---

---

---

---

---

---

---

---

## Overview

1. Psychological needs
2. Social needs

**2**

---

---

---

---

---

---

---

---

## Psychological needs

Reading:  
Reeve (2009)  
Ch 6

“when people find the environments that support and nurture their psychological needs, then positive, optimal experience, and development follow.”

---

---

---

---

---

---

---

---

## Psychological need

An inherent source of motivation that generates the desire to interact with the environment so as to advance personal growth, social development, and psychological well-being.

Based on Reeve  
(2009, pp. 142-143)

4

---

---

---

---

---

---

---

---

## Organismic approach to motivation

Two assumptions:

People are inherently active.

Person-environment dialectic.

Based on Reeve (2009, p. 143)

5

---

---

---

---

---

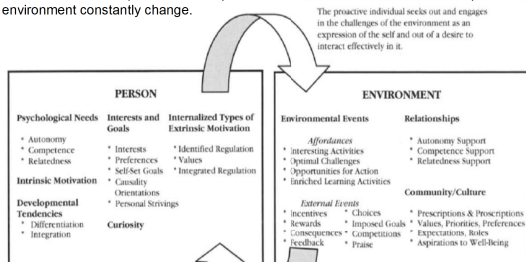

---

---

---

## Person-environment dialectic

In dialectic, the relationship between person and environment is reciprocal (two-way); the environment acts on the person and the person acts on the environment. Both the person and the environment constantly change.

The environment sometimes nurtures and enriches the individual's inner resources, facilitating development, but other times deigns and thwarts these inner resources, leading to less optimal development.

The proactive individual seeks out and engages in the challenges of the environment as an expression of the self and out of a desire to interact effectively in it.

Figure 6.1 Person-environment dialectical framework in motivation study Reeve (2009)

---

---

---

---

---

---

---

---

# Self-determination theory

## Three psychological needs

Based on Reeve (2009, p. 145)

7

---

---

---

---

---

---

---

---

---

---

## RSA Animate – Drive: The surprising truth about what motivates us: Dan Pink

### RSA Animate (10 mins)

<http://www.youtube.com/watch?v=u6XAPnuFjJc>

8

---

---

---

---

---

---

---

---

---

---

## Autonomy

Autonomy is the psychological need to experience self-direction and personal endorsement in the initiation and regulation of one's behaviour.

Based on Reeve (2009, p. 145)

Behaviour is autonomous (or self-determined) when our interests, preferences, and wants guide our decision-making process to engage or not to engage in a particular activity.

9

---

---

---

---

---

---

---

---

---

---

## Perceived autonomy

Figure 6.2 Three subjective qualities within the experience of autonomy (Reeve, 2009)

### Perceived autonomy

#### Internal perceived locus of causality

An individual's understanding of the causal source of his or her motivated actions

#### Volition (Feeling free)

An unpressured willingness to engage in an activity

#### Perceived choice over one's actions

Sense of choice in environments that provide decision-making flexibility that affords many opportunities to choose

10

---

---

---

---

---

---

---

---

## The conundrum of choice

Not all choices promote autonomy.

Based on  
Reeve (2009,  
p. 147)

### "either-or" choice offerings

*Choice among options offered by others fails to tap into and involve the need for autonomy*

### True choice over people's actions

*Meaningful choice that reflects people's values & interests*

Enhances a sense of need-satisfying autonomy

Enhances intrinsic motivation, effort, creativity, preference for challenge, and performance

11

---

---

---

---

---

---

---

## Promoting Motivation, Health, and Excellence: Ed Deci

### TEDx Talks (14 mins)

<http://www.youtube.com/watch?v=VGrcts0E6I>

12

---

---

---

---

---

---

---

---

## Supporting autonomy: Definitions

Based on  
Reeve (2009,  
Table 6.1)

### Autonomy support

Interpersonal sentiment and behaviour to identify, nurture, and develop another's inner motivational resources

### Control

Interpersonal sentiment and behaviour to pressure another toward compliance with a prescribed way of thinking, feeling, or behaving

13

---

---

---

---

---

---

---

---

## Supporting autonomy: Enabling condition

Based on  
Reeve (2009,  
Table 6.1)

### Autonomy support

- Takes the other person's perspective
- Values personal growth opportunities

### Control

- Pressures the other person toward a prescribed outcome
- Targets a prescribed outcome

14

---

---

---

---

---

---

---

---

## Supporting autonomy: Instructional behaviours

Based on  
Reeve (2009,  
Table 6.1)

### Autonomy support

- Nurtures inner motivational resources
- Relies on informational language
- Promoting valuing
- Acknowledges and accepts negative affect

### Control

- Relies on outer sources of motivation
- Relies on pressuring language
- Neglects explanatory rationales
- Asserts power to silence negative affect and to resolve conflict

15

---

---

---

---

---

---

---

---

## Four essential ways of supporting autonomy

Based on  
Reeve (2009,  
p. 149)

1. Nurture inner motivational resources
2. Rely on informational language
3. Promote explanatory rationales
4. Acknowledge & accept negative feedback

16

---

---

---

---

---

---

---

---

## Four essential ways of supporting autonomy

Based on  
Reeve (2009,  
p. 149)

### 1. Nurture inner motivational resources

#### Autonomy-supportive motivators

- Encourage initiative of others by identifying their interests, preferences, and competences.
- Find ways to allow others to behave in ways that express these interests, preferences, and competences.

#### Controlling motivators

- Forgo inner motivational resources.
- Rely on extrinsic motivators (e.g., incentives, directives, consequences, and deadlines).

17

---

---

---

---

---

---

---

---

## Four essential ways of supporting autonomy

Based on  
Reeve (2009  
pp. 150-151)

### 2. Rely on informational language

#### Autonomy-supportive motivators

- Treat listlessness, poor performance, & inappropriate behaviour as motivational problems to be solved
- Address the motivational problem with flexible & informational language
  - Diagnose the cause of the motivational problems
  - Provide feedback to identify points of improvement & progress

#### Controlling motivators

- Use a pressuring, rigid, and "no nonsense" communication style

18

---

---

---

---

---

---

---

---

## Four essential ways of supporting autonomy

Based on  
Reeve (2009  
p. 151)

### 3. Promote explanatory rationales

#### Autonomy-supportive motivators

- Communicate the value, worth, meaning, utility, or importance of engaging in uninteresting tasks
- Using a "because" phrase to explain why the uninteresting activity is worth the other's time and effort

#### Controlling motivators

- Do not take the time to explain the use of importance in engaging in these sorts of activities
- Saying "Just get it done" or "Do it because I told you to do it"

19

---

---

---

---

---

---

---

---

---

---

## Four essential ways of supporting autonomy

Based on  
Reeve (2009,  
pp. 151-152)

### 4. Acknowledge and accept negative feedback

#### Autonomy-supportive motivators

- Listen carefully to the expressions of negative affect and resistance and accept them as valid reactions
- Work collaboratively with the other person to solve the underlying cause of the negative affect and resistance

#### Controlling motivators

- Ignore the other's expressions of negative affect and resistance
- Try to change the negative affect into something more acceptable

20

---

---

---

---

---

---

---

---

---

---

## Moment-to-moment autonomy support

Based on  
Reeve (2009,  
Table 6.2,  
p. 152)

Table 6.2 What autonomy-supportive and controlling people say and do to motivate others

- Listen carefully
- Allow others time to talk
- Provide rationale
- Encourage effort
- Praise progress, mastery
- Ask others what they want to do
- Respond to questions
- Acknowledge the other's perspective

- Hold/hog learning materials
- Show correct answers
- Tell correct answers
- Speak directives, commands
- Should, must, have to statements
- Ask controlling questions
- Seem demanding

21

---

---

---

---

---

---

---

---

---

---

Involving competence

Flow

---

---

---

---

---

---

---

---

### Supporting competence

Based on Reeve (2009, pp. 159-161)

Positive Feedback

Four sources

- Task itself
- Comparisons of one's current performance with:
  - one's own past performance
  - the performance of others
- Evaluations of others

Pleasure of optimal challenge and positive feedback

- Harter's anagram study (1974, 1978b)
- Children experience the greatest pleasure following success in the context of moderate challenge

---

---

---

---

---

---

---

---

### Relatedness

A psychological need to establish close emotional bonds and attachments with other people. The desire to be emotionally connected to and interpersonally involved in warm relationships.

Based on Reeve (2009, p. 161)

---

---

---

---

---

---

---

---

## What makes for a good day?

Based on  
Reeve (2009  
pp. 167-168)

Psychological Nutriments necessary for  
Good Days, Positive Well-Being, and Vitality

34

---

---

---

---

---

---

---

---

## Social needs

Reading:  
Reeve (2009)  
Ch 7

---

---

---

---

---

---

---

---

## Quasi-needs

**Definition:** Ephemeral, situationally-induced wants that create tense energy to engage in behaviour capable of reducing the built-up tension.

### Examples:

- needing money at the store
- a Band-Aid after a cut
- an umbrella in the rain

Based on Reeve (2009, pp. 173)

36

---

---

---

---

---

---

---

---

## Social needs

**Definition:** An acquired psychological process that grows out of one's socialisation history that activates emotional responses to a particular **need-relevant incentive**.

### Examples:

- Achievement
- Affiliation
- Intimacy
- Power

Based on  
Reeve (2009,  
p. 173)

37

---

---

---

---

---

---

---

---

## Primary need-activating incentive

Incentive that activates each social need's emotional and behaviour potential

Social need	Incentive that activates each need
Achievement	Doing something well to show personal competence
Affiliation	Opportunity to please others and gain their approval
Intimacy	Warm, secure relationship
Power	Having impact on others

Based on  
Reeve (2009,  
Table 7.2, p. 175)

38

---

---

---

---

---

---

---

---

## Achievement

Based on  
Reeve (2009,  
pp. 175-176)

### Need for achievement

- Desire to do well relative to a standard of excellence

### Standard of excellence

- Any change to a person's sense of competence that ends with an objective outcome of success vs. failure, win vs. lose, or right vs. wrong.

### High- vs. low-need achiever

- Approach-oriented vs. avoidance-oriented emotions
- Differences in Choice, Latency, Effort, Persistence, and Willingness to take personal responsibility for successes and failures

39

---

---

---

---

---

---

---

---

## Conditions that involve & satisfy the need for achievement

Based on Reeve (2009, pp. 182-183)

43

---

---

---

---

---

---

---

---

## Achievement goals

Based on Reeve (2009, pp. 183-184)

44

---

---

---

---

---

---

---

---

## Benefits of adopting mastery goals

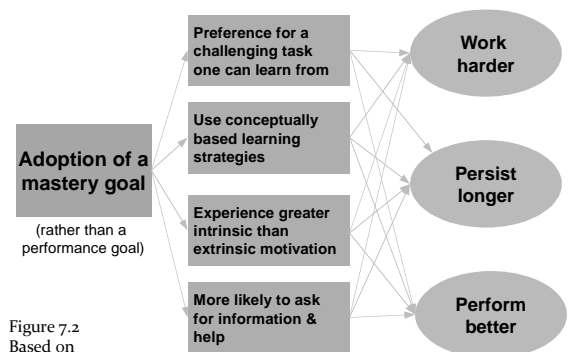

Figure 7.2  
Based on Reeve (2009, p. 185)

45

---

---

---

---

---

---

---

---

## Avoidance motivation & well-being

Based on Reeve (2009, pp. 187-189)

49

---

---

---

---

---

---

---

---

---

---

## Implicit theories

Based on  
Reeve (2009,  
pp. 189-191)

Implicit Theories	Incremental theorists	vs.	Entity theorists
	• <b>Changeable</b> Personal qualities		• <b>Fixed</b> Personal qualities
Adoption of Achievement Goals	<b>Mastery goals</b>		<b>Performance goals</b>
Meaning of Effort	Utility of effort: Challenging tasks require high effort.		High effort signals LOW ability.

50

---

---

---

---

---

---

---

---

---

---

## Affiliation and intimacy

Profile of high intimacy motivation

Category	Definition
THOUGHTS	Of friends, of relationships
STORY THEMES	Relationships produce positive affect, reciprocal dialogue, expressions of relationship commitment and union, and expressions of interpersonal harmony
INTERACTION STYLE	Self-disclosure, Intense listening habits, Many conversations
AUTOBIOGRAPHY	Themes of love and dialogue are mentioned as personally significant life experiences
PEER RATING	Individual rated as warm, loving, sincere, nondominant.
MEMORY	Enhanced recall with stories involving themes of interpersonal interactions

Based on Reeve (2009, Table 7.7, p. 192)

51

---

---

---

---

---

---

---

---

---

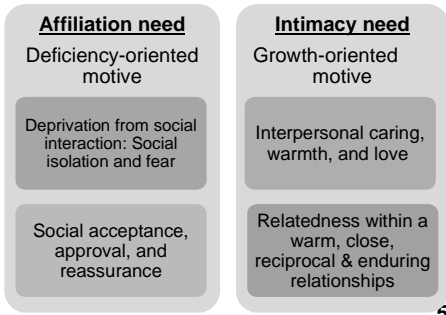

---

# Conditions that involve & satisfy the affiliation and intimacy needs

Based on  
Reeve (2009,  
pp. 193-195)

**Need-involving condition**

**Need-satisfying condition**

---

---

---

---

---

---

---

---

# Power

The need to impact on others

Based on  
Reeve (2009,  
pp. 196-198)

## Conditions that involve and satisfy the need for power

- Leadership
- Aggressiveness
- Influential occupations
- Prestige possessions

## Power and goal pursuit

- Power increases approach tendencies.
- People high in the need for power more easily acquire the goals they seek.

---

---

---

---

---

---

---

---

# Leadership motive pattern

A special variant of the need for power is the leadership motive pattern.

Based on Reeve (2009, pp. 198-199)

---

---

---

---

---

---

---

---

## Next lecture

- Intrinsic-extrinsic motivation and Goal-setting (Ch 5 & Ch 8)

55
