Tools for Program & Event Organizers

Trevor Bolliger, WMF Product Manager

WIKIMEDIA
FOUNDATION

About me

Talk to me any time about:

- Tools for Programs & Events
- Community Wishlist
- Anti-Harassment Tools
- Music recommendations

Community Tech

Meet the needs of active Wikimedia contributors for improved, expert-focused curation and moderation tools.

Here are the results of the 2017 Community Wishlist Survey – thanks to everyone who participated this year!

Curious about what happens next? Check out the **2017 Community Wishlist Survey FAQ**.

Rank	Proposal	Category	Tickets	Status
1	Kartographer improvements (project page)	Miscellaneous	154 T155601, T162232, T141304, T147184, T141750, T141715, T141335, T140212, T140209, T140092, T140087, T140083, T180907, T180909 Related: T181604	In development
2	Ping users from the edit summary (project page)	Editing	127 T32750	✓ Done
3	Development of the programs and events dashboard (project page)	Programs and events	111 T186820	In analysis
4	Blame tool (project page)	Search	110 T2639	Pending technical investigation

Background

- 3rd most supported proposal on the December 2017 Community Wishlist Survey
- New tools are frequently requested from program and event organizers
- The WMF's Community Tech and Community Resources teams strongly believe there is an opportunity for improved tools

WIKIMEDIA FOUNDATION

Our project direction

- Build tools that complement the existing Outreach Dashboard
- Build tools that address different use cases than the dashboard currently serves.
- Build granular, tactical tools for specific uses.
- In the end, we want to have a suite of interconnected tools that are useful to a wide audience.

Who we're building for

- We want our suite of tools to serve all Program and Event organizers
- However, during development we will focus on limited-scope, tightly-defined target audiences, including:
 - Edit-a-thon organizers
 - GLAM content donation organizers
 - Photo drive organizers (e.g. Wiki Loves Monuments)
 - Editing workshop organizers
 - etc.

Who we're building for

- First step will be to enumerate, or list out, all of these target audiences
- Second step will be to prioritize this list, based on who can benefit the most, the fastest, from new tools

Stages of an Event

BEFORE

- Announcing an event to the public
- Reaching the desired potential participants
- Registration

DURING

- Registration
- Wiki account creation
- Participant training
- Tracking of progress

AFTER

- Post-event evaluation & metrics reporting
- Post-event follow-up with participants and/or the affiliated organization

Programs Survey

- The WMF ran a survey for Program/Event organizers in April 2018
- We received 31 responses from 27 different affiliates/groups
- Most common requests:
 - Ability to see data updated in real time during an edit-a-thon
 - On-wiki tools for event registration & article assignment
 - Tools to help with cross-wiki events (incl. WikiData & Commons)
 - Ability to analyze first-time editors separate from power editors.

How you can help

- Find me and talk to me!
- Share use cases
- Follow up on our project page:
[meta.wikimedia.org/wiki/
Community_Tech/Tools_for_program_and_event_organizers](https://meta.wikimedia.org/wiki/Community_Tech/Tools_for_program_and_event_organizers)

Introducing: Grant Metrics

Leon Ziemba, English Wikipedia administrator
& WMF Software Engineer

WIKIMEDIA
FOUNDATION

Goals

- Provide grantees a simple, easy to use tool for reporting their shared metrics, and removing the need for manual counting.
- Correct some of the known tool-related problems around collecting metrics, especially Wikimetrics.

Problems to solve

- Counting things is boring, difficult and time-consuming.
- A lot of stuff is done manually.
- Privacy is important.
- Measuring retention is difficult.

How is Grant Metrics different?

- Simplicity.
- Focused exclusively on tracking metrics.
- Focused on reporting outputs of the program.

Welcome to Grant Metrics

ORFN [[edit](#) | [edit source](#)]

A *[start-class](#)* article from Wikipedia, the free encyclopedia

ORFN (born 1974 – September 7, 2016) was an American artist and performer. "one of the most prolific graffiti writers in the world" ORFN was known for his "bus-flow" style tags and for writing graffiti and making art in the Bay Area for over 25 years.

ORFN was a member of several graffiti crews, including **Jose Helldiver**, **Muddguts**, **Chainsaw**, **Phantasmagoria**, **Flavor**, and **640**. He was also a member of the "bus-flow" style [tags](#) he wrote in the San Francisco Bay Area. His work evolved to include more complex pieces, such as those featuring smiling faces, sad children, cobwebs, skulls and other symbols. ORFN's work has drawn comparisons to that of [Jean-Michel Basquiat](#), who was also a member of a graffiti crew (Big Kid Fun), DFW (Down for Whatever), 640, and BTM (Big Time Machine).

Gadgets on every Wikimedia wiki

In this notebook we retrieve a list of every wiki from the Site Matrix via the Wikipedia API. From there we download the "gadget definitions" page from each wiki, and with some light parsing, we come up with a list of every gadget on each wiki.

```
In [4]: import requests
import re
from collections import OrderedDict, Counter

# First, we download the Site Matrix to get our list of Wikimedia wikis

sitematrix = 'https://en.wikipedia.org/w/api.php?action=sitematrix&format=json'
r = requests.get(sitematrix)
r = r.json()
r = r['sitematrix']

site_urls = []
for blob in r.values():
    if type(blob) is dict:
        for subblob in blob['site']:
            site_urls.append(subblob['url'])
    elif type(blob) is list: # "Special" wikis, including Commons and Wikidata, are different for some reason
        for subblob in blob:
            site_urls.append(subblob['url'])
```
