

EUROCONFERENCE ON CORRELATIONS IN UNCONVENTIONAL QUANTUM LIQUIDS

Institute for Scientific and Technological Advanced Studies – Portugal

Évora, October 7-11, 1996

This conference marks the start of the activities of a new research institute, the Institute for Scientific and Technological Advanced Studies – Portugal. The main purpose of the meeting is the study of new theoretical tools for dealing with non-perturbative effects in quantum correlated systems. Particular emphasis will be made on the following topics: Superconductivity, correlations in finite systems (from nuclei to mesoscopic structures), heavy fermions and Kondo resonance, fermionic quantum liquids in low dimensions, magnetism.
