2-d Array

If Statements

```
if is_hot:  
    print("hot day")  
elif is_cold:  
    print("cold day")  
else:  
    print("beautiful day")
```

Logical operators:

```
if has_high_income and has_good_credit:  
...  
if has_high_income or has_good_credit:  
...  
is_day = True  
is_night = not is_day
```

<https://programmingwithmosh.com/wp-content/uploads/2019/02/Python-Cheat-Sheet.pdf>

2-d Array

statement block executed only
if a condition is true

if logical condition:
statements block

Can go with several elif, elif...
and only one final else.
Only the block of first true
condition is executed

with a var x:

if bool(x) == True: \Leftrightarrow **if** x:

if bool(x) == False: \Leftrightarrow **if not** x:

2-d Array

```
if age<=18:  
    state="Kid"  
elif age>65:  
    state="Retired"  
else:  
    state="Active"
```

https://perso.limsi.fr/poinal/_media/python:cours:mementopython3-english.pdf

2-d Array

if Statements

The if statement evaluates an expression, and if that expression is True, it then executes the following indented code:

```
>>> name = 'Debora'
```

```
>>> if name == 'Debora':  
...     print('Hi, Debora')
```

```
...  
# Hi, Debora
```

```
>>> if name != 'George':  
...     print('You are not George')
```

```
...  
# You are not George
```

<https://www.pythoncheatsheet.org/cheatsheet/control-flow>

2-d Array

The else statement executes only if the evaluation of the if and all the elif expressions are False:

```
>>> name = 'Debora'

>>> if name == 'George':
...     print('Hi, George.')
...     else:
...     print('You are not George')
...
# You are not George
```

<https://www.pythoncheatsheet.org/cheatsheet/control-flow>

2-d Array

Only after the if statement expression is False, the elif statement is evaluated and executed:

```
>>> name = 'George'
```

```
>>> if name == 'Debora':  
...     print('Hi Debora!')  
...     elif name == 'George':  
...         print('Hi George!')  
...  
# Hi George!
```

<https://www.pythoncheatsheet.org/cheatsheet/control-flow>

2-d Array

the elif and else parts are optional.

```
>>> name = 'Antony'

>>> if name == 'Debora':
...     print('Hi Debora!')
...     elif name == 'George':
...         print('Hi George!')
...     else:
...         print('Who are you?')
...
# Who are you?
```

<https://www.pythoncheatsheet.org/cheatsheet/control-flow>

Comparison operator

Operator	Meaning
==	Equal to
!=	Not equal to
<	Less than
>	Greater Than
<=	Less than or Equal to
>=	Greater than or Equal to

<https://www.pythoncheatsheet.org/cheatsheet/control-flow>

Comparison operator

```
>>> 42 == 42  
True
```

```
>>> 40 == 42  
False
```

```
>>> 'hello' == 'hello'  
True
```

```
>>> 'hello' == 'Hello'  
False
```

```
>>> 'dog' != 'cat'  
True
```

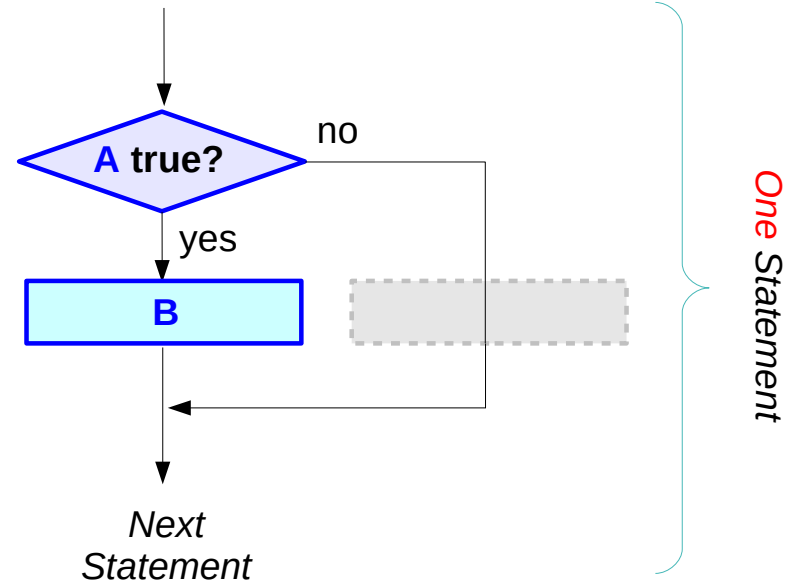

```
>>> 42 == 42.0  
True
```

```
>>> 42 == '42'  
False
```

If Statement

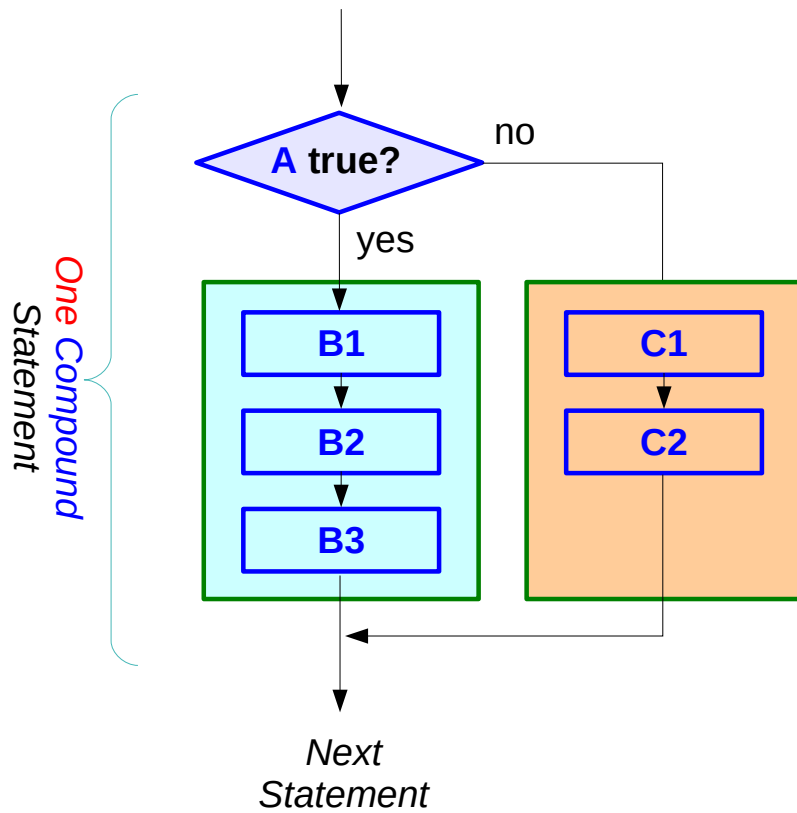

```
if A :  
    B  
else :  
    C
```

```
if A :  
    B
```

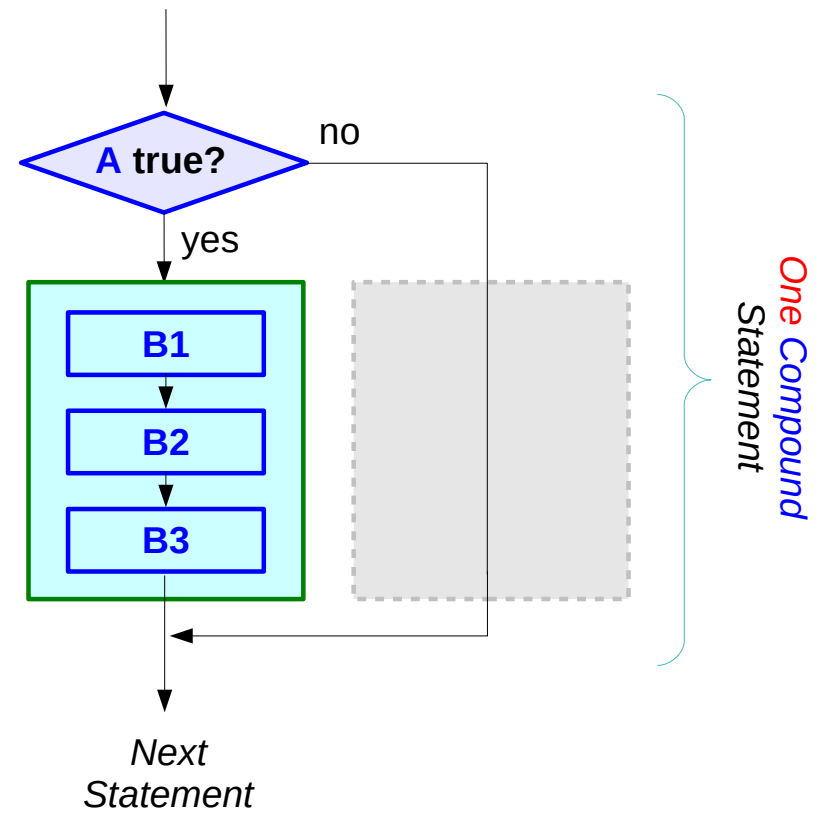

If Compound Statement

```
if A :  
  B1; B2; B3  
else :  
  C1; C2
```

```
if A :  
  B1; B2; B3
```

Cases of **if-else** Statements (1)

Each of these if statements are treated as a **single statement**.

If clause and else clause can be

1) a single statement

```
St1;
```

2) a compound statement

```
St1; St2; St3;
```

3) a nested if statement

```
if B :
```

```
    [ ]
```

4) a nested if-else statement

```
if B :
```

```
    [ ]
```

```
else :
```

```
    [ ]
```
