AG 004 - BA

19 March 1947

SUBJECT: Deficiencies in Care of Reparations Equipment

TO : See Distribution.

1. Reference: Letter, Imperial Japanese Government, Central Liaison Office, subject: "Operations to be performed in the Servicing and Repair of Machinery and Accessories to Implement SCAPIN 1219," a copy of which is attached hereto as Inclosure 1.

2. Representatives from the Office of the Supreme Commander for the Allied Powers have recently visited a number of reparations plants located in the area of jurisdiction of I Corps. As a result of these inspections, numerous deficiencies with respect to the care of reparations equipment have been brought to the attention of this headquarters. The following irregularities are cited for your information:

a. Guards posted at entrances to reparations plants were not always properly instructed. The guards frequently failed to stop visitors and require presentation of authenticated passes, before entry to the plant was permitted. All visitors to reparations plants, including Military Government officers, should have in their possession proper passes, prior to entry to these plants.

b. Considerable divergence was noted with respect to the classification of machinery in reparation plants. In some instances, machines were designated as Class II, although they were in operation; in other instances, machines which were inoperable were classified as Class I. Your attention is directed to the provisions of Section III, Paragraph H, Inclosure 1 to Operational Directive No. 5/4, Headquarters Eighth Army, dated 22 August 1946. All machines which are operable or can be placed in operation by means of minor servicing are to be classified as Class I. It is anticipated that the classification of many machines will be subject to change, as additional labor and material are expended. Classification of machinery located in reparations plants should be subject to constant review by Military Government officers.

775013

Hq I Corps, AG 004 - BA, subj: "Deficiencies in Care of Reparations Equipment," dtd 19 March 1947.

c. Reference letter, paragraph 1, consists of a copy of instructions issued by the Central Liaison Office of the Imperial Japanese Government, and provides for implementation of the provisions of SCAPIN 1219. Although distribution was made through Japanese channels, it has been found that all Japanese prefectures have not received this letter. It is directed that Japanese Liaison Offices in each prefecture be contacted, to insure that information contained in reference letter has been brought to the attention of appropriate Japanese officials, and corrective action taken.

IMPERIAL JAPANESE GOVERNMENT

CENTRAL LIAISON OFFICE

SUBJECT: Operations to be Performed in the Servicing and Repair of Machinery and Accessories to Implement SCAPIN-1219.

As regards the above mentioned subject, the standards of operations to be exercised have long been protracted and the concerned organs have often stressed the necessity to improve the conditions of custody and maintenance. Since, based on the advice of General Headquarters and Eighth Army, we have decided to put it into execution by the ways stated in the attached paper No. 1 and No. 2, it is requested that you should notify the matters to every concerned organ civil or official. Furthermore, much attention should be paid to the following matters in regard to this execution. Especially in respective prefecture there may be some diversities between the standards stated below and the requirements of local military government teams but the standards to be performed have been fixed after consulting with the Headquarters Eighth Army.

1. In performing the operations necessary in the service and repair of machinery and equipment, only the machines of which inventory has been drawn up will first be put into execution.

2. The service and repair will be performed for unactive machines in principle from A class and then to B class. As regards the machines which are now operating, much attention will be paid to cleaning or handling of the machines to put them in proper working order on principle stated in the attached papers.

3. The requirement of expenditure necessary for these operations is to be submitted to the Ministry of Finance as usual process.

4. Concerning the materials necessary in the operations, the utilization of the earmarked objects will be taken into consideration.

5. Regarding the attached paper No. 2.

(1) It is desirable that the organization of operating teams be taken into consideration as a reference. The above teams will work at a unit of a designated plant. As per about 100 sets of machines, the members of the first and second unit will be suitable and at most about 100 members will be desirable.

(2) The competent technicians in every special field will be selected as the leaders of the operating units.

(3) Concerning the third unit, it will be unnecessary to form a new group if the necessary members are now well organized.

8

SUBJECT: Operations to be Performed in the Servicing and Repair of Machinery and Accessories of Class 1 and 2 Machines.

1. Level - in order to custody and maintain in the perfect condition put machine in level position before maintenance is begun.

2. Accessories and attachments - detach all removable accessories such as chucks, steady rests, tool holders, wheel dressers, counter shafts, etc. - facilitate the cleaning process and much attention be paid to the internal cleaning.

3. Clean

a. External - all chips, dirt and other foreign matter should be removed and surfaces cleaned with a suitable solvent (kerosene, diesel oil, etc.) applied either by brush or clean rag. All surfaces should then be thoroughly dried. Removal of rust on finished surfaces should not be attempted except in extreme cases. Belts (rubber, leather, fiber) will be cleaned and protected from further exposure to oil and grease.

b. Internal - drain coolant system if present and clean reservoir, pump and connecting pipes. Perform same operations on hydraulic system if present.

c. Accessories - accessories will be cleaned as in (a) above.

4. Lubricate - service machine with suitable lubricants necessary to custody and maintain in the suitable condition.

5. Operation - connect to power supply if power line is perfect or easily taken in, otherwise by hand and perform all movements of operation. Need not connect motors to unactive machines when they are taken away and put in protective maintenance, but attention be paid to connect and operate them as testing.

6. Check.

a. Electric equipment.

(1) Motors - check all motors present on machine including those operating hydraulic, coolant and similar systems for proper operation and make repairs as good as possible in the subject plants if necessary (such as drying). Test them by suitable method such as insulator testing if power supply is unobtainable.

(2) Miscellaneous electric equipment - all wiring, connector boxes, fuse, switch and control units should be checked and put in proper order.

b. Pumps and related items such as pipes, flexible hose, valves, etc., in hydraulic and coolant systems will be cleaned and checked for worn parts, leaks, etc., and necessary repairs made in the limit possible in the subject plants.

c. Traversing mechanisms - i.e. feed screws, will be checked for back lash and adjustment or repair made wherever possible in the subject plants.

d. Gears - Remove gear case covers and check for worn gears, shafts, bearings and bushings and replace worn parts as good as possible in the subject plants.

e. All other moving parts such as counter shafts, bearings and bushings of all types check for wear and make adjustment and replacement if possible.

f. After completion of above operations a competent mechanic should make a list for each machine, of the accessories or parts not present and make clear the matters of machines such as damaged parts, peculiarities, and an attempt made to secure these missing items from machines designated as Class 3 of the subject plants.

7. All accessories and loose parts belonging to a machine will be collected and stored marking the name of machines to be attached to.

8

SUBJECT: Proposed T/O Necessary to Perform Service and Repair as Outlined in Memo for Imperial Japanese Government.

To perform the operations necessary in the service and repair of machinery and equipment the personnel should be grouped as a team and divided into three (3) working units.

1. The first unit will be composed of those workers necessary to accomplish operations as specified in paragraph 1, 2 and 3 of Memorandum No. 1 (Leveling, cleaning and removal of attachments). Personnel for this unit should be experienced insofar as maintenance and operation of equipment are concerned. Suggested number required, five (5).

2. The second unit of the team should be composed of personnel capable of inspecting, testing and making the necessary repair as suggested under paragraph 4 of Memorandum No. 1. As stated in Memo for Imperial Japanese Government it is desirable that these services be performed by mechanics associated with the particular plant. Suggested number required, four (4). One electrician, three mechanics.

3. The third unit will consist of a qualified supervisor and the necessary labor to properly process the necessary labor, to properly process the equipment for preservation during storage and shipment.

EG/kn

AG 004 - BA

4 JAN 1947

SUBJECT: Surveys of Reparations Plants Producing for Occupation Forces

TO : Commanding Officer, Gifu Military Government Team, APO 25

1. Reference is made to paragraph 2 (1) (2) of Operational Directive No. 5/7, Headquarters Eighth Army, dated 4 November 1946, which requires submission of information regarding "types and quantities of raw materials remaining on hand on completion of all such production".

2. Information referred to above has not been included on Expeditor's Report Form MGP 30's submitted to Headquarters Eighth Army to date. While the form itself contains no such heading, the directive is specific in requiring the addition of this information.

3. It is desired that supplementary reports containing the required information be furnished on all plants for which MGP 30's have already been submitted and that the provisions of the reference mentioned above be adhered to in the future.

Commanding Officer, Kyushu Military Government Region, APO 929
Commanding Officer, Kyoto Military Government Team, APO 713
Commanding Officer, Hyogo Military Government Team, APO 317
Commanding Officer, Osaka Military Government Team, APO 25

1. Reference: Operational Directive 5/9, dated 15 July 1947.
2. The following instructions have been given to Japanese Committees for Inventory (Identification) and Evaluation work to be performed in Army and Navy Arsenals:
 - a. A separate Evaluation Report will be prepared for each integrated facility located within an Arsenal.
 - b. Whenever there are several units producing the same end product located within the same area, these units will be considered as one integrated facility. For example, if there are several foundries located in adjacent buildings in the Arsenal, they shall be inventoried (identified) and evaluated as one integrated facility.
 - c. Whenever an item of machinery or equipment has been marked with an inventory number as an individual item of equipment from an arsenal as directed by Operational Directive 5/4, 22 August 1946, a circle will be painted around the old number and new inventory (identification) number will be painted on the machinery or equipment in accordance with instructions supplied by the Supreme Commander for the Allied Powers to Japanese Committee.
3. The Japanese Committees will be permitted to perform the functions outlined in paragraph 2, above.

20 November 1947

SUBJECT: Kawasaki Aircraft Plant (Sp. Rpt.)

TO : Commanding General, I Corps, APO 301
(Attn: Military Government Section)

1. The Kawasaki Aircraft Plant, listed for reparations, of the Gifu ken has recently been subjected to investigation by this office. During an inspection tour 8 November 47 of their storage warehouses, there were many critical items held in storage. Such critical items as crude rubber, bicycle tires, paint, chemicals, pharmaceutical products, medical equipment, electrical equipment, aluminum (Sheets, rods, and tubes), and brass.

2. Action taken by this Headquarters:
a. Procured from Commerce and Industry Section of the Prefectural Gov't the inventories of registered critical items as reported by the Kawasaki Plant to the Prefectural Government. (This inventory is now in the hands of S-3, 24th Infantry Regiment for checking.)

3. Information requested as to what further action can be taken by this headquarters.

1. Reference is made to paragraph 3 of basic communication.

2. Cabinet Instructions No. 11 from the Prime Minister to each ministry of the Japanese Government on November 30th 1946 provided in sub-paragraph 3 of Article 1 that "Persons who retain materials in excess of quantities needed for his normal business in the fixed terms (six months in principle), shall offer such excess materials for sale at official prices to those mentioned in the preceding item who offer to purchase."

3. It is suggested that the Gifu Military Government Team bring this situation to the attention of the prefectural economic police, and in the event that an investigation reveals the stocks held by Kawasaki Aircraft Company to be in excess of six months' requirement, to prosecute local officials of Kawasaki for violation of Cabinet Instructions No. 11.

HEADQUARTERS I CORPS
APO 301 (Kyoto, Honshu)

9 September 1947

AG 004 - BA

SUBJECT: List of Arsenals and Dispersal Areas

TO: Sec Distribution

1. The inclosed list of arsenals and dispersal areas has been compiled from corrected code number lists submitted by military government teams.

2. Any remaining errors in names, addresses and code numbers, including the addition of parenthetical designations which may have been omitted, will be reported to this headquarters.

BY COMMAND OF MAJOR GENERAL WOODRUFF:

C. C. Carter

C. C. CARTER
Colonel AGD
Adjutant General

1 Incl:
List of Arsenals and
Dispersal Areas

CORRECTED LIST OF ARSENALS AND THEIR DISPERSAL AREAS BY PREFECTUREAICHI (81)

<u>Code No.</u>	<u>Name</u>	<u>Address</u>
	NAGOYA MILITARY ARSENAL	
55(a) & 91	ATSUTA FACTORY	#1 Rokumachi, Atsuta-ku, Nagoya
	(Code #91 covers dispersed machinery of Osaka Military Arsenal located here)	
	<u>Dispersal areas:</u>	
(b)	Minato Kojo	#17 Juichiya-cho, Minato-ku, Nagoya
(c)	Chiyaki Kojo	#2248 Kanobaba, Chiaki-mura, Niwa-gun
56	HONSHA (Chikusa Kojo)	Nakata-hondori, Chikusa-ku, Nagoya
57	TAKAKURA PLANT	Mutsuno-cho, Atsuta-ku, Nagoya
58	TAKAGI PLANT	Dengaku-oaza, Kasugai-shi
59(a) & (c)	TORIIMATSU KOJO	Wayara-oaza, Kasugai-shi
	(Also contains machinery coded 01-59(c) centralized from a dispersal area)	
	<u>Dispersal area:</u>	
(b)	Kasugai Kojo	Shimoishiba, Kasugai-shi
60(a)	TOYOKAWA NAVAL ARSENAL	Ushikubo-cho, Toyokawa-shi
	<u>Dispersal areas:</u>	
(b)	Asouda Kojo	Asouda-cho, Toyokawa-shi
(c)	Shinoda Kojo	Shinoda-cho, Toyokawa-shi
(d)	Chirigi Kojo	Chirigi-cho, Toyokawa-shi
92	SECOND NAVAL FUEL DEPOT	828, Nakanokuni-aza, Atsuta-Maeshinden, Minato-ku, Nagoya

AKITA (02)Dispersal area of 41st Naval Aeronautical Arsenal (03-04):

10(A)	Tsuchizaki Railroad Repair Shop	Shoguno, Terauchi, Tsuchizoki-minato-machi
-------	---------------------------------	--

AKITA (2) (Cont'd)

<u>Code No.</u>	<u>Name</u>	<u>Address</u>
10 (B)	Hokoku Kojo	Odate, Kita-Akita-gun

24-05 Dispersal area of Tagajo Naval Arsenal:
Akita Mining College Fukuda Tegata

AOMORI (03)

03	OMINATO NAVAL ARSENAL	#44 Ochikagawa, Ominato-shi, Shimokita-gun
04	41ST AERONAUTICAL ARSENAL	Ominato-machi, Shimokita-gun

CHIBA ()

09	2ND NAVAL AIR DEPOT	Egawa, Kisorazu-shi
----	---------------------	---------------------

Dispersal area:
Hitachi Aircraft Co. Nampo Kaigan, Umetachi, Chiba-shi

37-23 (B) Dispersal area of Numazu Naval Arsenal (37-23):
Tokyo Shinku K.K. 661 Nomakido, Mobarashi-machi,
Mobarashi Kojo Chosei-gun

EHIME (05)

Dispersal areas of 11th Naval Aeronautical Arsenal (11-06):

05 (1)	Takeuchi Company	40 Izumi-machi, Matsuyama-shi
(2)	Izaki Farm Implements Co.	54-1 Oguri-machi, Matsuyama-shi
(3)	Ookawa Manufacturing Co.	370 Shiromawari, Gojo-mura, Kita-gun
(4)	Yoshida Technical School	Kita-Koji, Yoshida-cho, Kita-Uwa- gun
(5)	Futagami Auto- mobile Repairing Factory	1396 Minami-dori, Hon-machi, Yawatahama-shi
(6)	Hokoku Farm Imp. Mfg. Co.	1510 Okishinden, Yawatahama-shi
(7)	Kawanoishi Engineer- ing Works	148 Ichiban-kochi, Kawanoishi-cho, Nishi-Uwa-gun

EHIA 05) (Cont'd)

<u>Code No.</u>	<u>Name</u>	<u>Address</u>
05 (8)	Yoshu Dolomite Mill	49 Hirachi, Hiranomura, Kita-gun
(10)	Toyo Cotton Spinning Factory 1st Factory	280 Sumiyoshi-Imabari-mura, Imabari-shi
(11)	Yamato Manufacturing Shop	1167, 5-chome, Matsumoto-dori Imabari-shi
(12)	Abe-Neo Weaving Machine Work	4-chome, Matsumoto-dori, Imabari-shi
(13)	Hara Industrial Co.	665 Sumiyoshi-Imabari-mura, Imabari-shi
(15)	Nakamura-Chu Industrial Co.	1160 Kurashiki, Imabari-shi

SUBJECT: Reparatons Listing of Aircraft and Privately-Owned Munitions
Plants

TO: See Distribution

1. The Overseas Consultants, Inc., a group of industrial engineers have begun a review of Japanese Industry, for the War Department. In order to assist in expediting the review of aircraft and privately-owned munitions plants, each military government team will complete the reparations check sheet attached and forward two (2) copies direct to Headquarters Eighth Army, Attention: Military Government Section and one (1) additional information copy to this headquarters. All plants listed for reparations at any time by SCAP as well as those recommended for addition will be included. Reports Control Symbol MG-B is assigned.

2. "Prewar" is to be interpreted as before conversion to war production.

3. Remarks will include; pertinent critical information concerning conversion to war, reconversion to peacetime production, the effect of removal on the economy of the region, comments relative to stored peacetime equipment not used in war production, peacetime equipment used in war production but vital to reconversion, displacement of labor and lack of equivalent non-reparations facilities.

4. Reviews will be expedited and submitted on individual plants as completed without waiting for consolidation. It is desired that reviews be completed by 1 October 1947.

5. In the event that action cannot be completed by the designated date, this headquarters will be notified by letter.

FXM/kk

22 July 1947

SUBJECT: Sulphuric Acid Plants

TO: Commanding Officer, Tokai-Hokuriku Mil Govt Region, APO 710
(Attn: Resources, Commerce and Industry Section)

1. Reference is made to Operational Directive No. 49, Headquarters Eighth Army, subject: "Pyrite Production", dated 21 June 1947 and letter Headquarters Tokai-Hokuriku Mil Govt Region, APO 710, subject: "Sulphuric Acid Plants", dated 3 July 1947.

2. This headquarters has investigated the condition of the Mitsui Kozan Sulphuric Acid Plant in Yoshiki-gun, Gifu Prefecture and submits the following report.

a. Approximate production of sulphuric acid, January to June 1947.

January	102 metric tons
February	425 " "
March	554 " "
April	686 " "
May	744 " "
June	575 " "

Total for the reporting period: 3,086 metric tons

b. Adequacy of pyrite supply and source from which obtained.

Pyrite is not available in sufficient quantities for the manufacture of sulphuric acid. Sulphuric acid is derived from the zinc smeltery. Gas (SO₂) is separated from the zinc ore mined at the Kamioka Area in Yoshiki-gun.

c. No factors are reported as having adverse effects on sulphuric acid production in this area. Plant officials report, however, that production figures would be increased to 850 metric tons per month, if skilled labor were available.

SUBJECT: Integrated Facilities in Army and Navy Arsenals

TO : See Distribution

1. Reference: Operational Directive 5/9 for 1946, Headquarters Eighth Army, dated 15 July 1947.

2. In clarification of paragraph 11b, the purpose of Operational Directive 5/9 is to determine manufacturing units in army and navy arsenals which should be removed as an integrated manufacturing facility in any of the 10 categories listed, rather than being removed as individual disconnected items of equipment. It is desired that items not previously inventoried which are part of the integrated facilities listed be reported. Items which have previously been inventoried under the provisions of O.D. 5/4 and which are used in conjunction with the integrated facility, should also be reported as part of the manufacturing unit, and previous code numbers should be indicated on the report form.

3. Attention is directed to the requirement that separate reports will be submitted for each arsenal, and for each facility within an arsenal.

4. Military government team commanders are requested to submit required reports through channels at the earliest practicable date. Negative reports are required.

SUBJECT: Release of Equipment from Military and Naval arsenals, Laboratories, Aircraft and Munitions Plants Listed for Repairs.

TO: See Distribution

✓ May make extra copy for our files

1. Reference: paragraphs 2c and d of Section III, OD 5/5, Headquarters Eighth Army, dated 24 September 1946. The term, "capital equipment or facilities," is interpreted to include everything within the area under custody except raw materials and semi-finished or finished products, and will include all machine tool fittings and accessories, all mechanical equipment, hand tools, micrometers, gauges and allied equipment of the reparations facility.

2. Effective at once, no items will be released or removed from the subject installations without prior approval of Headquarters Eighth Army, except:

- a. Items which have already been released to the Home Ministry.
- b. Raw materials, semi-finished or finished end products.
- c. Land and buildings not required for custody and control.

AG 004(Rep) - BA

SUBJECT: Inventory Instructions for Synthetic Rubber Plants

TO: See Distribution

1. Reference: Memorandum for the Imperial Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, AG 387.6 (15 May 47) REP (SCAPIN 1681), subject as above, dated 15 May 1947. All items listed on the inventory form (Inclosure 1) which are located in the plants specified by Inclosure 1 to reference SCAPIN that are currently operable or economically reparable will be recorded on the inventory form, three (3) copies of which will be furnished this headquarters.

2. Each individual item of equipment inventoried will be marked at the most conspicuous place, in a size which will be easy to read, and in a color of paint which will be in sharp contrast to that item of equipment.

3. The identifying code is based on the inventory form. It will show for each item the category (Roman numeral), the class (capital letter), and the type (Arabic numeral). Example: Purifier - IA3 (Roman numeral I identifies process equipment, capital letter A identifies an individual item of acetylene gas generating process equipment and Arabic numeral 3 identifies an individual purifier).

4. Separated from the code marks by a dash (-) will be an identification number. Such numbers will follow in sequence the identification number of similar items; the highest number assigned indicates the aggregate number of a given type of equipment in the specific plant. Thus, if the purifier cited in the example in paragraph 3, above, were the tenth one assigned an identification number, its final numbering would be IA3-10.

5. It will not be necessary to identify this equipment in any greater detail than specified herein; specifically, prefecture and plant code numbers are not desired as identification on the equipment.

4 April 1947

SUBJECT: Review of Selected Plants

THRU : Commanding Officer, Tokai-Hokuriku Mil Govt Region,
APO 710

TO : Commanding General, I Corps, APO 301
(Attn: Military Government Section)

1. References:

- a. Ltr, Hqs I Corps, AG 004 (Rep)-RA, Subject:
Review of Selected Plants, dated 12 March 1947.
- b. Operational Directive 5/5, Hqs 8th Army, dated
24 September 1946.

2. The Seki Hamono Co. Ltd., 3545 Seki machi, Gifu Prefecture was established in 1913 for the special purpose of producing table-ware. The plant employed approximately 120 persons and this was their sole activity, prior to 1941.

3. During the 1941-1945 war period the plant converted to aircraft production through a major change in volume and character of equipment. They increased their employment figures to 1033, used 343 machines, and devoted 99% of their production to forging parts for aircraft motors and fuselage frame work. During this same period they continued to produce table-ware, in order to keep their skill, but this only amounted to approximately 1% of their production schedule.

4. It is the opinion of this headquarters that this factory qualifies as an aircraft producer under the criteria cited in Section III, paragraphs 1 and 2 of Operational Directive 5/5 as mentioned in the above references. The interim reparations program was designed to remove machinery and productive units obviously in excess of requirements, to a minimum Japanese economy, on this basis we recommend that this surplus machinery be subject to designation for reparations removal.
