Google Search Console

Notice of DMCA removal from Google Search

To: Webmaster of https://en.wikipedia.org/,

Google has been notified, according to the terms of the Digital Millennium Copyright Act (DMCA), that some of the material found on your site allegedly infringes upon the copyrights of others. Although some of these URLs may not be available in our search results now, we are retaining these notices and will act on them if at some point in the future we do crawl these pages for inclusion in search results.

The notice that we received, with any personally identifying information removed, may be found on the website of Lumen, a third-party aggregator of legal complaint notices, at https://lumendatabase.org/notices/40460658.

Please note that it may take several weeks for the notice to be posted on the above page.

What you can do next:

File a Counter Notice

If you feel that your sites or pages were mistakenly removed due to a DMCA request filed against you, Google can reinstate these materials into our search results upon receipt of a DMCA Counter Notification.

Speak to a lawyer

If you have legal questions about this notification, you may wish to speak to your own lawyer.

Here are the affected URL(s):
