Outline

First Order Distribution Function

N Gaussian random variables

Definition

For one particular time t_1, the distribution function associated with the random variable $X_1 = X(t_1)$

$$F_X(x_1; t_1) = P\{X(t_1) \leq x_1\}$$

Second Order Distribution Function

N Gaussian random variables

Definition

For one particular time t_1, t_2, the distribution function associated with the random variables $X_1 = X(t_1)$ and $X_2 = X(t_2)$

$$F_X(x_1, x_2; t_1, t_2) = P\{X(t_1) \leq x_1, X(t_2) \leq x_2\}$$
