Introduction

Agricultural Statistics is published each year to meet the diverse needs for a reliable reference book on agricultural production, supplies, consumption, facilities, costs, and returns. Its tables of annual data cover a wide variety of facts in forms suited to most common use.

Inquiries concerning more current or more detailed data, past and prospective revisions, or the statistical methodology used should be addressed directly to the agency credited with preparing the table. Most of the data were prepared or compiled in the U.S. Department of Agriculture. A few tables were prepared in other Government agencies.

The historical series in this volume have been expanded to provide a more complete reference than in any other recent edition. Volumes with similar historical series were issued in 1967, 1962, 1957, 1952, and 1942. With the longer series carried here, there should be few occasions for the user to refer to earlier issues. Historical tables showing totals for the United States start with 1929, for the principal crops and with 1930 for January 1 livestock numbers. Most other basic tables showing national totals begin with 1944, 1949, or 1954 (livestock and poultry tables 1 year later) depending in part on the relative need for a long series.

Agricultural data for Alaska and Hawaii are included in the appropriate tables, where available. Certain statistics for these two States are found in chapter XIV.

U.S. foreign agricultural trade statistics include Government as well as non-Government shipments of merchandise from the United States and Territories to foreign countries. They do not include U.S. shipments to the U.S. Armed Forces abroad for their own use or shipments between the States and U.S. Territories. The world summaries of production and trade of major farm products are prepared by the U.S. Department of Agriculture from reports of the U.S. Department of Commerce, official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, and the result of office research.

Three types of data are included in this volume. Statistics presented in many of the tables represent actual counts of the items covered. Most of the statistics relating to foreign trade and to Government programs, such as numbers and amounts of loans made to farmers, and amounts of loans made by the Commodity Credit Corporation, etc., are data of this type. A large number of other tables, however, contain data that are estimates made by the Department of Agriculture, which in many cases are supplemented by a third type of data obtained in census enumerations.

The estimates for crops, livestock, and poultry made by the U.S. Department of Agriculture are prepared mainly to give timely current State and national totals and averages. They are based on data obtained by sample surveys of farmers and of people who do business with farmers. The survey data are supplemented by information from the Censuses of Agriculture taken

every 5 years and check data from various sources. Being estimates, they are subject to revision as more data become available from commercial or Government sources. Unless otherwise indicated, the totals for the United States shown in the various tables on acreage, production, numbers, price, value, supplies, and disposition are based on official Department estimates. They exclude States for which no official estimates are compiled.

Revisions of the basic series from 1964 to 1969, based on an evaluation of the 1969 Census and other check data, were generally not completed in time for inclusion in this volume and will be carried in the next issue. Individual tables are labelled and footnoted to identify the few instances that 1969 Census data are included.

For census years, many tables carry both Bureau of the Census totals and Department of Agriculture estimates. Generally, where there are appreciable differences, between the Census totals and the Department's final estimates, the processes of checking and revising estimates have indicated that some sources provide more nearly complete information about some items than the Bureau of the Census has been able to obtain. For example, estimates of tobacco are often more precise than Census totals because the estimates are based on actual sales recorded by the USDA Agricultural Stabilization and Conservation Service, and State Departments of Agriculture. Sugarbeet and sugarcane production and acreage estimates are adjusted to quantities actually reported by sugar factories. Check information on peanuts and rice is available from processors for areas sometimes including several States. In a number of other instances allowances have been made for known incompleteness of coverage by the Census Bureau.

The Department's estimates of inventory numbers for livestock and poultry historically related to January 1. The inventory data was shifted to December 1 for hogs and pigs in 1968, and for chickens and turkeys in 1971. Most recent censuses have not enumerated numbers on the Department's inventory date. The 1945 Census was taken as of January 1, but with the trying wartime conditions, was delayed over a considerable length of time in a number of States with the result that reported inventory numbers did not always represent the actual January 1 inventory. The 1950 Census was taken as of April 1, the 1954 and 1959 Censuses were taken in October and November, the 1964 Census in November and December, and the 1969 Census as of December 31. Census totals are adjusted to an equivalent basis on the inventory date, taking into account changes that occurred between the inventory date and the actual date of enumeration.

DEFINITIONS

"Farm value" as applied to crops in the various tables, is derived by multiplying production by the estimated season average price received by farmers for that portion of the commodity actually sold. In the case of fruits and vegetables, quantities not harvested because of low prices or other economic factors are not included in farm value. The term is used in the inventory tables on livestock and poultry to mean value of the number of head on farms on the inventory date. It is derived by multiplying the number of head by an estimated value per head as of that date.

The word "Year" (alone) in a column heading means calendar year. "Ton" when used in this book without qualifications means a short ton of 2,000 pounds.

WEIGHTS, MEASURES, AND CONVERSION FACTORS

The following table on weights, measures, and conversion factors covers the most important agricultural products, or the products for which such information is most frequently asked of the U.S. Department of Agriculture. It does not cover all farm products nor all containers for any one product.

The information has been assembled from various sources within the Department and from State schedules of legal weights. For most products, particularly fruits and vegetables, there is a considerable variation in weight per unit of volume due to differences in variety or size of commodity, condition and tightness of pack, degree to which the container is heaped, etc. Effort has been made to select the most representative and fairest average for each product. For those commodities which develop considerable shrinkage, the point of origin weight or weight at harvest has been used.

The approximate or average weights as given in this table do not necessarily have official standing as a basis for packing or as grounds for settling disputes. Not all of them are recognized as legal weight. The table was prepared chiefly for use of workers in the U.S. Department of Agriculture who have need of conversion factors in statistical computations.

WEIGHTS, MEASURES, AND CONVERSION FACTORS
 (See explanatory text just preceding this table)

WEIGHTS AND MEASURES

Commodity	Unit ¹	Approximate net weight	Commodity	Unit ¹	Approximate net weight

CONVERSION FACTORS

Commodity	Unit	Approximate equivalent
Apples.....	1 pound dried.....	7 pounds fresh; beginning 1943, 8 pounds fresh
Do.....	1 pound chops.....	5 pounds fresh
Do.....	1 case canned ³²	1.4 bushels fresh
Applesauce.....do ³²	1.2 bushels fresh
Apricots.....	1 pound dried.....	6 pounds fresh
Barley.....	1 metric ton ³³	45.9296 bushels
Barley flour.....	100 pounds.....	4.59 bushels barley
Beans, lima.....	1 pound shelled.....	2 pounds unshelled
Beans, snap or wax.....	1 case canned ³⁴	0.008 ton fresh
Buckwheat flour.....	100 pounds.....	3.47 bushels buckwheat
Calves.....	1 pound live weight.....	0.557 pound dressed weight (1954-63 average)
Cattle.....do.....	0.561 pound dressed weight (1954-63 average)
Cane sirup.....	1 gallon.....	5 pounds sugar
Cherries, tart.....	1 case canned ³²	0.023 ton fresh
Chickens.....	1 pound live weight.....	0.72 pound ready-to-cook weight
Corn.....	1 metric ton ³³	39.368 bushels
Corn, shelled.....	1 bushel (56 lbs.).....	2 bushels (70 pounds) of husked ear corn
Corn, sweet.....	1 case canned ³⁴	0.030 ton fresh
Cornmeal:		
Degermed.....	100 pounds.....	3.16 bushels corn, beginning 1946
Nondegermed.....do.....	2 bushels corn, beginning 1946
Cotton.....	1 pound ginned.....	3.26 pounds seed cotton, including trash ³⁵
Cottonseed meal.....	1 pound.....	2.10 pounds cottonseed
Cottonseed oil.....do.....	5.88 pounds cottonseed
Dairy products:		
Butter.....do.....	21.1 pounds milk
Cheese.....do.....	10 pounds milk
Condensed milk, whole.....do.....	2.3 pounds milk
Dry cream.....do.....	19 pounds milk
Dry milk, whole.....do.....	7.6 pounds milk
Evaporated milk, whole.....do.....	2.14 pounds milk
Malted milk.....do.....	2.6 pounds milk
Nonfat dry milk.....do.....	11 pounds liquid skim milk
Ice cream ³⁶	1 gallon.....	15 pounds milk
Ice cream ³⁶ (eliminating fat from butter and concentrated milk).....do.....	12 pounds milk
Eggs.....	1 case.....	47 pounds
Eggs, shell.....do.....	39.5 pounds frozen or liquid whole eggs
Do.....do.....	10.3 pounds dried whole eggs
Figs.....	1 pound dried.....	3 pounds fresh in California; 4 pounds fresh elsewhere
Flaxseed.....	1 bushel.....	About 2½ gallons oil
Grapefruit, Florida.....	1 case canned juice ³⁴	0.64 box fresh fruit
Hogs.....	1 pound live weight.....	0.579 pound dressed weight, excluding lard (1954-63 average)
Linseed meal.....	1 pound.....	1.51 pounds flaxseed
Linseed oil.....do.....	2.77 pounds flaxseed
Malt.....	1 bushel (34 lbs.).....	1 bushel barley (48 lbs.)
Maple sirup.....	1 gallon.....	8 pounds maple sugar
Nuts:		
Almonds, imported.....	1 pound shelled.....	3-½ pounds unshelled
Almonds, California.....do.....	2.22 pounds unshelled through 1949; 2 pounds thereafter
Brazil.....do.....	2 pounds unshelled
Cashews.....do.....	4.55 pounds unshelled
Chestnuts.....do.....	1.19 pounds unshelled
Filberts.....do.....	2.22 pounds unshelled through 1949; 2.5 pound thereafter
Pecans:		
Seedling.....do.....	2.78 pounds unshelled
Improved.....do.....	2.50 pounds unshelled
Pignolias.....do.....	1.3 pounds unshelled
Pistachios.....do.....	2 pounds unshelled
Walnuts:		
Black.....do.....	5.88 pounds unshelled
Persian (English).....do.....	2.67 pounds unshelled
Oats.....	1 metric ton ³³	68.8944 bushels
Oatmeal.....	100 pounds.....	7.6 bushels oats, beginning 1943
Oranges, Florida.....	1 case canned juice ³⁴	0.53 box fresh
Peaches, California, freestone.....	1 pound dried.....	5½ pounds fresh through 1918; 6 pounds fresh for 1919-23; and 6½ pounds fresh from 1929 to date
Peaches, California, clingstone.....do.....	7½ pounds fresh
Peaches, clingstone.....	1 case canned ³²	1 bushel fresh
Do.....do.....	0.0230 ton fresh
Peanuts.....	1 pound shelled.....	1½ pounds unshelled
Pears.....	1 pound dried.....	6½ pounds fresh
Pears, Bartlett.....	1 case canned ³²	1.1 bushels fresh
Do.....do.....	0.026 ton fresh

See footnotes on page IX.

CONVERSION FACTORS—Continued

Commodity	Unit	Approximate equivalent
Peas, green	1 pound shelled	2½ pounds unshelled
Do	1 case canned ³⁴	0.009 ton fresh (shelled)
Prunes	1 pound dried	2.7 pounds fresh in California; 3 to 4 pounds fresh elsewhere
Raisins	1 pound	4.3 pounds fresh grapes
Rice, milled (excluding brewers)	100 pounds	152 pounds rough or unhulled rice
Rye	1 metric ton ³³	39,368 bushels
Rye flour	100 pounds	2.23 bushels rye, beginning 1947
Sheep and lambs	1 pound live weight	0.482 pound dressed weight (1954–63 average)
Soybeans	1 metric ton ³³	36,7437 bushels
Soybean meal	1 pound	1.27 pounds soybeans
Soybean oil	do	5.49 pounds soybeans
Sugar	1 ton raw	0.9346 ton refined
Tobacco	1 pound farm-sales weight	Various weights of stemmed and unstemmed, according to aging and the type of tobacco. (See circular 435, U.S. Dept. of Agr.)
Tomatoes	1 case canned ³⁴	0.018 ton fresh
Turkeys	1 pound live weight	0.80 pound ready-to-cook weight
Wheat	1 metric ton ³³	36,7437 bushels
Wheat flour	100 pounds	2.30 bushels wheat ³⁷
Wool, domestic apparel shorn	1 pound greasy	0.48 pound scoured
Wool, domestic apparel pulled	do	0.73 pound scoured

¹ Standard bushel used in the United States contains 2,150.42 cubic inches; the gallon, 231 cubic inches; the cranberry barrel, 5,826 cubic inches; and the standard fruit and vegetable barrel, 7,056 cubic inches. Such large-sized products as apples and potatoes sometimes are sold on the basis of a heaped bushel, which would exceed somewhat the 2,150.42 cubic inches of a bushel basket level full. This also applies to such products as sweetpotatoes, peaches, green beans, green peas, spinach, etc.

² Approximate inside dimensions, 10½ by 11½ by 18 inches.

³ Approximate inside dimensions, 4½ by 12½ by 16½ inches.

⁴ Approximate inside dimensions, 4½ by 16 by 16½ inches.

⁵ Approximate dimensions, 4½ by 13½ by 16½ inches.

⁶ Approximate inside dimensions, 13 by 12 by 32.

⁷ Inside dimensions vary. Common sizes are 13 by 13 by 22½ inches, and 13 by 15½ by 23 inches.

⁸ Approximate inside dimensions, 13 by 18 by 21½ inches.

⁹ Approximate inside dimensions, 13 by 13 by 22½ inches.

¹⁰ This is the weight commonly used in trade practices, the actual weight varying according to temperature conditions.

¹¹ Approximate inside dimensions, 9¾ by 16 by 20 inches.

¹² Approximate inside dimensions, 4½ by 11½ by 14 inches.

¹³ The standard weight of 70 pounds is usually recognized as being about 2 measured bushels of corn, husked, on the ear, because it requires 70 pounds to yield 1 bushel, or 56 pounds, of shelled corn.

¹⁴ For statistical purposes the bale of cotton is 500 pounds or 480 pounds net weight. Prior to Aug. 1, 1946, the net weight was estimated at 478 pounds. Actual bale weights vary considerably, and the customary average weights of bales of foreign cotton differ from that of the American square bale.

¹⁵ This is the average weight of cottonseed, although the legal weight in some States varies from this figure of 32 pounds.

¹⁶ Approximate inside dimensions, 9½ by 10½ by 15 inches.

¹⁷ Approximate inside dimensions, 1¾ by 11 by 16½ inches.

¹⁸ Approximate inside dimensions, 11½ by 11½ by 24 inches.

¹⁹ In California and Arizona from 1942 through 1953, the net weights as used by this Department were 77 pounds for oranges, 79 pounds for lemons, and 65 pounds for Desert Valleys grapefruit. Grapefruit in California areas, other than the Desert Valleys, averaged 68 pounds. The new weights effective in 1954 reflect the shift from the "box" to the ½-box carton as the container used.

²⁰ Approximate inside dimensions, 10½ by 10½ by 16½ inches for oranges or lemons, and 9¾ by 10½ by 16½ inches for grapefruit.

²¹ Approximate inside dimensions, 5¾ by 13½ by 16½ inches.

²² Approximate inside dimensions, 4¾ by 16 by 16½ inches.

²³ Approximate inside dimensions, 7¾ by 16 by 21½ inches.

²⁴ Approximate inside dimensions, 9¾ by 13 by 25 inches.

²⁵ Approximate inside dimensions, 12 by 12 by 24 inches.

²⁶ Approximate inside dimensions vary. Common size is 4½ by 11½ by 16½ inches.

²⁷ Approximate inside dimensions, 8½ by 11½ by 18 inches.

²⁸ Approximate inside dimensions, 12 by 10½ by 33 inches.

²⁹ Inside dimensions vary. Ranges from 4 by 16 by 16½ inches to 6 by 16 by 16½ inches.

³⁰ Includes both sorghum grain (kafr, milo, hegari, etc.) and sweet sorghum varieties.

³¹ This average of 55 pounds indicates the usual weight of sweetpotatoes when harvested. Much weight is lost in curing or drying and the net weight when sold in terminal markets may be below 55 pounds.

³² Case of 24 No. 2½ cans.

³³ 1 metric ton is equivalent to 2,204.6 pounds.

³⁴ Case of 24 No. 303 cans.

³⁵ Varies widely by method of harvesting.

³⁶ The milk equivalent of ice cream per gallon is 15 pounds. Reports from plants indicate about 81 percent of the butterfat in ice cream is from milk and cream, the remainder being from butter and concentrated milk. Thus the milk equivalent of the milk and cream in a gallon of ice cream is about 12 pounds.

³⁷ This is equivalent to 4.51 bushels of wheat per barrel (196 pounds) of flour and has been used in conversions, beginning July 1, 1957. Because of changes in milling processes, the following factors per barrel of flour have been used for earlier periods: 1790–1879, 5 bushels; 1880–1908, 4.75 bushels; 1909–17, 4.7 bushels; 1918 and 1919, 4.5 bushels; 1920, 4.6 bushels; 1921–44, 4.7 bushels; July 1944–Feb. 1946, 4.57 bushels; March 1946–Oct. 1946, average was about 4.31 bushels; and Nov. 1946–June 1957, 4.57 bushels.

CHAPTER I

STATISTICS OF GRAIN

This chapter contains tables for wheat, rye, rice, corn, oats, barley, sorghum grain, and feedstuffs. Estimates are given of acreage, production, farm disposition, prices, farm value, stocks, foreign production and trade, and price-support operations. The United States tables on acreage, yield, production, value, and foreign trade for the most part extend back to 1929. Data on earlier years are available from the 1962 and 1967 editions of Agricultural Statistics. Estimates in greater detail are published regularly by the Crop Reporting Board for commodities treated in this chapter. Tables on popcorn are placed in chapter VI with "minor field crops."

Table 1.—Wheat: Acreage, yield, production, value, and foreign trade, United States, 1929–71

Year	Acreage seeded ¹	Acreage harvested	Yield per harvested acre	Production	Season average price per bushel received by farmers ⁽²⁾	Farm value	Average price per bushel, year beginning July, at—		Foreign trade, including flour, year beginning July ⁵	
							Kansas City ³	Minneapolis ⁴	Domestic exports ⁶	Imports for consumption ⁷
1929	1,000 acres	1,000 acres	Bushels	1,000 bushels	Dollars	1,000 dollars	Dollars	Dollars	1,000 bushels	1,000 bushels

¹ Includes acreage seeded in preceding fall for harvest in the year shown.² Obtained by weighting State prices by quantity sold from 1944 to date; prior to 1944, weighted by production. From 193 to date, includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.³ Hard Winter wheat at Kansas City quoted as follows: 1929-46, No. 2 Hard Winter, and 1947 to date, No. 2 Hard and Dark Hard Winter; computed by weighting selling prices by number of carlots sold, as reported in the Kansas City Grain Market Review.⁴ No. 1 Dark Northern Spring; computed by weighting selling prices by number of carlots sold, as reported in the Minneapolis Daily Market Record.⁵ Compiled from reports of the Department of Commerce. Wheat flour is converted to grain equivalent.⁶ Includes flour milled from imported wheat. Excludes exports for relief or charity by individuals and private agencies.⁷ Includes wheat imported for milling in bond and subsequent export.⁸ Excludes some minor producing States and parts of other States where wheat was not asked separately.⁹ Preliminary.Statistical Reporting Service and Economic Research Service. Italic figures are Census of Agriculture returns from the Bureau of the Census. Data for 1866-1928 in *Agricultural Statistics, 1967*, table 1.

FOOTNOTES FOR TABLE 4

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1971 is combined with estimates for the Southern Hemisphere harvests which begin late in 1971 and end early in 1972.² Harvested area as far as possible.³ Preliminary.⁴ A hectare is equivalent to 2.471 acres. A quintal of wheat is equivalent to 3.67 bushels and a metric ton of wheat is equivalent to 36,7437 bushels.⁵ Estimated totals include allowances for producing countries not shown.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ "All wheat" acreage seeded includes winter wheat acreage abandoned and later reseeded to spring wheat for harvest in the same crop year.

² Acreage seeded in preceding fall for winter wheat.

³ Preliminary.

⁴ Includes Minnesota, North Dakota, South Dakota, Montana, and California.

⁵ Includes small quantities of durum wheat grown in States other than those mentioned in footnote 4.

Statistical Reporting Service. Data for 1944–48 in *Agricultural Statistics, 1967*, table 2.

¹ Imports of wheat of milling quality have been limited to a quota of 800,000 bushels per year since May 29, 1941, of which 795,000 bushels may come from Canada. Quantities in excess of the 800,000-bushel quota represent quota-free imports of seed wheat authorized by Presidential Proclamation 2550, April 16, 1942. During the war years 1943–44 and 1944–45 this import restriction was waived.

² Imports of flour have been limited to a quota of 4,000,000 pounds per year since May 29, 1941, of which 3,815,000 pounds may come from Canada (total quota is 93,200 bushels; wheat equivalent). Flour for special experimental purposes may be imported ex-quota. Excludes flour "free for export."

³ Consists of macaroni, spaghetti and similar products, and semolina.

⁴ Less than 500 bushels.

Economic Research Service. Data for 1944–48 in *Agricultural Statistics, 1967*, table 8.

¹ Old crop only.² Stocks at mills, elevators, warehouses, commercial stocks at terminals, processors, and those owned by Commodity Credit Corporation which are in bins, ships, and other storages under CCC control.³ Preliminary.⁴ Beginning Jan. 1, 1962, reported separately.Statistical Reporting Service. Data for 1944–48 in *Agricultural Statistics, 1967*, table 13.

FOOTNOTES FOR TABLE 11

¹ Under loan on July 1 from year-earlier crop and under reseal from previous crops. Includes small quantities sealed under bond in some years.² Includes full-duty wheat, wheat imported for feed, and dutiable flour and macaroni products in terms of wheat. Excludes wheat imported for milling in bond and export as flour.³ Preliminary.⁴ Includes shipments to U.S. Territories and wheat for military food use at home and abroad.⁵ Includes quantities of less than one million bushels used annually in distilled spirits and beer. Includes the quantities, "Totals used for seed," shown in table 6. The residual figure, after taking into account these 2 disappearance items, is assumed to roughly approximate total use for feed. The quantities, "Fed on farms where grown," are shown in table 6.⁶ Includes exports of flour and semolina and macaroni products in terms of wheat. Beginning 1961–62, includes bulgur and rolled wheat in terms of wheat.⁷ A breakdown of wheat and flour exports under the various Government programs is shown in table 9.⁸ Adjusted for transshipments of U.S. wheat through Canada, beginning 1961–62.Economic Research Service. Foreign trade figures from reports of the U.S. Department of Commerce and U.S. Department of Agriculture. Data for 1944–48 in *Agricultural Statistics, 1967*, table 11.

¹ Includes rye sown in preceding fall and in the spring of year shown.

² Obtained by weighting State prices by quantity sold from 1944 to date; prior to 1944, weighted by production. From 1939 to date, includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.

³ Average of daily prices weighted by carlot sales, as reported in the Minneapolis Daily Market Record.

⁴ Compiled from reports of the Department of Commerce. Rye flour and malt converted to grain equivalent.

⁵ Less than 500 bushels.

⁶ Excludes some minor producing States and parts of other States where rye was not asked separately.

⁷ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are Census of Agriculture returns from the Bureau of the Census. Data for 1924-28 in *Agricultural Statistics, 1962*, table 17.

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1971 is combined with estimates for the Southern Hemisphere harvests, which begin late in 1971 and end early in 1972.

² Harvested area as far as possible.

³ Preliminary.

⁴ A hectare is equivalent to 2.471 acres. A quintal of rye is equivalent to 3.94 bushels and a metric ton of rye is equivalent to 39.368 bushels.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Crop year beginning Aug. 1. Crops harvested in Northern Hemisphere during the latter part of the year shown are combined with those harvested in Asia principally from November to May, and in the Southern Hemisphere harvested during the first part of the following year.

² Harvested area as far as possible.

³ Preliminary.

⁴ A metric ton is 2,204.6 pounds.

⁵ Excluding North Korea and North Vietnam due to lack of reliable data.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Obtained by weighting State prices by quantity sold from 1944 to date; prior to 1944, weighted by production. From 1937 to date, includes allowance for unredeemed loans and purchases by the Government.

² Compiled from reports of the Department of Commerce. Cornmeal converted to grain equivalent, measured at the average loan and purchase rate, by States.

³ Includes shipments under the Army Civilian Supply Program, beginning January 1946, and continuing into later years.

³ Includes shipments under continuing into later years.

4 Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are Census of Agriculture returns from the Bureau of the Census. Data for 1866-1928 in *Agricultural Statistics, 1967*, table 38.

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1971 is combined with estimates for the Southern Hemisphere harvest, which begins early in 1972.

² Harvested area as far as possible.

³ Preliminary.

⁴ A hectare is equivalent to 2.471 acres. A quintal of corn is equivalent to 3.94 bushels and a metric ton of corn is equivalent to 39.368 bushels.

⁵ Estimated totals include allowances for producing countries not shown.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Support to cooperators; non-cooperators received program support for 3 years as follows: 1956 crop at \$1.25 per bushel, 1957 crop at \$1.10 per bushel, and 1958 crop at \$1.06 per bushel.

² Percentage of the parity price as of the beginning of the marketing year.

³ Represents loans made, purchases, and purchase agreements entered into. Percentage of production is on a grain basis.

⁴ Includes deliveries from original program, the reseed program and over-deliveries as determined by weight of farm-stored grain when delivered to CCC.

⁵ Includes price-support payments of 18 cents in 1963, 15 cents in 1964, 20 cents in 1965, 30 cents in 1966 through 1970, 32 cents in 1971, and 40 cents in 1972. Payments are made on a designated portion of the base.

⁶ Preliminary.

Agricultural Stabilization and Conservation Service.

¹ Estimates of seeded acreage relate to the total acreage of oats sown for all purposes, including oats sown in the preceding fall.

² Prior to 1949, includes an allowance for oats cut ripe for feeding, unthreshed.

³ Obtained by weighting State prices by quantity sold from 1944 to date; prior to 1944, weighted by production. From 1948 to date, includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.

⁴ Compiled as follows: 1929 to May 1942, Chicago Daily Trade Bulletin; June 1942 to 1951, Chicago Journal of Commerce and Chicago Wall Street Journal; and 1952 to date, Chicago Board of Trade. Computed from averages of daily quotations for No. 2 White, weighted by carlot sales.

⁵ Compiled from reports of the Department of Commerce. Oatmeal converted to grain equivalent.

⁶ Includes shipments under the Army Civilian Supply Program, beginning July 1946, and continuing in later years.

⁷ General imports, 1929-32. Includes "oats, unhulled, ground," beginning 1934.

⁸ Excludes some minor producing States and parts of other States where oats were not reported separately.

⁹ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are Census of Agriculture returns from the Bureau of the Census. Data for 1866-1928 in *Agricultural Statistics*, 1967, table 50.

¹ Preliminary.

Statistical Reporting Service. Disposition of a given year's production regardless of time of actual disposition. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes. Data for 1944–48 in *Agricultural Statistics*, 1967 table 53.

¹ Old crop only.² Stocks at mills, elevators, warehouses, commercial stocks at terminals, processors, and those owned by Commodity Credit Corporation which are in bins and other storages under CCC control.³ Preliminary.Statistical Reporting Service. Data for 1944–48 in *Agricultural Statistics, 1967*, table 55.

FOOTNOTES FOR TABLE 51

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1971 is combined with estimates for the Southern Hemisphere harvest, which begins late in 1971 and ends early in 1972.

² Harvested area as far as possible.³ Preliminary.⁴ A hectare is equivalent to 2.471 acres. A quintal of oats is equivalent to 6.89 bushels and a metric ton of oats is equivalent to 68,8944 bushels.⁵ Estimated totals include allowances for any missing data for countries shown and for other producing countries not shown.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés, and Foreign Service Officers, results of office research, and related information.

1970	46	49	57	768	871	16	2	18

¹ Owned by CCC and stored in bins or other storage owned or controlled by CCC. Additional CCC stocks are included in other off-farm positions.

² Includes grain and grain equivalent of oat products. Compiled from reports of the Bureau of the Census.

³ Less than 500,000 bushels.

⁴ Preliminary. Rough allowance for 1971–72 imports.

⁵ Used in production of oatmeal and other cereal preparations. Based on the reports of the Bureau of the Census.

⁶ Residual; includes other minor uses and waste.

Table 56.—Oats and oatmeal: United States exports (domestic), by country of destination, 1968-70

Country of destination	Year beginning July			Country of destination	Year beginning July

¹ Percentage of the parity price as of the beginning of the marketing year.

² Includes loans made, purchases, and purchase agreements entered into.

³ Includes deliveries from original program, the reseal program and over-deliveries as determined by weight of farm-stored grain when delivered to CCC.

* Preliminary.

Agricultural Stabilization and Conservation Service.

¹ Barley sown for all purposes, including barley sown in the preceding fall.² Obtained by weighting State prices by quantity sold from 1944 to date. Prior to 1944, weighted by production. From 1940 to date, includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.³ From Bureau of Labor Statistics, wholesale price bulletins monthly quotations, August 1919–September 1927, Fair to Good Malting. Beginning October 1927, grade reported as Feeding, but as quality remained unchanged, no change was made in comparative prices; August 1934–1939, barley No. 2 Malting, at Minneapolis.⁴ No. 3 barley; average of daily prices weighted by carlot sales, as reported in the Minneapolis Daily Market Record.⁵ Compiled from Commerce and Navigation of the United States, 1909–17; Foreign Commerce and Navigation of the United States, 1918; Monthly Summary of Foreign Commerce of the United States, June issues, 1919–26; January and June issues, 1927–39; and official records of the Bureau of Foreign and Domestic Commerce.⁶ Barley: Imports for consumption, beginning 1909. Malt: General imports, 1909–13; imports for consumption, beginning 1914. Flour: Not reported prior to 1914; imports for consumption, beginning 1915.⁷ Excludes some minor producing States where barley was not reported separately.⁸ Preliminary.Statistical Reporting Service and Economic Research Service. Italic figures are Census of Agriculture returns from the Bureau of the Census. Data for 1866–1908 in *Agricultural Statistics*, 1967, table 59.

¹ Years shown refer to year of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1971 is combined with estimates for the Southern Hemisphere harvests which begin late in 1971 and end early in 1972.

² Harvested area as far as possible.

³ Preliminary.

⁴ A hectare is equivalent to 2.471 acres. A quintal of barley is equivalent to 4.59 bushels and a metric ton of barley is equivalent to 45.9296 bushels.

⁵ Estimated totals include allowances for producing countries not shown.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

Table 61.—Barley: Production and farm disposition, United States, 1949–71

¹ Owned by CCC and stored in bins or other storage owned or controlled by CCC. Additional CCC stocks are included in other off-farm positions. ² Compiled from reports of the Bureau of the Census. ³ Less than 500,000 bushels. ⁴ Preliminary. Rough allowance for 1971–72 imports. ⁵ Compiled from reports of the Internal Revenue Service. Includes small quantities of barley grain. ⁶ Based on acreage seeded to the following crop. ⁷ Residual; includes other minor uses and waste.

Economic Research Service. Data for 1944–48 in *Agricultural Statistics*, 1967, table 64.

¹ Beginning 1960, includes Alaska and Hawaii.² Excludes quantities used in alcoholic beverages.³ Includes white, whole wheat, and semolina flour.⁴ Rice consumption for year beginning August previous to the year stated.⁵ Corn used in food products, excluding alcoholic beverages. Includes an allowance for the quantity used as hominy and grits.⁶ Oats used in oatmeal, prepared breakfast foods, infant foods, and minor food products.⁷ Barley used in malt for human food and as pearl barley, excluding quantities used in alcoholic⁸ Malt equivalent of barley food products.⁹ Preliminary. Estimates of corn syrup, sugar, and starch are unofficial estimates; industry data were not reported after April 1968.Economic Research Service. All figures are estimates based on data from private industry sources, the U.S. Department of Commerce, the Internal Revenue Service, and other Government agencies. Data for 1909-28 in *Agricultural Statistics, 1967*, table 69.

¹ Preliminary.² Production small and remaining stocks believed negligible.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information. Data for 1954–58 in *Agricultural Statistics, 1967*, table 70, are in millions of bushels (see conversion factors in "Weights, Measures, and Conversion Factors" table in front of book on pages VIII and IX).

¹ Bulk basis.

Economic Research Service. Prices of corn and oats at Kansas City, Chicago, and Minneapolis were computed by weighting selling prices by reported number of carlots sold. Prices of barley and grain sorghum at Kansas City and of barley at Chicago and Minneapolis are the average of prices at the close of each day. Prices at Los Angeles are the average of prices on one day each week. Data for 1944-48 in *Agricultural Statistics, 1967*, table 83.

¹ Based on prices of the following feedstuffs at leading markets, weighted by average consumption: Soybean, cottonseed, linseed, copra, and peanut meals; bran, middlings, shorts, and millrun; gluten feed and meal; hominy feed; brewers' and distillers' dried grains; alfalfa meal; rice bran, and feeding molasses.

CHAPTER II

STATISTICS OF COTTON, SUGAR, AND TOBACCO

In addition to tables on cotton, sugar, and tobacco, this chapter includes tables on fibers other than cotton, sirups, sugar, honey, and beeswax. Most cottonseed data, however, are in the following chapter on oilseeds, fats, and oils.

Table 84.—Cotton: Acreage, yield, production, value, and foreign trade, United States, 1929–71

Year	Cotton								Cottonseed

¹ Acreage in cultivation July 1 prior to 1944.² Census of Agriculture figures for all periods are in running bales, U.S. Department of Agriculture figures are in 480-pound net weight bales from 1969 to date; prior to 1969, in 500-pound gross weight bales.³ Net weight price for 1971; prior to 1971, gross weight price, including bagging and ties, except that extra-long staple cotton is included in net weight price. From 1933 to date, includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.⁴ Prices are for middling grade, $\frac{7}{8}$ -inch staple, through 1939; $\frac{15}{16}$ -inch staple, August 1940-July 1956; 1-inch staple, beginning August 1956; discontinued in 1967 crop year.⁵ Compiled from reports of the U.S. Department of Commerce. Equivalent bales of 500 pounds gross weight.⁶ Excluding linters.⁷ Imports for consumption beginning 1934; re-export not considered beginning this date.⁸ Acreage in cultivation July 1 less acres removed, as reported by the Agricultural Adjustment Administration, and natural abandonment on area not under contract.⁹ Preliminary.¹⁰ Average price to Apr. 1, 1972, including an allowance for unredeemed loans.

Statistical Reporting Service and Economic Research Service. Italic figures are Census of Agriculture returns from the Bureau of the Census. Production figures conform with Census annual ginning enumerations. Data for 1866-1928 in *Agricultural Statistics*, 1967, table 85.

FOOTNOTES FOR TABLE 85

¹ Preliminary.² Equivalent 480-pound net weight bales ginned.³ Beginning August 1971 (1971 crop), basis for upland cotton prices was changed from 500-pound gross weight to a 480-pound net weight bale; to compute comparable prices for previous periods multiply price by 1.04167. Includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.⁴ Average price to Apr. 1, 1972.⁵ American-Egyptian prior to 1970.⁶ 1969 acreage and production rounded to thousands.

1972	7 9 35.00	-----	-----	-----	-----	-----	-----

¹ Basis Middling 7/8-inch through 1960; average of the crop through 1970; Middling 1-inch, micronaire 3.5-4.9, net weight for 1971 and succeeding years.

² Percentage of the parity price as of the beginning of the marketing year.

³ Includes loans made and direct purchases.

⁴ Acquisitions from crop harvested in the year indicated and not acquisitions during that year.

⁵ Running bales.

⁶ For cotton grown by farmers electing Choice A acreage allotments. Corresponding support level for Choice B for 1959 is 24.70 cents which is 65 percent of parity; for 1960, it is 23.18 cents which is 60 percent of parity.

⁷ Includes price-support payments as follows: To producers who planted within domestic allotment, 3.50 cents per pound in 1964 and 4.35 cents in 1965; to program participants on projected production from farm's domestic allotment, 9.42 cents in 1966, 11.53 cents in 1967, 12.24 cents in 1968, 14.73 cents in 1969, 16.80 cents in 1970; and on production from acreage planted within the farm base acreage allotment, 15 cents in 1971 and a minimum of 15 cents in 1972.

⁸ Average price to Dec. 1, 1971.

⁹ Preliminary.

Agricultural Stabilization and Conservation Service.

FOOTNOTES FOR TABLE 87

¹ Harvest season beginning Aug. 1.

² Preliminary.

³ Bales of 480 pounds net.

⁴ Includes estimates for minor-producing countries not shown above and allowances for countries where data are not yet available.

⁵ Formerly Congo (Kinshasa).

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Ginnings during the 12 months, Aug. 1–July 31. Includes an allowance for "city crop" which consists of rebaled sample and pickings from cotton damaged by fire and weather.

² Total imports minus re-exports.

³ Total exports minus re-imports.

⁴ Domestic in running bales, and foreign in equivalent bales of 500 pounds.

⁵ Preliminary.

Agricultural Marketing Service. Compiled from reports of the U.S. Department of Commerce. Data for 1944–48 in *Agricultural Statistics, 1967*, table 89.

1959.....	95.8	32.8	1971 ³	89.8	33.8
1960.....	95.4	32.9			

¹ Computed by weighting the quantity in each grade by the 1937–39 average price per pound for such grade of $15\frac{1}{16}$ -inch staple. Converted to an index with Middling White equaling 100. For 1958 and subsequent years, constants for Plus, Light Spotted, and Light Gray set at mid-points between full grade weights.

² Averages calculated on numerical equivalents of the staple length designation. For example, $\frac{7}{8}$ -inch=28, $2\frac{1}{2}$ -inch=29, etc. Averages are in terms of thirty-seconds inches.

³ Preliminary.

¹ Uncompressed in carload lots, f.o.b. mill points.² Bales are running bales except imports, which are 500-pound bales; includes production at oil mills, gins, and other delinting plants. Beginning 1959, "Supply" items are principally in 600-pound gross weight bales and "Distribution" items are in running bales.³ Preliminary.Agricultural Marketing Service. Supply and distribution figures compiled from reports of the U.S. Department of Commerce. Data for 1944–48 in *Agricultural Statistics*, 1967, table 107.

FOOTNOTES FOR TABLE 106

¹ Estimates for Southern Hemisphere countries include unginned cotton.² Includes cotton destroyed or unaccounted for.³ Bales of 480 pounds net (500 pounds gross).⁴ Running bales except imports, which are in bales of 480 pound net.⁵ Ginning in season of 9,870,000 running bales plus city crop of 40,000 bales.⁶ Imports for consumption.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Estimates for Southern Hemisphere countries include unginned cotton.² Preliminary.³ In bales of 480 pounds net except United States, which is in running bales.⁴ Running bales.⁵ Formerly Congo (Kinshasa).⁶ Mostly U.S.S.R., Mozambique, and Nigeria.⁷ Mostly China and Eastern Europe.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information. Data for 1957-61 in *Agricultural Statistics, 1967*, table 109.

¹ Apparel and carpet wool, scoured basis.

² Imports for consumption.

³ Domestic shipments plus imports for consumption. Includes producers' waste consumed by mills. Non-cellulosic fibers also include textile glass fiber.

⁴ Less than 0.05 pound.

⁵ Less than 50,000 pounds.

⁶ Preliminary.

Economic Research Service. Data on man-made fibers from *Textile Organon*, Calendar year data divided by population on July 1, including Armed Forces overseas, to calculate per capita consumption. Data for 1919–28 in *Agricultural Statistics*, 1962, table 108.

Table 109.—Rayon, raw silk, and cotton yarn: Price per pound; production, imports, exports, and consumption of rayon; imports of raw silk, United States, 1949–71

Year	Rayon ¹					Raw silk		Cotton yarn

								70.4

¹ Includes filament yarn and staple fiber.

² Producers' exports.

³ Domestic shipments plus imports for consumption. Includes producers' waste consumed by mills.

⁴ Wholesale prices f.o.b. producer plants.

⁵ Viscose, 150 denier, 1st quality.

⁶ Viscose, 1½ denier.

⁷ Japanese silk, white 20/22.

⁸ Carded knitted 30/1 on cones or tubes.

⁹ Estimated from Bureau of Labor Statistics seasonal indexes.

¹⁰ Not available.

¹¹ Preliminary.

Economic Research Service. Compiled as follows: Exports, imports, production, and consumption of rayon from the *Textile Organon*; prices from bulletins of the U.S. Department of Labor and the *Textile Organon*. Data for 1944–48 in *Agricultural Statistics, 1967*, table 111.

FOOTNOTES FOR TABLE 112

¹ Includes wild or tussah, and raw silk in skeins.

² Silk waste, noils, and cocoons.

³ Beginning 1963, not entirely comparable with preceding years because of change in schedule classification.

⁴ Includes weights of all classes added without conversion to an equivalent fiber basis.

⁵ Includes erin vegetal, New Zealand or phormium fiber, broomroot, rice straw and rice fiber, coir, and other unmanufactured vegetable fiber.

⁶ Tons of 2,240 pounds.

⁷ Estimated.

Foreign Agricultural Service. Compiled from reports of the U.S. Department of Commerce. Data for 1944–48 in *Agricultural Statistics, 1967*, table 113.

¹ Includes nylon, acrylic, modacrylic, polyester, and other man-made fibers.² Includes textile glass fiber.Economic Research Service. Compiled from the *Textile Organon*. Rayon and acetate data for 1944–48 in *Agricultural Statistics*, 1967, table 112.

FOOTNOTES FOR TABLE 113

¹ Excludes mainland China, Manchuria, and U.S.S.R. Excludes mesta.² Preliminary.Foreign Agricultural Service. Import data compiled from reports of the U.S. Department of Commerce. Production data prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information. Data for 1944–48 in *Agricultural Statistics*, 1967, table 115.

¹ Relates to year of harvest, but for California beginning with 1952, includes some acreage harvested in the beginning of the following year.

² Prices do not include Government payments under the Sugar Act. Price-support payments for 1944-45 and 1947 are included.

³ Calculated on the basis that 1.07 tons of raw sugar is required to produce one ton of refined sugar.

⁴ Preliminary.

Statistical Reporting Service. Data for 1924-28 in *Agricultural Statistics, 1962*, table 116.

¹ Includes Hawaii for acres harvested, yield per acre, production of sugarcane for sugar, and sugar production; includes molasses production for Hawaii. Also includes Hawaii from 1959 to date for acres harvested, yield, and production of sugarcane for seed. Price and value not available for Hawaii.

² The growth of 9 months in Louisiana, 12 months in Florida, and 18-24 months in Hawaii. Sugarcane harvest usually ends by December or early January in Louisiana; in Florida, by March following the season of growth; and in Hawaii, the harvest takes place throughout the year.

³ Preliminary.

⁴ Prices do not include Government payments under the Sugar Act.

⁵ Raw value is the equivalent in terms of 96° sugar as defined in the Sugar Act of 1948.

⁶ Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.

⁷ Sirup production not included. See table 136.

Statistical Reporting Service. Of the total sugar produced in Louisiana about 25 percent consists of direct consumption sugar marketed "as made" without further refining. Data for 1949-53 in *Agricultural Statistics, 1967*, table 123.

¹ Crop year generally coincides with the calendar year except that small proportions of continental U.S. beet and cane sugar are processed early in the following year and that the Philippine crop year starts in October of the preceding year.

² Raw value is the equivalent in terms of 96° sugar, as defined in the Sugar Act of 1948.

³ Raw sugar, as made.

⁴ Preliminary.

Agricultural Stabilization and Conservation Service. Data for 1944–48 in *Agricultural Statistics, 1967*, table 125.

¹ Years shown are crop-harvesting years. Campaigns beginning not earlier than May of year shown, nor later than April of following year, are included in the same crop year. The entire season's production of each country is credited to the May/April year in which harvesting and sugar production began.

² Preliminary.

³ Centrifugal sugar, as distinguished from noncentrifugal, includes cane and beet sugar produced by the centrifugal process, which is the principal kind moving in international trade.

⁴ Formerly Congo (Kinshasa).

⁵ "Other Africa" includes Algeria, Afars-Issas, Somal Republic, Sudan, Angola, Congo (Brazzaville), Liberia, Tunisia, Ghana, Malawi, Zambia, Morocco, Nigeria, and Cameroon.

⁶ "Other Asia" includes Afghanistan, Israel, Syria, South Vietnam, Iraq, Lebanon, Ceylon, Nepal, and the Republic of Korea.

⁷ Noncentrifugal sugar includes all types of sugar produced by other than centrifugal process which is largely for consumption in the relatively few areas where produced. The estimates include such kinds known as piloncillo, panela, papelon, chancaca rapadura, jaggery, gur, muscovado, panocha etc.

Foreign Agricultural Service, Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Raw value is the equivalent in terms of 96° sugar. Imports and domestic marketings under annual sugar requirements determinations and quotas, pursuant to the Sugar Act of 1948, as amended. These comprise all sugar marketings except importations for re-export, livestock feed, and alcohol production, which were 125,388 tons in 1969, 132,695 tons in 1970, and 180,089 tons in 1971.

¹ Based on sales to Dec. 1. Obtained by weighting State prices by quantity sold.² Estimates discontinued.Statistical Reporting Service. Data for 1944-53 in *Agricultural Statistics, 1967*, table 138.

FOOTNOTES FOR TABLE 139

¹ Production of cane sirup, sorghum sirup, and edible molasses is of the fall of the preceding year. Estimates of sorghum discontinued, beginning 1961; cane sirup discontinued, beginning 1969.² Does not include varying quantities produced on nonfarm lands in Somerset County, Maine.³ U.S. Department of Commerce molasses and sugar sirups series, less liquid sugar imports reported to Sugar Division, Agricultural Stabilization and Conservation Service.⁴ Includes the following shipments of honey from territories: 60,000 gallons in 1949 and 30,000 gallons in 1950; discontinued in 1951.⁵ Unofficial estimates.⁶ Preliminary.⁷ Assumed to be largely refiners' sirup. Beginning 1965, data not available because of change in export classification.Economic Research Service. Data for 1944-48 in *Agricultural Statistics, 1967*, table 142.

¹ Production harvested within the calendar year specified. Farm-sales weight is about 10 percent above dry weight which is normally reported in trade statistics.

² Preliminary.

³ Includes estimates for countries where data are not yet available, and producing countries not shown.

⁴ Formerly Congo (Kinshasa).

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ July 1 for flue-cured types 11-14 and cigar types 61 and 62; Oct. 1 for all other types.

² Farm-sales weight of exports is subject to revision. Exports by rehandling trade included in totals of types from which they are made. Exports and domestic use not separately available for individual types 51, 52, 54, and 55.

³ Domestic disappearance adjusted for tobacco still on farms at end of marketing year.

⁴ Preliminary.

⁵ Includes fire loss of an estimated 4.7 million pounds.

⁶ Includes fire loss of an estimated 2 million pounds.

⁷ Puerto Rican crop planted in the fall of the year shown and harvested the following spring.

⁸ Includes Perique.

Economic Research Service. Basic export data from the official reports of the Department of Commerce. Data for 1954-58 in *Agricultural Statistics, 1967*, table 154.

¹ Stocks shown have been converted to a farm-sales-weight basis—the equivalent of weight at the time of sale by grower—thereby making these data of leaf-tobacco stocks comparable with data of leaf-tobacco production.

² Stocks on the island of Puerto Rico are included.

³ These tobaccos were previously grouped together and designated type 90.

Agricultural Marketing Service.

¹ Cigars produced in bonded manufacturing warehouses are included.

² "King size" cigarettes included in this category.

³ Formerly designated "Scrap."

⁴ Less than 500,000.

⁵ Excise tax on chewing and smoking tobacco and snuff discontinued after 1965. Data now reported by Agricultural Marketing Service, U.S. Department of Agriculture, and are not strictly comparable with prior year.

⁶ Preliminary.

Agricultural Marketing Service. Compiled from reports of the Internal Revenue Service, U.S. Treasury Department. Data for 1949–53 in *Agricultural Statistics*, 1967, table 157.

¹ This table does not show support operations for all tobacco. Only burley and flue-cured are shown because they are substantially more important in the total tobacco picture than other types which are also supported.

² Title to the tobacco obtained under the price-support program is retained in most cases by the Producers' Cooperative Association handling price-support loans.

³ Preliminary.

⁴ Less than 500,000 pounds.

Agricultural Stabilization and Conservation Service.

CHAPTER III

STATISTICS OF OILSEEDS, FATS, AND OILS

This chapter includes information on cottonseed, flaxseed, olive oil, peanuts, soybeans, tung nuts, margarine, and fats and oils. Most butter statistics are included in the chapter on dairy and poultry statistics. Lard data are mostly in the chapter on livestock.

Table 160.—Cottonseed: Cotton acreage, cottonseed yield, production, farm disposition, season average price per ton received by farmers, and value, United States, 1929–71

¹ United States averages not fully representative of entire crop because of relatively small volume of seed graded in some areas.² These basic factors are combined to form indexes of quantity and quality which in turn are used to determine the official grade of cottonseed in accordance with the United States Official Standards for Grades.³ The quantity index measures the oil and cake or meal in the cottonseed, taking into account variations in the quantity of oil, protein, and linters.⁴ The quality index measures the deterioration in oil and meal and takes into account the excesses of moisture and foreign matter.⁵ The average grade is the product of the quantity index times the quality index. The base grade is 100.0.⁶ Samples graded by licensed chemists under the supervision of the U.S. Department of Agriculture.

¹ Obtained by weighting State prices by quantity sold from 1944 to date; prior to 1944, weighted by production. From 1943 to date, allowance made for loans unredeemed at the end of the crop marketing season; from 1948 to date, includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.

² Prices are averages of daily prices weighted by carlot sales, compiled from Minneapolis Daily Market Record.

³ Compiled from reports of the U.S. Department of Commerce. Linseed oil converted to flaxseed equivalent on the basis of oil yield per bushel of flaxseed crushed.

⁴ General imports, 1929-32; imports for consumption, beginning 1933.

⁵ Less than 500 bushels.

⁶ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are Census of Agriculture returns from the Bureau of the Census. Data for 1924-28 in *Agricultural Statistics, 1962*, table 173.

Texas-----	70	8	2	68					

Statistical Reporting Service. Disposition of a given year's production regardless of time of actual disposition. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 169

¹ Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere countries in 1971 was combined with the Southern Hemisphere harvest which began late in 1971 and ended early in 1972. Estimates do not include China where annual production probably varies from 25,000 to 50,000 tons.

² Preliminary.

³ A quintal of flaxseed is equivalent to 3.94 bushels; a metric ton of flaxseed is equivalent to 39.368 bushels.

⁴ Seeded area.

⁵ Includes estimates for the above countries for which data are not available and for minor producing countries.

⁶ Includes fiber flax area and seed production.

⁷ Acreage includes that harvested for seed and that portion of fiber acreage which is harvested for seed as well as fiber. Production includes seed from fiber flax.

⁸ Flaxseed from acreage grown for seed only.

⁹ Includes estimates for the above countries for which data are not available.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

FOOTNOTES FOR TABLE 172

¹ Old crop only.

² Stocks at mills, elevators, and warehouses, at processing plants, and at terminals.

³ Preliminary.

Statistical Reporting Service. Data for 1947-48 in *Agricultural Statistics, 1967*, table 175.

¹ Less than 500,000 pounds.

² Less than 500 tons.

³ Preliminary.

Economic Research Service. Data from the U.S. Department of Commerce. Data for 1944-48 in *Agricultural Statistics*, 1967, table 178.

FOOTNOTES FOR TABLE 179

¹ Peanuts in the shell. Southern Hemisphere peanut crop, which is harvested from April to June, is combined with that of the Northern Hemisphere harvested from September through December of the same year.

² Harvested areas as far as possible.

³ Preliminary.

⁴ A metric ton is 2,204.6 pounds.

⁵ Includes estimates for the above countries for which data are not available.

⁶ Planted area.

⁷ Formerly Congo (Kinshasa).

⁸ Commercial crop.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Acres grown alone, plus 1/2 the interplanted acres. Beginning 1964, interplanted acreage discontinued.² Mostly hogged.³ For data on peanut-vine hay, see table 394.⁴ Beginning 1959, net weight basis.⁵ Obtained by weighting State prices by quantity sold from 1944 to date; prior to 1944, weighted by production.⁶ Compiled from reports of the Department of Commerce. Trade data are on the basis of "in the shell," converted at ratio of 1 to 1 1/2 through 1944; beginning 1945, ratio of 1 to 1.55.⁷ General imports, 1929-32; imports for consumption, beginning 1933.⁸ Excludes 3,371,850 pounds "free for export."⁹ Beginning January 1947, includes exports for civilian feeding by the military abroad.¹⁰ Preliminary.Statistical Reporting Service and Economic Research Service. Data for 1924-28 in *Agricultural Statistics, 1962*, table 183.

¹ Percentage of the parity price as of the beginning of the marketing year. ² Includes loans made and direct purchases. ³ Includes shelled peanuts converted to farmers' stock basis. ⁴ Less than 500,000 pounds. ⁵ Preliminary. ⁶ Minimum price representing 75 percent of the parity price for April 1972. Subject to upward adjustment at the beginning of the marketing year (Aug. 1, 1972) if a combination of the parity price and supply percentage results in a higher legal minimum price.

Agricultural Stabilization and Conservation Service.

New Mexico handpicked Valencias ³	17½	16½	17½	17½	17½	18	18½	19½	20	20½

¹ Crop year begins about Oct. 1 in the Virginia-North Carolina area; in August in the Southeastern and the Southwestern States. Prices are for prompt shipment.

² U.S. Splits replace U.S. No. 2 due to change in marketing practices. No information available for prior years.

³ No U.S. grade standards apply to Valencia peanuts.

Agricultural Marketing Service.

1959	10.2	8.8	9.6	9.9	10.3	1971 ⁴ ⁵	14.2	14.6	13.9	13.6	13.8
1960	11.2	9.2	10.1	10.2	10.8						

¹ Prices for the years prior to 1956 are for "Base Grade" quality as described in USDA price-support announcements; for 1956 and later years, they are based on average quality factors for each crop year as described in the price-support schedules and summaries of inspections as reported by the Federal-State Inspection Service.

² Crop year begins about Oct. 1 in the Virginia-North Carolina Section; in August in the Southeastern and in the Southwestern States.

³ Prices are for "Quota" stocks only.

⁴ Principal quality factors for the 1971 crop are as follows: Virginia type—71 percent sound mature kernels and 34 percent extra-large kernels; Spanish type—Southeast, 71 percent sound mature kernels and Southwest, 70 percent sound mature kernels; Runner type—75 percent sound mature kernels; Valencias—64 percent sound mature kernels.

⁵ Preliminary.

¹ Acres grown alone, plus $\frac{1}{2}$ the interplanted acres. Beginning 1965, interplanted acreage discontinued; data for soybean hay for earlier years are included in table 394.

² Obtained by weighting State prices by quantity sold from 1944 to date; prior to 1944, weighted by production. From 1942 to date, allowance made for loans unredeemed at the end of the crop marketing season; from 1948 to date, includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.

³ Inspections for export by Federal licensed inspectors; first reported in October 1931.

⁴ Not separately classified by Department of Commerce prior to Jan. 1, 1937.

⁵ Less than 500 bushels.

⁶ Includes exports for civilian feeding by the military abroad, beginning January 1947.

⁷ Preliminary.

Statistical Reporting Service and Economic Research Service. Statistical returns from the Bureau of the Census. Foreign trade from the U.S. Department of Commerce. Data for 1924-28 in *Agricultural Statistics*, 1967, table 192.

¹ Years shown refer to years of harvest. Southern Hemisphere crops which are harvested in the early part of the year are combined with those of the Northern Hemisphere harvested the latter part of the same year.

² Harvested acreage as far as possible.

³ Preliminary.

⁴ A quintal of soybeans is equivalent to 3.67 bushels; a metric ton of soybeans is equivalent to 36.7437 bushels.

⁵ Acreage harvested for beans.

⁶ Planted area.

⁷ Quantities purchased by the Nigerian Marketing Boards for exports.

⁸ Sales.

⁹ European farms only.

¹⁰ Includes estimates for the above countries for which data are not available and for minor producing countries.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

FOOTNOTES FOR TABLE 188

¹ Excludes peanut butter made by manufacturers for own use in candy and/or peanut butter sandwiches.

² Beginning August 1956, excludes peanut butter used in sandwiches.

³ Apparent disappearance represents stocks beginning of year plus production, minus stocks at end of year.

Statistical Reporting Service. Data for 1949-53 in *Agricultural Statistics, 1967*, table 191.

¹ Includes fish oils which have been negligible in recent years. ² Not reported separately beginning 1959. ³ Less than 500,000 pounds. ⁴ Preliminary.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce. Totals computed from unrounded numbers. Data for 1944–48 in *Agricultural Statistics, 1967*, table 209.

FOOTNOTES FOR TABLE 205

¹ Includes imports, which are negligible.

² Shipments to Puerto Rico and Virgin Islands only.

³ Includes estimated exports through nongovernmental relief agencies.

⁴ Includes estimates of foreign donations not reported by the U.S. Department of Commerce.

⁵ Preliminary.

Economic Research Service. Compiled from reports of the Commerce and Agriculture Departments. Data for 1944–48 in *Agricultural Statistics, 1967*, table 208.

FOOTNOTES FOR TABLE 208

¹ Beginning 1959, excludes fats and oils used in fatty acids, many of which are used in drying-oil products.

² Beginning 1969, not reported separately.

³ Preliminary.

Economic Research Service. These estimates include utilization in paints, varnishes, floor coverings, printing inks, core oil, resins, insulation, linings, packings, caulking compounds, oilcloth, and other coated fabrics. Compiled from reports of the Commerce and Interior Departments. Totals computed from unrounded numbers. Data for 1944–48 in *Agricultural Statistics, 1967*, table 211.

¹ Includes oil equivalent of cottonseed, soybeans, peanuts, and flaxseed exported for crushing abroad. ² Includes commercial exports, voluntary or civilian relief, re-exports, and shipments to U.S. Territories. ³ Stocks differ slightly from end of preceding year because of minor change in reporting procedure. ⁴ Includes Government stockpiling. ⁵ Excludes stocks of coconut, palm, castor, and sperm oils held by the Government for stockpiling of strategic materials. ⁶ Includes General Services Administration stockpile of coconut oil. ⁷ Excludes an estimate of oil equivalent of soap used in synthetic rubber. This use is included in "Other industrial."

Economic Research Service. Computed from reports of the Commerce, Interior, and Agriculture Departments. Totals computed from unrounded numbers. Data for 1944-48 in *Agricultural Statistics*, 1967, table 212.

¹ Includes inedible tallow, inedible animal oils not elsewhere classified, and inedible animal greases and fats, not elsewhere classified, through 1964. Beginning 1965, data include tallow and grease (except wool grease) and choice white grease; lard and tallow oil; lard, oleo, and tallow stearine; unrendered animal fats, and animal fats and oils, not elsewhere classified.

² Preliminary.

³ Includes the following estimated quantities exported under Title III, P.L. 480 (Foreign Donations) (thousand pounds): 12,232 in 1960, 69,932 in 1961, 39,207 in 1962, 1,438 in 1963, and 107,705 in 1964. Beginning January 1965, donations included as reported by the Census Bureau.

⁴ Includes the following estimated quantities exported under Title III, P.L. 480 (Foreign Donations) (thousand pounds): 18,128 in 1960, 152,781 in 1961, 92,466 in 1962, 18,004 in 1963, and 74,379 in 1964. Beginning January 1965, donations included as reported by the Census Bureau.

⁵ Includes food exported for relief or charity.

⁶ Includes an estimated 10,192 thousand pounds exported under Title III, P.L. 480 (Foreign Donations).

Foreign Agricultural Service. Compiled from reports of the Commerce and Agriculture Departments. Data for 1949-53 in *Agricultural Statistics*, 1967, table 214.

¹ Includes inedible tallow and choice white grease; inedible lard oil, tallow oil, lard stearine, oleo stearine, and tallow stearine; and animal fats, oils, and greases, n.e.c.

² Preliminary.

³ May not add due to rounding.

Foreign Agricultural Service. Compiled from reports of the U.S. Department of Commerce.

FOOTNOTES FOR TABLE 212

¹ Beginning 1955, includes blanched or roasted peanuts.

² Preliminary.

³ Less than 500 pounds.

Foreign Agricultural Service. Compiled from reports of the U.S. Department of Commerce. Data for 1949–53 in *Agricultural Statistics*, 1967, table 215.

¹ Computed from factory consumption, foreign trade, and stocks; beginning October 1966 through 1969, production as reported by the Census Bureau.

² Less than 500,000 pounds.

Economic Research Service. Computed from unrounded numbers. Stocks, consumption, and trade from the U.S. Department of Commerce. Prices from the National Provisioner and Wall Street Journal. Data for 1944-48 in *Agricultural Statistics, 1967*, table 217.

FOOTNOTES FOR TABLE 215

¹ Mainly salad and cooking oils. Beginning 1959, includes all food fats and oils used other than butter, lard, margarine, or shortening.

² Including only the fat content of butter, estimated at 80.5 percent of total weight, and of margarine for which the fat content varies slightly each year.

³ Preliminary.

⁴ Fat equivalent of soap used in synthetic rubber, is included with "Other industrial products." Prior to 1949, most of the fats and oils used in synthetic detergents is believed to have been reported as used in soap. Beginning 1949, this use of fats and oils is entirely included in "Other industrial products."

⁵ Paints, varnishes, floor coverings, oilcloth, printing inks, core oils, synthetic resins, insulation, linings, packings, coated fabrics (other than oilcloth), caulking, and other protective coatings.

Economic Research Service. Computed from reports of the Commerce, Interior, and Agriculture Departments. Totals and per capita estimates computed from unrounded numbers. Data for 1944-48 in *Agricultural Statistics, 1967*, table 218.

CHAPTER IV

STATISTICS OF VEGETABLES AND MELONS

This chapter contains statistics on potatoes, sweetpotatoes, and commercial vegetables and melons.

For potatoes and sweetpotatoes, the estimates of acreage, production, value, and farm disposition pertain to the total crop and include quantities produced both for sale and for use as food, feed, and seed on farms where grown. Potato statistics are shown on a within-year seasonal grouping of winter, early spring, late spring, early summer, late summer, and fall crops, by States. Some States have production in more than one seasonal group.

For processing vegetables, the estimates of acreage, production, and value for each of the 10 crops relate to production used by commercial canners, freezers, and other processors, except dehydrators. These estimates include raw products grown by processors themselves and those grown under contract or purchased on the open market. This production and the actual or equivalent acreage harvested are not duplicated in the fresh market estimates for the same commodities. The production of those vegetables used for processing for which regular processing estimates are not made, is included in the fresh market estimates.

Beginning in 1968, commercial vegetables for fresh market include 22 principal vegetable and melon crops in the major producing States. Earlier years include the following 5 additional crops: lima beans, beets, kale, green peas, and shallots. These estimates relate to crops which are grown primarily for sale and they do not include vegetables and melons produced in farm and nonfarm gardens. The bulk of the production of the principal vegetable and melon crops is for consumption in the fresh state. However, quantities used by processors of artichokes, broccoli, brussels sprouts, carrots, cauliflower, celery, garlic, onions, and green peppers are included, and separate estimates of commercial processing are not made for these crops. The commercial estimates of the principal crops include local market production from areas near consuming centers as well as production from well-recognized commercial areas which specialize in producing supplies for shipment to distant markets.

Beginning in 1954, for fresh market vegetables and melons, value per unit and total value are on a f.o.b. basis, except garlic, for which values are reported annually on a field run basis at packing-house door. For processed vegetables prior to 1964, value per unit and total value refer to average price received by growers at receiving point; beginning in 1964, value per unit and total value are at processing plant door.

Annual estimates of national commercial production of all vegetables are presented in table 220. The estimates for fresh market vegetables include production for sale of principal fresh market crops in major producing States in the regular monthly reporting program, allowances for production of principal crops in minor producing States, greenhouse vegetable production, and production of all other vegetables in all States. These figures show that the regular program of releases of commercial fresh market vegetable estimates for principal crops in major producing States account for over four-fifths of the national commercial output of all fresh vegetables and melons. The total national commercial production of each of the principal vegetable and melon crops and aggregate production of minor vegetables is published by the Statistical Reporting Service, but production estimates by States, and comparable data on acreage and value, are not available.

The seasonal nature of the production of vegetables and melons for fresh market and their perishability created a need for information on supplies available during specific periods of the year to facilitate orderly marketing. Vegetable and melon estimates are classified according to the season or period within the season when the bulk of each crop is usually harvested. The forecasts and estimates of acreage and production therefore provide a measure of supplies available in specific seasonal periods. The seasonal groupings used are as follows:

Seasonal Classifications Used for Vegetable and Melon Crops

Dates refer to period of most active harvest

Classifications Most Commonly Used

Winter: January, February, March.

Spring: April, May, June.

Early Spring: April 1–May 15.

Late Spring: May 16–June 30.

Summer: July, August, September.

Early Summer: July 1–August 15.

Late Summer: August 16–September 30.

Fall: October, November, December.

Early Fall: October 1–November 15.

Late Fall: November 16–December 31.

Classifications Used for Certain Short Season Crops

Early Spring: April.

Early Summer: July.

Mid-Spring: May.

Mid-Summer: August.

Late Spring: June.

Late Summer: September.

In practice, the beginning and ending of these seasons are not fixed dates but approximations. There is necessarily some overlapping in the marketing seasons for individual crops, and weather frequently disturbs normal harvesting schedules. Consequently, the classifications employed are less precise than the dates indicate.

¹ Commercial production, including greenhouse production, of all fresh market vegetables and melons in all States. Includes the production shown in table 221 for the principal vegetable crops (28 prior to 1954, 27 from 1954 to 1968 and 22 from 1968 to date). Does not include production for home consumption in farm and nonfarm gardens. Production by States, and acreage and value data not available.

² Production in all States of the 10 principal vegetables for processing shown in table 223. Production of other vegetables processed included in fresh market series of estimates.

³ Beginning 1954, includes Hawaii.

⁴ Beginning 1960, includes Alaska. Discontinued in 1969.

⁵ Preliminary.

¹ Acreage for fresh market is acreage for harvest, including any partially harvested or not harvested because of low prices or other economic factors. Acreage for processing is acreage harvested.

² Acreage, production, and farm value of the following 27 crops (28 prior to 1954) for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeydew melons prior to 1954, honeydew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons. Lima beans, beets, kale, green peas, and shallots discontinued in 1968.

³ Acreage, production, and farm value of the following 10 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, pimientos prior to 1954, spinach, and tomatoes. Production of other vegetables processed included in fresh market series of estimates.

⁴ Production for fresh market prior to 1967 includes some quantities not marketed because of low prices or other economic factors which are excluded in computing value. Production since 1967 is the quantity sold.

⁵ Value for all fresh market vegetables, except garlic, on f.o.b. basis. For processed vegetables, beginning 1964, value at processing plant door; prior to 1964, average price received by growers at receiving point.

⁶ Beginning 1959, includes Alaska and Hawaii; Alaska discontinued in 1968.

⁷ Preliminary.

Statistical Reporting Service. Data for 1939-43 in *Agricultural Statistics, 1967*, table 224.

¹ Acreage for fresh market is acreage for harvest. Acreage for processing is acreage harvested.² Acreage of the following crops for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, snap beans, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeydew melons, lettuce, onions, green peppers, spinach, tomatoes, and watermelons.³ Preliminary.⁴ Acreage of the following 10 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, spinach, and tomatoes. Other vegetables processed included in fresh market series of estimates.

¹ Fresh market and processing asparagus is frequently harvested from the same acreage; therefore it is not practical to make individual acreage estimates for these segments.

² Preliminary.

³ Excludes the following quantity not harvested or not marketed because of economic conditions (1,000 hundredweight): 1969—late spring, New Jersey, 44.

⁴ Mostly for processing; includes Pennsylvania, Ohio, Indiana, Minnesota, Iowa, Delaware, Virginia, and Arkansas.

⁵ Fresh market includes Pennsylvania, Ohio, Iowa, and Delaware. Processing includes Indiana, Minnesota, Iowa, Delaware, Virginia, and Arkansas.

Statistical Reporting Service.

¹ Includes casaba and persian melons, but not honeyball and honeydew melons.

² Preliminary.

³ Excludes the following quantity not marketed because of economic conditions (1,000 hundredweight): 1971, mid-summer, California, 10.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 239

¹ Includes the following quantities not harvested or not marketed which are excluded in computing value (1,000 hundredweight): Due to economic factors—2,230 in 1944, 2,102 in 1945, 2,382 in 1946, 408 in 1947, 1,682 in 1948, 1,195 in 1949, 5,076 in 1950, 1,591 in 1951, 294 in 1952, 2,479 in 1953, 1,573 in 1954, 516 in 1955, 1,003 in 1956, 112 in 1957, 629 in 1958, 432 in 1959, 504.4 in 1960, 523.3 in 1961, 156.4 in 1962, 145.6 in 1963, 507.2 in 1964, 305 in 1965, and 258 in 1966 [beginning 1967, excludes the following quantities not marketed (1,000 hundredweight): 542 in 1967, 144 in 1968, 135 in 1969, 180 in 1970, and 10 in 1971]; loss due to shrinkage and waste in the New York storage crop—142 in 1959, 338 in 1960, 133 in 1961, 165 in 1962, 228 in 1963, 164 in 1964, 270 in 1965, 148 in 1966, 200 in 1967, 191 in 1968, 202 in 1969, 352 in 1970, and 230 in 1971].

² New York storage crop; excluded in computing value for total crop and fresh market. Not available prior to 1959.

³ Beginning 1954, fresh market value on f.o.b. basis. Beginning 1964, processing value at processing plant door; prior to 1964, average price received by growers at receiving point.

⁴ Grower and dealer stocks, New York only.

⁵ Jan. 1 of succeeding year.

⁶ Beginning 1959, includes Alaska and Hawaii; Alaska discontinued in 1968.

⁷ Preliminary.

Statistical Reporting Service. Data for 1939–43 in *Agricultural Statistics*, 1967, table 241.

¹ Includes some quantities not marketed which are excluded in computing value (1,000 hundredweight): 3 in 1945, 61 in 1946, 96 in 1947, 30 in 1948, 115 in 1949, 165 in 1950, 260 in 1951, 31 in 1953, 247 in 1954, 146 in 1955, 30 in 1956, 98 in 1957, 308 in 1958, 156 in 1959, 141 in 1960, 80 in 1961, 81 in 1962, 106 in 1963, 101 in 1964, and 3 for fresh market and 13,630 tons for processing in 1965. For fresh market, excludes 96,000 cwt. not marketed in 1968.

² Beginning 1954, fresh market price and value on f.o.b. basis.

³ Beginning 1964, at processing plant door; prior to 1964, average price received by growers at receiving point.

⁴ Stocks in hands of original salters of both salt and dill pickles, sold and unsold, in tanks and barrels, on Oct. 1. Beginning 1962, includes stocks of fresh-pack pickles.

⁵ Beginning 1959, includes Hawaii.

⁶ Preliminary.

¹ Includes the following quantities not marketed which are excluded in computing value (1,000 hundredweight): 12 in 1944, 27 in 1945, 22 in 1946, 4 in 1947, 26 in 1948, 5 in 1955, 5 in 1958, and 2 in 1965.

² Beginning 1954, fresh market price and value on f.o.b. basis.

³ Beginning 1964, at processing plant door; prior to 1964, average price received by growers at receiving plant.

⁴ In the shell.

⁵ Shelled basis; 2½ pounds of peas in the shell produce approximately 1 pound of shelled peas.

⁶ Beginning 1968, processing yield on tonnage basis.

⁷ Preliminary.

Statistical Reporting Service. Data for 1939-43 in *Agricultural Statistics*, 1967, table 267.

¹ Excludes 78,000 cwt. not marketed in 1967. Prior to 1967, included the following quantities unharvested and/or not marketed and which were excluded in computing price and value (1,000 hundredweight): 40 in 1931, 1,305 in 1932, 43 in 1937, 744 in 1939, 264 in 1943, 741 in 1950, 656 in 1951, 3,068 in 1953, 1,147 in 1955, 534 in 1957, 934 in 1958, 248 in 1959, 48 in 1961, 333 in 1963, and 925 in 1966.

² Obtained by weighting States prices by quantity sold.

³ Prices are of eastern potatoes weighted by unloads, seasons September-May. Beginning 1951, price data are for Maine and Long Island potatoes only.

⁴ Preliminary.

Statistical Reporting Service and Economic Research Service. Italian figures are Census of Agriculture returns from the Bureau of the Census. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1924-28 in *Agricultural Statistics*, 1962, table 352.

¹ Includes the full quantities—181 in 1945, 69 in 1946, 42 in 1948, 105 in 1949, 50 in 1951, 102 in 1954, 110 in 1955, 100 in 1956, 541 in 1958, 1 in 1962, 1 in 1963, 1 in 1964, 56 in 1965, and 406 in 1966 (beginning 1967, excludes the following quantities not marketed: 52 in 1967 and 100 in 1970); delivered because of economic conditions; average value derived.

² Beginning 1954, fresh market price and value on f.o.b. basis.

³ Includes "otherwise prepared," if any.

⁴ Includes "otherwise prepared," if any.

⁵ Beginning January 1964, includes Hawaii.

⁶ Beginning 1959, includes Hawaii.

^a Beginning 1964, at processing plant door; prior to 1964, average price received by growers at receiving point.

^b Includes "otherwise prepared," if any.

^c Beginning January 1964, includes Hawaii.

^d Beginning 1959, includes Hawaii.

^e Statistical Reporting Service and Economic Research Service, Foreign trade data from reports of the U.S. Department of Commerce. Data for 1939-43 in *Agricultural Statistics*, 1967, table 286.

¹ Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales.

² Beginning 1963, reports of rail shipments for beets, turnips, and rutabagas discontinued.

³ Includes casaba, honeydew, persian, and mixed melons. Cars of mixed melons may include cantaloups as well as other muskmelons.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Data for 1944–48 in *Agricultural Statistics, 1967*, table 290.

FOOTNOTES FOR TABLE 289

¹ Fresh vegetable consumption computed from total commercial production for fresh market, including greenhouse production. Does not include production for home use. Civilian consumption obtained by dividing the total apparent civilian consumption by total civilian population as reported by the Census Bureau. All data for calendar year, except dry field peas which are on a crop-year basis.

² Less than 0.05 pound.

³ Beginning 1968, included in minor vegetables.

⁴ Preliminary.

⁵ Close trim basis since 1954; slight trim basis in prior years.

⁶ Includes 0.1 pound of shallots each year through 1958; 1959 through 1967, less than 0.05 pound. Beginning 1968, included in minor vegetables.

⁷ Includes table stock and processed.

Economic Research Service. Data for 1924–28 in *Agricultural Statistics, 1967*, table 291.

Table 289.—Vegetables (fresh), melons, potatoes, sweetpotatoes, dry edible beans, and dried field peas: Per capita civilian consumption (farm-weight basis) United States, 1929-71¹

¹ Total crop for processing converted to a canned basis by applying factors (cases of 24 No. 303 cans per ton, farm weight): Cucumbers for pickles, 83 cases for 1954, 112 cases for 1964, and interim years interpolated; cabbage for kraut, 65.9 cases for 1954, 54.0 cases for 1964, and interim years interpolated; pimientos, 35.4 cases, 1949–55, and as reported by National Canners Association, 1956 to date.

² Equivalent cases of 24 No. 303 cans.

³ Preliminary.

⁴ Includes combination vegetable juices containing at least 70 percent tomato juice.

Economic Research Service. Compiled mainly from reports of the National Canners Association. Data for 1944–48 in *Agricultural Statistics*, 1967, table 292.

¹ Excludes soups and baby food. In years 1929-42, calendar-year data are derived from pack-year data by combining proportional parts of each pack year involved. Civilian consumption only, beginning 1941.

² Minor vegetables and, in earlier years, items not shown separately, are included in "Other."

³ Other concentrated products.

⁴ Preliminary.

⁵ Based on information available for 1944-46, tomato juice comprises approximately 85 percent of the total, combination vegetable juices 13 percent, and other vegetable juices 2 percent. Combination vegetable juice contains approximately 70 percent or more tomato juice.

⁶ Computed as a residual; includes miscellaneous greens, pimientos, potatoes, mixed vegetables, and all items for which no separate data are available.

Economic Research Service. Data for 1919-28 in *Agricultural Statistics*, 1967, table 293.

FOOTNOTES FOR TABLE 292

¹ Included in "Miscellaneous vegetables" prior to 1964.

² Beginning 1965, reported by components which represent first freezing.

Economic Research Service. Data from American Frozen Food Institute.

¹ Data for asparagus, lima beans, sweet corn, and sauerkraut are either estimates or interpolations.² Actual cases.³ Canners' stocks of sauerkraut converted to cases by using a factor of 14 cases of 24/2's per barrel (of 45 gallons).⁴ Not available.

Agricultural Marketing Service. Compiled mainly from reports of the National Canners Association, the Canners League of California, the National Kraut Packers Association, and the U.S. Department of Commerce.

CHAPTER V

STATISTICS OF FRUITS, TREE NUTS, AND HORTICULTURAL SPECIALTIES

Fruit production was defined, beginning with the 1969 crop, as the quantity sold or utilized. Production under this definition is comparable with the "production having value" series carried in earlier editions of Agricultural Statistics. Additional quantities of fruit left unharvested or culled from harvested fruit because of economic conditions are shown in the tables or footnotes. Losses from natural causes, such as windstorms, freezes, etc., are not included in production. Production relates to the crop produced on all farms, except for apples and strawberries. In accordance with Congressional enactment, the Department's estimates of apple production since 1938 have related only to the crop in commercial areas. The estimates for strawberries cover production on acreage grown primarily for sale.

The annual estimates are checked and adjusted at the end of each marketing season on the basis of shipment and processing records from transportation agencies, processors, cooperative marketing associations, and other industry organizations. The estimates are reviewed (and revised if necessary) at 5-year intervals, when the Census of Agriculture data become available. The Department's available statistics are limited to the major tree fruits and nuts and to grapes, cranberries, and strawberries, and exclude some States where census data indicate production is of only minor importance.

¹ In orchards of 100 or more bearing-age trees from 1959 to date. Prior to 1959, estimates refer to the total production of apples in the commercial apple areas of each State.

² Quantities not harvested for economic reasons and excess cullage of harvested fruit.

³ Production is the quantity sold or utilized.

⁴ Fresh fruit prices are equivalent returns at packinghouse door for Washington, Oregon, and California; for other States, returns at point of first sale. Beginning 1963, processing prices are equivalent returns at processing plant door. U.S. prices obtained by weighting State prices by quantity sold.

⁵ Dried and canned are converted to terms of fresh apples on following basis: 1 pound dried is equivalent to 8 pounds fresh; 1 pound of canned is equivalent to about 2 pounds fresh; 48 pounds fresh equal 1 bushel. No re-exports reported.

⁶ Census of Agriculture returns of total harvested production of all areas in the United States.

⁷ July–December average. No longer reported separately.

⁸ Preliminary.

Statistical Reporting Service and Economic Research Service. Data for 1934–43 in *Agricultural Statistics*, 1967, table 302. Italic figures are Census of Agriculture returns from the Bureau of the Census of harvested production. Foreign trade data from reports of the U.S. Department of Commerce.

FOOTNOTES FOR TABLE 302

¹ Years shown refer to years of harvest in Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1970 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1970 and ended early in 1971.

² Preliminary.

³ Basic production data reported in units other than bushels converted to 42-pound equivalents.

⁴ Commercial crop.

⁵ May include some cider apples.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Production, price, and value for California, Washington, and Utah. The 1964 Census of Agriculture showed these 3 States as having 98.0 percent of the 1964 production.

² Quantities not harvested for economic reasons and excess cullage of harvested fruit.

³ Production is the quantity sold or utilized.

⁴ Obtained by weighting State prices by quantity sold. Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

⁵ Net processed weight.

⁶ Preliminary.

Statistical Reporting Service and Economic Research Service. Exports from reports of the U.S. Department of Commerce. Data for 1929–43 in *Agricultural Statistics, 1967*, table 310.

Table 309.—Apricots: Production and season average price per ton, by States, 1969–71

¹ Production, price, and value for California and Florida only. ² Production is the quantity sold or utilized. Additional quantities of fruit not harvested and excess cullage of harvested fruit are also as follows (tons): 500 in 1954, 875 in 1955, 1,125 in 1956, 545 in 1957, 400 in 1958, 1,950 in 1959, and 660 in 1964. ³ Equivalent returns per ton for bulk fruit at the first delivery point. Beginning 1963, quantities processed are priced at the equivalent processing plant door level. ⁴ Obtained by weighting State prices by quantity sold. ⁵ Preliminary.

Statistical Reporting Service and Economic Research Service. Import data from reports of the U.S. Department of Commerce. Data for 1929-43 in *Agricultural Statistics*, 1967, table 316.

1970–71 ¹¹		5,000	2.47	12,350	2,768		

¹ Season begins with the bloom of the first year shown and ends with the completion of harvest the following year. In California, picking usually extends from about Oct. 1 to Dec. 31 of the following year (15 months). In other States the season begins about Oct. 1 and ends in early summer, except for Florida limes, harvest of which usually starts about Apr. 1.

² Not harvested for economic reasons and excess cullage of harvested fruit.

³ Production is the quantity sold or utilized.

⁴ Equivalent returns per box at the intake packinghouse door for all methods of sale. When sale represents fruit sold at point other than intake packinghouse door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold. Obtained by weighting State prices by quantity sold.

⁵ Includes quantities used for juice, concentrates, grapefruit segments, and other citrus products. In some seasons, includes appreciable quantities of oranges and lemons in California delivered to processing plants which were not utilized, but for which growers received payment.

⁶ Year beginning November for oranges and lemons; year beginning September for grapefruit; year beginning July for limes.

⁷ Exports reported in pounds which are converted to boxes on the following basis: Oranges, 84 pounds per box; grapefruit, 76 pounds per box; lemons, 79 pounds per box. Beginning 1964–65, oranges and tangerines reported separately; also, lemons and limes.

⁸ Imports converted to boxes on the following basis: Oranges, 90 pounds per box; grapefruit, 80 pounds per box; lemons, 78 pounds per box; limes, 80 pounds per box.

⁹ Includes small quantities of tangerines in Louisiana, Texas, Arizona (prior to 1964), and California (prior to 1961); excludes Florida temples (except for foreign trade) from crop year 1953–54 to date; in earlier years temples are included with oranges.

¹⁰ Less than 500 boxes.

¹¹ Preliminary.

¹² Florida only, prior to 1961. Includes California beginning in 1961, and Arizona in 1964.

¹³ Estimates not made prior to 1955–56 crop.

Statistical Reporting Service and Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1929–43 in *Agricultural Statistics, 1967*, table 322.

FOOTNOTES FOR TABLE 321—Continued

⁴ Navel and miscellaneous varieties in California and Arizona. Early and midseason varieties in Florida and Texas. All varieties in Louisiana. Includes small quantities of tangerines in Texas and Louisiana.

⁵ Net content of box varies. Approximate averages are as follows: Oranges—California and Arizona, 75 pounds; Florida and other States, 90 pounds; grapefruit—California Desert Valleys and Arizona, 64 pounds; other California areas, 67 pounds; Florida, 85 pounds; Texas, 80 pounds; lemons—76 pounds; limes—80 pounds; tangelos—90 pounds; tangerines—California and Arizona, 75 pounds; Florida, 95 pounds; and temples—90 pounds.

⁶ The marketing season for California lemons was changed from (Nov. 1–Oct. 31) to (Aug. 1–July 31). Data for the 1968–69 crop are on the old basis. Data for 1969–70 and 1970–71 crops are presented on both the new and old basis.

¹ Season begins with the bloom of the first year shown and ends with completion of harvest the following year. For oranges, harvest in California usually starts in early November of the year shown and continues into November of the following year. In other States, harvest of oranges begins about Oct. 1 and ends in early summer. Grapefruit harvest for the California Desert Valleys and for all other States begins in the fall and ends by early summer. Harvest of other California grapefruit extends from early summer of the year after bloom through September. California lemons are harvested from November through the following calendar year. Florida limes are picked mostly from April through December. Florida tangelos are harvested largely from October through April. Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. Additional quantities of fruit not harvested and excess cullage of harvested fruit are as follows (1,000 boxes): 1968-69—tangerines, Florida, 900.

² Preliminary.

³ Equivalent returns per box at the intake packinghouse door for all methods of sale. When sale represents fruit sold at point other than packinghouse door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold.

Footnotes continued on page 266.

¹ Estimates relate to Massachusetts, New Jersey, Wisconsin, Washington, and Oregon.² Includes the following quantities unharvested on account of economic conditions and/or excess cullage of harvested fruit (1,000 barrels): 26 in 1949, 62.1 in 1950, 18 in 1956, 4 in 1960, and 1 in 1961. In 1959, includes 18,900 barrels unharvested, confiscated, and dumped which did not qualify for payment under the Cranberry Payment Program, AMM, 181a. Includes cranberries dumped, used for charity, used for experimental purposes, or set aside under provisions of the Cranberry Marketing Order as follows (1,000 barrels): 143 in 1962, 44 in 1963, 18 in 1964, 14 in 1965, 21 in 1966, 192 in 1970, and 625 in 1971.³ Obtained by weighting State prices by quantity sold. Equivalent returns for fruit at the first receiving station. For 1959, includes returns to growers for cranberries dumped which qualified for payment under the Cranberry Payment Program, AMM, 181a.⁴ Mainly for canning.⁵ Barrels of 100 pounds.⁶ Preliminary.Statistical Reporting Service. ^a Production, price, and value for California and Texas, discontinued in 1962.
^b Equivalent return per ton for half fruit, at the first delivery point. Beginning 1963, quantities processed are priced at the equivalent processing plant, door level.
^c Obtained by dividing utilization group to fresh basis at ratio of 3 pounds fresh to 1 pound dried.
^d Prior to 1941, includes annual quantity in brine; 1941-62, includes quantities in brine and fresh; 1962 to date, dried only.

^e Includes shipments under the Army Civilian Supply Program, beginning 1947.
^f Preliminary.

Statistical Reporting Service and Economic Research Service, "Foreign trade data from reports of the U.S. Department of Commerce," Data for 1934-43 in *Agricultural Statistics, 1967*, Table 335.

¹ Preliminary.² Quantities processed are priced at the equivalent processing plant door level.³ Dried basis. 1 ton of raisins is equivalent to 4.60 tons of fresh grapes for 1971; 4.25 tons for 1970; and 4.01 tons for 1969.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 333

¹ Production is the quantity sold or utilized. Additional quantities of fruit not harvested and excess cullage of harvested fruit are as follows (1,000 tons): California—61 in 1963; other States—6 in 1957, 0.2 in 1962, 25 in 1965, 0.3 in 1966, and 6.8 in 1967.

² Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

³ Equivalent returns per ton for bulk fruit at the first delivery point.

⁴ Obtained by weighting State prices by quantity sold.

⁵ Converted on the basis of country data, using the following weight per cubic foot: Argentina and Chile, 36 pounds; Belgium and Netherlands, 10 pounds; Canada, Italy, and Mexico, 40 pounds; Spain, 24 pounds; Republic of South Africa, 16 pounds; and all other, 20 pounds.

⁶ Included in total production of grapes, fresh basis; 1 ton of raisins equivalent to about 4 tons of fresh grapes.

⁷ Exports and imports of raisins converted to sweatbox, or production basis at the ratio of 1 to 1.08.

⁸ Includes 12,000 tons (fresh weight) of raisin varieties lost on the drying trays because of rain damage.

⁹ Less than $\frac{1}{2}$ ton.

¹⁰ Preliminary.

Statistical Reporting Service and Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1934-43 in *Agricultural Statistics*, 1967, table 336.

¹ Production, price, value, and utilization for California only.

² Production is the quantity sold or utilized. In 1958, 2,000 additional tons were not harvested for economic reasons.

³ Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

⁴ Includes Spanish, Greek, and Sicilian styles, and chopped, minced, brined, and other cures.

⁵ Preliminary.

Statistical Reporting Service and Economic Research Service. Imports compiled from the reports of the U.S. Department of Commerce. About 40 gallons of oil are obtained from 1 ton of olives in California. Data for 1929–43 in *Agricultural Statistics, 1967*, table 343.

FOOTNOTE FOR TABLE 338

¹ Production is the quantity sold or utilized.

² Fresh fruit prices are equivalent returns at first delivery point. Processing fruit prices are at first delivery point prior to 1963; beginning 1963, they are equivalent returns at processing plant door.

³ Excludes 3,000 tons of excess cullage for 1958, and 2,200 tons not harvested for 1965.

⁴ Some quantities canned or otherwise processed are included with fresh to avoid disclosure of individual operations.

⁵ Estimates discontinued.

⁶ Includes home use.

⁷ Preliminary.

Statistical Reporting Service. Data for 1944–48 in *Agricultural Statistics, 1967*, table 342.

1971 ⁸	31.3	2,888.9	6.29	173,993	-----	-----	-----	-----	-----	-----	

¹ Quantities not harvested for economic reasons and excess cullage of harvested fruit.

² Production is the quantity sold or utilized except for California Clingstone which includes the following quantities of cannery diversions and culls (million pounds): 104.0 in 1959, 98.0 in 1960, 141.0 in 1961, 160.8 in 1962, 162.4 in 1963, 152.4 in 1964, 178.0 in 1965, 169.6 in 1966, 157.6 in 1967, 172.6 in 1968, 228.0 in 1969, 196.0 in 1970, and 122.0 in 1971.

³ Obtained by weighting State prices by quantity sold. Beginning 1963, quantities processed are priced at the equivalent processing plant door level.

⁴ Net processed weight.

⁵ Canned peaches are 40 percent of total canned fruit for salad.

⁶ Dried peaches are 21 percent of total dried fruit for salad.

⁷ Beginning June 1965, exports of dried fruit converted to unprocessed dry weight by dividing by 1.08 (1.07 prior to June 1965). Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 6.0 pounds fresh (6.5 prior to June 1965). Canned peaches converted to terms of fresh on basis that 1 pound canned equals about 1 pound fresh.

⁸ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are Census of Agriculture returns from the Bureau of the Census of harvested production. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1929-43 in *Agricultural Statistics*, 1967, table 344.

¹ Quantities not harvested for economic reasons and excess cullage of harvested fruit.² Production is the quantity sold or utilized.³ Obtained by weighting State prices by quantity sold.⁴ Net processed weight.⁵ Dried pears are 16½ percent of total dried fruit for salad.⁶ Canned pears are 33 percent of total canned fruit for salad.⁷ Beginning June 1965, canned pears converted to terms of fresh on the basis that 1 pound canned equals about 1.0 pound fresh (1.2 prior to June 1965); dried pears converted to terms of fresh on the basis that 1 pound dried equals about 6.5 pounds fresh (5.5 prior to June 1965); 50 pounds fresh equals 1 bushel, except in California, where 48 pounds equals 1 bushel.^a Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are Census of Agriculture returns from the Bureau of the Census of harvested production. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1929-43 in *Agricultural Statistics, 1967*, table 350.

¹ Years shown refer to years of harvest in Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere in 1970 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1970 and ended early in 1971.

² Preliminary. ³ Basic production data reported in units other than bushels converted to 45-pound equivalents. ⁴ Commercial crop. ⁵ May include some cider pears.

¹ Includes some quantities not marketed which are excluded in computing value (1,000 hundredweight): 3 in 1944, 4 in 1945, 18 in 1947, 14 in 1948, 10 in 1949, 29 in 1951, 42 in 1954, 65 in 1957, 7 in 1958, 5 in 1959, 77 in 1964, 30 in 1965, and 4 in 1966.

Excludes the following quantities not marketed: 44 in 1967, 70 in 1969, and 100 in 1970.

² Fresh market on f.o.b. basis, beginning 1954. Beginning 1964, processing value at processing plant door; prior to 1964, average price received by growers at receiving point.

³ Mostly for fresh market, but includes some quantities used for processing in States for which processing estimates are not prepared.

⁴ Preliminary.

Statistical Reporting Service. Data for 1939-43 in *Agricultural Statistics*, 1967, table 368.

FOOTNOTES FOR TABLE 360

¹ Net processed weight.

² Dried prunes in salad estimated at 43 percent of total dried fruit for salad.

³ Beginning 1965, exports and imports of dried prunes converted to unprocessed dry weight by dividing by 1.04 (1.025 prior to 1965). Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 2.7 pounds fresh (2½ pounds prior to 1965). Canned prunes converted to terms of fresh fruit on the basis that 1 pound canned equals 0.729 pound fresh. "Otherwise prepared or preserved" converted to terms of fresh fruit on the basis of 1 pound equals 0.899 pound fresh.

⁴ Less than ½ ton.

⁵ No longer reported separately.

⁶ Preliminary.

Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1929-43 in *Agricultural Statistics*, 1967, table 367.

¹ Data for all commodities are on a calendar-year basis, except apples and pears which begin in June of year indicated and end the following year. Shipments by truck are not included but represent a large proportion of total movement, especially for some commodities. The data are not indicative of total production or total sales. ² Includes satsumas and tangerines.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Data for 1944-48 in *Agricultural Statistics*, 1967, table 372.

FOOTNOTES FOR TABLE 368

¹ Excluding citrus concentrates. ² Hawaii and foreign operations. ³ Equivalent cases of 24 No. 2 cans. ⁴ Thousand actual cases basis. ⁵ Not available.

Economic Research Service. Based on data obtained from various canners' associations and individual canners. Data for 1944-48 in *Agricultural Statistics*, 1967, table 374.

¹ Fresh citrus fruits are on a crop-year basis. Dried fruits are on a pack-year basis. The per capita civilian consumption was obtained by dividing the total apparent civilian consumption by total population adjusted for members of the Armed Forces not eating out of civilian supplies.

² Excludes noncommercial apples.

³ Apricots, avocados, bananas, cherries, cranberries, figs, grapes, nectarines, peaches, pears, pineapples, papayas beginning 1960, plums and prunes, and strawberries.

⁴ Apples, applesauce, apricots, berries, cherries (including brined), cranberries, figs, fruit cocktail and salad, citrus sections, olives (including brined), pineapple, plums, prunes, peaches (including spiced), and pears.

⁵ Grapefruit, orange, blended citrus, lemon and lime, tangerine and blends, pineapple, apple, grape, and prune juices, and fruit nectars. Including canned concentrated citrus juices converted to single-strength basis, but excludes all frozen juices.

⁶ Dried apples, apricots, dates, figs, peaches, pears, prunes, and raisins. Excludes unmerchantable figs, substandard prunes, and prunes used for juice and concentrate. Data are in terms of processed dried weight.

⁷ Principally cherries, apples, peaches, apricots, strawberries, other berries, and citrus juices.

⁸ Beginning 1955, includes chilled citrus juices.

⁹ Beginning 1956, includes chilled sections and salad.

Economic Research Service. Data for 1909-28 in *Agricultural Statistics*, 1967, table 381.

¹ Includes almonds, filberts, pecans, walnuts, Brazil nuts, pignolias, pistachios, chestnuts, cashews, and miscellaneous tree nuts. Beginning 1960, includes macadamias.

² Almonds, filberts, walnuts, pecans, and macadamias; no reports on other nuts. Excludes quantities unharvested and culls not used or used for oil.

³ Foreign trade data on a fiscal-year basis, beginning July 1 of year indicated.

⁴ Preliminary.

Economic Research Service. Data for 1944–48 in *Agricultural Statistics*, 1967, table 382.

¹ Production, price, and value for California and Oregon only.

² Production is the quantity sold or utilized.

³ Obtained by weighting State prices by quantity sold.

⁴ Shelled nuts converted to in-the-shell basis at ratio of 1 to 2.38.

⁵ Preliminary.

⁶ Not available.

⁷ The 1970 season average price was used in evaluating production.

CHAPTER VI

STATISTICS OF HAY, SEEDS, AND MINOR FIELD CROPS

Chapter VI deals with hay, pasture, seeds, and various minor field crops. Table 414 shows the seeding rate for a number of specified crops. The State averages are based on surveys made in 1970. The United States average rates are derived by weighting the average for each State by the acreage planted to the particular crop. Rates are not shown for States where the crop is not estimated currently.

West Virginia	80	84	78	78	87	90							
North Carolina	83	90	90	84	91	93							

¹ Reported in terms of percentage of normal.

² For range States, relates largely to farm pasture—that is, condition of ranges is not included.

Statistical Reporting Service.

¹ Obtained by weighting State prices by quantity sold from 1944 to date; prior to 1944, weighted by production.

² Includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.

³ Preliminary.

¹ Includes, besides the ordinary edible beans, blackeyes and garbanzos in California. Excludes soybeans, mung beans, and beans grown for garden seed.

² Cleaned basis.

³ Obtained by weighting State prices by quantity sold. Includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.

⁴ Compiled from the New York Journal of Commerce.

⁵ Census yield and production on partially uncleansed basis.

⁶ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are Census of Agriculture returns from the Bureau of the Census; census figures include all States; other figures, principal producing States only. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1924-58 in *Agricultural Statistics, 1962*, table 420, include beans grown for garden seed and are not strictly comparable.

¹ Data are for the States in which dry edible and seed peas are grown commercially in material quantities and do not include cowpeas, nor Austrian winter peas.

² Uncleaned basis prior to 1941.

³ State prices weighted by quantity sold from 1944 to date; prior to 1944, weighted by production. Prior to 1940, prices are as of Dec. 1.

⁴ Includes allowance for unredeemed loans and purchases by the Government valued at the average loan and purchase rate, by States.

⁵ Preliminary.

¹ Includes peas grown for seed and cannery peas harvested dry.² Converted to cleaned basis, not including culms. Discontinued after 1960.³ Includes minor quantities lost and fed to livestock.⁴ Preliminary.

Statistical Reporting Service. Disposition of a given year's production regardless of time of actual disposition. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes. Data for 1941–48 in *Agricultural Statistics, 1967*, table 432.

¹ Includes the following quantities not marketed because of economic conditions, fire losses, and/or provisions under terms of a marketing agreement (1,000 pounds): 5,436 in 1935; 4,365 in 1937; 3,140 in 1938; 2,813 in 1939; 11,737 in 1949; 8,273 in 1950; 16,619 in 1951; 20,883 in 1952; 1,518 in 1959; 324 in 1960; 159 in 1962; 86 in 1963; 297 in 1964; 409 in 1966; 1,780 in 1967; 158 in 1968; 1 in 1969; and 80 in 1971. Data for 1966-69 include quantities sold from reserves through Apr. 30, 1971.

² Prior to 1932, prices are as of Dec. 1. Prices obtained by weighting State prices by quantity sold from 1944 to date; prior to 1944, weighted by production.

³ Prior to 1937, the Sept. 1 stocks included only those in growers' hands; from 1937 to date, stocks in dealers' hands and in brewers' hands are also included, and these have greatly exceeded the growers' stocks. Stocks for 1950-52 do not include hops held by growers which are not available for sale under the Marketing Agreement.

⁴ General imports, 1929-32. Includes hop extract and lupulin, 1930-35.

⁵ Year beginning July, 1929-32. 1929-31, represents hops used to make cereal beverages containing less than 0.5 percent of alcohol by volume; 1932, includes 867,057 pounds of hops used to make cereal beverages containing less than 0.5 percent of alcohol by volume and 6,900,263 pounds fermented malt liquor containing not more than 3.2 percent of alcohol by weight; 1933 to date, used for fermented malt liquor. Records of the Internal Revenue Service, 1933 to date; annual reports of the Commission of Prohibition, 1929, and Commissioner of Industrial Alcohol, 1930-32.

⁶ Includes 262,000 pounds paid for but not harvested.

⁷ Preliminary.

Statistical Reporting Service and Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1924-28 in *Agricultural Statistics, 1962*, table 445.

CHAPTER VII

STATISTICS OF CATTLE, HOGS, AND SHEEP

This chapter contains information about most kinds of farm livestock and livestock products, with the exception of dairy and poultry. The information relates to inventories, production, disposition, prices, and income for farm animals, and to livestock slaughter (including horse slaughter), meat production, and market statistics for meat animals.

The term "on farms" as used in this chapter includes ranches. Estimated numbers do not include livestock not on farms.

The census enumerations in 1954 and 1959 were taken during October and November, and, in 1964, during November and December. Marketings and slaughter of livestock as well as young stock born during the period between the census enumeration and January 1 can result in differences in the number on farms. For example, hog marketings and slaughter are seasonally large during the last 2 or 3 months of the year. As a result, the number on farms January 1 is substantially different from the census enumeration during earlier months.

Beginning in January 1, 1969, the date of the inventory estimate for all hogs and pigs was changed from January 1 to December 1 of the preceding year. Data are shown for both dates for one year—January 1, 1968 and December 1, 1967. Cattle inventory class estimates were changed from a sex and age basis to a sex and weight basis, beginning with January 1, 1970 estimates. Inventory class estimates are shown in both bases for the United States for the years 1965 through 1971.

¹ Animals being fattened for slaughter market on grain or other concentrates and expected to produce a carcass that will grade Good or better. For the years 1945 through 1959, data include 26 feeding States. In 1960 and 1961, data are for 37 States, the 26 for earlier years, plus 11 Southeastern States which had 362,000 head for each year. For 1962–71, data shown are for 39 States including the 37 above, plus Maryland and New York. These 13 additional States accounted for the following number on Jan. 1 in the designated years (1,000 head): 454 in 1962, 450 in 1963, 448 in 1964, 467 in 1965, 446 in 1966, 437 in 1967, 439 in 1968, 433 in 1969, 411 in 1970, and 411 in 1971. For 1972, 48 States and Hawaii.

¹ Weighted average price, sold out of first hands.

Agricultural Marketing Service.

FOOTNOTES FOR TABLE 451

¹ Not strictly a calving rate. Figure represents calves born expressed as a percentage of the Jan. 1 inventory of cows and heifers and not the number of all cows and heifers giving birth to calves during the year. January 1 inventory classification changed in 1970 from cows and heifers 2 years old and over to cows and heifers that have calved.

¹ Beginning 1961, includes Alaska and Hawaii.

² Calves born during the year.

³ Excludes interfarm sales.

⁴ Includes cattle shipped in from other States and from central markets, but excludes cattle for immediate slaughter.

⁵ Beginning 1966, farm slaughter excludes animals custom slaughtered for farmers at commercial establishments.

⁶ Cattle and calves combined, beginning 1967.

⁷ Preliminary.

⁸ Adjustments were made for cattle shipped in and changes in inventory.

⁹ Receipts from marketings and sale of farm-slaughtered meat.

¹⁰ "Cash receipts from sales of cattle, calves, beef, and veal" plus "Value of cattle and calves slaughtered for home consumption."

¹¹ Discontinued.

¹ Excludes interfarm sales, but includes animals custom slaughtered for use on farms where produced.
² Does not include animals custom slaughtered for farmers at commercial establishments.
³ Adjustments were made for cattle shipped in and changes in inventory.

⁴ Includes receipts from marketings and from sales of farm-slaughtered meat.

Statistical Reporting Service.

⁵ Cash receipts from sales of cattle, calves, beef, and veal plus value of cattle and calves slaughtered for home consumption.

¹ Total rail and truck receipts unloaded at public stockyards. Beginning January 1962, truck receipts discontinued.² Rounded totals of the complete figures.³ The number of stockyards varies from 39 to 68.⁴ Market closed Aug. 1, 1971.Agricultural Marketing Service. Compiled from reports received from stockyard companies. Data for 1950-54 in *Agricultural Statistics, 1967*, table 465.

FOOTNOTES FOR TABLE 461

¹ Excludes slaughter in Alaska, Hawaii, and the Virgin Islands. In recent years, the carcass weight of cattle has averaged about 59 percent of the live weight, and for calves 56 percent of the live weight.Statistical Reporting Service. Data for 1945-49 in *Agricultural Statistics, 1967*, table 467.

¹ Preliminary.² May not add due to rounding.

Foreign Agricultural Service. Compiled from reports of the U.S. Department of Commerce.

FOOTNOTES FOR TABLE 483

¹ Factory and warehouse stocks as reported by the Bureau of the Census. In 1951, includes stocks held or in transit by U.S. Department of Agriculture.

² Includes imports, which were less than 500,000 pounds in all years, except 1952 when 7 million pounds were imported.

³ Includes civilian relief and shipments by CARE.

⁴ Preliminary.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce and the U.S. Department of Agriculture. Totals and per capita estimates computed from unrounded numbers. Data for 1930-49 in *Agricultural Statistics*, 1967, table 488.

¹ Excludes slaughter in Alaska, Hawaii, and the Virgin Islands.Statistical Reporting Service. Data for 1945–49 in *Agricultural Statistics, 1967*, table 504.

FOOTNOTES FOR TABLE 493

¹ Excludes interfarm sales, but includes animals custom slaughtered for use on farms where produced.² Does not include animals custom slaughtered for farmers at commercial establishments.³ Adjustments made for shipments and changes in inventory.⁴ Includes receipts from marketings and from sales of farm-slaughtered meat.⁵ Cash receipts from sales of sheep, lambs, mutton, and lamb plus value of sheep and lambs slaughtered for home consumption.⁶ Decrease in inventory and large death loss of sheep and lambs resulted in a deficit in number of pounds produced.

Statistical Reporting Service.

¹ Includes fed sheep shorn.
² Preliminary.
³ For Texas and California, the weight per fleece is the amount of wool shorn per sheep and lamb during the year.

⁴ Monthly price weighted by monthly sales of wool, U.S. average prices weighted by sales were as follows: 1969, 41.8; 1970, 35.5; and 1971, 19.4.

⁵ Production multiplied by annual average price.

Statistical Reporting Service.

Carpet wool ⁷	148.9	160.4	122.7	112.3	103.6	83.9	91.4	93.8	76.6	74.8

¹ Scoured wool, plus greasy wool converted to a scoured basis, using assumed average yields. Includes both pulled and shorn, foreign and domestic wool. Wool was considered as consumed (1) on the woolen system when laid in mixes (2) on the worsted system when entering scouring bowls. Consumption on the worsted system is taken as the sum of top and noil production.

² 53 weeks.

³ Preliminary.

⁴ Domestic and duty-paid foreign.

⁵ Excludes wool consumed on the cotton system and in the manufacture of felt, hat bodies, and other miscellaneous products.

⁶ Beginning 1965, 50's up to 60's and 48's and coarser combined.

⁷ Duty-free foreign.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

FOOTNOTES FOR TABLE 502

¹ Includes Alaska and Hawaii for exports and imports of apparel and carpet wool since they were granted statehood. Beginning 1961, includes Alaska for sheep shorn, weight per fleece, production, price, and value of production.

² Includes sheep shorn at commercial feeding yards.

³ Average price relates to April-March marketing season for 1945-62, April-December for 1963, and calendar year from 1964 to date. Price computed by weighting State average prices for all wool sold during the year by sales of shorn wool.

⁴ Production by States multiplied by annual average price.

⁵ Preliminary.

⁶ Conversion factors from grease basis to clean basis are as follows: Shorn wool production—44 percent, 1945-59; 45 percent, 1960-63; and 47.7 percent, 1964 to date; pulled wool production—75 percent, 1945-63; and 72.9 percent, 1964 to date.

⁷ Actual weight through 1951.

⁸ Apparel wool includes all dutiable wool; carpet wool includes all duty-free wool.

⁹ Production minus exports plus imports; stocks not taken into consideration.

¹⁰ Beginning 1965, includes carpet wool exports.

Statistical Reporting Service and Economic Research Service. Imports and exports from Foreign Commerce and Navigation of the United States and other reports of the U.S. Department of Commerce. Data for 1940-44 in *Agricultural Statistics, 1967*, table 509.

¹ Includes shorn, pulled wool, and wool exported on skins, with the latter two converted to a greasy basis. Wool produced in the spring in the Northern Hemisphere is combined with that produced in the season beginning July 1 or Oct. 1 of the same year in the Southern Hemisphere.

² Totals may not add due to rounding.

³ Preliminary.

⁴ Does not include pulled wool.

⁵ Includes pulled wool converted to greasy basis using 1.7 conversion factor.

⁶ Includes estimates for missing data.

⁷ Includes Republic of South Africa, Lesotho, and South West Africa.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

FOOTNOTES FOR TABLE 505

¹ Wools grown in the range areas of Washington, Oregon, the intermountain States (including Arizona and New Mexico) and parts of the Dakotas, Nebraska, Kansas, and Oklahoma. These wools vary considerably in shrinkage and color.

² Open market prices.

³ Wools grown east of the Mississippi River and in the farm areas of the Dakotas, Nebraska, Kansas, Oklahoma, Minnesota, Iowa, and Missouri.

⁴ Beginning 1970, 64's, warp and ½ warp.

Economic Research Service. Data for 1945-49 in *Agricultural Statistics, 1967*, table 513.

¹ Carcass weight equivalent: Dressed weight of cattle, calves, sheep, and lambs; pork excluding lard is carcass equivalent weight of hog products minus an allowance for carcass fat rendered for lard. Edible offals are excluded. Beginning 1940, data exclude meat produced in Hawaii and Virgin Islands. Civilian consumption through 1940 is assumed to be the same as total consumption; for 1941 to date, military takings are excluded. Beginning 1960, production in Alaska and Hawaii is included.

² Includes production and consumption for Government emergency programs.

³ Preliminary.

Economic Research Service. Data for 1909-29 in *Agricultural Statistics*, 1967, table 528.

FOOTNOTES FOR TABLE 525

¹ Data through 1966 compiled from Pratt's Daily Hide and Leather Market; beginning 1967, prices are obtained from Livestock Market News.

² Not reported, beginning 1967.

Economic Research Service. Data for 1945-49 in *Agricultural Statistics*, 1967, table 530.

1971 ⁵	121	8	183	312	1,733	23	103	458	2,317

¹ Carcass weight equivalent of all meat, including the meat content of minor meats and of mixed products. Includes shipments to Puerto Rico, the Virgin Islands, and Guam, 1950-64; included Wake Island also, 1965-69. Beginning 1970, includes shipments only to Puerto Rico and Virgin Islands. ² Less than 500,000 pounds. ³ Apparent reduction from earlier years is due to change in reporting of data. ⁴ Includes beef procured by USDA and shipped abroad by CARE. ⁵ Preliminary.

Economic Research Service. Data on imports and commercial exports and shipments are computed from records of the U.S. Department of Commerce; those on exports and shipments by the U.S. Department of Agriculture are separately estimated from deliveries and stocks. Data for 1945-49 in *Agricultural Statistics*, 1967, table 529.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 534

¹ Feed consumed by all cattle divided by the number on feed Jan. 1.² Feed for all cattle, except milk cows, divided by the net live-weight production of cattle and calves. It includes the growth on dairy heifers and calves as well as all beef cattle.³ About 19 pounds of wool were produced with each 100 pounds live-weight production.⁴ Preliminary.

¹ For method of combining species and weights in construction of these index numbers, see *Agricultural Handbook No. 365, Volume II, Major Statistical Series of the U.S. Department of Agriculture, April 1970*. Weights based on 1967 sales values relative to milk cows are as follows: Milk cows, 1.00; beef cattle and calves, 0.71; hogs, 0.17; sheep and lambs, 0.07; chickens, 0.001; turkey breeder hens, 0.014. For 1965 and thereafter, milk cows and heifers that have calved are used in place of milk cows two years old and older; hogs and pigs on farms Dec. 1 of preceding year are used in place of hogs and pigs on farms Jan. 1. All chickens (excluding commercial broilers) on farms Dec. 1 of preceding year are used in place of all chickens on farms Jan. 1.

² Weights for milk cattle are as follows: Milk cows, 1.00; milk heifers 1 to 2 years old, 0.56. Beginning 1965, milk heifers weighing 500 pounds and over are used in place of milk heifers 1 to 2 years old.

³ Excludes commercial broilers.

¹ Includes skim milk, corn for forage, and seeds fed; excludes corn in silage.

² Beginning 1960, feed from pasture was recalculated on the basis of new determinations of animal feed requirements by the National Research Council, National Academy of Sciences.

³ Preliminary.

Economic Research Service. Data for 1940-44 in *Agricultural Statistics, 1967*, table 538.

CHAPTER VIII

DAIRY AND POULTRY STATISTICS

Dairy statistics in this chapter include series relating to many phases of production, movement, prices, stocks, and consumption of milk and its products. Two series of number of milk cows on farms are included in this publication. One series is an inventory number of a specific classification estimated as one of the major groups making up the total cattle population on January 1. The other series identified as "milk cows on farms" is an annual average number of milk cows during the year (excluding any not yet fresh) and is used in estimating milk production.

The January 1 inventory classification was changed from a sex and age basis to milk cows and heifers that have calved, and a sex and weight basis for milk cow replacements, beginning January 1, 1971. Classification on both bases is included for the United States for 1965 to 1970.

In comparing the several series of milk prices, it is important to note that prices received by farmers for all whole milk sold are for milk or milkfat content as actually sold, while certain prices paid by dealers for milk for fluid purposes or for specified manufacturing purposes may be quoted on a 3.5 percent butterfat basis, or for some types of manufacturing milk on the test of the milk used for that particular purpose.

Poultry and poultry products statistics include inventory numbers of chickens by classes; the production, disposition, cash receipts, and gross income from chickens and eggs; poultry and egg receipts at principal markets; commercial broiler production; turkey production, disposition, and gross income; liquid and dried egg production; and the National Poultry Improvement Plan.

The estimates of chickens and turkeys on farms in census years differ from the census figures to the extent of the seasonal disappearance in numbers from January 1 to the average date of the enumeration. Estimates relating to inventories, production, and income exclude poultry and eggs produced on places not classified as farms. Beginning in January 1, 1972, the date of the inventory estimates for chickens and turkeys was changed from January 1 to December 1 of the preceding year. The estimates for all turkeys were discontinued and estimates for breeder hens only are now available for December 1.

The series of data on individual feeds as a percentage of total concentrate ration fed to milk cows, and data on homegrown feed as a percentage of total ration fed to milk cows, are discontinued due to modification of the livestock program.

Table 538.—Cows, heifers, and heifer calves kept for milk purposes: Number on farms Jan. 1, value, and number eliminated during year, United States, 1930-70¹

¹ Reflects difference in value of the various kinds of hay fed as well as the difference in value of baled, chopped, and loose hay.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 549

¹ Beginning 1960, includes Alaska and Hawaii.

² Excludes milk sucked by calves.

³ Includes milk produced by dealers' own herds.

⁴ Sales directly to consumers by producers who sell only milk from their own herds; also includes milk produced by institutional herds.

⁵ Includes some milk used for other purposes on farms or not utilized.

⁶ Includes farm-churned butter.

¹ Annual ratios based on average of monthly ratios. ² Pounds of concentrate ration equal in value to 1 pound of whole milk sold by farmers to plants and dealers. ³ Pounds of concentrate ration equal in value to 1 pound of milkfat in cream sold by farmers. ⁴ Discontinued, beginning 1968. ⁵ Beginning 1967, cream selling areas combined with whole milk selling areas.

⁶ Preliminary.

¹ Prior to 1963, number of herds largely reflected membership rather than those actually serviced. ² Probably includes some beef to beef inseminations. ³ Includes one all-beef stud. ⁴ Includes 150,088 first services, by State only, where breakdowns were not reported. ⁵ Based only on data where bulls were reported.

Agricultural Research Service. Data for 1939-44 in *Agricultural Statistics, 1967*, table 553.

¹ Represents multiple milk ring tests each year for the commercial dairy herd.² Includes an increasing proportion of herds tested each year because of suspicious milk ring or market cattle test results.³ Percent of cattle infected based on results of tests conducted on farm and ranch, livestock markets,

slaughter plants, and negative cattle represented under the milk ring testing program.

⁴ Includes the number of market cattle lots tested and found infected.

Animal and Plant Health Inspection Service.

Used in fluid products:							
Sold by dealers	46,528	48,252	49,506	49,933	50,329	50,914	50,546
Sold by producers directly to consumers ⁷	2,672	2,448	2,294	2,167	2,071	2,086	2,054
Total fluid sales	49,200	50,700	51,800	52,100	52,400	53,000	52,600
Used on farms where produced:							
Fed to calves	3,266	3,119	2,950	2,767	2,658	2,548	2,432
Consumed as fluid milk and cream	8,114	7,694	7,003	6,393	5,776	5,273	4,835
Used for farm-churned butter	3,245	2,814	2,428	1,987	1,602	1,337	1,115
Total used on farms	14,625	13,627	12,381	11,147	10,036	9,158	8,382
Residual ¹⁰	1,067	1,131	1,170	1,289	1,324	1,193	1,172
Total utilization	122,919	124,864	124,563	123,282	121,977	123,102	125,734

¹ Preliminary.² Whole milk equivalent (milkfat basis) of net imports of dairy manufacturing ingredients such as frozen cream and butterfat-sugar mixtures.³ Whole milk equivalent of net out-of-storage movement of fluid and plastic cream during the year. A negative figure represents a net movement of cream into storage.⁴ Total evaporated and sweetened condensed.⁵ Without adjustment for imported butterfat-sugar mixtures which replaced butter and condensed milk used in ice cream.⁶ Whole milk equivalent of dry cream, malted milk powder, part-skim dry milk, dry or concentrated ice cream mix, dehydrated

FOOTNOTES FOR TABLE 552

¹ Excludes milk sucked by calves.² Includes milk produced by dealers' own herds, except for New York and California, where such milk is included as sold directly to consumers.³ Sales directly to consumers by producers who sell only milk from their own herds; also includes milk produced by institutional herds.

¹ Beginning 1960, includes Alaska and Hawaii. ² Preliminary. ³ For 1950, includes also farm-churned butter sold. ⁴ Cash receipts divided by milk or milkfat represented in combined marketings. ⁵ For 1950, excludes milk equivalent of farm butter sold. ⁶ Valued at average returns per 100 pounds of milk in combined marketings of milk and cream. ⁷ Cash receipts from marketings of milk and cream plus value of milk used for home consumption and farm-churned butter. ⁸ Includes value of milk fed to calves. For 1967, also includes value of milk used for other purposes on farms or not utilized.

¹In-area sales represent total fluid sales in each of the areas by handlers regulated under the respective orders, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas; therefore, some handlers in-area sales are partially estimated. ²Plain, flavored, and fluid equivalent of concentrated. ³Plain, fortified, and flavored skim and part skim milk, buttermilk, and cultured specialties. ⁴Sales represent the marketing area as defined after Oct. 1, 1970. ⁵Eastern Ohio

Western Pennsylvania; and Jan. 1, 1971, Central Illinois. ⁶Sales represent the area after the merger and expansion of Delaware Valley, Upper Chesapeake Bay and Washington, D.C., Aug. 1, 1970; and Tri-State, Cincinnati, Columbus, Miami Valley, and Northwestern Ohio, Aug. 1, 1970.

Agricultural Marketing Service. Compiled from reports of market administrators.

¹ Grade and kind of container may differ by market.

² New York City plus Nassau, Suffolk, and Westchester counties.

³ Not available prior to 1964.

⁴ Simple averages; averages for 23 cities prior to 1964.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 555

¹ Percentage of milk sold to plants and dealers that is eligible for fluid use (Grade A in most States). Includes fluid-grade milk used in manufactured dairy products.

² Not published to avoid disclosing individual operations for manufacturing grade milk.

³ Cash receipts divided by milk or milkfat represented in combined marketings.

⁴ Valued at average returns per 100 pounds of milk in combined marketings of milk and cream.

⁵ Cash receipts from marketings of milk and cream plus value of milk used for home consumption and farm-churned butter.

⁶ Includes value of milk fed to calves.

Statistical Reporting Service.

¹ Regional and U.S. averages based on prices for individual markets weighted by population. Prices for Federal Order Markets include prevailing premiums above minimum Class I prices, as reported by principal producers' associations. Prices in this table do not represent returns to producers. U.S. average prices received by producers for milk eligible for fluid market are shown in table 562.

² Preliminary.

Statistical Reporting Service. Data for 1945-49 in *Agricultural Statistics*, 1967, table 571.

FOOTNOTES FOR TABLE 562

¹ Simple average of monthly prices, by States, weighted by the number of milk cows on farms Jan. 1 of the current year.

² Average price at average fat test for all milk sold at wholesale to plants and dealers, based on reports from milk market administrators, cooperative milk-marketing associations, whole-milk distributors, and milk-products manufacturing plants, f.o.b. plant or receiving station (whichever is the customary place for determining prices) before hauling costs are deducted and including all premiums.

³ Milk eligible for fluid market, including surplus diverted to manufacturing.

⁴ Weighted average of monthly prices, by States, weighted by the estimated quantity of fat sold.

⁵ Preliminary.

⁶ Monthly average prices and tests weighted by estimated production in each month. Price f.o.b. factory or local receiving station (whichever is the customary place for determining prices) before hauling costs are deducted and including all premiums.

⁷ Includes milk for canned condensed milk.

Statistical Reporting Service. Data for 1945-49 in *Agricultural Statistics*, 1967, table 564.

¹ All prices are f.o.b. factory. Geographic division prices are straight averages of monthly prices. U.S. prices represent weighted average prices of milk for evaporated milk.

² Montana, Wyoming, Idaho, Washington, and Oregon, through 1970.

³ Colorado, New Mexico, Arizona, Nevada, Utah, and California, through 1970.

⁴ Preliminary.

⁵ Not shown separately to avoid disclosure of individual operations.

⁶ Pertains to entire North Central Region for 1971.

⁷ Pertains to entire Western Region for 1971.

Statistical Reporting Service. Data for 1948-49 in *Agricultural Statistics, 1967*, table 572.

¹ Includes Alaska and Hawaii.² Preliminary.³ Excludes full-skim American cheese and cottage, pot, and bakers' cheese.⁴ Cottage cheese curd includes pot and bakers' cheese. Creamed cottage cheese contains not less than 4 percent milkfat, whereas partially creamed cottage cheese contains less than 4 percent milkfat and is not legal in interstate commerce and in many States. Cottage cheese curd and creamed or partially creamed cottage cheese should not be added together to obtain a total cottage cheese figure. While a small quantity of cottage cheese curd is sold direct for consumption without further processing, a considerable part is creamed within the plant or shipped to another plant where creaming mixture is added prior to sale.⁵ Less than 3 plants reporting.⁶ Includes freezer-made milkshake in most States.

¹ Total disappearance is based on production, imports, and change in stocks during the year. Production statistics for these commodities appear in other tables in this chapter. The total apparent civilian consumption was obtained by subtracting ending stocks, shipments, exports, and military takings from the total supply. The per capita civilian consumption for each year was obtained by dividing the total apparent civilian consumption by the number of persons eating out of civilian supplies.

² Includes both farm and factory-made butter.

³ Includes all kinds of cheese except cottage and full-skim American.

⁴ The evaporated milk is unskimmed, unsweetened, case goods. The condensed milk is unsweetened (plain condensed) unskimmed, bulk goods; and sweetened condensed milk, unskimmed, case and bulk goods.

⁵ Preliminary.

Economic Research Service. Data for 1909-28 in *Agricultural Statistics, 1967*, table 581.

¹ Percentage of the parity equivalent price for manufacturing milk and the parity price for butterfat as of the beginning of the marketing year. ² Announced purchase prices for products in bulk containers. ³ U.S. Grade A or higher. Prices at all locations through Mar. 31, 1953; at Chicago beginning Apr. 1, 1953. Prices not announced for Chicago after Mar. 31, 1959; thereafter, prices based on New York prices less 80 percent of the lowest rail freight rate from Chicago to New York.

⁴ U.S. Grade A or higher, standard moisture basis. ⁵ U.S. Extra Grade, not more than 3.5 percent moisture content. Prices quoted are for product in barrels and drums through Nov. 3, 1954; 100-lb. bags, Nov. 4, 1955 through Aug. 18, 1967; and 50-lb. bags beginning Aug. 19, 1967. ⁶ Milkfat and nonfat solids content of butter, cheese, and nonfat dry milk purchased under price support and related programs. (Excludes purchases of fluid milk partly paid for by CCC under military and veterans milk program. Includes purchases of butter and cheese in the 1966-67 marketing year and of cheese in the 1969-70, 1970-71, and 1971-72 marketing years for domestic school lunch and welfare programs under Section 709 of the Food and Agriculture Act of 1965. Beginning with the 1968-69 marketing year, includes evaporated milk, and 1971-72 dry whole milk, purchased with Section 32 funds for distribution to needy persons.)

⁷ Calendar year. ⁸ Based on parity equivalent published in March 1949. ⁹ Effective Feb. 8, 1949. ¹⁰ Effective July 27, 1949. ¹¹ Effective April 18, 1949. ¹² Effective Sept. 1, 1949.

¹³ Jan. 1, 1950 to Mar. 31, 1951 (fifteen months). ¹⁴ Effective July 12, 1954. ¹⁵ Effective July 12, 1954; 15.15 cents effective for product in 100-lb. bags beginning Nov. 4, 1954. ¹⁶ Effective April 18, 1956. ¹⁷ Effective May 20, 1959. ¹⁸ Effective Sept. 17, 1960. ¹⁹ Effective Mar. 10, 1961. ²⁰ Effective Oct. 24, 1960. ²¹ Effective July 18, 1961. ²² Effective June 30, 1966. ²³ Effective Aug. 19, 1967. ²⁴ Effective for product in 50-lb. bags beginning Aug. 19, 1967. ²⁵ Effective June 24, 1968. ²⁶ Effective Nov. 28, 1968. ²⁷ Effective Nov. 19, 1969. ²⁸ Effective June 9, 1970. ²⁹ Effective Nov. 20, 1970. ³⁰ Effective Jan. 10, 1971. ³¹ The requirement to support butterfat has been suspended for 3 years by the Agricultural Act of 1970.

¹ Does not include commercial broiler production.

² Total chicks hatched less death loss of chickens and young chickens during the year.

³ Death loss during the year of mature chickens on hand Dec. 1.

⁴ Chickens raised less death loss during the year of mature chickens on hand Dec. 1.

⁵ Chickens consumed in households of farm producers.

⁶ Annual production, disposition, cash receipts, and gross income estimates for chickens were changed to a Dec. 1 through Nov. 30 marketing year, beginning 1970.

⁷ Preliminary.

⁸ Value of sales plus value of those consumed in households of producers.

¹ Does not include broiler production. Annual production, disposition, cash receipts, and gross income for chickens were changed to a Dec. 1 through Nov. 30 marketing year.

² Total chicks hatched less death loss of chicks and young chickens during the year.

³ Death loss during the year of mature chickens on hand Dec. 1.

⁴ Chickens raised less death loss during the year of mature chickens on hand Dec. 1.

⁵ Chickens consumed in households of producers.
⁶ Value of sales plus value of those consumed in households of producers.

Statistical Reporting Service.

¹ Broilers are young chickens of the heavy breeds and other meat-type birds, to be marketed at 2-5 pounds live weight, and from which no pullets are kept for egg production. These figures are not included in farm production of chickens. Beginning 1961, includes Hawaii.² Includes value of consumption in households of producers, which is less than 1 percent of total production.³ Commercial broilers were changed to a Dec. 1 through Nov. 30 marketing year, beginning with the 1970 estimates.⁴ Preliminary.

¹ Number of pounds of poultry ration equivalent in value at local market prices to 1 dozen eggs, or 1 pound of chicken or turkey live weight. Simple average of monthly ratios.

² Ratios based on price of farm chickens, excluding commercial broilers.

³ Average of prices paid for commercial feed, and prices received for grain.

⁴ Beginning 1970, ratio computed on a December through November marketing year rather than a calendar year.

¹ Preliminary.² Year beginning June 1 of year shown.³ Revised series, year ending June 30 of year shown.⁴ Year ending Sept. 30 of year shown.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

FOOTNOTES FOR TABLE 612

¹ Heavy and light breeds not published in some States in order to avoid disclosing individual operations.² Includes birds for which the normal mature marketing live weight is 12 pounds or over.³ Includes birds for which the normal mature marketing live weight is less than 12 pounds.⁴ States combined to avoid disclosing individual operations.⁵ Includes Nebraska, North Dakota, South Dakota, Delaware, Maryland, West Virginia, South Carolina, Kentucky, Alabama, and Mississippi to avoid disclosing individual operations.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 613

¹ Estimates were changed to a Dec. 1 through Nov. 30 marketing year, beginning 1970.² Number of eggs produced during the year divided by the average number of hens and pullets of laying age on hand during the year.

Statistical Reporting Service.

¹ Beginning 1960, includes Alaska and Hawaii.² Includes an allowance for nonfarm (backyard) production through 1963.³ Commercial and USDA.⁴ Shell equivalent of eggs and egg products.⁵ Estimated from number of chickens raised or hatched.⁶ Adjusted for changes in coverage of cold storage holdings or storage losses in 1944-45 and 1948-50.⁷ Civilian per capita only, beginning 1941.⁸ Preliminary.Economic Research Service. Data for 1909-28 in *Agricultural Statistics, 1967*, table 624.

FOOTNOTES FOR TABLE 616

¹ Data cover both farm and commercial operations. Annual production, disposition, cash receipts, and gross income estimates for eggs are computed on a Dec. 1 through Nov. 30 marketing year.

² Valued at same price as eggs sold.³ Cash receipts plus value of home consumption may not add to gross income due to rounding.⁴ Less than one-half million eggs.

Statistical Reporting Service.

¹ Included in preceding columns showing frozen in terms of liquid; beginning 1965, not available.² Beginning July 1, 1971, data were available on a 4-week reporting period under the mandatory egg products inspection law. Comparable data are not available for classes of product. The last reporting period of the year ended Jan. 8, 1972.³ Beginning 1966, not available; included in "Other yolk."⁴ Yolk emulsions through 1964.

CHAPTER IX

FARM RESOURCES, INCOME, AND EXPENSES

The statistics in this chapter deal with farms, farm resources, farm income, and expenses. Many of the series are estimates developed in connection with economic research activities of the Department.

For convenience, the tables have been arranged in general groups. These groups, with the beginning table indicated, are as follows:

- Economic trends, 621
- Farm property, table 622
- Population and employment, table 643
- Farm production and distribution, table 649
- Prices and income, table 671
- Costs and expenses, table 688

Table 621.—Economic trends: Data relating to agriculture, United States, 1910–71

Year	Prices paid by farmers		Prices received by farmers	Farm income				
	Total including interest, taxes, and wage rates	Commodities only		Realized gross farm income (including Government payments)	Production expenses	Realized net income of farm operators	Total net income of farm operators	Realized net income per farm

1935	6,812,350	1,054,515	55.4	295,624	32,859
1940	6,096,799	1,060,852	55.7	321,242	33,642
1945	5,859,169	1,141,615	59.9	352,866	453,889
1950	5,382,162	1,158,566	60.9	344,399	75,261
1954	4,782,416	1,158,192	60.8	332,870	97,583
1959	3,703,894	1,120,158	58.9	311,285	128,988
1964	3,152,611	1,105,874	58.2	286,708	159,432
1969	2,585,051	-----	-----	-----	201,485

¹ Excludes Alaska and Hawaii.² Acreages are for preceding year except for 1954, 1959, and 1964. Prior to 1925, this column shows the total acreage of crops for which figures are available, except for 1920, when 14,502,932 acres of corn cut for forage were excluded (most of this was probably duplicated in the acreage of corn harvested as grain). Beginning 1925, the figures represent the total cropland harvested.³ Estimates for 1950, 1954, 1959, 1964, and 1969 are based on a sample of farms.⁴ Estimate derived from the index of farm real estate values applied to 1940 and 1950 Census values. The 1945 Census reported a total value of land and buildings of \$46,389 million.

Economic Research Service. Compiled from reports of the Census of Agriculture, U.S. Department of Commerce.

FOOTNOTES FOR TABLE 626

¹ Cropland harvested, crop failure, and cultivated summer fallow.² Open or nonforested permanent pasture in farms.³ Land used chiefly for grazing. Includes open or nonforested grazing land, forest and arid woodland grazed, and shrub and brush grazing land.⁴ Excludes part of the forested areas in parks, wildlife refuges, military areas, recreation sites, and arid woodland, brushland, and forest land used for grazing.⁵ Includes urban, industrial, and nonfarm residential areas; parks and wildlife refuges; military lands; and roads, railroads, ungrazed desert, rock, swamp, and miscellaneous other areas.⁶ Remeasurement and increases in reservoirs account for changes in total land area.

Economic Research Service. Data from records and reports of the U.S. Departments of Agriculture and Commerce, and public land administering and conservation agencies.

FOOTNOTES FOR TABLE 627

¹ Data may not add to regional and U.S. totals because of rounding.² Less than 500 acres.³ Not available.⁴ Excludes Alaska. Irrigated acreage in Alaska in 1969 was estimated at only 823 acres.⁵ Excludes Hawaii in 1954.

Economic Research Service. Data from the Census of Agriculture, U.S. Department of Commerce.

¹ Acreage classified as to use in preceding year except in 1934, 1939, 1964, and 1969.² Before 1915, acreage included in grassland pasture.³ Open or nonforested permanent pasture in farms, 1945-69. Before 1945, also includes cropland used only for pasture.⁴ Land used entirely for grazing. Includes open or nonforested grazing land, forest and wood-land grazed, and shrub and brush grazing land.⁵ Excludes part of the forested areas in parks, wildlife refuges, military areas, recreation sites, and arid woodland, brushland, and forest land used for grazing.⁶ Includes urban, industrial, and nonfarm residential areas; parks and wildlife refuges; military lands; and roads, railroads, ungrazed desert, rock, swamp, and miscellaneous other areas.⁷ Remeasurement and increases in reservoirs account for changes in total land area.

Economic Research Service. Data from reports of the U.S. Departments of Agriculture and Commerce, and public land administering and conservation agencies.

Table 626.—Land utilization: Land in farms and land not in farms, by States, 1969

¹ As of Mar. 1. Data for 1950, 1955, 1965, and 1970 are based on Census of Agriculture estimates. Values for intercensal years are based on index number of land values per acre; land in farms interpolated between census benchmarks.

¹ All farmlands with improvements as of Mar. 1.² Includes the index of average value of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut.

Economic Research Service.

FOOTNOTES FOR TABLE 634

¹ Based on deposits of member banks of the Federal System located in places of less than 15,000 population. Prior to 1966, annual indexes are simple averages of monthly indexes, which are based on average amounts of daily deposits. Beginning 1966, the only data available were as of June 30 and Dec. 31. In preparing indexes for groups of States, the amounts of deposits for each State are weighted by the cash farm income of each State in the base period. Beginning December 1959, U. S. Government deposits are excluded from the data on which the indexes for demand deposits are based. This change in method of reporting slightly lowers the levels of the indexes.

² Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Dakota, Texas, Washington, and Wisconsin.

³ Michigan, Wisconsin, and Minnesota.

¹ Average number of persons employed during one survey week each month. Survey weeks selected are the latest calendar week that excludes the last day of the month.

² Includes farm operators doing 1 or more hours of farm work and members of their families working 15 hours or more during the survey week without cash wages.

³ Includes all persons doing farm work during the survey week for pay.

Statistical Reporting Service. Data for 1910-28 in *Agricultural Statistics*, 1962, table 648.

v

FOOTNOTES FOR TABLE 647

¹ Data relate to persons 14 years of age and over in the civilian noninstitutional population at or near the end of the year. Estimates not available for all intervening years. Migratory workers are those who leave their homes temporarily to do farm wage work in another county or counties. Does not include foreign nationals brought into the United States to do farm work who have left the country before the time of the survey.

² Beginning 1960, includes Alaska and Hawaii.

Economic Research Service. Based on data from enumerative sample surveys made by the U.S. Department of Commerce for the Economic Research Service.

¹ Data relate to persons 14 years of age and over in the civilian noninstitutional population at or near the end of the year. No survey conducted in 1953 and 1955. This series differs from the hired workers series shown in table 645 which gives an annual average based on employment during the last week of each month.

² Beginning 1960, includes Alaska and Hawaii.

Economic Research Service. Based on data from enumerative sample surveys made by the U.S. Department of Commerce for the Economic Research Service. Data for 1945–48 in *Agricultural Statistics, 1967*, table 652.

¹ Does not include Alaska and Hawaii.² Estimates discontinued.³ Preliminary.⁴ Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers, green peas, spinach, and tomatoes.⁵ Artichokes, asparagus, snap beans, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeydew melons, lettuce, onions, green peppers, spinach, tomatoes, and watermelons (included lima beans, beets, kale, green peas, and shallots, through 1968). Excludes farm gardens. Acreage for harvest; prior to 1967, included mature acreage abandoned or only partially harvested because of low prices or other economic factors.⁶ Totals are for crops shown in preceding columns. Alfalfa seed, red clover seed, alsike clover seed (through 1963), and lespedeza seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts harvested for nuts, has been deducted. Other crops not included are hops, various legumes and other crops harvested by livestock, minor crops, and fruits and nuts. The acreage shown includes some crops harvested in succession from the same land.⁷ Commercial apples, peaches, pears, grapes, cherries, plums, prunes, apricots, figs, nectarines, olives, avocados, dates, persimmons, pomegranates, oranges, tangerines, grapefruit, lemons, limes, tangelos (beginning with the 1955 crop), temples, walnuts, almonds, and filberts.Statistical Reporting Service. Data for 1939–43 in *Agricultural Statistics, 1967*, table 657.

FOOTNOTES FOR TABLE 650—continued

⁶ Included are the following: Rye, hay, sweetclover seed, timothy seed, soybeans for beans, cowpeas for peas (through 1967), peanuts harvested for nuts, tobacco, sugarcane, broomcorn, and commercial vegetables (for processing: asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers, green peas, spinach, and tomatoes; for fresh market: artichokes, asparagus, snap beans, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeydew melons, lettuce, onions, green peppers, spinach, tomatoes, and watermelons (included lima beans, beets, kale, green peas, and shallots, through 1968)). The addition or dropping of crops generally has little effect on the total. Alfalfa seed, red clover seed, alsike clover seed (through 1963), and lespedeza seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts harvested for nuts, has been deducted. The harvested instead of the planted acreage of rye is included because most of the rye acreage not harvested is planted to other crops or used for pasture. Excludes grains cut for hay because part of the acreage shown as planted to wheat, oats, and barley is included in grain hay.

⁷ Includes crops listed separately in this table, plus those mentioned in footnote 6. (Sorghums counted as 3 crops—grain, forage, and sirup.)

Statistical Reporting Service. Data for 1939–43 in *Agricultural Statistics, 1967*, table 656.

¹ Alaska and Hawaii are included in commercial vegetables and in acreage and production of sugar cane, but are excluded from other crops. Total of 59 crops harvested does not include Alaska and Hawaii.

² Preliminary.

³ Includes acreage seeded in preceding fall.

⁴ Acreage seeded in preceding fall.

⁵ Clean basis.

⁶ Does not include Hawaii.

⁷ Includes syrup later made into sugar. Does not include production in nonfarm lands in Somerset County, Maine.

⁸ Fresh basis.

⁹ Year of bloom.

¹⁰ Crop year begins with bloom in one year and ends with completion of harvest the following year. Citrus production is included with other crops on a harvested basis, beginning in the 1968 edition; former editions included production in the year of bloom.

¹¹ For breakdown between fresh market and processing, see individual crop tables.

¹² Processing only.

¹³ Includes crops listed in footnote 5, table 631. Farm value also includes apples (commercial crop), peaches, pears, grapes, cherries, cranberries, oranges, grapefruit, lemons, limes, plums, all prunes, apricots, figs, olives, almonds, walnuts, pecans, maple syrup, and hops.

¹⁴ Total values do not include revisions made for some commodities after December 1971.

Statistical Reporting Service.

¹ Area in 59 principal crops harvested as reported by Statistical Reporting Service, plus acreages in fruits, tree nuts, and farm gardens.

² Acreages for exports relate to exports for year beginning July 1, or month representing beginning of crop season. Acreage includes seeds for crops and feed for livestock that are exported.

³ Includes feed used by horses and mules.

⁴ Includes persons in our military forces in this country and abroad.

⁵ Preliminary.

Economic Research Service. Data for 1929–28 in *Agricultural Statistics, 1962*, table 658.

¹ For cattle, sheep, and hogs, the quantity of net production is the live weight actually produced during the year, adjustments having been made for animals shipped in and changes in inventory.

² Preliminary.

³ Including commercial broiler production.

⁴ Turkey production and value estimates do not include an adjustment for changes in inventory, beginning 1970.

⁵ Texas only. Texas accounted for nearly 97 percent of the U.S. production during the period 1966–70.

¹ Quantities weighted by constant farm prices. Domestic use allocated on the basis of value of processed products. Net concept excludes domestic use of feed and seed to avoid double counting of livestock products. Beginning 1960, includes Alaska and Hawaii.

² Includes inshipments from U.S. Territories.

³ Farm, commercial, and Government program holdings; excludes live animal inventory. Derived by applying annual changes to January 1961 level to avoid inconsistent coverage.

⁴ Includes civilian feeding in occupied areas.

⁵ Excludes feed and seed.

⁶ Includes shipments to U.S. Territories.

⁷ Preliminary.

¹ Quantities weighted by constant farm prices. Domestic use allocated on the basis of value of processed products. Net concept excludes domestic use of feed and seed to avoid double counting of livestock products. Beginning 1960, includes Alaska and Hawaii.

² Includes inshipments from U.S. Territories.

³ Farm, commercial, and Government program holdings; excludes live animal inventory. Data represent stock changes. Negatives indicate stock increases; positives signify withdrawals.

⁴ Includes civilian feeding in occupied areas.

⁵ Excludes feed and seed.

⁶ Includes shipments to U.S. Territories.

⁷ Preliminary.

Economic Research Service. Data for 1924-28 in *Agricultural Statistics, 1967*, table 664.

Table 658.—Agricultural productivity: Index numbers of farm output per unit of input, United States, 1929-71

1942	69	1957	83		
1943	67	1958	89		

¹ Productivity is the output-input ratio. The ratio is obtained by dividing the index of farm output in table 660 by the index of total input in table 659.

² Preliminary.

Economic Research Service.

¹ Production of livestock and livestock products for human use, horses and mules excluded.² Includes clipped wool, mohair, honey, and beeswax. These items are not included in the separate groups of livestock and products shown.³ Cattle and calves, sheep and lambs, and hogs.⁴ Butter, butterfat, wholesale milk, retail milk, and milk consumed on farms.⁵ Chicken eggs, commercial broilers, chickens, and turkeys.⁶ Includes farm gardens, production of hayseeds, pasture seeds and cover-crop seeds, and some miscellaneous crop production not included in separate groups of crops shown.⁷ Corn for grain, oats, barley, and sorghum grain.⁸ All hay, sorghum forage, corn silage, and sorghum silage.⁹ All wheat, rye, buckheat, and rice.¹⁰ Potatoes, sweetpotatoes, dry edible beans, dry field peas, truck crops for processing, and truck crops for fresh market having value.¹¹ Fruits, berries, and tree nuts having value. Citrus production is based on year of harvest for 1960 to date; earlier years on year of bloom.¹² Sugarbeets, sugarcane for sugar and seed, sugarcane sirup, and maple sirup.¹³ Cotton lint and cottonseed.¹⁴ Soybeans, peanuts harvested for nuts, peanuts hogged, flaxseed, and tung nuts.¹⁵ Preliminary.

¹ Index of farm production (see table 660) divided by the appropriate index of hours of labor (for absolute number of hours, see table 689).

² Preliminary.

Economic Research Service.

FOOTNOTES FOR TABLE 669

¹ Total persons supplied with agricultural products from U.S. farm production divided by farm employment. Total persons supplied in the United States is obtained by dividing value of farm production minus value of agricultural exports by per capita level of support. Total persons supplied abroad is calculated by dividing value of U.S. agricultural exports by per capita level of support in the United States. Per capita level of support is derived by dividing total population into value of farm production minus value of agricultural exports plus value of agricultural imports.

² Includes persons in our military forces in this country and abroad. Excludes Alaska and Hawaii.

³ Preliminary.

Economic Research Service. Data for 1820-1920 in *Agricultural Statistics, 1967*, table 675.

Table 666.—Selected crops: Labor-hours per unit of production and related factors, United States, indicated periods, 1910-71¹

Crop and item	1910-14	1925-29	1935-39	1945-49	1955-59	1965-69	1970-71 ²

¹ All index number series are of the weighted aggregative type. They are based upon averages of rates in effect during the year. Annual averages are computed by weighting the rates by the number of days they are in effect. In constructing the combined index, group indexes were weighted by average revenues for 1957-59.

² Beginning 1957, combined index includes soybeans, corn, small grains, wool, and tobacco, in addition to other products for which data are shown separately.

¹ The market basket contains the average quantities of farm-originated foods purchased annually per household in 1960-61 by wage-earner and clerical-worker families and workers living alone. ² Retail costs are calculated mainly from retail prices published by the U.S. Department of Labor. ³ The farm values, or payments received by farmers for products equivalent to the foods in the market basket, are calculated from prices received by farmers. The farm values of processed products are adjusted by subtracting imputed values of byproducts. ⁴ Beginning July 1964, the farm value and farmer's share for bakery products are based on the market price of wheat received by farmers plus the cost of the marketing certificate to processors.

⁵ Preliminary.

¹ For domestic farm foods bought by civilian consumers in this country. Beginning 1960, estimates include Alaska and Hawaii.

² Labor cost includes imputed earnings of proprietors, partners, and family workers not receiving stated remuneration. It also includes supplements to wages and salaries such as social security and unemployment insurance taxes and health insurance premiums, but it does not include the cost of labor employed in for-hire transportation. ³ Includes charges for protective services, heating and refrigeration; does not include local hauling. Charges for intercity transportation by water and air are a part of the "other" or residual component of the marketing bill. ⁴ Does not include profits of unincorporated firms or transportation firms. ⁵ Residual component; includes other costs such as advertising, depreciation, fuel, electric power, containers, packaging materials, air and water transportation, interest on borrowed capital, taxes other than those on income, and non-corporate profits. ⁶ Preliminary.

¹ The total marketing bill is the difference between total civilian expenditures for domestic farm-originated food products and the farm value or payment farmers received for the equivalent farm products. It relates only to domestic food bought by civilian consumers and not to that sold to the Armed Forces or exported. Beginning 1960, includes Alaska and Hawaii.

¹ Season average prices for crops; weighted calendar year average for livestock and livestock products. Unless otherwise noted, these are averages for marketing season or calendar year computed by weighting State prices by quantities sold, or by production for those commodities for which virtually all the production is sold. ² Preliminary. ³ Parity prices as computed, currently using base prices in effect and indexes for months indicated. Parity prices shown are those for the most recent month available preceding the start of the crop marketing season for crops and the calendar year for livestock and livestock products. ⁴ Following year. ⁵ Previous year. ⁶ State annual average prices weighted by production to obtain U.S. averages. ⁷ Average local market price for wool sold excluding incentive payment. ⁸ Average local market price for mohair sold excluding incentive payment. ⁹ Crop year begins with bloom in one year and ends with completion of harvest the following year. Beginning with the 1968 edition, prices refer to the year of harvest; in former editions, prices referred to the year of bloom. ¹⁰ Equivalent packinghouse-door returns for Washington and Oregon, equivalent first delivery point returns for California, and prices as sold for other States. ¹¹ Equivalent per unit returns for bulk fruit at first delivery point. ¹² Prices for fresh use in New York, Pennsylvania, Michigan, Virginia, North Carolina, South Carolina, Georgia, Washington, and California, and average price for all sales in all other States. ¹³ Packinghouse-door returns for fresh consumption for Washington and Oregon, equivalent first delivery point returns for California, average prices for fresh use for New York and Michigan, and average prices for all methods of sale for other States. ¹⁴ Discontinued. ¹⁵ Prices include average conditional payments to farmers authorized by the Sugar Acts. ¹⁶ Continental United States only. ¹⁷ Includes some processing. ¹⁸ Simple average of States weighted by estimated Jan. 1 head for U.S. average. ¹⁹ Sold by farmers directly to consumers.

¹ National averages during the marketing years for the individual crops, beginning in the years shown.² Commodities grouped under "Mandatory" are those which the Commodity Credit Corporation is required by law to support.³ Represents the average loan rate plus any direct price-support payment (or in the case of wheat, the value of the domestic marketing certificate) received by participants in the program for the commodity. The basis of such payments varies among the crops and from year to year.⁴ In these years average allotments were proclaimed for corn. Allotments were proclaimed for the commercial area only, with these support prices in effect to compliers in the area. Support prices were in effect to noncompliers in the commercial area, in the following years, and at the following rates: 1956, \$1.25; 1957, \$1.10; and 1958, \$1.06.⁵ Basis 7/8-inch middling, through 1960; 1-inch middling, beginning 1961.⁶ Choice A; support for Choice B as follows: 1959, \$0.2470 and 1960, \$0.2318.

¹ Fresh market for noncitrus, and fresh market and processing for citrus.² Ratio of index of prices received to the Parity Index.

Preliminary.

Statistical Reporting Service. The price series for individual commodities are averages for all classes and grades of the commodity being sold in local farm markets on or about the 15th of each month. In computing the group indexes, prices of individual commodities have been weighted by average quantities sold during 1953–57. Data for 1944–48 in *Agricultural Statistics*, 1967, table 687. See table 678 for data on 1967 = 100 basis.

Table 681.—Prices paid by farmers: Prices, by commodities, United States, 1967-71¹

Commodity and unit	1967	1968	1969	1970	1971
	Dollars	Dollars	Dollars	Dollars	Dollars
Food:					
Steak, round, per pound	.994	1.02	1.14	1.17	1.24
Hamburger (beef), per pound	.596	.611	.679	.717	.730
Chuck roast, per pound	.636	.655	.747	.744	.777
Bologna, per pound	.648	.662	.737	.765	.783
Bacon, sliced, per pound	.767	.741	.838	.856	.739
Ham, whole, per pound	.698	.695	.746	.806	.737
Pork chops, per pound	.871	.874	.990	.969	.916
Pork sausage, per pound	.623	.631	.719	.719	.699
Frying chickens, per pound	.378	.395	.416	.398	.403
Salmon, pink, per 16-ounce can	.806	.878	.899	.930	.973
Frozen haddock, per pound	.650	.654	.700	.786	.881
Lard, per pound	.226	.213	.232	.262	.266
Vegetable shortening, per 3-pound can	.846	.822	.842	.922	.973
Margarine, per pound	.284	.278	.270	.289	.309
Salad dressing, per quart jar	.553	.551	.557	.590	.614
Peanut butter, per pound	.540	.543	.562	.586	.615
Milk, fluid, per half gallon	.273	.567	.588	.608	.620
Milk, evaporated, per 14½-ounce can	.181	.187	.191	.204	.213
Butter, packaged, per pound	.883	.890	.904	.930	.933
Cheese:					
Processed, American, per pound	.742	.748	.778	.854	.894
Natural cheddar, American, per pound	.783	.793	.835	.914	.953
Ice cream, per half gallon	.850	.860	.872	.893	.901
Eggs, per dozen	.459	.529	.628	.528	.502
Flour, per 25-pound sack	2.50	2.47	2.48	2.52	2.62
Bread, white, loaf, per pound	.232	.234	.241	.254	.262
Soda crackers, packaged, per pound	.336	.350	.356	.384	.397
Corn flakes, packaged, per pound	.431	.436	.437	.451	.463
Baking powder, canned, per pound	.314	.332	.350	.374	.404
Cake mix, packaged, per pound	.344	.343	.353	.357	.369
Gelatin dessert, flavored, per pound	.621	.626	.634	.666	.675
Corn, per standard No. 303 can	.227	.244	.233	.241	.244
Peas, per standard No. 303 can	.220	.229	.224	.229	.237
Beans, dry, Navy, per pound	.194	.202	.199	.206	.247
Potatoes, Irish, per 10-pound bag	.631	.670	.704	.771	.749
Cabbage, per pound	.108	.114	.114	.139	.127
Lettuce, per head	.227	.240	.295	.325	.333
Tomatoes, fresh, per pound	.308	.365	.408	.392	.433
Frozen peas, per 10-ounce package	.226	.229	.233	.239	.246
Apples, per pound	.188	.211	.225	.204	.224
Bananas, per pound	.165	.166	.167	.170	.160
Oranges, per dozen	.635	.740	.681	.733	.812
Frozen orange juice concentrate, per 6-ounce can	.200	.227	.253	.240	.238
Peaches, halves in heavy syrup, per No. 2½ can	.335	.376	.370	.370	.390
Sugar, per 5-pound bag	.646	.658	.670	.700	.730
Sirup:					
Cane blend with corn and sugar sirup, per pint (16 fl. oz.)	.288	.301	.318	.340	.361
Maple blend with corn and sugar sirup, per pint (16 fl. oz.)	.403	.414	.434	.466	.491
Candy, non-chocolate, without nuts, per pound	.428	.448	.471	.497	.521
Coffee, ground, per pound	.814	.818	.834	.969	.975
Tea, Orange Pekoe, packaged, per pound	1.76	1.78	1.78	1.85	1.90
Cola drinks, 10-12 oz., per carton of 6 ³	.129	.140	.148	.162	.185
Tobacco:					
Smoking tobacco, packaged, per pound	1.91	1.91	2.07	2.22	2.40
Cigarettes, per package of 20	.315	.332	.350	.380	.396
Clothing and yard goods:					
Men's clothing:					
Overalls, each	4.48	4.88	5.22	5.64	6.07
Shirts, work, each ⁴	2.73	2.94	3.14	3.27	3.69
Undershirts, lightweight, T-style, each ⁵	.846	.909	.985	1.02	1.15
Shorts, lightweight, each ⁶	.943	1.02	1.09	1.11	1.14
Union suits, heavy, cotton, each	3.45	3.70	3.89	4.08	
Gloves, canvas, work, per pair	.436	.462	.489	.512	.532
Jackets, chore, lined, each	7.48	8.09	8.55	8.62	9.08
Socks, work, per pair ⁷	.404	.428	.450	.474	.508
Shoes, work, per pair	10.50	11.00	11.60	12.20	12.80
Boots, rubber, knee-length, per pair	7.42	7.63	7.98	8.28	8.52
Suits, winter weight, wool or wool blend, 1 pair pants, each ⁸	55.50	59.10	64.90	70.40	74.4
Slacks, dress, wool, wool blend, or polyester blend, each ⁹	13.10	13.90	14.80	12.80	13.4
Slacks, casual, cotton or polyester blend, each ¹⁰	8.60	9.07	9.60	8.47	8.94
Shirts, dress, durable press, each ¹¹	3.76	4.04	4.27	4.66	5.49
Coats, winter, or topcoats, each ¹²	47.60	50.50	53.10	44.20	43.7
Hats, felt, each	8.80	9.17	9.52	9.87	9.93
Shoes, dress, per pair	12.00	12.70	13.40	14.20	15.00
Overshoes, rubber, per pair:					
Arctics, with buckles or zippers	6.32	6.55	6.81	7.02	6.97
Rubbers, without buckles or zippers	3.79	4.06	4.24	4.24	4.37

See footnotes at end of table.

Table 681.—Prices paid by farmers: Prices, by commodities, United States, 1967-71¹—Continued

Commodity and unit	1967	1968	1969	1970	1971
Clothing and yard goods—Continued					
Boys' clothing:					
Suits, 6-12 years, each	\$17.80	18.30	19.00	19.40	20.00
Overalls, waist, each	3.07	3.34	3.55	3.82	4.02
Sweaters, pull-over, part-wool, each	6.11	6.49	6.70	7.03	7.08
Shoes, sizes 2½-6, per pair ¹²	7.44	7.80	8.24	8.9	9.15
Women's clothing:					
Dresses:					
Budget-priced, each ¹⁴	4.72	5.12	5.62	7.89	8.64
Casual or daytime, each ¹⁵	7.88	8.26	8.85	11.30	12.20
Better dresses, each ¹⁶	10.40	11.00	11.80	20.30	22.00
Panties or briefs, chiefly man-made fibers, each ¹⁷	.869	.910	.932	.984	.955
Slips, cotton, each	2.53	2.64	2.74	2.82	
Slips, chiefly man-made fibers, each ¹⁸	3.78	3.94	4.07	4.23	4.10
Nightgowns, chiefly man-made fibers, each ¹⁹	3.10	3.28	3.48	3.77	4.44
Car coats	18.40	20.50	22.10	24.00	24.90
Coats, heavy, each: ²⁰					
With fur trim	60.00	63.40	66.90	66.90	69.50
Without fur trim	39.30	41.20	45.00	44.20	44.90
Sweaters, man-made fibers, each	7.24	7.78	8.02	8.75	9.09
Hats, felt, each	4.95	5.21	5.49	5.56	
Hose, nylon, per pair	.928	.940	.949	.991	1.02
Shoes or oxfords, per pair	7.18	7.76	8.41	9.37	10.10
Girls' clothing:					
Dresses, cotton, or blends, sizes 7-14 years, each ²¹	4.61	4.88	5.16	5.64	5.94
Coats, heavy, each ²⁰	19.00	20.20	20.80	18.90	18.70
Shoes, oxfords, sizes 12½-3, per pair	5.58	5.95	6.39	6.89	7.30
Yards goods:					
Percale, prints, 156-164 thread count, durable					
press, per yard ²²	.547	.570	.606	.614	.765
Gingham, cotton, 44-45 inch width, per yard ²³	.722	.736	.757	.783	.905
Household operation:					
Coal, bituminous, prepared sizes, per ton	20.00	20.80	21.60	24.90	27.20
Coal, bituminous, run-of-mine, per ton	19.00	19.40	20.60	22.70	24.90
Coal, anthracite, per ton	26.50	27.40	28.20	30.10	31.40
Wood, per cord	16.40	17.20	18.10	21.80	21.50
Electricity, per kilowatt hour	.0217	.0215	.0209	.0212	.0218
Telephone, per month	5.15	5.30	5.55	5.72	5.96
Newspapers, yearly subscription	13.20	13.60	14.40	14.90	16.10
Laundry starch, aerosol spray can, per pound ²⁴	.248	.255	.271	.509	.523
Laundry detergents, per pound	.286	.296	.308	.313	.323
Toilet soap, regular size, per cake	.140	.144	.147	.154	.164
Household furnishings:					
Floor lamps, medium quality, each	21.50	23.50	27.00	29.60	31.80
Radios, table model, AM, with clock, each ²⁵	19.60	20.00	19.30	19.00	24.30
Television sets, 18-inch portable, B & W, each ²⁶	152.00	150.00	150.00	151.00	150.00
Television sets, 23-inch console, color, each ²⁶		556.00	550.00	546.00	546.00
Refrigerators, 14 cu. ft. capacity, each	288.00	294.00	297.00	301.00	301.00
Washing machines, wringer type, elec., each	151.00	156.00	160.00	164.00	170.00
Washing machines, automatic, elec., each	236.00	242.00	244.00	248.00	253.00
Sewing machines, portable, incl. carrying case, each	85.20	87.30	88.90	90.60	95.40
Clothes dryers, 12-16 pound capacity	176.00	179.00	182.00	184.00	186.00
Vacuum cleaners, cannister type, each	51.40	53.00	53.80	54.40	55.00
Irons, electric, combination spray-steam, each	14.70	15.10	15.40	15.60	16.00
Electric toasters, pop-up	16.40	16.60	16.70	16.80	16.80
Electric ranges, 4-top heating units, each	224.00	230.00	229.00	233.00	235.00
Gas ranges, 4-burner, each	184.00	187.00	196.00	202.00	210.00
Kitchen wall cabinet unit, double-door, each	25.80	30.20	33.00	34.10	36.00
Dinner plates, plain, each	.314	.325	.341	.355	.386
Brooms, each	1.52	1.60	1.65	1.73	1.80
Fruit jars, Mason, 1 quart, per dozen	1.61	1.68	1.75	1.84	1.95
Innerspring mattress and boxspring sets, full size, 54 by 75 inches ²⁷	48.00	50.30	97.50	101.00	104.00
Bedroom sets, 3 pieces, per set	211.00	228.00	216.00	261.00	275.00
Living-room sets, 2 pieces, per set	224.00	239.00	254.00	270.00	280.00
Lounge chairs, upholstered	87.10	94.80	102.00	107.00	112.00
Dining-room sets, 8 pieces, per set	337.00	359.00	386.00	415.00	442.00
Sheets, 72 by 108 inches, percale, durable press, each ²⁸	2.70	2.85	2.92	2.99	3.13
Blankets, single, each:					
All wool, 80 by 90 inches	11.40	12.00	11.90	12.50	13.30
Cotton, 80 by 90 inches	3.36	3.62	3.80	3.96	4.08
Bath towels, 22 by 44 inches, each	1.03	1.14	1.23	1.32	1.44
Curtains, kitchen, ready-made, per pair	2.65	2.76	2.88	3.07	3.13
Building materials:					
Framing lumber, 2 by 4 inches, per 1,000 board feet:					
Pine, Standard and better ²⁹	135.00	155.00	175.00	158.00	180.00
Pine, Utility ³⁰	112.00	130.00	146.00	128.00	148.00
Fir, Standard and better ²⁹	150.00	174.00	196.00	175.00	201.00
Fir, Utility ³⁰	115.00	137.00	156.00	131.00	156.00

See footnotes at end of table.

Table 681.—Prices paid by farmers: Prices, by commodities, United States, 1967-71—Continued

Commodity and unit	1967	1968	1969	1970	1971
Building materials—Continued					
Boards, per 1,000 board feet:					
Rough, No. 2 and better ³¹	139.00	155.00	182.00	178.00	191.00
Rough, under No. 2 ³²	113.00	128.00	152.00	141.00	155.00
Dressed, No. 2 and better ³¹	169.00	186.00	219.00	214.00	232.00
Dressed, under No. 2 ³²	124.00	140.00	170.00	152.00	165.00
Ship-lap, pine, per 1,000 board feet:					
No. 2 and better ³¹	142.00	156.00	186.00	179.00	192.00
Under No. 2 ³²	121.00	136.00	167.00	150.00	164.00
Drop-siding, per 1,000 board feet:					
Pine, C and better	207.00	222.00	244.00	248.00	263.00
Fir, C Select and better	262.00	276.00	320.00	341.00	367.00
Bevel-siding, per 1,000 board feet:					
Cedar, clear VG Heart	215.00	232.00	264.00	277.00	292.00
Flooring, per 1,000 board feet:					
Yellow pine, Band better	228.00	239.00	264.00	276.00	293.00
Fir, V G, B and better	317.00	335.00	374.00	405.00	427.00
Fir, V G, C Select	242.00	264.00	354.00	384.00	407.00
Oak Select	294.00	305.00	338.00	343.00	353.00
Oak No. 1	254.00	263.00	292.00	299.00	312.00
Shingles, wood, cedar, 16 inches, per square	17.80	21.30	28.60	25.40	28.90
Doors, fir, 2-panel, each	13.80	15.10			
Doors, flush, hollow-core, each	8.74	9.50	10.30	9.83	10.20
House windows, D. H. Unit with frames and sashes	24.20	26.20	28.20	28.00	29.80
Window sash, plain rail	5.67	6.47	7.79	7.84	
Nails, 8d, common, per pound	.180	.184	.192	.201	.221
Screen wire, galvanized, 16-mesh, 30-inch width, per linear foot	.236	.242	.246	.244	.266
Roofing, galvanized steel, per 100 square feet	13.30	13.90	14.20	14.70	15.40
Roofing, composition, per roll	4.19	4.31	4.39	4.53	5.52
Asbestos shingle shingles, per square	22.20	23.60	24.90	26.30	28.60
Gypsum board, 3/8-inch, per 1,000 square feet	59.80	62.20	64.00	62.80	62.60
Shingles, asphalt, per square	9.33	9.66	9.78	10.00	12.20
Insulating sheathing, per 1,000 square feet ³³	89.00	91.80	78.40	77.20	78.30
Bricks, common, per 1,000	63.20	66.10	69.20	72.30	77.90
Drainage tile, 4-inch:					
Clay, per foot	.154	.162	.174	.183	.187
Concrete, per foot	.153	.155	.163	.172	.179
Concrete blocks, per 100	27.10	28.20	29.50	31.00	32.90
Portland cement, per 94 pounds	1.61	1.68	1.74	1.83	1.97
Paint, house, per gallon	6.63	6.90	7.18	7.36	7.65
Linseed oil, per gallon	3.20	3.29	3.42	3.53	
Barbed wire, 2-point, per spool of 80 rods	10.00	10.20	10.40	11.30	12.20
Barbed wire, 4-point, per spool of 80 rods	11.10	11.40	11.70	12.60	13.80
Posts, wood, line fence, each	.889	.954	1.02	1.06	1.13
Posts, steel, each	1.16	1.19	1.22	1.27	1.34
Staples, fence, per pound	.199	.203	.210	.226	.244
Woven wire fencing, 32-inch, per 20-roll roll	24.00	24.20	25.10	27.00	29.00
Iron pipe, galvanized, 1 1/4-inch diameter, per foot	.472	.478	.493	.538	.576
Plastic tubing, 1-inch, per foot	.137	.136	.135	.134	.135
Motor supplies:					
Gasoline, regular, filling station, per gallon	.330	.332	.344	.349	.355
Gasoline, tank truck, per gallon	.282	.284	.295	.302	.308
Kerosene, per gallon	.195	.199	.202	.204	.210
Tractor fuel, diesel, per gallon	.168	.174	.179	.181	.189
Motor oil, regular, nondetergent, per gallon	1.27	1.30	1.34	1.38	1.45
Motor oil, heavy duty detergent, per gallon	1.61	1.66	1.72	1.76	1.88
Motor oil, all weather high detergent, per gallon	1.92	2.00	2.06	2.13	2.24
Grease, 35 lb. pail	8.12	8.24	8.45	8.78	9.09
Tires, conventional, 7.75 x 15, 4-ply, tubeless, each ³⁴	22.40	23.40	24.10	25.20	26.30
Tires, bias-bolted const., 7.75 x 15, 4-ply, tubeless, each				32.40	33.80
Inner tubes, 7.75 x 15, each	3.32	3.35	3.35	3.47	3.55
Tires, truck, 7.50 x 20, 10-ply, each	63.70	64.90	66.50	65.40	66.40
Tractor tires, rear, 15.5 x 38, 6-ply, each		131.50	132.00	137.00	141.00
Spark plugs, each	.927	.948	.987	1.02	1.08
Storage batteries, 51 plates, 6-volt, each	19.00	19.40	19.90		
Storage batteries, 54 plates, 12-volt, each	21.50	21.80	22.40	24.20	25.00
Motor vehicles:					
Autos, 4-door sedans:					
Intermediate size ³⁵					
Low price standard size ³⁶	3,170.00	3,350.00	3,500.00	3,660.00	3,825.00
Medium price standard size ³⁷		3,690.00	3,800.00	3,975.00	4,150.00
Trucks:					
2-ton, cab and chassis, each ³⁸	3,620.00	3,820.00	4,020.00	4,285.00	4,500.00
1 1/2-ton, pickup ³⁹	2,350.00	2,520.00	2,680.00	2,910.00	3,050.00
Tractors:					
Wheel, 30-39 maximum P.T.O. horsepower, each	3,700.00	3,820.00	3,880.00	3,980.00	4,200.00
Wheel, 50-59 maximum P.T.O. horsepower, each	5,440.00	5,670.00	5,830.00	5,970.00	6,160.00
Wheel, 70-79 maximum P.T.O. horsepower, each	7,020.00	7,380.00	7,590.00	7,730.00	8,040.00

See footnotes at end of table.

Table 681.—Prices paid by farmers: Prices, by commodities, United States, 1967-71¹—Continued

Commodity and unit	1967	1968	1969	1970	1971
Motor vehicles—Continued					
Tractors—Continued					
Crawler, 20-34.9 db. hp., each ⁴⁰	5,960.00	6,290.00	6,830.00	7,130.00	7,760.00
Crawler, 35-49.9 db. hp., each	8,120.00	8,560.00	9,250.00	9,650.00	10,100.00
Farm machinery:					
Plows, tractor, moldboard, two bottom, each	362.00	376.00	396.00	423.00	437.00
Plows, tractor, moldboard, three bottom, each	606.00	639.00	664.00	700.00	733.00
Disk harrows, tandem, 7-ft., each	366.00	381.00	395.00	417.00	432.00
Spiketooth harrows, steelbar, one section	52.60	54.60	58.00	61.00	65.00
Cultivators, 4-row, tractor, each	840.00	878.00	906.00	939.00	991.00
Corn planters, 4-row, plain, each	878.00	919.00	1,010.00	1,040.00	1,120.00
Grain drills, tractor-drawn, 15-17-tube, plain, each ⁴¹	900.00	914.00	1,000.00	1,065.00	1,185.00
Grain drills, tractor-drawn, 18-20-tube, plain, each ⁴²	1,080.00	1,140.00	1,200.00	1,310.00	1,440.00
Mowers, tractor, 7-ft., each	568.00	593.00	629.00	653.00	699.00
Pick-up balers, automatic tie, P.T.O., each	2,070.00	2,150.00	2,270.00	2,400.00	2,510.00
Combines, self-propelled:					
Small capacity, 11.5-ft. header, each ⁴³	8,580.00	9,200.00	8,920.00	9,545.00	10,950.00
Medium capacity, 13.5-ft. header, each			11,600.00	12,325.00	13,685.00
Large capacity, 16.0-ft. header, each			15,600.00	16,700.00	18,160.00
Combines, 5-6 feet, P.T.O., each	2,780.00	2,920.00			
Corn picker-huskers, 2-row, each	3,280.00	3,500.00	3,740.00	3,960.00	4,140.00
Hammer mills, each	323.00	336.00	353.00	374.00	377.00
Single milker units, each	157.00	165.00	170.00	180.00	193.00
Farm wagons, without box and tires, each	210.00	222.00	238.00	259.00	276.00
Power sprayers, boom type, tr. mtd., each	342.00	382.00	428.00	455.00	487.00
Gas engines, 3-horsepower, each	61.40	61.90	63.80	65.00	68.90
Electric motors, 1/4-horsepower, each	21.20	21.80	22.40	23.50	
Electric motors, 1/2-horsepower, each					28.70
Farm supplies:					
Axes, with handle, each	6.36	6.58	6.83	7.20	7.57
Hammers, nail, with handle, each	4.11	4.29	4.46	4.66	4.88
Pitchfork, 3-tine, each	4.96	5.17	5.48	5.82	6.09
Pitchfork, 4-tine, each	5.67	5.91	6.20	6.51	6.94
Hoes, 7-inch blade, each	2.90	3.01	3.19	3.37	3.56
Milk cans, 10 gallons, each	15.80	16.20	16.20	16.60	16.30
Milk pails, 12 quarts, each	2.72	2.83	2.87	3.02	3.07
Rope, manila, per pound	.890	.898	.914	.944	.980
Binder twine, per pound	.264	.257	.250	.256	.260
New baskets, round stave, bushel, with cover, per dozen	5.83	5.99	6.20	6.48	6.76
Lead arsenate, per pound	.368	.406	.391	.404	.419
Fertilizer:					
Mixed fertilizer:					
0-20-20, per ton	65.60	62.60	57.50	59.70	61.50
3-9-9, per ton	60.10	60.50	58.40	62.00	63.20
4-8-12, per ton	55.00	53.90	53.40	56.40	60.10
4-12-12, per ton	43.00	43.00	42.20	45.70	48.90
5-10-10, per ton	51.40	50.80	48.70	51.70	54.20
5-10-15, per ton	45.80	45.60	44.40	48.30	51.00
5-20-20, per ton	74.20	71.60	65.40	69.20	73.70
6-8-8, per ton	43.00	43.20	43.20	45.00	48.50
6-24-24, per ton	85.00	80.10	72.80	75.90	79.90
10-10-10, per ton	62.60	61.60	58.40	60.40	62.30
12-12-12, per ton	70.40	67.90	63.70	65.80	68.80
18-46-0, per ton	108.00	98.10	93.00	94.80	95.20
Nitrate of soda, per ton	60.10	59.80	60.00	62.50	65.10
Sulphate of ammonia, per ton	54.80	53.60	52.60	52.30	51.50
Ammonium nitrate, per ton	73.70	66.60	60.90	60.50	63.60
Superphosphate, 20% P ₂ O ₅ , per ton	42.10	43.20	44.20	46.20	48.40
Superphosphate, 46% P ₂ O ₅ , per ton	82.20	76.80	73.70	75.70	76.60
Phosphate rock, per ton	22.00	21.80	22.30	24.00	24.50
Ammonium phosphate, 16-20, per ton	80.20	78.50	77.40	76.70	76.90
Muriate of potash, 60% K ₂ O, per ton ⁴⁴	52.20	48.80	46.50	52.50	58.00
Agricultural limestone, spread on field, per ton	5.18	5.28	5.44	5.59	5.92
Livestock:					
Feeders and stockers:					
Cattle and calves, per 100 pounds	24.60	25.80	29.40	30.50	32.00
Lambs, per 100 pounds	21.30	24.20	26.90	26.30	24.30
Hogs (40-60 lbs. av.), per 100 pounds ⁴⁵	33.50	33.00	39.20	42.90	29.60
Baby chicks, straight run, per 100	11.40	11.70	11.80	11.70	11.40
Turkey poult, each	.557	.545	.547	.552	.564
Feed:					
Alfalfa hay, baled, per ton	34.10	32.90	34.10	34.70	37.60
Other hay, baled, per ton	32.30	31.20	31.70	33.00	35.00
Cottonseed meal, 41% per 100 pounds	5.35	5.24	4.98	5.40	5.54
Soybean meal, 44% per 100 pounds	5.36	5.34	5.27	5.62	5.68
Tankage, per 100 pounds	6.31	6.29	6.44	7.33	6.90
Bran, per 100 pounds	3.62	3.46	3.51	3.73	4.01
Middlings, per 100 pounds	3.72	3.55	3.61	3.81	4.09
Mill run, per 100 pounds	3.33	3.21	3.21	3.32	3.66

See footnotes at end of table.

Table 681.—Prices paid by farmers: Prices, by commodities, United States, 1967-71¹—Continued

Commodity and unit	1967	1968	1969	1970	1971
	Dollars	Dollars	Dollars	Dollars	Dollars
Feed—Continued					
Cornmeal, per 100 pounds	3.42	3.16	3.28	3.50	3.72
Hominy feed, per 100 pounds	3.50	3.30	3.48	3.64	3.85
Layer feed, per ton ⁴⁶	86.00	80.00	80.00	84.00	87.00
Broiler grower, per ton ⁴⁶	93.00	89.00	90.00	95.00	98.00
Chick starter, per ton ⁴⁶	97.00	93.00	94.00	99.00	101.00
Dairy feed:					
14 percent protein, per ton	69.00	67.00	67.00	70.00	73.00

32 percent protein, per ton		98.00	99.00	104.00	109.00
40 percent and over protein, per ton		109.00	108.00	115.00	119.00
Stock salt, per 100 pounds	1.70	1.74	1.78	1.88	2.00
Seeds:					
Barley, per bushel	2.01	2.06	2.00	2.07	2.20
Corn, hybrid, per bushel	12.90	13.90	13.70	15.70	18.80
Oats, per bushel	1.61	1.66	1.65	1.75	1.83
Potatoes, per 100 pounds	3.38	2.92	3.60	3.81	3.44
Rye, per bushel	2.48	2.55	2.57	2.60	2.73
Soybeans, per bushel	4.40	4.05	4.16	4.02	4.87
Wheat, per bushel	2.73	2.47	2.38	2.47	2.57
Grain sorghums, hybrid, per 100 lb.	19.20	19.20	19.50	20.80	21.90
Alfalfa, uncertified, per 100 pounds	50.60	58.00	54.40	57.90	54.60
Alfalfa, certified, per 100 pounds	60.20	65.10	62.20	65.80	63.40
Alsike clover, per 100 pounds	32.50	32.60	37.60	37.60	37.90
Red clover, per 100 pounds	40.30	48.80	57.40	60.30	56.90
Sweetclover, per 100 pounds	17.20	17.40	24.50	23.60	21.30
Lespedeza, Korean, per 100 pounds	22.40	25.60	26.20	24.20	22.70
Sudangrass, per 100 pounds	13.20	13.50	13.40	15.80	16.00
Timothy, per 100 pounds	22.30	20.00	23.60	23.30	24.20

¹ Annual average of prices at independent and chain stores. Prices paid by farmers are collected for the most part from retail establishments located in small cities, town, and in rural areas through using questionnaires sent and returned by mail.

2 Per quart.

3 "Cola drinks, per 16 fluid ounces" prior to 1970.

4 "Shirts, cotton, work" prior to 1971.

5 "Undershirts, sleeveless" prior to 1971.

6 "Shorts" prior to 1971.

7 "Socks, cotton, work" prior to 1971.

8 "Suits, wool, 1 pair pants" prior to 1970.

9 "Trousers, extra, woolen" prior to 1970.

10 "Trousers, artificial-fiber mixtures" prior to 1970.

11 "Shirts, broadcloth" prior to 1971.

12 "Overcoats, all wool" prior to 1970.

13 "Shoes, dress, sizes 2½-6" prior to 1971.

14 "Dresses, house, percale" prior to 1970.

15 "Dresses, street, cotton" prior to 1970.

16 "Dresses, rayon, medium quality" prior to 1970.

17 "Panties or briefs, nylon" prior to 1971.

18 "Slips, nylon" prior to 1971.

19 "Nightgowns, cotton" prior to 1971.

20 "Coats, all new wool, heavy" prior to 1970.

21 "Dresses, cotton, sizes 7-14" prior to 1970.

22 "Percale, 36-inch width" prior to 1971.

23 "Gingham, 36-inch width" prior to 1971.

24 "Laundry starch, packaged, per pound" prior to 1970.

25 "Radios, table model, 4 tubes plus rectifier, without clock" prior to 1971.

26 Viewable picture area defined by Federal Trade Commission Jan. 1, 1967.

27 54-inch innerspring prior to 1969.

28 "Sheets, 72 by 108 inches, percale" prior to 1971.

29 No. 2 and better prior to 1971.

30 Under No. 2 prior to 1971.

31 Includes Standard and better.

32 Includes "utility" and "economy."

33 Interior insulating board prior to 1969.

34 7.75-7.50 x 14 prior to 1970.

35 Current coverage includes Chevrolet Chevelle Malibu, Ford Gran Torino, and Plymouth Satellite.

36 Current coverage includes Chevrolet Impala, Ford Galaxie, and Plymouth Fury III.

37 Current coverage includes Pontiac Catalina and Buick LeSabre.

38 Coverage includes Ford and Chevrolet.

39 Coverage includes Ford, Chevrolet, International, and Dodge.

40 25-34.9 drawbar horsepower prior to 1969.

41 16-tube prior to 1969.

42 20-tube prior to 1969.

43 12 feet prior to 1969.

44 55 percent K₂O prior to September 1967.

45 Price series based on prices for 40-60 pound feeder pigs.

46 Specification changed to "complete feed."

Table 682.—Farm income: Gross and net income from farming, United States, 1939-71¹

Year	Cash receipts			Nonmoney income			Gross income			Net income of farm operators

¹ Includes Alaska and Hawaii, beginning 1960. ² Preliminary.

Economic Research Service.

FOOTNOTES FOR TABLE 685

¹ Includes Alaska and Hawaii, beginning 1960.² Includes returns from farming operations to resident farm operators for their capital, labor, and management, after deduction of farm production expenses (there is no allowance in the item farm production expenses for a return on investment in farm capital). Also includes farm wages and other labor income received by hired farm-resident workers.³ Includes all income received by farm residents from nonfarm sources such as wages and salaries from nonfarm employment, nonfarm business and professional income, rents from nonfarm real estate, dividends, interest, royalties, unemployment compensation, and Social Security payments.⁴ Preliminary.

Economic Research Service.

¹ Includes labor used on crops, livestock, and overhead. Farm maintenance or overhead work includes time spent on fencing, repairs to buildings, machinery and equipment, farmwoods, pastures, general land maintenance, farm business, and other miscellaneous work.

² Excludes horses and mules; includes wool and minor livestock which are excluded from separate enterprises shown.

³ Cattle and calves, sheep and lambs, and hogs.

⁴ Chickens, broilers, and turkeys.

⁵ Includes hay seeds, pasture seeds, and cover-crop seeds; farm gardens; and minor crops which are excluded from separate crops shown.

⁶ Corn for grain, oats, barley, and sorghum grain.

⁷ All hay, corn silage, and sorghum forage and silage.

⁸ All wheat, rye, buckwheat, and rice.

⁹ Potatoes, sweetpotatoes, dry edible beans, dry field peas, and truck crops.

¹⁰ Fruits, berries, and tree nuts.

¹¹ Sugarcane; sugarcane for sugar and seed, sugarcane sirup, and maple products.

¹² Soybeans, peanuts, flaxseed, and tung nuts.

¹³ Preliminary.

Economic Research Service. Data for 1910-28 in *Agricultural Statistics*, 1962, table 696.

Table 690.—Fertilizers: Quantities¹ of commercial fertilizers consumed and their available plant-nutrient content,² by States and possessions, averages 1950–54 and 1960–64, and years beginning July 1, 1969 and 1970

¹ Includes the chlorinated compounds aldrin, chlordane, dieldrin, endrin, heptachlor, and toxaphene; includes terpene polychlorines, beginning 1965.

² Preliminary.

³ Export categories not comparable with those shown in earlier issues; in 1965, the Department of Commerce discontinued separate reporting of some of the individual items previously listed.

⁴ Includes copper sulfate and agricultural sulfur, which were previously listed separately.

⁵ Beginning 1965, preparations containing 2,4-D and 2,4,5-T included in "Other herbicides."

⁶ Includes calcium arsenate, lead arsenate, and nicotine sulfate, which were previously listed separately.

Agricultural Stabilization and Conservation Service. Compiled from data supplied by the U.S. Department of Commerce, the U.S. Tariff Commission, the U.S. Department of Interior, and trade sources.

¹ Average of weekly price quotations.

² Gamma unit price; i.e., price per pound of 36 percent gamma material is 36 times the unit price quoted.

³ Price for flake or chip grades; price for powdered is 0.75 cent to 1 cent higher.

Agricultural Stabilization and Conservation Service. Compiled from the Oil, Paint, and Drug Reporter. Data for 1944-48 in *Agricultural Statistics*, 1967, table 704.

CHAPTER X

TAXES, INSURANCE, CREDIT, AND COOPERATIVES

The statistics in this chapter deal with taxes, insurance, agricultural credit, and farm cooperatives. Some of the series were developed in connection with research activities of the Department, while others, such as data from agricultural credit agencies, are primarily records of operations.

Table 696.—Taxes levied on farm real estate and personal property: Amount, amount per acre, index numbers of amount per acre, United States, 1929-71¹

Year	Farm real estate			Farm personal property <i>Million dollars</i>	
	Amount <i>Million dollars</i>	Tax per acre			
		Amount <i>Dollars</i>	Index (1967=100)		
1929	567.5	0.58	32	83.9	
1930	566.8	.57	31	81.3

¹ Estimates of numbers in operation, not registration counts by States.

² Special fuel tax rates, where they differ from gasoline rates, are shown in parentheses; when there is more than one, the first rate is for diesel fuel and the second for liquefied petroleum gases.

³ Weighted average tax rate.

Table 699.—Motor vehicles: Registrations, motor-fuel consumption, and road-user taxes (levied by the States), United States, 1949–71¹

Year	Motor-vehicle registrations and fees			Motor-fuel consumption and taxes

¹ Contract rates on loans through Federal land bank associations. Beginning 1961, some land banks have charged temporary rates that were lower than the contract rates. In computing the average rates, each Farm Credit district is given equal weight; within districts, rates are weighted by the number of days in force.

² Based on bonds outstanding at end of each year. Beginning 1950, represents net cost to banks. Based on face rates prior to 1950. Excludes bonds owned by issuing agency.

³ Average market yields on representative outstanding issues.

⁴ Rates represent interest (less patronage refunds), service fees, cost of record searches, and filing and releasing mortgages, etc. paid by borrowers as percent of average loans outstanding during year.

⁵ Annual interest income on loans, discounts, and notes receivable as a percentage of average balance of such items outstanding during the year.

⁶ Beginning 1950, represents weighted average net cost to banks of debentures issued each year. Based on face rates of debentures prior to 1950.

⁷ Excludes rates on loans secured by CCC documents.

⁸ Represents weighted average net cost to banks of debentures outstanding at end of each year. No debentures issued prior to 1950.

⁹ Board of governors of Federal Reserve System. Annual averages of prevailing open-market rates in New York City.

¹⁰ Board of governors of Federal Reserve System. Annual ranges in discount rates on advances secured by Government obligations maturing or callable beyond 1 year and discounts of advances secured by eligible paper.

¹¹ Excludes recording and filing fees paid to county and other public recording offices.

¹² Comparable representative data not available.

¹³ A rate of $\frac{1}{2}$ percent was effective from Oct. 30, 1942-Apr. 23, 1946, on advances secured by Government obligations maturing or callable in 1 year or less.

¹ For States included in regions, see table 713.² Estimated as payable during calendar year. Excludes Alaska and Hawaii.

Economic Research Service.

FOOTNOTES FOR TABLE 711

¹ Includes mortgages in process of foreclosure.² Includes United States legal reserve companies only. Includes regular mortgages and purchase-money mortgages.³ Includes direct farm-ownership loans, direct soil and water loans to individuals, and rural-housing loans to farmers. Also includes direct farm-ownership loans made from State Corporation trust funds.⁴ Includes loans held by all operating commercial, savings, and private banks, individuals, and miscellaneous lenders. State estimates are approximations and should be used only as general indicators of the amount of mortgage debt held by this group. See table 717 for State data held by all operating banks (classified by location of bank rather than by location of security).⁵ Includes District of Columbia.

Economic Research Service.

¹ Excludes Alaska, Hawaii, Puerto Rico, and U.S. possessions.² Loans on regular mortgages only for 1958 and earlier years. Beginning June 30, 1959, includes purchase-money mortgages and sales contracts. Includes loans by the Land Bank Commissioner made on behalf of the Federal Farm Mortgage Corporation. Authority to make Land Bank Commissioner loans expired July 1, 1947, except for the limited purpose of refinancing loans previously made by the Land Bank Commissioner. Liquidation of Commissioner loans was completed June 30, 1955. For 1955 and earlier years, the data in this table on Federal land bank loans "made" differ from the data in table 719 only because Puerto Rico is excluded. Prior to 1956, the data on Federal land bank loans made in both this table and table 719 included the outstanding loan balance as well as new money advanced in a part of the cases where existing borrowers obtained additional loans. Beginning 1956, however, an effort was made to include the outstanding balance in loans made for a larger number of existing borrowers obtaining additional loans. By 1958, the data in this table include all outstanding loan balances in cases where borrowers obtained additional financing.³ Estimates based on reports from counties including a substantial sample of farms in the United States. Includes purchase-money mortgages and sales contracts to the extent they were recorded.⁴ Includes farm-mortgage loans made by the Farmers Home Administration, and by miscellaneous lenders.Farm Credit Administration. Prepared in cooperation with the 12 Federal land banks. Data for 1919-28 in *Agricultural Statistics, 1957*, table 712.

¹ Excludes Alaska and Hawaii, except as indicated in footnote 9.

² Includes regular mortgages, purchase-money mortgages, and sales contracts. Federal land bank and Federal Farm Mortgage Corporation mortgages in process of foreclosure were estimated for 1951 and 1952.

³ Loans were made by the Land Bank Commissioner. Lending authority expired July 1, 1947. On June 30, 1955, loans of the FFMC were sold to the Federal land banks.

⁴ Liquidation of the joint-stock land banks was completed Apr. 26, 1951.

⁵ Includes farm-purchase, farm-enlargement, farm-development, project-liquidation, and direct soil and water loans to individuals, and loans for these purposes from State Corporation trust funds. Includes rural-housing loans to farmers. Beginning October 1961, rural-housing loans were made on nonfarm tracts; these loans are included in the amount outstanding reported for Jan. 1, 1962, but excluded for 1963 to date.

⁶ Compiled from reports of life insurance companies, "Best's Life Insurance Reports," "Spectator Life Insurance Yearbook," and data from Life Insurance Association of America and Institute of Life Insurance. Includes legal reserve companies only. Includes regular mortgages, purchase-money mortgages, and sales contracts; beginning 1965, excludes sales contracts.

⁷ Includes all operating commercial, savings, and private banks. Also includes bank holdings of soil and water loans and farm-ownership loans insured by the Farmers Home Administration.

⁸ Amounts are residuals or differences between amounts reported by institutional lenders and estimates of total farm-mortgage debt. They roughly measure the farm-mortgage debt held by individuals and other nonreporting lenders.

⁹ Beginning 1960, data for reporting lending institutions in Alaska and Hawaii are included. No estimates of total farm-mortgage debt for these States are available.

148 States only. Real estate mortgages or deeds of trust are taken as supplemental evidence for some of these loans.

² Includes loans to individuals guaranteed by the Community Credit Corporation and certificates of interest in pool of growers' notes, prior to 1966. After Jan. 1, 1966, data exclude CCC guaranteed loans and pooled certificates of interest of growers.

³ Loans "made" include renewals.

⁴ Excludes loans guaranteed by CCC, and loans held by associations in liquidation.

⁵ Excludes loans secured by CCC documents.

⁶ For separate data on operating loans and emergency crop and feed loans, 1949-65, see *Agricultural Statistics 1965*, table 722.

⁷ Economic opportunity loans are made to farm and nonfarm rural residents. Through June 30, 1971, approximately 56 percent of the economic opportunity loans in the 48 States were made to farmers.

⁸ Includes only direct loans to soil and water associations, rural rental housing, water-shed protection, flood prevention, rural renewal, and resource conservation and development organizations, or economic opportunity cooperatives, defense relocation corporations, and rural rehabilitation or resettlement project cooperative associations.

⁹ Loans "outstanding" are cumulative net advances minus principal repayments; loans "made" are net advances to borrowers.

¹⁰ Approximately 2/3 of the individuals served by these cooperatives are farmers.

¹¹ Principally loans to public bodies and to power companies.

¹² Loans to commercial telephone companies.

¹³ Includes direct loans made and held by CCC. Excludes pooled loans against which certificates of interest were issued and also loans guaranteed by CCC held by other lending agencies.

Economic Research Service. Data for 1939-43 in *Agricultural Statistics, 1967*, table 723.

¹ Includes loans of national and State commercial, mutual savings, stock savings, and private banks. Loans are classified according to location of bank and, therefore, are not strictly comparable with data for other lenders which are classified according to location of farm. ² Prior to 1972, bank holdings included farm-ownership loans and soil and water loans insured by the Farmers Home Administration; banks now report these loans as U.S. Government securities. ³ Mariana Islands, Puerto Rico, Samoa (American), and Virgin Islands.

Table 718.—Farm loans: Number and amount guaranteed or insured by the Veterans Administration, United States, 1949–71

Year	Loans			Amount of loans	Amount of guaranty or insurance

Total	440	303,837	9,421,290	5,334,460	6,273,191	6,115,524

¹ No loans have been made in Alaska and Hawaii. ² Includes renewals. ³ New Hampshire, Massachusetts, and Rhode Island are served by the Production Credit Association in Connecticut.

Farm Credit Administration.

FOOTNOTES FOR TABLE 719

¹ Includes Puerto Rico.

² Includes renewals.

³ Includes Federal intermediate credit bank direct loans to cooperative associations; such loans were not made after Dec. 31, 1956.

Farm Credit Administration. Data for 1929-38 in *Agricultural Statistics, 1967*, table 729.

FOOTNOTES FOR TABLE 721

¹ Includes Puerto Rico.

² Includes Federal intermediate credit bank direct loans to cooperatives; such loans were not held after 1957.

Excludes interagency loans.

Farm Credit Administration. Data for 1929-38 in *Agricultural Statistics, 1967*, table 731.

1972	—	658,468	—	75,889	116	—	41,991	1,192,872

¹ Includes production and subsistence and loans from Corporation trust funds.

² Includes production and subsistence, rural rehabilitation, construction and wartime adjustment loans, and loans from Corporation trust funds.

³ Includes production, economic, and special emergency loans; fur, orchard, and flood damage loans; and Regional Agricultural Credit Corporation loans made by Farm Credit Administration.

⁴ In addition to the types of loans reported in the preceding column, includes flood and windstorm restoration loans.

⁵ Includes direct and insured soil and water loans to associations, rural rental housing (known as senior citizens rental housing from Jan. 1, 1964 through June 30, 1966) and rural housing site loans to organizations; direct water facilities loans to associations, watershed, flood prevention, rural renewal, resource conservation and development loans to organizations, and economic opportunity loans to cooperatives; and insured farm labor housing and Indian tribe land acquisition loans to organizations.

⁶ In addition to the types of loans reported in the preceding column, includes direct loans to defense relocation corporations and rural rehabilitation or resettlement project cooperative associations.

Farmers Home Administration. Data for 1944–48 in *Agricultural Statistics, 1967*, table 737.

FOOTNOTES FOR TABLE 723

¹ Amounts of loans made represent obligations and include loans to new borrowers and subsequent loans to borrowers who received an initial loan in a prior year. Amounts outstanding are loan advances less principal repayments.

² Includes loans for farm purchase, enlargement, development, and refinancing purposes.

³ Includes 10 Recreation loans for \$419,180 in 1968, 77 for \$2,225,060 in 1969, 31 for \$956,640 in 1970, and 23 for \$1,019,070 in 1971.

⁴ Includes Recreation loans outstanding for \$100,095 as of Jan. 1, 1969, \$2,466,267 as of Jan. 1, 1970, \$3,477,641 as of Jan. 1, 1971, and \$4,294,695 as of Jan. 1, 1972.

Farmers Home Administration. Data for 1944–48 in *Agricultural Statistics, 1967*, table 735.

¹ Includes Puerto Rico.

² Seasonal loans.

³ Term loans. After June 30, 1966, loans are classified as "seasonal" and "term." Total amount of loans outstanding is the same as it would have been under the old classification.

Farm Credit Administration. Data for 1934-38 in *Agricultural Statistics, 1967*, table 734.

Table 727.—Farmers' cooperatives: Number of marketing, farm-supply, and related-service cooperatives and business volume, United States, 1969-70¹ (preliminary)

Item	Cooperatives handling	Gross business (includes intercooperative business)	Net business (excludes intercooperative business) ²
Products marketed:			
Beans and peas (dry edible)	59	61,727	37,459
Cotton and cotton products	554	501,891	434,069
Dairy products	971	6,062,368	5,126,314
Fruits and vegetables	499	2,212,737	1,778,026
Grain, soybeans, and soybean meal and oil	2,539	4,760,471	3,005,667
Livestock and livestock products	546	2,292,470	2,154,102
Nuts	69	266,532	254,250
Poultry products	295	707,514	587,679
Rice	55	421,569	346,472
Sugar products	66	635,046	634,285
Tobacco	28	376,705	376,705
Wool and mohair	189	19,327	19,327
Miscellaneous ³	132	70,063	61,645
Total farm products	4 5,415	18,388,420	14,816,000
Supplies purchased:			
Building materials	2,268	213,784	156,687
Containers	1,044	137,299	39,399
Farm machinery and equipment	1,574	183,865	116,065
Feed	4,214	1,750,229	1,278,688
Fertilizer	4,294	1,185,925	657,145
Meats and groceries	717	108,898	82,836
Petroleum products	2,774	1,338,399	864,199
Seed	4,007	200,148	142,365
Spray and dusts (farm chemicals)	3,721	274,662	164,979
Other supplies ⁴	4,556	593,150	370,848
Total farm supplies	4 6,209	5,986,350	3,873,211
Receipts for services:			
Trucking, cotton ginning, storage, grinding, locker plants, miscellaneous	4 5,353	6 391,176	6 391,176
Total business	4 7,790	24,765,955	19,080,387

¹ Includes Alaska and Hawaii.

² Represents value at the first level at which cooperatives transact business for farmers.

³ Includes coffee, forest products, fur pelts, hay, hops, nursery stock, tung oil, and other farm products not separately classified.

⁴ Because many cooperatives do more than one type of business, these totals are less than the number that would be obtained by adding the number of cooperatives marketing individual products, handling individual supplies, or providing individual services.

⁵ Includes plant equipment, automotive supplies, hardware, chicks, and other supplies not separately classified.

⁶ Receipts for services related to marketing and purchasing activities, but not included in the volumes reported for these activities.

Farmer Cooperative Service. Based on records from cooperatives reporting to the Service.

United States.....	7,790	6,354,980	19,080,387

¹ Includes cooperatives headquartered both in and outside the State handling business originating in the State. No totals can be shown because of duplication.

² Represents value at the first level at which cooperatives transact business for farmers.

³ Volume of a sugar cooperative located in Hawaii but headquartered in California is included in California.

⁴ Sales to foreign countries.

Farmer Cooperative Service.

Table 730.—Farmers' cooperatives: Types, numbers, and memberships, United States

Type	Year or date of data	Associations	Estimated memberships or participants
Marketing and farm supply:			
Marketing ¹	1969-70.....	² 4,763	3,102,745
Farm supply ¹	1969-70.....	³ 2,775	3,222,435
Miscellaneous services ¹⁴	1969-70.....	⁶ 181	29,800
Service:			
Federal land bank associations ⁶	June 30, 1971.....	594	⁷ 405,767

Rural telephone cooperatives ¹⁰	Jan. 1, 1971.....	235	608,746
Farmers' mutual fire insurance companies ⁹	Jan. 1, 1971.....	1,209	2,500,000
Production:			
Mutual irrigation companies ¹³	Jan. 1, 1970.....	7,500	161,000
Dairy-herd-improvement associations ¹⁴	Jan. 1, 1972.....	1,247	56,650
Dairy-cattle artificial breeding associations ¹⁴	1970.....	15	¹³ 216,447

¹ Farmer Cooperative Service, U.S. Department of Agriculture.

² When associations marketing farm products but principally engaged in providing some other services are included, the total is 5,415.

³ When associations purchasing farm supplies but principally engaged in providing some other services are included, the total is 6,209.

⁴ Includes trucking, storage, grinding, locker plant, and other services.

⁵ When associations providing miscellaneous services but principally engaged in marketing or farm-supply activities are included, the total is 5,353.

⁶ Farm Credit Administration.

⁷ Represents the number of Federal Land Bank loans outstanding as of June 30, 1971.

⁸ Cooperative associations borrowing from banks for cooperatives.

⁹ Farmer Cooperative Service, U.S. Department of Agriculture estimates.

¹⁰ Rural Electrification Administration, U.S. Department of Agriculture.

¹¹ Includes associations that are REA repaid borrowers.

¹² Includes only memberships of associations financed by REA.

¹³ Census of Irrigation, Department of Commerce.

¹⁴ Dairy Cattle Research Branch, Agricultural Research Service, U.S. Department of Agriculture.

¹⁵ Number of herds serviced by cooperatives.

Farmer Cooperative Service.

Table 731.—Rural Electrification Administration: Number and amount of electrification loans approved by purpose of loan, by States and Territories, from organization (May 11, 1935) to Jan. 1, 1972¹

State and Territory	Total loans			Loans to cooperative associations ²		Loans by purpose			Miles of line provided for by loans ⁴	Consumers provided for by loans ⁴

¹ State totals represent data for borrowers incorporated within the State.

² United States totals for other types of borrowers are as follows: Public Power Districts, 54 borrowers, \$245,392,276; municipalities and other Government authorities, 34 borrowers, \$173,132,376; power companies, 25 borrowers, \$24,856,862.

³ Funds loaned to corporate borrowers for relocating to individuals. Includes wiring, plumbing, and refrigeration installations.

⁴ Includes miles energized and consumers served, shown in tables 732 and 733.

Table 732.—Rural Electrification Administration: Advances to, and operating statistics of, electric borrowers, 1971, by States and Territories¹

¹ State totals represent data for borrowers incorporated within the State. ² Actual funds advanced out of loans approved, as shown in table 731. ³ Cumulative. ⁴ Preliminary. ⁵ Includes data at time of repayment of loan for borrowers whose loans have been repaid in full. As of Jan. 1, 1971, there were 67 such borrowers with 26,399 miles energized and 148,547 consumers served. ⁶ Includes 37,737,810,000 kw.-hr. sold by one REA borrower to another. ⁷ Excludes energy sales and revenues of power sold by one REA borrower to another. ⁸ Includes rural nonfarm and farm consumers.

1971 ²	1,766,495	1,343,836	84,346	209,488	156,972	7,708,276

¹ Beginning 1970, includes nonoperating margins, generation and transmission capital credits, and miscellaneous revenue deductions not shown elsewhere in this table. Prior years includes nonoperating margins and miscellaneous revenue deductions. Includes patronage capital.

² Preliminary.

Rural Electrification Administration. Data for 1941-43 in *Agricultural Statistics, 1967*, table 742.

FOOTNOTES FOR TABLE 728

¹ Beginning 1950, includes Alaska and Hawaii.

² Reports of cooperatives are included either for the calendar year or for fiscal years ending between July 1 of the calendar year shown and June 30 of the following calendar year, with limited exceptions.

³ Includes independent local cooperatives, centralized cooperatives, and federations of cooperatives. Cooperatives are classified according to their major activity. If, for example, more than 50 percent of a cooperative's business is derived from marketing activities, it is included as a marketing cooperative. Prior to 1950, total dollar volume of the marketing cooperatives was classified as marketing business even though a portion of this volume was derived from handling supplies or performing services for patrons. Similarly, the total volume of farm-supply cooperatives was classified as farm-supply business even though a portion of their business originated from the sale of various farm commodities or from performing trucking and other services for patrons. In 1950, the method of reporting was revised so that cooperatives reported sales of each major commodity marketed, the value of each major type of supply purchased, and receipts from major types of services performed for patrons. Beginning 1950, the total marketing volume, therefore, consists only of the value of products actually marketed and farm-supply volume consists only of the value of individual supplies purchased.

⁴ In 1950, a separate category was set up for cooperatives whose major activity is providing services related to marketing and farm-supply activities.

⁵ Includes members (those entitled to vote for directors) but does not include nonvoting patrons. (Some duplication exists because some farmers belong to more than one cooperative.)

⁶ Receipts for services related to marketing and purchasing activities, but not included in the volumes reported for these activities.

⁷ Preliminary.

⁸ Includes service receipts for cooperatives rendering essential services either in marketing or farm-supply purchasing.

⁹ The estimated gross business figures for 1950 and subsequent years cannot be compared with the estimated business for previous years because in previous figures not all of the supply sales at wholesale level for other cooperatives or terminal market sales for local cooperatives were included. Estimated gross business, however, includes all business reported between cooperatives, such as the wholesale business of farm-supply cooperatives with other cooperatives or terminal market sales for local cooperatives.

¹⁰ The estimated net business figures for 1950 and subsequent years cannot be compared with the estimated business for previous years because previous figures included some supply sales at the wholesale level for other cooperatives and some terminal market sales for local cooperatives. Estimated net business represents the value at the first level at which cooperatives transact business for farmers. Figures are adjusted for duplication resulting from intercooperative business.

Farmer Cooperative Service. Based on records from cooperatives reporting to the Service. Data for 1934-38 in *Agricultural Statistics, 1967*, table 676.

CHAPTER XI

STABILIZATION AND PRICE-SUPPORT PROGRAMS

The statistics in this chapter relate to activities of the Commodity Credit Corporation, cropland diversion programs, and marketing agreement and order programs for fruits and vegetables. Statistics for Federal Milk Marketing Order programs are contained in chapter VIII.

Table 740.—Commodity Credit Corporation: Price support granted on 1970 crop, United States and Territories¹

Commodity	Unit	Through June 30, 1971	
		Quantity	Value
Cotton, upland.....	Bale.....	2.4	247.2
Cotton, extra-long staple.....	do.....	(2)	5.1
Wheat.....	Bushel.....	254.3	308.5
Corn.....	do.....	321.1	330.3
Milk and butterfat:			
Butter.....	Pound.....	344.9	241.4
Cheese.....	do.....	61.2	34.4
Dried milk.....	do.....	448.0	139.6
Tobacco.....	do.....	172.0	158.0
Rice, rough.....	Cwt.....	21.5	110.0
Grain sorghum.....	Bushel.....	30.5	26.4
Soybeans.....	do.....	146.5	327.8
Peanuts, farmers' stock.....	Pound.....	878.1	119.8
Peanuts, shelled.....	do.....	139.7	23.5
Oats.....	Bushel.....	112.2	65.1
Flaxseed.....	do.....	13.5	32.9
Barley.....	do.....	27.6	22.2
Beans, dry edible.....	Cwt.....	1.4	9.2
Tung oil.....	Pound.....	3.7	1.0
Rye.....	Bushel.....	12.2	11.8
Honey.....	Pound.....	40.6	5.5
Special purchase programs ³			68.4
Total.....			2,288.1

¹ Consists of loans made and purchases.

² Less than 50,000.

³ Commodities included in "Special purchase programs" for 1970 crop are corn products, wheat products, rolled oats, refined cottonseed oil (salad oil, shortening, and vegetable oil products), and rice cereal.

Agricultural Stabilization and Conservation Service.

¹ Commodities which were owned by CCC in some years but not shown in this table are as follows: Cottonseed and products, naval stores, wheat products, corn products, oat products, vegetable oil, honey, mixed feed, and linseed oil.

² Less than 500,000 units.

³ Less than 50,000 units.

⁴ Farmers' stock basis; includes farmers' stock equivalent of shelled peanuts.

⁵ Rough basis; includes milled rice in rough equivalent.

⁶ The total value of all commodities owned by CCC, including price-supported commodities not shown and commodities acquired under programs other than price-support programs.

¹ Data are for crop years.² Preliminary.³ Not available.⁴ Less than \$500.

Agricultural Stabilization and Conservation Service. Totals may not add due to rounding.

FOOTNOTES FOR TABLE 747

¹ Loans made directly by Commodity Credit Corporation. As far as possible, loans have been distributed according to the location of producers receiving the loans. Direct loans to cooperative associations for the benefit of members have been distributed according to the location of the association.

² Includes storage facility and equipment loans.³ 500 or less.⁴ Storage charges for the initial loan period to be paid by CCC on extended warehouse storage grain loans.⁵ Denotes adjustment of prior activity.

Agricultural Stabilization and Conservation Service.

¹ Total farms are not the sum of the farms by kinds of feed grain since individual farms may produce more than one.
² Includes all farms earning a diversion, price support, or substitute crop payment and farms diverting to substitute crops for which there was no diversion payment.
³ Based on 1959 and 1960 averages, including acreage in the Conservation Reserve Program and proven acreage.
⁴ Computed on the basis of acreages diverted for payment plus estimated feed grain acreages diverted

at the 20 percent level without payment and acres set aside in 1971.

⁵ Includes feed grain and wheat planted under the feed grain, wheat, and cotton programs.

⁶ Certificates earned.

⁷ Computed payment at \$1.64 per bushel.

Agricultural Stabilization and Conservation Service.

FOOTNOTES FOR TABLE 759

¹ National acreage allotments proclaimed by the Secretary of Agriculture under the Agricultural Adjustment Act of 1938, as amended. In most years, allotments were accompanied by marketing quotas.² Excludes increases in allotments granted under special legislation, as for durum for years 1954-57 and 1962, and for small wheat farms, 1964-66.³ The commercial corn area included the following number of counties: 1954, 834; 1955, 805; 1956, 840; 1957, 894; and 1958, 932.⁴ Adjusted in certain years to include increases granted under special legislation.⁵ Totals of individual allotments. Beginning 1966, flue-cured allotments shown are before adjustments for undermarketings and overmarketings the previous year. Allotments are also proclaimed for types other than flue-cured and burley.⁶ Proclaimed but suspended.⁷ Suspended and replaced by 51-million-acre base acreage.⁸ Corn allotments abolished after referendum held Nov. 25, 1958.⁹ Marketing quotas voted out for 1964 and have not been in effect in succeeding years.¹⁰ Agricultural Act of 1970 changed wheat allotments to domestic allotments for 1971, 1972, and 1973.¹¹ Acreage allotments discontinued.Agricultural Stabilization and Conservation Service. Data for 1938-48 in *Agricultural Statistics, 1967*, table 762.

South Texas onions	265	14,100
Texas tomatoes	100	2,800
Potatoes:		
Colorado	810	16,500
Idaho and eastern Oregon	2,800	126,000
Maine	1,750	64,000
New England, except Maine	200	10,100
Oregon and Northern California	850	21,000
Southeastern States (Virginia-North Carolina)	330	14,400
Washington	450	43,700
Nuts:		
California almonds	7,000	88,440
Oregon, Washington, and California walnuts	8,450	54,981
Oregon and Washington filberts	1,700	5,318
Peanuts ²	82,495	406,878
Washington, Oregon, Idaho, and California hops	222	32,728
Total (49 orders)		2,254,410

¹ Included under Florida oranges, grapefruit, tangerines, and tangelos.

² Marketing agreement only; covers States of Alabama, Florida, Georgia, Mississippi, South Carolina, Arizona, Arkansas, California, Louisiana, New Mexico, Oklahoma, Texas, Missouri, North Carolina, Tennessee, and Virginia.

CHAPTER XII

AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS

Statistics in this chapter concern conservation of various resources, particularly soil, water, and timber. Forestry statistics include acres of private and public-owned forest land, timber production, imports and exports, pulpwood consumption and paper and board production, area burned over by forest fires, livestock grazing, and recreational use of national forest lands. Data on production, supply, and distribution of naval stores are included because of their close association with forestry statistics.

Six tables on forestry showing data for forest land, timber volume, timber drain, and timber cut and growth have been included in this chapter with current information. Data for an earlier period for this series appear in the 1970 edition.

Table 763.—Rural Environmental Assistance Program:¹ Assistance to farmers for carrying out conservation and pollution abatement practices, United States and Caribbean area, by program years, 1952-71

¹ For specific procedure on organization of soil conservation districts, reference should be made to each of the respective State soil conservation district's laws. ² Upon request, the U.S. Department of Agriculture enters into memoranda of understanding with districts for such assistance from the Departmental agencies as may be available. ³ Includes 3 State cooperative grazing districts. ⁴ Includes the Elephant Butte Irrigation District. ⁵ Includes the Imperial Irrigation District.

¹ The National Cooperative Soil Survey of the Soil Conservation Service and cooperating agencies is designed to locate, classify, describe, and show on maps the different kinds of soil and make multiple-use interpretations of each kind of soil for town-and-country planning and for other purposes.

² Puerto Rico and Virgin Islands.

¹ As authorized by the Act of Congress August 7, 1956 (Public Law 1021, 84th Congress).

Soil Conservation Service.

FOOTNOTES FOR TABLE 777

¹ Covers work in following watersheds: Buffalo Creek, Coosa River, Little Tallahatchie, Los Angeles, Potomac, Santa Ynez, Yazoo, Trinity, Washita, and Little Sioux.² These principal physical works of improvement have been installed and major fire protection equipment items acquired for watershed improvement purposes under the Flood Control Acts by the Forest Service and cooperating State agencies.³ Includes treatment of watersheds following fire or other disaster under the provisions of Section 216 of the Flood Control Act of 1950.

Forest Service.

FOOTNOTES FOR TABLE 778

¹ Forest land is land at least 10 percent stocked by forest trees of any size, or formerly having had such tree cover and not currently developed for non-forest use. Includes chaparral areas in the West and afforested areas. The minimum area for classification of forest land is 1 acre. Roadside, streamside, and shelterbelt strips of timber must have a crown width at least 120 feet wide to qualify as forest land. Unimproved roads and trails, streams, and clearings in forest areas are classed as forest if less than 120 feet in width.² Commercial forest land is forest land which is producing or is capable of producing crops of industrial wood and not withdrawn from timber utilization by statute or administrative regulation. Includes areas suitable for management to grow crops of industrial wood, generally capable of producing in excess of 20 cubic feet per acre of annual growth. Includes both accessible and inaccessible areas.Forest Service. Data for 1962 in *Agricultural Statistics, 1970*, table 769.

Table 776.—Watershed protection¹ and flood prevention projects:² Works of improvement installed with the assistance of the Soil Conservation Service in fiscal year 1971 with watershed protection and flood prevention funds

Item	Unit	P.L. 566 watersheds	Flood prevention watersheds
Projects in operation during year:			
P. L. 566 watersheds	Number	772	
Flood prevention watersheds	do		10
Works of improvement installed:			
Structural measures:			
Floodwater retarding structures	do	132	103
Floodwater retarding structures	Acre feet	140,740	69,895
Grade stabilization structures	Number	431	625
Channel stabilization	Miles	1	2
Open channel	do	446	36
Dikes	do	23	
Critical area planting	Acres	6,257	30,795

Crop residue management	do	572,122	517,435
Debris basins ³	Number	33	209
Diversions	Miles	21	37
Grassed waterway	Acres	768	365
Pasture and hayland planting	do	81,067	100,198
Ponds	Number	288	175
Range seeding	Acres	1,304	2,248
Stripcropping	do	8,985	140
Terracing	Miles	43	47
Tree planting	Acres	7,371	3,949
Wildlife management	do	101,274	105,731
Woodland improvement	do	7,796	3,957
Structures for water control	Number	1,585	155

¹ As authorized by the Soil Conservation Act of 1935 (Public Law 46, 74th Congress) and Watershed Protection and Flood Prevention Act P. L. 566 as amended.

² All of the 11 watersheds were approved Dec. 22, 1944; however, flood control funds did not become available for works of improvement until 1946. As of June 30, 1965, work in one watershed was completed.

³ Includes some basins constructed as structural measures.

Soil Conservation Service.

Table 777.—Flood prevention: Improvement works completed in authorized watersheds with assistance of the Forest Service, years ending June 30, 1970 and 1971, and cumulative to June 30, 1971¹

Practices and measures ²	Unit	Total completed or acquired		
		During year ending June 30, 1970	During year ending June 30, 1971	Cumulative to June 30, 1971

¹ Timber removals include the net volume of growing stock trees removed from the inventory by harvesting; cultural operations, such as timber-stand improvement; land clearing; or changes in land use. Volumes refer to growing stock inventory and are in cubic feet roundwood excluding bark and in board feet log scale, International 1/4-inch rule, and represent the net cubic foot volume of live sawtimber and poletimber trees from stump to minimum 4-inch top (of central stem) outside bark and the net board foot volume of the saw-log portion of live sawtimber trees (from stump to merchantable top).Forest Service. Data for 1962 in *Agricultural Statistics, 1970*, table 772.

¹ Timber removals include the net volume of growing stock trees removed from the inventory by harvesting; cultural operations, such as timber-stand improvement; land clearing; or changes in land use.

² The considerable excess of cut over growth for most western softwoods is not entirely due to overcutting. Growth is at a low level partly because 8 percent of the commercial forest area consists of old-growth timber which contributes little to net annual growth, and an excess of cut over growth is necessary to achieve a more regulated forest containing a desirable balance of growing stock by age classes.

³ Includes coastal Alaska.

⁴ Includes Hawaii.

Forest Service. Data for 1962 in *Agricultural Statistics, 1970*, table 774.

¹ *National Forest System lands.*—The national forests, national forest purchase units, national grasslands, and other lands administered by the Forest Service. Includes national forest lands withdrawn for use of other Federal agencies where the National Forest reservation has not been revoked.

National forests.—Areas formally designated or proclaimed as national forests. Data also include administrative sites outside national forest boundaries.

Purchase units.—Portions of approved national forest acquisition areas established by the Secretary of Agriculture, with the concurrence of the National Forest Reservation Commission, located outside designated or proclaimed national forest boundaries.

National grasslands.—Lands designated "National grasslands" by the Secretary of Agriculture and permanently held by the Department of Agriculture under Title III of the Bankhead-Jones Farm Tenant Act. The acreage shown for the national grasslands are the areas of such lands administered by the indicated unit headquarters or regions.

Land utilization projects.—Lands administered by the Forest Service for programs of land utilization and adjustment under Title III of the Bankhead-Jones Farm Tenant Act.

Research and experimental areas.—Areas outside of the national forests and grasslands which have been reserved and dedicated to forest or range research and experimentation.

Other areas.—Lands administered by the Forest Service that are not included in the above groups.

² *Other lands within unit boundaries.*—Lands within the unit boundaries in private, State, county, and municipal ownership, and Federal lands over which the Forest Service has no jurisdiction. Areas of such lands which have been offered to the United States and have been approved for acquisition and subsequent Forest Service administration, but to which title had not yet been accepted by the United States.

³ Less than 500 acres.

Forest Service.

FOOTNOTES FOR TABLE 779

¹ Net volume in cubic feet of live sawtimber and poletimber trees from stump to a minimum 4-inch top (of central stem) outside bark or to the point where the central stem breaks into limbs.

² Net volume of the saw-log portion of live sawtimber trees in board feet log scale, International $\frac{1}{4}$ -inch rule. Live trees of commercial species containing at least one saw log. Softwoods must be at least 9.0 inches in diameter breast height, except in California, Oregon, Washington, and coastal Alaska where the minimum diameter is 11.0 inches. Hardwoods must be at least 11.0 inches in diameter in all States.

Forest Service. Data for Jan. 1, 1963, in *Agricultural Statistics, 1970*, table 770.

¹ Western Washington and western Oregon; average prices for the years 1949–56 include Bureau of Land Management timber sales.

² Southern region.

³ California region.

⁴ Pacific Northwest region.

⁵ Eastern and Southern regions.

Forest Service. All U.S. Forest Service national forest prices in this table are the bid prices (including KV payments) for timber sold on a Scriber Decimal C log rule basis, except in the Northeastern States where International $\frac{1}{4}$ -inch log rule is used. Prices exclude timber sold by land exchanges and from land utilization project lands. Data for 1944–48 in *Agricultural Statistics, 1967*, table 795.

¹ Payments under the acts of May 20, 1908 (as amended) and July 24, 1956, are 25 percent of total receipts remaining after deducting (a) payments to Arizona and New Mexico on account school section lands administered by Forest Service, (b) appropriations of receipts under laws authorizing such appropriations for acquisition of lands in specified national forests or portions thereof, and (c) receipts from an area of the Superior National Forest, Minnesota, on account of which the State (for the counties) is paid 0.75 percent of the appraised valuation in lieu of 25 percent of the receipts.

² Includes \$551,820 representing 25 percent of Tongass (Alaska) Suspense Account receipts in year beginning July 1967.

³ Includes \$1,052,244 representing 25 percent of Tongass (Alaska) Suspense Account receipts in year beginning July 1968.

⁴ Includes \$1,023,000 representing 25 percent of Tongass (Alaska) Suspense Account receipts in year beginning July 1969.

¹ Data for the years 1946–64 are user visits; beginning 1965, data are visitor-days. A visitor-day represents fisherman or hunter use which aggregates 12 person-hours. This may entail 1 person for 12 hours, 12 persons for 1 hour, or any equivalent combination of individual or group use, either continuous or intermittent.

² Inventory numbers: 1946–48, as of December; 1949–71, as of Apr. 30.

³ Includes antelope, elk, bear, moose, mountain goat, bighorn, peccary, and wild boar.

⁴ Year ending June 30.

Forest Service.

¹ Reports of the U.S. Department of Commerce.
² Barrels of 50 gallons.
³ Total supply less exports and Mar. 31 stocks.

⁴ The difference between domestic disappearance and reported industrial consumption is chiefly retail sales.

¹ Rosin, not for violins; imports for consumption, as reported by the U.S. Department of Commerce.

² Drums of 520 pounds net weight for wood; 517 pounds for gum.

³ The breakdown between gum and wood resin imports not available.

⁴ Less than 500 drums.

⁵ Reports of the U.S. Department of Commerce. Includes some modified resin.

⁶ Total supply less exports and Mar. 31 stocks.

⁷ The difference between domestic disappearance and reported industrial consumption is due to unreported industrial consumption; failure of some consumers to distinguish in their reports between gum, wood, and modified or derived rosins; and the inclusion of modified rosins in exports.

Statistical Reporting Service. Data for 1944-48 in Agricultural Statistics, 1967, table 806.

CHAPTER XIII

CONSUMPTION AND FAMILY LIVING

The statistics in this chapter deal with the consumption of food by both rural and urban people, retail price levels, and other aspects of family living of farm people. Data presented here on quantities of food available for consumption are based on material presented in the earlier commodity chapters, but they are shown here at the retail level, a form that is more useful for an analysis of the demand situation faced by the producer. Data on quantities of farm-produced food consumed directly by farm households are presented in the commodity chapters. Its value and the rental value of the farm home are given in the section on farm income, table 682.

The table with seasonal food indexes for housekeeping households on a "per person" basis has been dropped from this edition as no new data for updating are available.

Table 805.—Population: Number of people eating from civilian food supplies, United States, Jan. 1 and July 1, 1929-72¹

Year	Jan. 1	July 1	Year	Jan. 1	July 1

¹ Beginning 1960, includes Alaska and Hawaii.

Economic Research Service. Estimates based on published and unpublished records of the U.S. Department of Commerce. Figures for 1929-39 are total population resident in the United States with no allowance for the small number of Armed Forces then overseas. Estimates of population eating from civilian food supplies from 1941 to January 1946 are civilian population plus the number of Armed Forces eating from civilian supplies; beginning with July 1946, the estimates relate to civilian population only. Data for 1910-28 in *Agricultural Statistics, 1962*, table 794.

¹ Quantities of nutrients computed by Agricultural Research Service, Consumer and Food Economics Research Division, on the basis of estimates of per capita food consumption (retail weight), including estimates of produce of home gardens, prepared by the Economic Research Service. No deduction has been made in nutrient estimates for loss or waste of food in the home, use for pet food, or for destruction or loss of nutrients during the preparation of food. Civilian only.

² Includes estimates of quantities added to flour and cereal products.

³ Includes estimates of quantities added to margarine and to milk of all types.

⁴ Includes estimates of quantities added to fruit juices and drinks.

⁵ Preliminary.

Agricultural Research Service. Data for 1909-28 in *Agricultural Statistics, 1967*, table 812.

Table 307.—Food nutrients: Percentage of total contributed by major food groups, average 1957-59, annual 1971¹

¹ Percentages were derived from nutrient data which include quantities of iron, thiamin, riboflavin, and niacin added to flour and cereal products; quantities of vitamin A value added to margarine and milk of all types; and quantities of ascorbic acid added to fruit juices and drinks.

³ Chocolate liquor equivalent of cocoa beans.

⁴ Components may not add to total due to rounding.

⁵ Preliminary.

Agricultural Research Service.

¹ Civilian consumption only, beginning 1941. Includes Alaska and Hawaii, beginning 1960. Quantities of individual foods, measured in pounds equivalent to the form sold at retail food stores are combined into indexes using average retail prices in 1947-49 for 1909 through 1954, and prices in 1957-59, beginning 1955; indexes were linked at 1955. ² Includes edible offal. ³ Preliminary. ⁴ Data for melons, fresh vegetables, potatoes, sweetpotatoes, and dry beans and peas include consumption from home garden produce. ⁵ Corn sugar and sirups are included with sugars and other sweeteners. ⁶ Excludes sugar used in production of canned and frozen fruit, canned fruit juices, canned vegetables, and unskimmed sweetened condensed milk. ⁷ Excludes spices and herbs.

Table 810.—Food plans: Food cost at home, at three cost levels, for families and individuals in the United States and for families by region, for one week, April 1972¹

Region and sex-age groups ²	Low-cost plan	Moderate-cost plan	Liberal plan
FAMILIES			
United States:			
Family of two, 20-35 years ³	19.20	24.60	30.40
Family of two, 55-75 years ³	15.70	20.60	24.70
Family of four, preschool children ⁴	28.00	35.70	43.60
Family of four, school children ⁵	32.40	41.70	51.30
INDIVIDUALS⁶			
United States:			
Children under 1 year	3.70	4.70	5.20
1-3 years	4.80	6.00	7.20
3-6 years	5.70	7.30	8.80
6-9 years	6.90	8.90	11.10
Girls, 9-12 years	7.80	10.20	12.00
12-15 years	8.60	11.30	13.70
15-20 years	8.80	11.20	13.40
Boys, 9-12 years	8.00	10.40	12.60
12-15 years	9.40	12.40	14.90
15-20 years	10.90	13.80	16.80
Women, 20-35 years	8.10	10.40	12.60
35-55 years	7.80	10.00	12.10
55-75 years	6.60	8.60	10.30
75 years and over	6.00	7.60	9.40
Pregnant	9.70	12.10	14.40
Nursing	11.20	14.00	16.40
Men, 20-35 years	9.40	12.00	15.00
35-55 years	8.70	11.10	13.70
55-75 years	7.70	10.10	12.20
75 years and over	7.20	9.70	11.70
FAMILIES			
Northeast:			
Family of two, 20-35 years ³	21.40	27.30	32.30
Family of two, 55-75 years ³	17.50	22.70	26.40
Family of four, preschool children ⁴	31.10	39.70	46.50
Family of four, school children ⁵	36.10	46.30	54.70
North Central:			
Family of two, 20-35 years ³	19.10	23.60	29.30
Family of two, 55-75 years ³	15.60	19.70	23.80
Family of four, preschool children ⁴	27.70	34.20	41.90
Family of four, school children ⁵	32.10	39.90	49.50
South:			
Family of two, 20-35 years ³	17.90	23.10	28.20
Family of two, 55-75 years ³	14.70	19.40	23.00
Family of four, preschool children ⁴	26.00	33.50	40.50
Family of four, school children ⁵	30.20	39.00	47.70
West:			
Family of two, 20-35 years ³	19.70	23.90	29.60
Family of two, 55-75 years ³	16.10	20.00	24.20
Family of four, preschool children ⁴	28.60	34.60	42.30
Family of four, school children ⁵	33.10	40.40	49.90

¹ Estimated from food quantities shown in *Agricultural Statistics, 1963*, table 807, slightly revised in 1964, and prices paid by urban families. The prices per pound of each food group are averages of those paid by families at selected income levels surveyed in 1965 adjusted to current levels by use of Retail Food Prices by Cities (a sample of 56 urban areas for the United States; Boston for Northeast Region; St. Louis for North Central; Atlanta for the South; and Los Angeles for the West) released periodically by the Bureau of Labor Statistics. Revisions in food quantities in 1964 resulted in insignificant changes in cost, except for about 10 percent increase in cost for women 20 to 55 years and 10 percent decrease for men 55 years and over.

² Age groups include the persons of the first age listed up to but not including those of the second age listed.

³ Ten percent added for family size adjustment.

⁴ Man and woman, 20 to 35 years; children, 1 to 3 and 3 to 6 years.

⁵ Man and woman, 20 to 35 years; child, 6 to 9 and boy, 9 to 12 years.

⁶ The costs given are for individuals in 4-person families. For individuals in other size families, the following adjustments are suggested: 1-person—add 20 percent; 2-person—add 10 percent; 3-person—add 5 percent; 5-person—subtract 5 percent; 6-or-more person—subtract 10 percent.

¹ A subsidy program for local purchase of food on basis of the quality and quantity of meals served. The program was started in February 1943. ² A subsidy program to schools started in January 1967. ³ A subsidy program which aids in the purchase of school lunch equipment. The program started in fiscal year 1967. ⁴ Distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320, 74th Congress, approved Aug. 24, 1935, as amended; under Section 416, Public Law 439, 81st Congress, as amended; and under Section 6 of the National School Lunch Act, Public Law 396, 79th Congress, approved June 4, 1946.

Distribution to ultimate eligible recipients is accomplished through cooperating distributing agencies in States. Eligible recipients include school lunch programs, eleemosynary institutions, and households receiving public assistance from State or local welfare agencies, or other needy persons.

⁵ A subsidy program to expand consumption of milk by children. ⁶ Preliminary.

¹ See footnote 4, table 811.² Less than \$500.³ Including some Section 6 commodities distributed to summer camps and for disaster relief.

Food and Nutrition Service.

FOOTNOTES FOR TABLE 809

¹ Civilian consumption only. Beginning 1960, includes Alaska and Hawaii. Quantity data used in computing the per capita food consumption index, table 808. Final consumer products that are derived from a combination of primary food groups, such as bakery products, are measured and reported in the form of their primary ingredients, such as flour, shortening, and eggs. Beginning 1960, data reflect population revisions based on the 1970 Census of Population. Data in parentheses are approximations.

² Includes game and edible offal.³ Includes 2.0 pounds per capita of game fish 1909-51, increasing 0.1 pound annually to 3.0 pounds in 1961.⁴ Includes product weight of butter and margarine; other items in terms of fat content.⁵ Preliminary.⁶ Data for melons, fresh vegetables, potatoes, sweetpotatoes, and dry beans and peas include consumption of home garden produce.⁷ Excludes estimated quantities of meat, poultry, and fish base soups duplicated elsewhere.⁸ Since 1958, approximations for soya products are continued at 1.3 pounds.⁹ Corn sugar and sirups are with sugars and other sweeteners.¹⁰ Excludes sugar used in production of canned and frozen fruit, canned fruit juices, canned vegetables, and unskimmed sweetened condensed milk.¹¹ Includes spices and herbs.

Economic Research Service.

¹ Total cost to the Government, and includes commodity cost plus reprocessing, packaging, transportation costs, and miscellaneous handling charges for Section 6 and Section 32 commodities. Cost for Section 416 commodities includes acquisition cost plus any reprocessing or repackaging costs necessary before commodity is distributed.

¹ Reflects retail prices of goods and services usually bought by average families in urban areas of the United States. This index is the official index released monthly by the U.S. Department of Labor.

² Prior to 1964, excludes upkeep.

Economic Research Service. Compiled from data of the U.S. Department of Labor.

CHAPTER XIV

MISCELLANEOUS AGRICULTURAL STATISTICS

This chapter contains miscellaneous data which do not fit into the preceding chapters. Included here are summary tables on foreign trade in agricultural products; tables on acreage and production of world crops; weather data; statistics on fishery products; tables on refrigerated warehouses; commodity future statistics; and statistics on crops in Alaska and Hawaii. Three weather tables are included in this issue. The two tables showing monthly and annual 30-year normals, by climatic divisions, for precipitation and for average temperature are carried about every five years. The current table showing annual averages for precipitation and temperature, by climatic divisions, is carried annually. More complete information can be secured from the National Weather Service, U.S. Department of Commerce.

Foreign Agricultural Trade Statistics

U.S. foreign agricultural trade statistics include official U.S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as rawhides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and in transit through the United States from one foreign country to another when documented as such through U.S. Customs.

The export statistics also exclude shipments to the U.S. Armed Forces and diplomatic missions abroad for their own use and supplies for vessels and planes engaged in foreign trade. Data on shipments valued at less than \$251 (\$100 prior to October 1969) are not compiled by commodity and are excluded from agricultural statistics but are reflected in nonagricultural and overall export totals. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under P.L. 87-195 (Act for International Development); and involving Government payments to exporters. (USDA payments are excluded from the export value.) Separate statistics on Government program exports are compiled by the U.S. Department of Agriculture from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country, as known to him at the time of shipment from the United States, to which the commodities are to be shipped in their present form. Since substantial amounts of agricultural commodities such as wheat, corn, and soybeans are transshipped through Canada, the Netherlands, and Belgium, exports to those countries are overstated. Exports to final destinations including West Germany, the United Kingdom, France, Spain, and other countries are understated. Except for Canada, export shipments valued \$251-\$499 (\$100-\$499 prior to October 1969) are included on the basis of sampling estimates; shipments to Canada valued \$251-\$1,999 (\$100-\$1,999 prior to October 1969) are sampled.

Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. Where the country of origin is not known, the imports are credited to the country of shipment. Low-valued shipments under \$251 are reflected in nonagricultural and overall import totals.

1971 ⁴	43,662	7,759	18	-----	42,733	5,829	3,685	2,144	47

¹ Beginning January 1942, includes food exported for relief or charity by individuals and private agencies. These figures include a small amount of certain foodstuffs other than agricultural.² Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such U.S. commodities. Complementary agricultural imports include all others, about 98 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and vegetable fibers.³ Excess of imports.⁴ Preliminary.

¹ Because of transshipments, the value of U.S. exports is overstated to such countries as Canada, Netherlands, and Belgium, and understated to such countries as West Germany, United Kingdom, Switzerland, Ireland, Italy, Denmark, Sweden, Norway, and others. ² Includes sales for foreign currency, donations for disaster relief and economic aid, donations through voluntary relief agencies, barter for strategic materials, and long-term credit sales, under P.L. 83-480 (the Agricultural Trade Development and Assistance Act of 1954, as amended), and other legislation. Also includes economic aid under P.L. 87-195 (the Act for International Development of 1961, as amended) and development loans (1969) under P.L. 87-195. ³ "Agricultural exports outside specified Government-financed programs" (sales for dollars) include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) barter for overseas procurement for U.S. agencies, (2) extension of credit and credit guarantees for relatively short periods, (3) sales of Government-owned commodities at less than domestic market prices, and (4) export payments in case. ⁴ The excess of Government programs over total exports may be due to lags in reporting or to differences in classification or valuation procedures.

¹ Supplementary agricultural import products consist of all products similar to agricultural commodities produced commercially in the United States, together with all other agricultural products interchangeable to any significant extent with such U.S. commodities. Complementary agricultural products include all others, about 98 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and vegetable fibers.

² Less than \$50,000.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

Total	897,543	1,059,509	1,286,414
Total European Community	1,299,938	1,410,810	1,765,869

¹ Preliminary.² Grains, poultry, and pork were subject to variable levies beginning on July 30, 1962; rice, on Sept. 1, 1964; and beef and dairy products, on Nov. 1, 1964.³ Lard for food is a variable-levy commodity, while lard for industrial use is bound in the General Agreement on Tariffs and Trade (GATT) at 3 percent ad valorem. U.S. lard is for food use.⁴ Although canned poultry, tallow, and variety meats are subject to variable levies, these cannot exceed the amount of import duties bound in GATT.⁵ Variable levy on sugar-added content.⁶ Includes fur skins totaling \$20 million in 1969-70 and \$12 million in 1970-71.⁷ Includes bulk smoking tobacco totaling \$8 million in 1969-70 and \$11 million in 1970-71.⁸ Mainly corn gluten feed and meal, which are nonvariable-levy commodities, but may contain small quantities of other corn products, subject to variable levies (see "Export Highlights, March 1970").

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

Table 830.—European Economic Community: Value of agricultural imports by origin, 1952-70¹

¹ Production figures may vary from those in commodity tables by country breakdown due to later estimates.² Unless otherwise indicated, the years shown refer to years of harvest in the Northern Hemisphere countries. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crops harvested in the Northern Hemisphere in 1970 are combined with Southern Hemisphere harvests which begin late in 1970 and end in the first half of 1971.³ Preliminary.⁴ Dessert and cooking varieties. Apples changed from 48 pounds per bushel to 42 pounds; pears from 50 pounds per bushel to 45 pounds.⁵ Foreign production in equivalent boxes: oranges, 70 pounds; grapefruit, 80 pounds; lemons, 76 pounds.⁶ Year ending Sept. 30 of year shown.⁷ Year beginning Jan. 1. Excluding mainland China.⁸ Six leading countries.⁹ Southern Hemisphere crops which are harvested in the early part of the year are combined with those of the Northern Hemisphere harvested the latter part of the same year.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

FOOTNOTES FOR TABLE 826

¹ Preliminary.² Supplementary agricultural import products consist of all products similar to agricultural commodities produced commercially in the United States, together with all other agricultural products interchangeable to any significant extent with such U.S. commodities. Complementary agricultural products include all others, about 98 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and vegetable fibers.³ Less than \$500.⁴ Not included in agricultural total prior to fiscal year 1970.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

Pork, frozen bellies	36,000 pounds
Total								86,306	60,073	67,485	114,353

¹ Commodities covered by the Commodity Exchange Act.

² All contract markets combined.

³ Less than \$500,000.

⁴ Includes live beef cattle, choice steers, and feeder cattle.

⁵ Prior to the 1969 August future, contract unit was 25,000 pounds for live beef and feeder cattle.

Prior to the 1971 June future, contract unit was 27,600 pounds for choice steers.

⁷ Prior to the 1970 July future, contract unit was 30,000 pounds.

⁸ Chicago Mercantile Exchange, contract of 30,000 pounds prior to the 1971 February future; Minneapolis Grain Exchange, contract of 18,000 pounds.

Commodity Exchange Authority.

¹ Commodities covered by the Commodity Exchange Act. Contract unit is as shown in unit column of table 830, except for the following commodities: Grains and soybeans, 5,000 bushels; sorghum grain, 280,000 pounds for Kansas City Board of Trade, and 200,000 pounds for Chicago Mercantile Exchange; cotton, 100 bales; eggs (shelled) and pailates, cartons; eggs (frozen), 36,000 pounds beginning with the 1967 September future and 30,000 pounds prior to that future; and soybean meal, 100 bags.

² In terms of contract units, all contract markets combined.

³ Less than 500 transactions.

⁴ Includes live beef cattle, choice steers, and feeder cattle.

Commodity Exchange Authority.

¹ Represents the net weight of canned products. In the classifications "Clam products" and "Other products," the weight of any chowders, soups, and juices includes the weight of the entire mixture, which may contain potatoes and other vegetables, etc.

² Included in "Other products."

³ Preliminary.

¹ Value of raw sugar and molasses produced and Sugar Act compliance payments; 1946–54, value of molasses shipped. Data from Agricultural Stabilization and Conservation Service and Hawaiian Sugar Planters' Association.

² Value of canned fruit, juice, and industry byproducts shipped out and value of local sales of canned fruit and juice. Bank of Hawaii data. Estimated value of fresh fruit included from 1950. Statistical Reporting Service estimates.

³ Excludes pineapples for fresh market; includes guavas and passion fruit used for processing, beginning 1955.

⁴ Year ending June 30 of following year.

⁵ Preliminary.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 848

¹ Data from Agricultural Stabilization and Conservation Service, USDA, and Hawaiian Sugar Planters' Association.

² Processed fruit, equivalent 24/2½, 1946–67. 1968–70, reported as "actual" cases of Hawaiian pack converted to 24/2½ "equivalent" case using a factor of 0.70. Pineapple Growers Association of Hawaii data.

³ 1946–62, single strength juice reported as 24/2=29.25 pounds converted to 24/2½ cases=42.5 pounds using a factor of 0.688. 1963–70, reported as "actual" cases of Hawaiian pack converted to 24/2½="equivalent" cases using a factor of 0.78. Pineapple Growers Association of Hawaii data.

⁴ Concentrated juice, 6/10 "equivalent" cases of Hawaiian pack converted to 24/2½ "equivalent" cases using a factor of 0.915. Year ending May 31. Data for concentrated juice prior to 1959 not available. Pineapple Growers Association of Hawaii data.

⁵ Excludes quantities not marketed because of economic conditions.

⁶ Excludes pineapples for fresh market. Includes guavas and passion fruit used for processing, beginning 1955.

⁷ Year ending June 30 of following year.

⁸ Preliminary.

Statistical Reporting Service.
