Follow Up: Compilation of Objects from Ethnographic Museums

Wikimania, Alexandria July 17-19, 2008

Since Wikimania Taipei a workgroup was built and consisting of:

- ICOM = International Council of Museums, Paris
  ICME = International Council of Museums of Ethnography, Florida, US

- UNESCO Paris

- Wiki
  Wikimedia Board & Advisory, France, Belgium
  Wikipedia France, France

- Ethnographic Museums
  Antwerp, Belgium
  Leiden, The Netherlands
  Quai Branly, France
Follow Up: Compilation of Objects from Ethnographic Museums

Wikimania, Alexandria July 17-19, 2008

- General agreement of the concept
  
  - Recommendation to start with pilot museums (four) and have been identified: Belgium, Norway, South Africa, South Corea;

  - Compilation of the data by museum personnel and volunteers (friends of the museum);

  - List of meta-data exists in the ICOM/ICME documents;

  - Larger Museums have ICT installed or are doing it, each with own data structure.
Follow Up : Compilation of Objects from Ethnographic Museums

Wikimania, Alexandria July 17-19, 2008

- Topic language to be used for description of the objects:
  - language of the country of the Museum;
  - language of the culture or ethnic group, if available;
  - language with 'universal' character (English).

This agreement was understood to be minimal and remains open to local situations.
Follow Up: Compilation of Objects from Ethnographic Museums

Wikimania, Alexandria July 17-19, 2008

- Technical concerns

- For the pilot projects local working team should be built, with the presence of a Wiki-knowledge;

- No technical major problems are to be expected;

- Existing museums with web-site access can be linked with Wiki, ICOM/ICME will have to promote such links.
Follow up: Compilation of Ethnographic Objects from Museum Reserves

Wikimania, Alexandria July 17-19, 2008

- Previous to start: Wiki is expected for give strong support

- Project start January 1st, 2009

-Financial means:
  to start a small budget was proposed to look after: US$10,000.- 20,000.- The chair of ICME will prepare a proposal for submitting to possible donors.

  Suggested Sources: ICOM and Wiki

- After this meeting ICME will then promote the concept and mobilize its members.
Content of Presentation at Wikimania 2007 in Tapei:

I. Sustainability concept includes the *Cultural domain*.

II. *Cultural diversity is threatened*

III. Frame of the Proposal
   1. *Some data* about collections & museums
   2. *A few examples* of museums

IV. Methodology

V. Support: *UNESCO, ICOM* (International Council of Museums, Paris) & private contacts

VI. How to proceed further?

VII. Conclusions
I. Sustainability concept includes a *fourth dimension*: CULTURE

```
Economy

Social

Eco-system (diversity)

CULTURE & DIVERSITY)
- Values
- Languages & other expressions
- Arts
- Traditions & believes
```
II. Cultural Diversity is threatened

- Human cultural heritage is disappearing
  - *UN 6,912 spoken languages in 2005*; of which nearly extinct 516
  - by 2050 only a few hundreds remain.

- **Spoken Languages** *(From: *Ethnologue: Languages of the World, 2005)*

III. Frame of the Proposal

- This proposal deals with: in general cultural diversity, especially compilation ethnographic museum objects (in reserves ~90%):

  - recent history & still living ethnic communities & groups: 19\textsuperscript{th}–20\textsuperscript{ed} century

  - safeguard & testimonies about their creativity, diversity of traditions & believes, values (ecosystem), visions,....

  - compile in a systemic way information about objects: arts expressions & creation, artifacts of all kind, etc.
The discussions on cultural diversity in some UN publications:

*World Culture Report* (2000);
*Universal Declaration of UNESCO on Cultural Diversity* (2003);
*Towards Knowledge Societies* (2005);

The present and future challenges of diversity loss focus on:

- *Globalization and homogenization* to a one-culture world (McDonaldization);
- *Cultural diversity and poverty*: the North-South situation.

Ethnographic contributions in these considerations are mostly absent and the heritage is not a direct issue.
From Wikipedia. **Category: Museums**

"A museum is a *non-profit making*, permanent institution in the service of society and of its development, and open to the public, ....... "

“Modern museums concentrate on a particular subject, and most museums belong to one or more of the following categories: fine arts, applied arts, archeology, *anthropology, ethnology*, history, cultural history, science, technology, natural history.”

ASEMUS (Asia-Europe Museums Network) & ASEF (Asia Europe Foundation)

bi-& multi-lateral association of ethnographic museums, comprising about 60 museums (2003)

- facilitate the sharing of our joint Eurasian cultural heritage
- historical relations have a legacy of major asymmetries in museum collections
- many European museums hold large collections of Asia with key Asian heritage not available in Asia itself
- develop mechanisms, instruments and projects to redress 'asymmetry' and form pools of resources (virtual museum)

Total number of catalog records: 540,000

The division's collections are comprised of three general types: archeological (excavated), *ethnographic (material collected from living people)*, and biological materials (human remains).
Collections Database

The data-base can be searched by country/region, culture, object name, material, geographic locale, catalog number, and donor name; explored by viewing objects on display in AMNH exhibit halls.

- Pacific Ethnographic Collection 27,000 objects on line
- North American Ethnographic Collection 49,000
- Asian Ethnographic Collection 45,000
- African Ethnographic Collection 37,000
- Textile Collection 10,500

The collection includes more than 800,000 objects, as well as a photographic archive of 125,000 images.

2.3. *Royal Museum for Central Africa*, Brussels (Tervuren), Belgium (Wiki)

Collections
- 10,000 animals
- 250,000 rock samples
- *180,000 ethnographic objects*
- 20,000 maps
- 56,000 wood samples
- 8,000 musical instruments
2.4. Museum *Quai Branly*, Paris

In total **267,417 objects** belong to the collection. Since 1998, the museum acquired 8,168. Over 3,600 objects are exhibited (1.35%).

**Continent:**
- America: 97,372 objects
- Afrique: 70,205
- Asie: 54,041
- Oceanie: 28,911

**Additional objects:** music instruments
2.5. *The J. Paul Getty Museum*

As a museum and educational center dedicated to the study of the arts and cultures of ancient Greece, Rome, and Etruria, .......

The Villa houses approximately *44,000 works* of art from the Museum's extensive collection of Greek, Roman, and Etruscan antiquities, of which over *1,200 are on view.* (2.72%)
IV. Methodology

- Museums in general exhibit only a very small part of their collections; the reserves can be as high as ~90% of the collections

  - Focus on reserves
  - Hidden treasurers
  - Building Virtually geographical ethnographic museums

- Compilation:

  - Catalogue like:
    - picture (max 2), material, size, geographic & ethnic info, description in native & 'other used' languages, period of origin, acquisition info, etc.

  - Standardization and structure of meta-data
Tapei Slides: Compilation of Ethnographic Objects from Museum Reserves

Wikimania, Alexandria July 17-19, 2008

Action models for compilation:

1. *volunteers* with museum authorities (access?) : in principle anyone in the spirit of Wikipedia;

2. museum authorities in partnership with *volunteers, ethnographic experts, and local Wiki-teams* for data structures and other technical matters;

3. museum authorities in partnership with *cultural associations &* (e.g. Friends of the Museum ..... ), *academics & experts, and local 'Wiki-teams'.

Difficulties and Obstacles:

- administration: museums function frequently under State, City and/or local authorities or the like;

- copyrights related to objects;

- propriety considerations, theft (Interpol), pending claims;

- larger museums have already inventories or are in the process of setting them up;

- .................
V. Support:

- **UNESCO**: first discussions with the *Director of the Division of Foresight, Philosophy and Human Sciences*, indicate a real interest in the proposal and some "partnership or collaboration" with Wikipedia.

- **ICOM** (International Council of Museums, Paris) affiliated with UNESCO, is very interested as well as with Wikipedia in general. This proposal will be announced at their Annual Conference in August (Vienna), provided a clear signal comes from the Wikipedia organization.

For both organizations is a *win-win situations* feasible.

- **Local museums** show similar interests as well.
VI. How to proceed further?

- Evaluation of what *exists already* in Wikipedia;

- Elaborating a *several year* work program -five year or more- for the compilation process;

- Finding funding partners: *Foundations, Intergovernmental Organizations, Academics, National Governments, ......*;

- Suggestion was already made to have a first meeting (in Paris) in the near future: *UNESCO-ICOM-Wikimedia Foundation*;

- .........
VII. Conclusions:
- The proposal addresses
  -the *cultural diversity* issue under the umbrella of sustainability;
  -the *encyclopedic character* of the compilation of ethnographic objects, Wiki is the appropriate frame;

- Culture in general& its heritage belong to *the common goods of humankind*; conceptually they are present Wikipedia; the ethnographic dimension enlarges the scope;

- *Preliminary support* is encountered at international organizations and some local museums;

- A *win-win situation* for these international organizations and Wikipedia is achievable; if agreed, Wikipedia will have other benefits;

- Difficulties will emerge in the process of implementation.
