

# Help from input method menu

? A help icon appears next to the currently selected input method (except for "use native keyboard")

? The active click area will be bigger than the icon.

? On hover, a tooltip will display a "how to use" label.

For consistency, the help icon graphics from Echo can be reused.

# Help from input settings panel

A "how to use" link is added next to each input method except for "Use native keyboard"
