Outline

Outline

Binomial Density Function

Definition

Let $0 < p < 1$ and $N = 1, 2, \ldots$

$$f_X(x) = \sum_{k=0}^{N} \binom{N}{k} p^k (1-p)^{N-k} \delta(x-k)$$

where $\binom{N}{k} = \dfrac{N!}{k!(N-k)!}$

Binomial Distribution Function

Definition

Let $0 < p < 1$ and $N = 1, 2, \ldots$

$$F_X(x) = \sum_{k=0}^{N} \binom{N}{k} p^k (1-p)^{N-k} u(x-k)$$

where $\binom{N}{k} = \dfrac{N!}{k!(N-k)!}$

Outline

Poisson Density Function

Definition

$$f_X(x) = e^{-b} \sum_{k=0}^{\infty} \frac{b^k}{k!} \delta(x-k)$$

where $b>0$ is a real constant

Poisson Distribution Function

Definition

Let $0 < p < 1$ and $N = 1, 2, \ldots$

$$F_X(x) = e^{-b} \sum_{k=0}^{\infty} \frac{b^k}{k!} u(x - k)$$

where $b>0$ is a real constant

Outline

Exponential Density Function

Definition

$$f_X(x) = \begin{cases} \frac{1}{b} e^{-(x-a)/b} & (x > a) \\ 0 & (x < a) \end{cases}$$

where $-\infty < a < \infty$ and $b > 0$

Exponential Distribution Function

Definition

$$f_X(x) = \begin{cases} 1 - e^{-(x-a)/b} & (x > a) \\ 0 & (x < a) \end{cases}$$

where $-\infty < a < \infty$ and $b > 0$

Outline

Rayleigh Density Function

Definition

$$f_X(x) = \begin{cases} \frac{2}{b}(x-a)e^{-(x-a)^2/b} & (x \geq a) \\ 0 & (x < a) \end{cases}$$

where $-\infty < a < \infty$ and $b > 0$

Rayleigh Distribution Function

Definition

$$F_X(x) = \begin{cases} 1 - e^{-(x-a)^2/b} & (x > a) \\ 0 & (x < a) \end{cases}$$

where $-\infty < a < \infty$ and $b > 0$
