the same, for which such permit has not been given authorizing the same. And it shall be the duty of every person who shall receive any such permit, to preserve and to return the same to this Department, as its regulations may require.

Sec. 168. No new crematory, burying-ground, cemetery, tomb, or vault for dead human bodies shall be established, nor shall the remains of any dead body be placed in any existing burying-ground, vault, tomb, or cemetery in The City of New York, nor any of said receptacles be opened, exposed, or disturbed, except according to the terms of a permit therefor given by the Board of Health, and every body buried in any such place shall be buried to the depth of six feet below the surface of the ground, and four feet below any closely adjacent street, except that in the Borough of Queens a body may be buried to the depth of three feet below the surface of the ground.

No food, beverage or other article for human consumption shall be sold, exposed or offered for sale in any cemetery or burying-ground within The City of New York.

Sec. 169. Every person who acts as a sexton or undertaker in The City of New York, or has the charge or care of any crematory, vault, tomb, burying-ground, or cemetery for the reception of the dead, or where the bodies of any human beings are deposited, shall cause his or her name or residence, and the nature of his or her charge and duties, to be registered with this Department.

Sec. 170. Every sexton or other person having charge of any crematory, burying-ground, cemetery, tomb or vault in The City of New

York, shall, before twelve o'clock on Monday of each week, make return to this Department of the bodies and persons buried or cremated since their last return, and in such form, and specifying such particulars, as the special regulations of this Department shall require.

Coroners.

Sec. 171. At least two hours before the holding of any inquest within The City of New York upon a dead body, the coroner who has been notified of any death, or who may propose or intend to hold such inquest, shall transmit and cause to be delivered to the Bureau of Records written notice containing the following facts so far as known or reported to any such coroner:

- 1. The fact of any such call for the holding of an inquest, and by whom made, and when and from whom received by the coroner.
- 2. The place (giving the street and street number, and if there be none, then other particulars) where the body is.
 - 3. What is reported to be the cause of the death.
- When and where the death took place, and where the body has since been.
- 5. When and where he proposes to hold the inquest, giving the street, the street number (or otherwise sufficiently designating such place), and the hour.
- What physician, or physicians, or other professional person last attended such deceased person, or attended such person within fortyeight hours of such decease.

At any time after the commencement of any inquest, the coroner holding or who should hold, or who held such inquest, shall within twelve hours after the receipt of a written request so to do from the Sanitary Superintendent, answer in writing such of the following or such other questions as may be propounded to him by the said Sanitary Superintendent to the best of his knowledge, information, and belief.

Report of Coroner (here insert Coroner's name) upon the body of (here fill in name or description of deceased), on the (here fill in year, month and day), at (here mention street and number).

- 1. What was the age, sex, and last occupation, residence, and nativity of such deceased person?
- 2. At what house or place, and in or near what street or avenue, at what number therein did such deceased person die?
- 3. If such deceased person died of any poison, when and where was the same administered, and what was the kind of poison?
- 4. If such deceased person died of violence, when and where was the same committed, and upon what part of the body and organs, and of what did it consist?
- 5. If such deceased person died of any other cause, state such cause, and when and where the cause took effect upon or was received by the deceased?
- 6. Who was last in care of or with such deceased person, and at what place and at what time before death, and when, giving the full name and residence of each such person?
- 7. What were the name and residence of the physician and persons who last attended, and of each physician and person who within forty-eight hours of such death attended upon such deceased person, and where did he so attend; and whether said physician was notified of or attended and was examined at such inquest?
- 8. The times, places, and dates of holding the inquest, and the names and residences by street number of the jurors and witnesses that attended, and dates of their attendance, and when and where the body of the deceased was present at such inquest?
- 9. Was any post-mortem examination made, and if so, when, where, and by whom, and who was present thereat?

It shall be the duty of all coroners in said city to make return to the Bureau of Records of all inquisitious by them taken, except when by law such inquests are required to be filed elsewhere, and such return shall include the evidence taken on such inquest, and the verdict of the jury, and the full names and residences of the several jurymen.

And in all cases where the inquest may be required by law to be filed elsewhere such coroner shall make return to said Bureau of a copy of such inquest, including a copy of such evidence and verdict; and all such returns shall be made within forty-eight hours after the holding of any and every inquest.

Railroad Cars.

- Sec. 173. Each and every car used upon any railroad in The City of New York for the carrying of passengers shall, on each and every day on which it may be used, be carefully and thoroughly cleaned, so that all refuse, dirt and filth are removed from the inside of said car.
- Sec. 174. No person shall at any time carry or convey in or upon any passenger railroad car, nor shall any conductor or person in charge of any such railroad car permit or allow to be carried or conveyed in or upon such car, except on the front platform thereof, any soiled or dirty articles of clothing or bedding.
- Sec. 175. Every car used for the carrying of passengers in The City of New York shall be constructed so as to provide and secure at all times good, adequate and sufficient ventilation.
- Sec. 176. Every company, corporation or person operating a line of railroad cars for the carriage of passengers for hire in The City of New York shall, in connection with the running and operation of cars as aforesaid, have and provide closed cars to be run on said railroad; and at all times shall have, provide and operate at least one closed car in every four cars so operated and run for the carriage of passengers as aforesaid.
- Sec. 177. No conductor, driver, gripman or motorman of any railroad car or other vehicle running on tracks in The City of New York
 shall permit, allow or cause the same to be run, pulled, drawn or propelled on or around any curve on the surface of any public street or
 avenue of said city unless the means and appliances by which said car
 is operated and controlled are of such character and efficiency that the
 movement of said car is entirely and at all times under absolute control, so
 that the car can be stopped at will at any point of said curve, and be held
 motionless upon it or be moved upon or around it at any desired rate of
 speed less than the maximum speed of operation; and no person, corporation, superintendent, or other person who is interested in or who
 owns or has the management and control of any such car or vehicle,
 shall permit it to be so run, pulled, drawn or propelled, or placed in
 service, unless properly provided with means and appliances as aforesaid. No conductor, driver, gripman or motorman of any railroad

car or other vehicle running on tracks in The City of New York, shall permit, allow or cause the same to be run, pulled, drawn or propelled on or around any curve on the surface of any public street or avenue at a rate of speed which is dangerous or detrimental to life; and no person, corporation, superintendent or other person who is interested in or who owns or has the management and control of any such car or vehicle shall permit it to be so run, pulled, drawn or propelled.

Spitting.

Sec. 178. Spitting upon the sidewalk of any public street, avenue, park, public square or place in The City of New York, or upon the floor of any hall in any tenement house which is used in common by the tenants thereof, or upon the floor of any hall or office in any hotel or lodging-house which is used in common by the guests thereof, or upon the floor of any theatre, store, factory, or of any building which is used in common by the public, or upon the floor of any ferryboat, railroad car or other public conveyance, or upon the floor of any ferrybouse, depot or station, or upon the station platform or stairs of any elevated railroad or other common carrier, or into the street from the cars, stairs or platforms of the elevated railroads, is hereby forbidden.

The corporations or persons owning or having the management or control of any such building, store, factory, ferryboat, railroad car or other public conveyance, ferrybouse, depot or station, station platform or stairs of any clevated railroad or other common carrier, are hereby required to keep permanently posted in each of said places a sufficient number of notices forbidding spitting upon the floors and calling attention to the provisions of this section.

It is hereby made the duty of every corporation or person engaged in the manufacture of cigars, cigarettes or tobacco, or conducting the business of printing in The City of New York, where ten or more persons are employed on the premises, to provide proper receptacles for expectoration. Such receptacles are to be in proportion of one for every two persons so employed, and they are to be cleansed and disinfected at least once in every twenty-four hours.

A copy of the preceding paragraph must be kept posted in a conspicuous place in every factory or printing office mentioned therein.

Barber Shops.

Sec. 179. Every barber shop in The City of New York shall be conducted in accordance with regulations adopted from time to time by the Board of Health. A copy of such regulations must be posted in a conspicuous place in every such barber shop.

Noise.

Sec. 180. No person owning, occupying, or having charge of any building or premises, shall keep or allow thereon or therein any animal or bird, which shall by noise disturb the quiet or repose of any person therein or in the vicinity, to the detriment of the life or health of any human being.

Smoke.

Sec. 181. No person shall cause, suffer or allow dense smoke to be discharged from any building, vessel, stationary or locomotive engine, place or premises within The City of New York, or upon the waters adjacent thereto, within the jurisdiction of said city. All persons participating in any violation of this provision, either as proprietors, owners, tenants, managers, superintendents, captains, engineers, firemen or otherwise, shall be severally liable therefor.

Cocaine.

Sec. 182. No cocaine or salt of cocaine either alone or in combination with other substances, shall be sold at retail by any person in The City of New York except upon the prescription of a physician.

Milk Receptacles.

Sec. 183. It shall be the duty of all persons having in their possession bottles, cans or other receptacles containing milk or cream, which are used in the transportation of milk or cream, to clean or cause them to be cleaned immediately upon emptying.

No person shall use or cause or allow to be used any receptacle which is used in the transportation and delivery of milk or cream for any purpose whatsoever other than the holding of milk or cream; nor shall any person receive or have in his possession any such receptacle which has not been washed after holding milk or cream or which is unclean in any way.

Midreives.

Sec. 184. No person other than a licensed physician shall practice midwifery in The City of New York without a permit of the Board of Health authorizing such practice, and no person unless authorized by law to do so shall conduct a lying-in hospital, home, or place for the care of pregnant and parturient women, or advertise, offer, or undertake to receive and care for them at such a place, or at his home, without a permit from the Board of Health.

Sec. 185. No oysters shall be held, kept or offered for sale anywhere in The City of New York, without a permit in writing from the Board of Health, and subject to the rules and regulations of said Board.

I, EUGENE W. SCHEFFER, Secretary of the Board of Health of the Department of Health of The City of New York, do hereby certify that the foregoing printed "Sanitary Code," viz.: from page I to 78, inclusive, consisting of 184 sections, is a true transcript from the minutes and from the record of the proceedings of the said Board of Health, and is a true Copy of the Sanitary Code and of the original ordinances thereof, now in force, and of the amendments thereto, and of the whole thereof, and that the same are now in full force and entitled to full credence as such ordinances, and were duly adopted, enacted, published and confirmed by said Board of Health agreeably to the provisions of the law of the State of New York, entitled, "An act to reorganize the local government of The City of New York," passed April 30, 1873, as amended by an act entitled, "An act to amend chapter 335 of the Laws of 1873," passed June 13, 1873, and to the provisions of chapter 636 of the Laws of 1874, and to the provisions of chapter 410, Laws of 1882. and to the provisions of chapter 378, Laws of 1897, and to the provisions of chapter 466, Laws of 1901.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the seal of the said Department of Health this day of ,
A. D. 190 .

CHAPTER 135.

AN ACT TO SIMPLIFY THE PROOF OF THE SANITARY CODE OF THE CITY OF NEW YORK.

Passed April 19, 1880; three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Sec. 1. The Sanitary Code adopted and declared as such at a meeting of the Board of Health of the Health Department of the City of New York, held in the city on the second day of June, one thousand eight hundred and seventy-three, is hereby declared to be the Sanitary Code mentioned and described in section eighty-two of an act entitled, "An act to reorganize the local government of the City of New York," passed April thirtieth, eighteen hundred and seventy-three, and in all courts of justice or judicial proceedings proof of the said Sanitary Code, and of the proceedings of such Board of Health, in relation thereto, by the production of the book of minutes of such meeting held as aforesaid, or a transcript of the record of such proceedings duly authenticated by the secretary of the said Board of Health, shall be held and taken as complete and valid evidence of the said Sanitary Code, its due adoption, enactment and publication; and such Sanitary Code shall be deemed in full force and operative in the City of New York, save as duly modified or repealed by the said Board of Health.

Sec. 2. This act shall take effect immediately.

CHAPTER 378, LAWS OF 1897.

Sanitary Code.

Sec. 1172. The sanitary code adopted and declared as such at the meeting of the Board of Health of the Health Department of the City of New York, held in the city as formerly constituted and bounded on the second day of June, eighteen hundred and seventy-three, as amended in accordance with law, is hereby declared to be binding and in force in the city constituted by this act, and shall continue to be so binding and in force, except as the same may, from time to time, be revised, altered, amended and annulled by the Board of Health as herein provided. And it shall be the duty of said board, immediately upon organi-

zation under this act, to cause to be conformed to this title the sanitary code of ordinances, adopted by the existing Department of Health, and the Departments and Boards of Health existing in the several parts of the City of New York before the passage of this act, which shall be called the "sanitary code." Said Board of Health is hereby authorized and empowered from time to time to add to or to alter, amend or annul any part of the said sanitary code, and may therein publish additional provisions for the security of life and health in the City of New York, and distribute appropriate powers and duties to the members and employees of the Department of Health, not inconsistent with the constitution or laws of this State. The Board of Health may embrace therein all matters and subjects to which, and so far as, the power and authority of said Department of Health extends, not limiting their application to the subject of health only. But no such revision, alteration or amendment shall take effect, or be binding or in force, until the same has been published once a week for two successive weeks in the "City Record." The publication of additional provisions in, and of additional ordinances of the sanitary code once a week for two successive weeks in the "City Record" shall be sufficient, and render any further publication of the same in any other newspaper unnecessary. Any violation of said code or its amendments shall be treated and punished as a misdemeanor, and the offender shall also be liable to pay a penalty of fifty dollars, to be recovered in a civil action in the name of the Department of Health of the City of New York, before any justice or tribunal in said city, having jurisdiction of civil actions; and all such justices and tribunals shall take jurisdiction of such action. Copies of the record of the proceedings of said board, of its rules, regulations, ordinances, bylaws and books and papers constituting part of its archives, and the sanitary code, now or hereafter in force in said city, and the ordinances of the sanitary code added thereto and adopted by said Board of Health, when authenticated by its secretary, or secretary pro tempore, shall be presumptive evidence, and the authentication taken as presumptively correct in any court of justice, or judicial proceeding, when they may be relevant to the point or matter in controversy, of the facts, statements and recitals, therein contained,

CHAPTER 466, LAWS OF 1901.

SANITARY CODE.

Sec. 1172. The sanitary code which shall be in force in the City of New York the first day of January, nineteen hundred and two, and all existing provisions of law for fixing penalties for violations of said code are hereby declared to be binding and in force in the City of New York, and shall continue to be so binding and in force, except as the same may, from time to time, be revised, altered, amended or annulled as herein provided. Provided, however, that so much of this section as declares the sanitary code binding, and in force in the City of New York shall not be construed as limiting the storage of fertilizers or the keeping and slaughtering of fowls, cattle and other domestic animals upon premises used for farming in unimproved sections of the city, or as forbidding the ordinary use of country roads in driving such fowls, cattle and other domestic animals. Said Board of Health is hereby authorized and empowered, from time to time, to add to and to alter, amend or annul any part of the said sanitary code, and may therein publish additional provisions for the security of life and health in the City of New York, and confer additional powers on the Department of Health, not inconsistent with the constitution or laws of this state, and may provide for the enforcement of the said sanitary code by such fines, panalties, forfeitures, or imprisonment as may by ordinance be prescribed. The Board of Health may embrace in said sanitary code all matters and subjects to which, and so far as, the power and authority of said Department of Health extends, not limiting their application to the subjects of health only. Any violation of said sanitary code shall be treated and punished as a misdemeanor. Pecuniary penalties for violation of said sanitary code may be recovered in a civil action in the name of the Department of Health of the City of New York, before any justice or tribunal in said city, having jurisdiction of civil actions; and all such justices and tribunals shall take jurisdiction of such action. Copies of the record of the proceedings of said Board of Health, of its rules, regulations, ordinances, by-laws and books and papers constituting part of its archives, and the sanitary code, now or hereafter in

force in said city, when authenticated by its secretary or secretary pro tempore, shall be presumptive evidence, and the authentication taken as presumptively correct in any court of justice, or judicial proceedings, when they may be relevant to the point or matter in controversy, of the facts, statements, and recitals, therein contained.

REPORT OF THE BUREAU OF RECORDS FOR THE YEAR 1908.

Population.

The population of the City of New York as enumerated by the State authorities in 1905 consisted of 4,014,304 persons, and by the Federal authorities in 1900 of 3,437,202 persons, an increase of 577,102, and upon the assumption that the rate of increase that prevailed in the quinquennium 1900-1905 was maintained, the estimated population in 1908 was 4,422,685, distributed among the Boroughs as follows: Manhattan, 2,292,894; The Bronx, 327,553; Brooklyn, 1,492,970; Queens, 232,580, and Richmond, 76,685.

GENERAL STATISTICS.

Births.

There were 126,862 births reported during the year against 120,720 in 1907, an increase of 6,142, distributed among the Boroughs as follows; Manhattan, 1,104; The Bronx, 1,118; Brooklyn, 3,274; Queens, 596, and Richmond, 50. The birth-rate recorded in the year 1898, the vear of the formation of the Greater City, was 24.12 per 1,000 of the population; in 1908 the rate was 28.68, an increase over 1898 of 4.56 per 100; the average number reported in the decennium, 1898-1907, was 93,534, with a rate per 1,000 of 24.98, the number and the rate in the year 1908 exceeding this average by 33,328 and 3.70 per 1,000 respectively. This tremendous increase was due to two causes, first, the more complete registration (though there are still many that are not recorded by reason of the neglect of the medical attendants and midwives), and, second, by the great influx into the City during the past ten years of Italian and Russian immigrants who materially increase the birth-rate of the community by reason of their unrestrained fecundity.

The number of children recorded as born of native mothers was 39,999, of foreign mothers 86,842, and mother's nativity not stated 30; that is, about 32 per cent, represented the native mothers' share and 68 per cent, the foreign mothers' share in the production of future citizens; the number of native-born and foreign females at child-bearing ages not being ascertainable, recourse must be had to an estimation of

the birth-rate per one thousand females at all ages according to their nativity, and it will be seen that the fertility of the native mothers is slightly less than one-fourth that of the foreign mothers, to be exact, for every four children born of native mothers, seventeen are born of foreign mothers.

Estimated number of native born females	1,414,817
Number of births with native born mothers	39.990
Birth-rate per 1,000 native born females at all ages	28.26
Estimated number of foreign born females	793,332
Number of births with foreign born mothers	86,842
Birth-rate per 1,000 foreign born females at all ages	100.46

Nearly eighty thousand of the infants whose births were reported during the year were born of mothers whose knowledge of the English language is extremely meagre and of sanitary precautions almost nil; if we consider that during the previous four years the same preponderance of infants born of non-English-speaking mothers prevailed, then the magnitude of the task of saving the lives of these infants may be realized; of the 86,842 births reported as born of foreign mothers, 26,021 or 30 per cent. were of Italian mothers, 25,812 or 29.7 per cent. Russian Polish, 11,831 or 13.6 per cent. Austro-Hungarian, 8,436 or 9.7 per cent. Irish, 5,785 or 6.7 per cent. German, and 8,957 or 10.3 per cent. of other foreign.

As usual, the number of male exceeded that of female births, the figures being 64,541 and 62,321 respectively; 1,973 colored (African) births were reported, and 10 yellow (Chinese); 71,210 births were reported by physicians and 55,652 by midwives; 2,112 reported were apparently illegitimate; 1,040 pairs of twins and 8 groups of triplets were recorded.

Marriages.

The marriages reported during the year 1908 numbered 37,499 against 51,097 in 1907, a decrease of 13,598; the rate for the year of 1908 of 16.96 persons married per one thousand of the population at all ages was 6.88 lower than that of 1907, which reached the highest figure on record, 23.84 persons married per one thousand; this precipitous slump in the absolute figures and rate was due to two causes, the financial depression which began in the late fall of 1907 and the

enactment of the Marriage License Law which went into effect January 1, 1909, this latter being the most potent of the two factors. In consequence of the requirements of this law thousands of persons matrimonially inclined sought the, to them, hospitable shores of the State of New Jersey, where the knots were tied just as securely and with far less trouble than in New York State; 34,577 single, 2,695 widowed and 227 divorced males married 34,870 single, 2,314 widowed and 315 divorced females; 3 white females married blacks, and 17 white females married Chinamen; 29,268 natives were married, and 45,730 foreigners.

Still-Births.

There were 7,191 still-births reported during the year with a rate of 1.63 per 1,000 against 7,351 during 1907 with a rate of 1.72 per 1,000.

Deaths.

There were 73,072 deaths reported during 1908, giving a deathrate of 16.52 per 1,000 of the population, against 79,205 deaths and a rate of 18.48, a decrease of 6,133 deaths and 1.96 in the rate per 1,000. The quinquennial average for the immediately preceding five years was 18.62 per 1,000, the rate for 1908 being 2.10 points lower. The following table gives the population, deaths and death-rates per 1,000 from all causes for the four decenniums included in the years 1868-1907, and the year 1908, in the territory covered by the present Boroughs of Manhattan, The Bronx, and Brooklyn, the Boroughs of Queens and Richmond being excluded by reason of the absence of complete mortality returns therein previous to the year of formation of the Greater City in 1898.

Years.	Average Population.	Average Deaths.	Average Rates Per 1,000.
1868-1877	1,423,780	38,684	27.17
1878-1887	1,924,233	48,637	25.27
1888-1897	2,633,982	62,199	23.61
1898-1907	3,500,950	67,319	19.23
1908	4,113,417	67,999	16.53

From the above figures it will be readily seen that a remarkable decrease in the rate has taken place within the past forty years, a decrease comparing each decennial rate with the one immediately preceding represented by seven, seven and eighteen per cent. respectively, and comparing that of the first decennium with the individual year under review, a decrease of forty-seven per cent.

The following diseases and causes of death are those which have been the targets against which the bolts of sanitary science have been hurled, and with what effect the following comparisons, based upon the previous table, will show:

- Typhus Fever.—This dreaded disease has entirely disappeared from the causes of death since the years of its importation, 1892 and 1893.
- 2. Asiatic Cholera.—In the year 1849 this disease carried off 5.071 inhabitants of the city; in 1854 there were 2,509 deaths reported, and in 1866—the year of the organization of the Board of Health—1,137 deaths; in the decennium, 1868-1877, 30 deaths; in that of 1878-1887, no deaths; in that of 1888-1897, 9 deaths; since 1892 the City has not suffered the loss of one inhabitant from this cause.
- 3. Smallpox.—Out of every 100,000 of the population 48 died in the decennium 1868-1877, 7 in that of 1878-1887, 3 in that of 1888-1897, and 2 in that of 1897, comparing the latter decennium with that of 1868-1877, a reduction of 95 per cent.
- 4. Typhoid Fever.—The rate per 100,000 in the decennium 1868-1877 was 31, and in the subsequent decennia fell to 28, 20 and 18; the rate fell to 12 in 1908, a decrease of 61 per cent, compared with that of the first decennium, a reduction which falls far short of the actual condition, for if we consider the immense strides made in medical diagnosis as to this disease, we can not but realize that in earlier decades many deaths that should have been reported under this heading found place under indefinite titles, for example, under the heading of typhoid fever 4.445 deaths were enumerated in the first decennium, and 3.626 under that of malarial fevers, while under the same headings in the decennium 1898-1907 the figures were 6,349 and 1,112 respectively, the ratio of typhoid to malarial deaths in the first decennium being one and one-quarter deaths to one, and in the last six to one; undoubtedly there

has been an immense transference from the malarial death column to that of typhoid; it is very evident that deaths from malarial fever originating in this climate are seldom fatal, most of those that are reported being probably of a pernicious type having origin in southern latitudes. It is only fair to assume that the death rates from typhoid fever in remote years did not reflect the true index of mortality from this disease. If we add the number of deaths in the first decennium from malarial fevers to those from typhoid fever, the result is a total of 8,071 deaths with a rate of 57 per 100,000, against 7,461 deaths and a rate of 21 per 100,000 during the last decennium, a decrease of 63 per cent.

- 5. Malarial Fevers.—In the decennium 1868-1877 the rate per 100,000 was 26, which rose to 30 in the succeeding one, then fell to 18, and finally to 3 in the last decennium; if we compare the latter rate with the first, a decrease of almost 90 per cent. will be shown.
- 6. Measles.—The mortality from this cause rose from 28 in the ten years, 1868-1877, to 37 in the next decennium, fell to 31 in the next, and then to 20 in the last.
- 7. Scarlet Fever.—The decrease in the mortality from this cause has been a tremendous one, reaching 78 per cent. comparing the rates of the decennium 1898-1907 with that of 1868-1877; the number of deaths in the latter ten years reached 12,978, while in the former only 6,864 were reported.
- 8. Diphtheria and Croup gave a death rate of 153 per 100,000 in the decennium 1868-1877, and 53 in that of 1898-1907, a decrease of 66 per cent., that is, where three children died from this cause in the former, only one died in the latter decennium; in 1894 the rate was 163 per 100,000; in 1895—the year of the introduction of diphtheria antitoxin—the rate was 127, and in the following year fell to 86, since which year it has not reached 60, and in 1907 and 1908 fell to 40.
- 9. Whooping Cough.—Under this head 5,212 deaths and a rate of 37 per 100,000 were recorded in the decennium 1868-1877, and 4,124 deaths and a rate of 12 in that of 1898-1907, a decrease of 68 per cent., that is, three children succumbed from this disease in the former to one in the latter decennium.

- 10. Pulmonary Tuberculosis.—There were 5,374 deaths reported under this heading in the decennium 1868-1877, with a mortality of 376 dying out of every 100,000 of the population; this high mortality rate fell gradually until in the decennium 1898-1907 it reached the comparatively low figure of 224, a decrease of 40 per cent. During the past ten years the number of deaths certified from this cause was 79,637.
- 11. Diarrhocal Discoses.—The mortality rate of 30.3 per 1,000 children under the age of five years in the decennium 1868-1877 fell to 23.4, then to 19.7, and finally to 13.5 during the subsequent decennia. The rate from this cause has always been considered a reliable standard whereby to judge the sanitary conditions of a locality, and from the above decline in the mortality, especially when the following facts are considered, first, the extremely high temperature occurring during the summer months, and second, the high birth-rate among the foreignborn non-English-speaking population in the community, it is fair to assume that the efforts of this Department supplemented by those of the various charitable organizations have been productive of this encouraging result.

The rate per 100,000 of deaths from violence increased from 108 to 119 between the decennia 1868-1877 and 1898-1907, an increase of 10 per cent.

In contrast to the reduced mortality in the causes mentioned previously, that of the causes not amenable to sanitary intervention has increased considerably; the rate from the acute respiratory diseases, bronchitis and pneumonia, has increased 8 per cent., the rate of 291 per 100,000 in the decennium 1868-1877 increasing to 315 in that of 1898-1907. The mortality from cancer and sarcoma has increased at an enormous pace; in the decennium 1868-1877 the number of deaths reported was 5,556 and the rate 39 per 100,000, and in that of 1898-1907 the deaths numbered 23,648, and the rate reached the high figure of 67 per 100,000, an increase of 72 per cent. in the rate. While there is no doubt as to the more accurate certification of causes of death contributing to this increase, still it must be admitted that this explanation does not explain, save in part, the increased mortality recorded (see page 242, Annual Report of year 1902). The rate per 100,000

from organic diseases of the kidneys increased from 67 in the decennium 1868-1877 to 1.39 in that of 1898-1907, an increase of 107 per cent.; the rate from organic heart disease increased, comparing that of 1878-1887 with 1898-1907, from 111 to 138 per 100,000, an increase of 20 per cent.

12. Death Rate of Children Under Five Years of Age.—This is considered one of the most reliable tests of the sanitary condition of a community and the following short table shows in what proportion the decrease in mortality at this group of ages has taken place, in the present Boroughs of Manhattan, Brooklyn and The Bronx, which house about 93 per cent. of the population of the entire City:

Decennium.	Average Number of Deaths Under 5 Years.	Decennial Rate of Number of Children Under 5 Years.	Per Cent. Reduction of Previous Decennium.	
1878-1887	21,653	97.8		
1888-1897	26,142	86.2	1.2	
1898-1907	23,305	57.9	33	
1908	22,536	47.6	18	

It is evident that this decrease in the mortality at this age-group has been a considerable one, greater, in fact, than at any other age-group, according to tables recently compiled, and we are not surprised at this when we consider the reduced mortality previously spoken of in discussing the rates from individual causes of death, such as measles, scarlet fever, diphtheria and croup, whooping-cough, diarrhoea, and to a limited extent, smallpox and tuberculosis.

INFANTILE MORTALITY.

In other countries than this where the returns of birth are fairly complete this term is used to express the proportional number of deaths of infants under one year of age to every thousand births reported during the same year; the returns of births in this City are not complete, nevertheless the infantile mortality is such that it compares favorably with nearly all the largest cities of the world, as shown in the following table, notwithstanding our hot summers and consequent heavy mortality among infants from diarrhoeal diseases; a truer comparison

would follow the juxtaposition of quinquennial or decennial rates, but the absence of anything like complete returns of births in this City in previous years prevents the preparation of a table possessing rates other than annual rates:

Infantile Mortality—Certain Cities.					
City.	Year.	Rate Per 1,000 Births.	City.	Year.	Rate Per 1,000 Births.
Nuremberg	1906	228	Birmingham	1907	147
Cologne	1906	221	Manchester	1907	146
Munich	1906	196	Sheffield	1907	145
Vienna	1906	170	Liverpool	1907	144
Dresden	1906	167	Boston	1907	129
Hamburg	1906	т 66	New York	1908	128
Berlin	1907	163	London	1907	116
Bremen	1906	160	Paris	1905	111

In the City of New York during 1908 there were reported 16,231 deaths of infants under one year of age, 8,818 of which were males and 7,413 females; the great majority of these deaths were certified as having been due to the following specified diseases, arranged in order of numerical preponderance and of percentage of all deaths occurring at the age-group:

	Number of Deaths.	Per Cent. of Total.
All causes	16,231	100.0
Diarrhocal diseases	5,118	31.5
Congenital diseases	4,533	27.9
Acute respiratory diseases	3.137	19.3
Contagious diseases	692	4 3
Jarasmus	601	3 - 7
Convulsion	411	2 - 5
Cuberculosis	287	1.8
leningitis (Simple)	180	1.1
Syphilis	168	1.0
Violence	145	0.9

It will be seen by this table that the most important factor in the mortality of infants is that of deaths from diarrhoeal diseases; the death rate from this cause is one that we may improve, and the many agencies working toward this end, by improving the quality of the milk supply, educating of the parent, establishing of seaside and country institutions, gives promise of betterment in the near future.

The deaths from congenital diseases consist mainly of malformations and prematurity of birth, and are not susceptible to any great extent to official interference; those from acute bronchitis and pneumonia can undoubtedly be lessened by the education of the parent to the necessity of constant vigilance to prevent exposure to infection and inclement weather. Marasmus is often the result of tuberculous infection and improper feeding. The other causes enumerated constitute a small part of the mortality and may be looked upon for the present as negligible factors.

Comparison of Deaths of 1908 and 1907.

The following table shows the number of deaths from the principal causes in the entire City during the year and compares its mortality with that of 1907, indicating the increases and decreases:

Cause of Death.	1907.	1908.	Increase in 1908.	Decrease in 1908,
Typhoid fever	740	536		204
Malarial fever	69	34		35
Smallpox	9	1		8
Measles	728	972	244	
Scarlet fever	796	1,333	537	
Whooping cough	393	188		205
Diphtheria and croup	1,740	1,758	18	
Influenza	714	403		311
Dysentery	116	91		25
Pulmonary tuberculosis	8,999	8,869		130
Other tubercular diseases	1,264	1,288	24	
Cancer, sarcoma	3,227	3,243	16	
Diabetes	664	670	6	
Alcoholism	719	409		310
Diseases of nervous system	5,662	4,146	****	1,516

Bureau of Records.

Cause of Death.	1907.	1908.	Increase in 1908.	Decrease in 1908.	
Diseases of circulatory system	8,788	9,297	509		
Bronchitis, acute	1,048	819		229	
Pneumonia (lobar and broncho)	11,806	9,508		2,298

Total	79,205	73,072	1,638	7,771	
Balance	6,	133	(6,133	

Typhoid Fever.

The number of deaths reported from this cause in 1908 was 536 and a rate of 12 per 100,000 of the population against 740 deaths and a rate of 17 in 1907. This is the lowest rate attained since the organization of the Board of Health in 1866; compared with that of the decennium 1868-1877, which was 31 per 100,000, it shows a decrease of 61 per cent.; there is no doubt that in earlier years of registration in this City that many deaths were reported under the head of malarial fever which should have been added to the typhoid fever figures. In the first decennium the combined rate of typhoid and malarial fevers equalled 57 deaths per 100,000, while last year's similar rate was 13, a decrease of 77 per cent.; the decrease in the absolute figures compared with 1907 in the different Boroughs was: Manhattan 118, The Bronx 11, Brooklyn 65, Queens 4, and Richmond 6.

SMALLPOX.

Seventeen cases were reported during the year 1908, only one of which proved to be fatal. The greatest number of deaths reported during a single year was that of 1875, in which there were 1,899 deaths reported in the old Cities of New York and Brooklyn combined.

MEASLES.

In 1908 there were 972 deaths reported from this cause against 728 in 1907, the rate jumping from 17 to 22 per 100,000. The incidence of this disease has appeared in alternate years since 1898, and the past year was an "on" year. There were 38,276 cases reported against 16,622 in 1907. Notwithstanding this tremendous increase in the number of cases reported, the mortality rate did not rise to the same proportional height, as the increase in the deaths over those of 1907, ascribed to this cause was about 33 per cent., while that of the cases reported reached 130 per cent.; again, the number of pneumonia deaths reported among children under five years of age showed not an increase—as might be expected ordinarily—but a decrease of 739 deaths, almost 14 per cent., proving that there was a decrease in the virulence of the disease.

SCARLET FEVER.

There were 1,333 deaths and a rate of 30 per 100,000 recorded in 1908 against 796 deaths and a rate of 19 in 1907, an increase of 537 deaths; the rate increased almost 60 per cent.; the combined rates for the former Cities of New York and Brooklyn gave a decennial rate for the immediately preceding decennium of 20 per 100,000, so that the rate of 1908 was 50 per cent. higher than the decennial; compared with rates of the decennia 1868-1877, 1878-1887, 1888-1897, which rates were 91, 74 and 39, there is a decrease of 66, 59 and 23 per cent. respectively; a wave of unusual prevalence marked the year under notice, 24,426 cases having been reported against 15,788 cases in 1907 and 7,881 in 1906, but the case fatality was only slightly higher than last year. The type of infection has gradually grown milder during the past eleven years as evidenced by the following percentage of deaths based on the cases reported: 1898, 7.7; 1899, 7.2; 1900, 7.0;

1901, 7.0; 1902, 7.9; 1903, 6.7; 1904, 6.2; 1905, 5.8; 1906, 6.1; 1907, 5.0; 1908, 5.4.

There has occurred during the past thirty years a rise in the mortality which holds for two years and which recurs at varying intervals, these latter having lengthened within the past fifteen years from annual or biennial to quinquennial or even longer periods. As in former years by far the greater number of deaths are reported at ages under 15 years; in 1908 the percentage was 93; infants under one year of age constituted less than 5 per cent. of all deaths from this cause.

WHOOPING-COUGH.

There were 188 deaths and a rate of 4 per 100,000 recorded during 1908, against 393 deaths and a rate of 9 during 1907, a decrease of 205 deaths and 5 points. This is the lowest death rate ever reported from this cause and it represents a decrease of 89 per cent, in the mortality from this distressing disease; the rate among females in this disease has always exceeded that among males; no positive reasons can be advanced as to this anomaly.

DIPHTHERIA AND CROUP.

There were 1,758 deaths reported in 1908 from this cause against 1,740 in 1907, a decrease of 18 deaths; the rate decreased from 40.6 to 39.7 per 100.000, this latter being the second lowest rate on record; that of 1905 reached the low figure of 38.4. The combined mortality figures of the former Cities of New York and Brooklyn show a tremendous decrease from the decennium rate from this cause when compared with that of the past decennium, that of the former starting at 154 and the latter at 45.6, a decrease of 70 per cent.

Influenza.

The number of deaths reported during 1908 was 403 against 714 during 1907, a decrease of 311 deaths; the rate was respectively 9.1 and 16.7 per 100,000; this decrease in the deaths from influenza was accompanied by a considerable decrease in the deaths from pneumonia,

as was to be expected. The following table gives the deaths, by months, from influenza and lobar pneumonia for the years 1907 and 1908.

Month.	Deaths Influ		Deaths from Lobar Pneumonia.		
	1907.	1908.	1907.	1908.	
January	155	167	854	626	
February	109	94	756	580	
March	109	63	795	607	
April	50	33	636	528	
May	2.4	7	519	448	
[une	17	4	356	218	
July	3	1	189	170	
August			223	150	
September	6		237	204	
October	15	3	329	289	
November	2 2	11	489	377	
December	204	20	834	485	
Total.,,	714	403	6,217	4,682	

With the exception of the month of January, 1908, every monthly decrease in the deaths from influenza during the year was attended by a decrease in the corresponding month in the deaths from lobar pneumonia, the total for the year 1908 being 1,535 less from this disease than in 1907. Influenza also played an important part in the decrease by 743 from the total number of deaths attributed to organic heart and kidney diseases in 1908 compared with 1907.

Pulmonary Tuberculosis.

During the year 1908 there were 8,869 deaths and a rate of 201 per 100,000 recorded against 8,999 deaths and a rate of 210 during the previous year, a decrease of 130 deaths and 9 points. The rate per 100,000 for the decennium 1868-1877 was 376 against 224 in the decennium 1898-1907, a decrease of 40 per cent. An analysis of the death rates from this cause in the years 1868 and 1907 allows the following conclusions to be drawn: That the reduction in the mortality rates at every age-group in both sexes is considerable, with the exception of

the age-group 45-55 in males, in which the reduction is only I per cent., and the group 10-15 in females, in which it reached the low mark of 7 per cent., other male age-groups showing a reduction from 10 to 70 per cent, and female age-groups from 25 to 76 per cent.; that a greater decrease occurs at all age-groups among the females than at those of the males, with the exception of the groups under 5 and 10-15; the reduction per cent, of the female mortality at all ages is 55, and that of the males 29, slightly more than one-half that of the females; that the reduction has been greatest at the ages above sixty-five in both cases; that the heaviest mortality prevails at the age-group 45-54 in the males and both sexes combined, and 35-44 in the females; that at the agegroup 45-54 seven males died to two females; that the death rate from other tuberculous diseases at all ages shows a much greater decrease than that from pulmonary tuberculosis, the percentage reductions being almost the same for males and females, 78 and 76 respectively; and finally that the death-rate from all forms of tuberculosis shows a considerabde decrease at all ages, reaching 41 per cent. among males and 60 per cent. among females, those of both sexes being exactly 50 per cent.

CANCER AND SARCOMA.

The number of deaths ascribed to malignant growths during 1908 was 3,243 against 3,227 in 1907, an increase of 16 deaths; a slight decrease is shown in the rate of 1908, that of the latter year standing at 73 against 75.3 per 100,000. The increase from this cause, as shown in previous annual reports, has been continuously gradual; comparing the decennium 1868-1877 with that of 1898-1907 the rate will be found to have almost doubled; this increase is partly due to more accurate certification and to a greater proportion of persons existing at the agegroups 35 years and over, at which ages cancer is more prevalent.

Alcoholism.

There is hardly any doubt that the deaths reported from this cause do not represent the true mortality directly due to acute or chronic poisoning from this agent. The deaths ascribed directly to alcoholism fell from 719 in 1907 to 409 in 1908, and as certification remained the

same for these two years, one may not be far wrong in connecting it with the wave of prohibition which swept the country during the year.

Diseases of the Nervous System.

There were reported 4,146 deaths and a rate of 132 per 100,000 in 1908 against 5,662 deaths and a rate of 94 in 1907, a decrease of 1,516 deaths. More than 50 per cent. of this decrease was due to more accurate diagnoses and certification in the deaths hitherto ascribed to apoplexy; almost three hundred fewer deaths were credited to cerebrospinal meningitis, due to gradual receding of the wave of infection since the severe epidemic of 1904; seventy less deaths were reported under the head of locomotor ataxia and other diseases of the spinal cord; 39 less deaths from general paresis, and 42 less deaths from diseases of the ear; convulsions, as an indefinite cause of death, fell from 572 deaths in 1907 to 508 in 1908, a decrease of 64.

DISEASES OF THE CIRCULATORY SYSTEM.

In the year 1908 there were 9,297 deaths and a rate of 210 per 100,000 recorded against 8,788 deaths and a rate of 205 in 1907, an increase of 509 deaths; this increase was apparent and not real, and was due in great measure to the transfer of deaths hitherto ascribed to apoplexy, from under the nervous diseases to diseases of heart and especially of the arteries, in consequence of which we find that 1,085 deaths were ascribed to diseases of the arteries in 1908 against 483 in 1907, an increase of 602 deaths; by reason of the more accurate certification some of the indefinite causes were transferred from the heading of nervous diseases to chronic nephritis.

Acute Respiratory Diseases.

There were 10,327 deaths reported from acute bronchitis, broncho and lobar pneumonia in 1908 against 12,854 in 1907, a decrease of 2,527 deaths; this tremendous decrease was found to have occurred chiefly under the head of deaths from lobar pneumonia, 1,535 less deaths having been reported under this title; in discussing the deaths from influenza, a few pages back, it was shown that the less prevalence of this cause was responsible for the lowered rate from lobar pneumonia;

it also caused a decrease in the rate from broncho-pneumonia at the ages of sixty years and over; in analyzing the mortality from measles, it was shown that although far more prevalent in 1908 than 1907, it was of a milder type of infection, and, in consequence, we find the deaths from broncho-pneumonia under five years of age was considerably below that of 1907; the deaths from broncho-pneumonia under five years of age were almost 500 less in 1908 than in 1907.

DIARRHOEAL DISEASES.

There were 6.594 deaths from diarrhoeal diseases reported during 1908 against 7,118 in 1907, a decrease of 524 deaths; the rate fell from 166 to 149 per 100,000. Of the 6,594 deaths reported from this cause, 5.977 were of children under the age of two years.

The following table shows the population, deaths and death-rates of children under two years of age, from all causes and diarrhoeal diseases, for a period of eleven years, since the organization of the Greater City:

Year.	Population Under 2 Years.	Deaths All Causes Under 2 Years.	Rates per 1,000 at 2 Years.	Deaths Diarrhoea Under 2 Years.	Rates per 1,000 Under 2 Years.
1898	156,421	21,678	138.6	6,459	41.2
1899	160,451	19,875	123.9	5,236	32.6
1900	164,720	21,526	130.7	5,846	35.5
1901	169,884	20,156	118.7	5,796	34.1
1902	175,226	20,280	115.7	4.938	28.2
1903	180,752	18,418	101.9	4,440	24 - 3
1904	186,468	21,146	113.4	5.647	30.3
1905	192,384	20,816	108.2	5.877	30.5
1906	198,506	21,901	110.3	5,783	29.1
1907	204,843	21,930	107.1	6,346	31.0
1908	211,404	20,462	96.8	5.977	28.3

It will be noted that while the absolute figures of death remain about the same, the death-rate has decreased considerably; the average decennial rate from all causes for that of 1898-1907 was 116.8 per 1,000 children living under the age of two years, and that of 1908 was 96.8, a decrease of 17 per cent.; the average decennial rate from diarrhoeal deaths at this age-group was 31.7 per 1,000 against 28.3 in 1908, a decrease of 10.7 per cent.; it will be seen that the rate diarrhoea in 1908 did not reach the lowest mark on record, that of 1903; this is not surprising upon consideration of the meteorological conditions of the summer of 1903; the mean temperature recorded during the months of June, July, August and September in 1903 were respectively 64.20, 74.64, 69.07 and 67.00, whilst those of the corresponding months of 1908 were 72.97, 79.80, 75.78 and 68.58; again, the rainfall in 1903 was considerably above that of 1908, as evidenced by the following table:

Y	June.		July.		August.		September.	
Year.	1903, 1908.	1908.	1903.	1908.	1903.	1908.	1903.	1908.
Inches of rain	9.78	1.27	5 - 59	3.80	4.30	6.01	3.67	1.91

The year 1903 was remarkable for its cool and moist summer, and as these two factors are the most important ones affecting the diarrhoeal rate, the diarrhoeal mortality for 1908 was remarkably low considering the relatively high temperature and absence of average rainfall; the concentration of official, philanthropic and individual endeavors put into operation for the first time during the summer of 1908 resulted in a rate the second lowest on record.

Bright's Disease and Acute Nephritis.

The deaths reported from these two causes in 1908 were 5,049 against 5,685 in 1907, a decrease of 636 deaths; the rate fell from 133 to 114 per 100,000, this decrease being due to diminished effect of the influenza infection of 1908 compared with 1907.

DEATHS FROM VIOLENCE.

Homicides—There were 231 homicidal deaths reported during 1908 against 285 in 1907, a decrease of 54.

Suicides—The year 1908 showed a considerable increase in the number of suicides over that of 1907, the figures being 994 and 710 respectively. This increase of 284 deaths was due to the depressed financial conditions under which the country labored in 1908, and which have not yet disappeared. The male suicides numbered 771, the female 223; 344 were native-born, 252 Germans, 100 Russians, 42 Austro-Hungarians, 41 Irish, and the nativities of 52 were unknown. Until the Board of Health passed an amendment to the Sanitary Code forbidding the sale of carbolic acid by retail druggists except upon prescription or in weak solution, this ready and painful means of exit was the favorite method chosen; its place has been superseded by gun and pistol shot, 312 persons having suicided by that means; illuminating gas was used by 288 persons and hanging by 110.

Accidents—The deaths by accidents decreased from 3.916 in 1907 to 3.512 in 1908, a decrease of 404 deaths; there were 1.862 deaths reported as due to falls, fractures, street vehicles and railroads in 1908 against 2.222 from the same causes in 1907, a decrease of 360 deaths; drowning showed an increase from 436 to 474 deaths; deaths by illuminating gas fell from 356 to 200 deaths; criminal abortion was the cause given in 54 cases against 46 in 1907; 16 deaths were reported from hydrophobia in 1908 against 28 in 1907. Burns and scalds were given as the causes of death upon 370 certificates filed in 1908 against 377 in 1907; deaths in conflagrations rose from 66 in 1907 to 142 in 1908.

SEARCHES AND TRANSCRIPTS.

During 1908 the searches of births, marriages and deaths numbered 119,824 against 98,504 made during 1907, an increase of 21,320 searches; fully 50 per cent. of the total number of searches were made without charge to aid children to gain admission to the public schools and to obtain employment certificates. There were issued 45,783 cer-

tified copies of the records of births, marriages and deaths for use in collecting insurance, transferring bank deposits, instituting and prosecuting civil and criminal actions, proving citizenship, passing of titles to real estate, etc., etc.

SUMMARIES FOR THE YEARS 1790 TO 1908, INCLUSIVE.

The following tables have been compiled from the records of the Health Departments of New York and Brooklyn before consolidation into the present City of New York. The New York tables, therefore, present the statistics of the present boroughs of Manhattan and The Bronx, and the Brooklyn tables those of the present Borough of Brooklyn. It has been found impossible to prepare similar tables for the boroughs of Queens and Richmond:

Former New York (Boroughs of Manhattan and The Bronx).

Estimated Population, Deaths, Births and Marriages, from 1790 to 1908, Inclusive.

	-		-	1 . 1	1

NOTE .- In this and the four following tables, the columns headed by decade years give the results of

Note.—In this and the four following tables, the commins neaded by decade years give the resolutions. The figures, for years prior to 1870, for this and the following tables, are taken from the official report true totals, as given in the reports of the United States census for those years. The actual figures of the 515,552; and for 1860, \$13,668.

The city was originally divided into seven wards in 1686, by Governor Dongan's charter. They were the rest of Machattan Island forming the Out Ward.

*The New York State census of New York City (Boroughs of Manhattan and The Bronn) was not N. B.—The Twenty-third and Twenty-fourth Wards constitute the present Borough of the Bronx correct figures cannot be given previous to the census of 1655, the population as given in the table for became a part of New York, was separated from Westchester County, a whole, and formed into the towns A. On June 6, 1855, a portion of Westchester County, comprising a part of the present Twenty-fourth to the United States census, was 25,085.

New York, showing the growth of population since 1800 in the territory ascertained, together with the development and successive segregation

the United States census, and the others, excepting when otherwise stated, the results of the New York of the New York State census of 1865. The totals at the foot of the columns for 1840, 1850, and 1860 are the columns, however, when summed up, do not give the same totals, that for 1840 being 313,161; for 1850, not numbered at that time, but were called the West, South, Dock, East, North and Montgomerie Wards,

taken by wards, but by assembly districts, so that only the total is available for this table.

They were formed from a part of Westchester County, and owing to the division of townships and villages, previous years, being the minimum, but not the true total. The portion represented above, which afterward of West Farms, (1865) and Morrisania, formoff from West Farms (1855).

Ward, was annexed to The City of New York; the population of this annexed district June 1, 1900, according

^{*} Previous to 1880 most of the deaths caused by illuminating gas were supposed to be intentional and were classed with suicides. Since that year the deaths believed to be accidental have been separated from the others.

^{*} The number of deaths from Yellow Fever in the year 1798, as reported to Mayor Varick, was 714. In 1874 there was a death reported as due to Hyssophobia in addition to the 5 deaths from Hydrophobia.

† Vaccinating Corps organized September 27, 1874, under act of Legislature passed June 15, 1874. Note.—These diseases have been selected from the confessedly imperfect records of the years preceding the organization of the Health Department, as being diseases of such bold characteristics and exciting so great public interest as to make it probable that the record of them is complete.

Bureau of Records.
