

Notice of Turkish local law delisting from Google Search for <https://commons.wikimedia.org/>

Due to a request under Turkish local law, Google can no longer show one or more pages from your site in Google Search results. This only affects responses to some search queries for names that might appear on your pages. Only results from Google's search results for Turkey are affected. No action is required from you.

What we'd like you to know:

- These pages have not been delisted entirely from our search results. They've only been delisted on certain searches for names from Google's search results for Turkey. These pages will continue to appear for searches other than those specified by individuals in the requests we have honored.
- Due to legal reasons, we are unable to share with you the details of the legal request received by Google. We do not provide any additional comments or clarifications regarding this notification.
- In many cases, affected queries don't relate to the name of any person mentioned prominently on the page. For example, the name might only appear in a comment section.

Here are the affected URLs:
