PREFACE

WORKS registered in the Copyright Office in Class A, Books, are divided between parts 1A and 1B of the *Catalog of Copyright Entries*, with the exception of greeting cards, which are listed in Parts 7-11A.

Part 1A contains domestic and foreign books and pamphlets, registered under the symbols A, AF and AI, which have been selected for the general collections of the Library of Congress. They constitute, in general, the current output of the book publishing industry of the United States and the works of foreign origin of present or potential interest to the American book trade. Part 1A includes trade books (novels, poetry, biographies, travel books, children's books, etc.), scientific and technical books, reference books, dissertations and monographs of scholarly importance, books issued by university presses and other similar monographic works.

Part 1B lists all other works registered in the Copyright Office in Class A, usually distinguished by the symbol AA. These are predominantly of a pamphlet or serial nature and comprise a wide variety of domestic and foreign works. Pamphlet material includes reports, surveys, manuals, instruction books, tests, as well as other monographic works in all subject fields. Typical of the serial material are yearbooks, directories, trade catalogs, commercial, industrial, and legal services in loose-leaf or pamphlet form, etc. Contributions to periodicals registered in Class B under the symbol B5 are listed in Part 1B. Included also in the catalog are registrations of copyrightable printed matter which appears upon materials of diversified physical form.

Works listed in this catalog were registered in the Copyright Office from July 1, 1951, through December 31, 1951. Renewal registrations for contribu-

tions to periodicals which were originally registered either in Class A or Class B are listed in the second section of this catalog.

Arrangement.—This catalog is divided into two sections. The first section consists of an alphabetical arrangement of complete entries for current works under main headings (personal author, issuing body, or title) and of brief entries in the form of cross-references from essential names associated with the works, and of cross-references from variant forms of the names used.

The second section, similarly arranged, lists renewal registrations under the name of the author of the work. It includes cross-references from titles, joint authors, editors, etc., and from the names of those claimants which are followed in the entries by the abbreviations (PCB), (PCW), (PPW), or (PWH).

Bibliographic Data.—Under the main heading for current works, each monographic entry includes, as applicable, 1) the title; 2) names of all joint authors—unless there are more than three, in which case only the first is given—illustrators, editors, compilers, and translators; 3) edition statement, together with any available information of previous publication under a different title; 4) imprint, consisting of place of publication, publisher, and date of publication (imprint data is omitted in whole or in part when the information supplied to the Copyright Office has indicated that the claimant given in the copyright statement is also the publisher and that the date of publication agrees with the corresponding date given in the copyright statement); 5) collation, consisting of pagination or number of volumes and the abbreviation, "illus." to indicate illustrative matter (briefer items or works of a special nature are described by the use of such terms as "sheet," "folder," etc.); 6) series.

Serial entries do not contain information relating to paging and illustrations, and issue dates or numbers follow the name of the claimant in the statement covering copyright facts.

Under the author each renewal entry includes 1) title; 2) subtitle or installment numbers; 3) names of authors, illustrators, editors, compilers and translators; 4) an analytical note consisting of the name and issue date of the periodical in which the contribution appears.

Cross-reference entries, which are made under the names of claimants, joint authors, illustrators, editors, or other participants in the work, give, in each case, title of the work and registration number, followed by reference to the heading under which the complete entry will be found.

Copyright Data.—In the first section the portion of the entry giving the facts of copyright registration for a monograph begins with the copyright symbol © and is followed by 1) a brief statement of the new matter in which copyright is claimed when such a statement is given in the copyright application; 2) the name of the copyright claimant; 3) date of publication as given in the application; and 4) the registration number. However, if the name appearing in the heading is the same as that of the copyright claimant, it is not repeated in the statement of copyright facts, but the copyright symbol © is added to the heading. For ad interim works, the date the work was deposited in the Copyright Office, preceded by the abbreviation "1c" or "2c," is also given. Any information contained in the copyright application or copy of the work itself which relates to the registration of an earlier version of the work is given in brief form at the end of the entry.

For serial entries, each portion of the entry giving facts of copyright registration begins with the copyright symbol ©. The information includes 1) name of the copyright claimant; 2) publication date of each issue as given in the application; 3) copyright registration number for each issue; for example:

No. PDK-2. © 13Dec50; AA170911.

No. PD-40. © 12Dec50; AA170914.

For renewal entries, the facts of copyright registration begin with the copyright symbol ©. This is followed, as applicable, by 1) a brief statement of the new matter on which copyright is claimed when information can be secured from the renewal application or the records of the Copyright Office; 2) date of original copyright; 3) original registration number; 4) renewal registration number; 5) date of the receipt of renewal application; 6) name of the renewal claimant; and 7) an abbreviation in parentheses representing the applicant's statement of the basis of his renewal claim; e. g., John Doe (NK) indicates that renewal of copyright is claimed by John Doe as next of kin of the deceased author.

In the case of each entry the name of the copyright claimant is that given at the time of registration. Any information relating to subsequent changes of ownership recorded in the Copyright Office can be ascertained upon request and upon payment of the statutory search fee to the Register of Copyrights.

Deposit of Copies.—In the case of every copyright entry listed in this part of the *Catalog*, except in the case of renewal copyrights, the deposit of copies (or copy) as required by sections 13 or 215 of Title 17 of the United States Code has been made.

Authority.—The *Catalog of Copyright Entries* is published by authority of sections 210 and 211 of Title 17 of the United States Code. Section 210 provides in part: "The current catalog of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

Organization of the Catalog.—This issue of the *Catalog* is part of Volume 5 of the Third Series. The parts are numbered according to the alphabetical sequence of classes as listed in section 5 of Title 17 of the United States Code. Letters are added to the part numbers to indicate subdivisions.

The classes of material principally contained in each part are listed, together with their respective symbols, under the title of the part in the "Table of Organization" which faces the title page in this issue. In each case, the first letter of the symbol is that of the class under which registration is made;

the second, if any, is a designation added by the Copyright Office for purposes of statistical analysis of registrations. Foreign works for which two copies have been deposited, under section 215 of Title 17 of the United States Code, are distinguished by a zero immediately following the symbol. The symbol R does not represent a class designated by the Copyright Act, but has been adopted by the Copyright Office to distinguish renewal copyright registrations. Some parts also contain registrations made under symbols other than those listed for the respective part if the subject matter or type of material of these registrations is similar to that generally included.

Orders.—Orders for all parts of the *Catalog* should be sent directly to the *Register of Copyrights, Library of Congress, Washington 25, D. C.* Orders may be placed as follows: (1) as a subscription for a single year or to continue until further notice, or (2) as an order for individual issues. All

orders should state clearly the title of the *Catalog* part and the inclusive dates of the issues wanted. For the convenience of subscribers, payment may be made either with the order or upon receipt of an invoice from the Copyright Office. *Checks or money orders should be made payable to the Register of Copyrights.*

The price of each individual number of the *Catalog* is given in the "Table of Organization." The annual subscription rate for each part is twice the price of a single number, since all parts are issued semiannually. The complete *Catalog of Copyright Entries* may be secured on a subscription basis for \$20 a year.

Inquiries.—The Copyright Office welcomes inquiries, suggestions, and comments on the content and organization of the *Catalog*. Please address communications of this nature to the *Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington 25, D. C.*
